

2002

IS A HARDTAIL The Sugar climbs efficiently. On bumpy stuff, the 2.8" of rear wheel travel conforms to the trail. The wheels remain hooked up and under control as the rider sits and continues pedaling. And the Sugar goes downhill with comfort: it changed the term "full suspension XC bike" into the sweet truth.

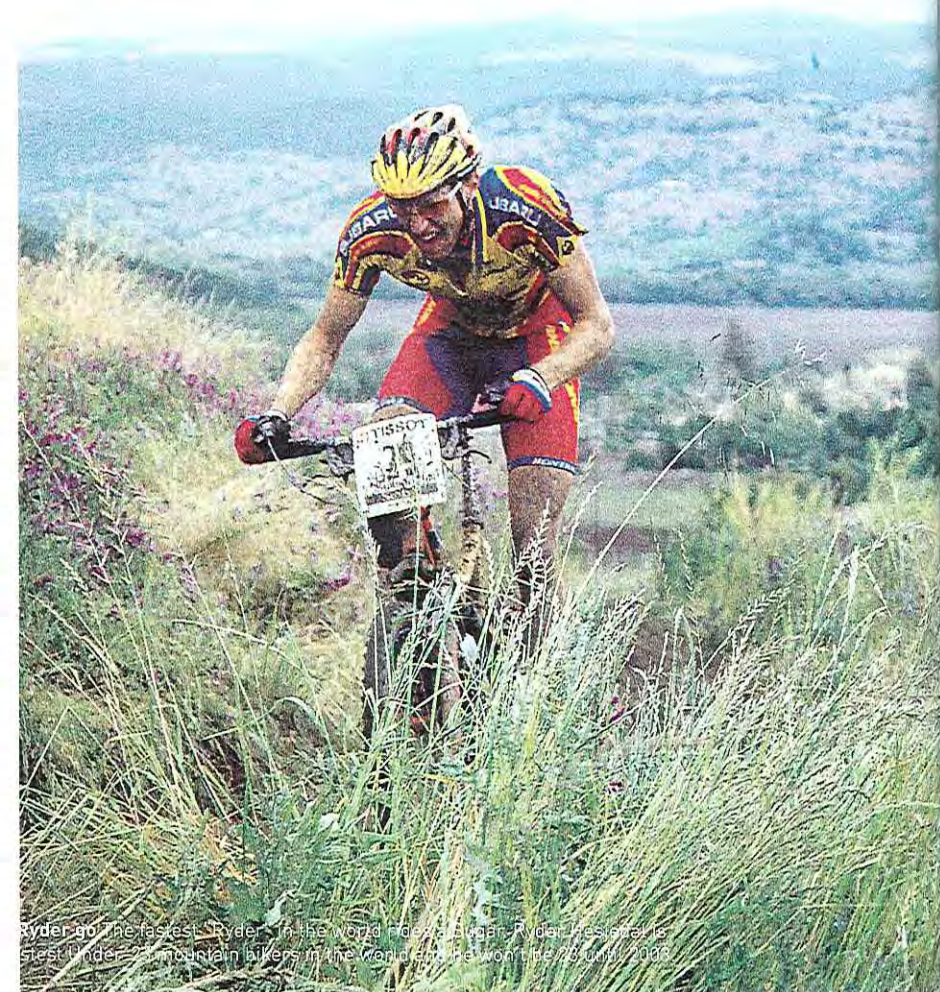

SUGAR1™

frame	Platinum Series 6061 T6 double butted aluminum Genesis Geometry b7 link swingarm w/ carbon fiber stays also available as a frame

Ryder got the fastest Ryder. In the World Ride, Sugar Ryder Regional is the fastest. Under 23 mountain bikers in the World Ride won the 23rd in 2006.

OUT OF THE BOX mySugar + is set up just like a standard Sugar: 2.8" of travel in the rear and 80mm of travel in the front. But with the flip of a lever in the Sybil linkage and another on the front fork, your XC Sugar racer is turned into a backwoods bomber with more than 4" of rear and 100mm of front travel — a bike with a whole new attitude. Been avoiding that backwoods beater trail with the drop-offs and baby heads? You just might like it.

Hey, sugar, look at me.

No... Look at me.

REUNION The 'Repack' was our annual race down Mt. Tam on our original coaster brake cruisers. The rear hub brakes heated up so much that we had to repack the hub grease after almost every run. Hence the name. Fast forward to 2002 and we are introducing the Repack: our new downhill specific frame.

1st 'Repack' frame

Repack > Downhill Frame

REPACK

frame Platinum Series Zirconium 9000
double butted aluminum |
Fisher Downhill

suspension Fox Vanilla RC2

sizes SM-MD | MD-LG

color Blue Gray Powdercoat

- > Geometry designed for current long-travel downhill forks.
- > Extremely stiff monocoque construction down tube
- > A patented Chain Torque Eliminator, or CTE, isolates the crank from the swingarm, preventing pedal bob and unwanted suspension feedback through the cranks.
- > The Crank Case - BB shell, swingarm pivot shell, and CTE mounts - is machined from a single piece of aluminum billet, for perfect alignment of the frame swingarm, and drivetrain.
- > Using a Fox downhill shock with 2.75" of stroke gives 8" of rear wheel travel.
- > The single pivot suspension design, with a hollow aluminum axle and sealed cartridge bearings, will not get loose or sloppy over time and requires no maintenance.
- > Elevated swingarm stays reduce chain slap for a quiet ride.
- > Both dropouts are replaceable, provide 0.5" of wheelbase adjustment

32 > I am never satisfied with the status quo.

- > Why did 26" become the world's standard mountain bike wheel diameter (even in metric places?)
- > when we started "klunking" — junk-picking bikes in the early 1970's and riding them down and around Mt. Tam in Marin County, California — everything we found came with 26" wheels.
- > when Charlie Kelly and I started building our own frames and calling them "mountain bikes," we knew 26" wheels and tires were in good supply. We worked with what was there.
- > the mountain bike world has been growing so fast it hasn't stopped to ask itself an important question: is a 26" wheel the ideal size?

Go big.

JUST RIDES BETTER A Genesis hardtail
 mart, it's simple, and it works. Genesis Geometry provides
 more stable ride by moving the rider's center of gravity lower
 and further behind the front wheel. It also concentrates the
 rider's weight over the rear wheel for better traction. Shorter
 arms enable better steering.

The effect: it climbs, descends, and
 handles better than other bikes. My
 Genesis Hardtails are available built
 with our Platinum, Gold, or Silver series
 tubing, each with a variety of parts for
 every riding style and budget.

Gary Fisher

Thursday, 5 April 2001, Riva di Garda, Italia.

45 miles later.

ITY This is my most versatile set of bikes. There are a
 people I see who want to ride and be totally comfortable,
 so want a bike that can cruise a local dirt trail now and
 They want it all in one simple, comfortable, and easy-to-
 ke. My City/Path series could be the perfect recipe for a
 these riders. Mountain bike durable, road bike fast with a
 focus on rider comfort. Upright handlebars, suspension
 posts, suspension forks, great saddles, fast 700c wheels.

GEOMETRY TABLES

GEOMETRY GLOSSARY

standover	SO	"	The vertical distance from the ground to the point on the top tube where you straddle the bike.
effective top tube	TT	"	The horizontal measure from the center of the headset to the center of the seatpost. The most important measurement when buying a bike, because it cannot be changed.
cockpit length	CP	"	The horizontal measure from the center of the handlebar to the center of the seatpost. This is where you spend your time. (The next two measurements show how it can be adjusted.)
minimum cockpit	minCP	"	The shortest the cockpit can be made by changing the stem to the shortest one available.
maximum cockpit	maxCP	"	The longest the cockpit can be made by changing the stem to one which is 30mm longer than original. The maximum recommended to retain optimum handling.
stem length	SL	mm	The original stem, measured from the center of the steerer tube to the center of the handlebar.
crank length	CL	mm	The distance from the center of the bottom bracket to the center of the pedal axle. A rider with long legs can benefit from longer cranks.
headtube length	HTL	mm	The distance between the upper and lower headset. Affects how high your handlebar is relative to your saddle.
head angle	HA	°	The angle of headtube to the ground. Tailored to optimize steering precision on each frame size.
seat tube angle	STA	°	The angle of seat tube to the ground. Tailored to optimize power transmission on each frame size.
effective chainstay length	CSL	mm	The distance from the center of the bottom bracket to the center on the rear axle.
bottom bracket height	BBH	mm	The vertical distance from the center of the bottom bracket to the ground. Expresses clearance of the frame over obstacles.
bottom bracket drop	BBD	mm	The vertical distance the bottom bracket is below an imaginary horizontal line drawn through the axles. The greater the bottom bracket drop, the lower the rider's center of gravity.
wheelbase	WB	mm	The distance between the axles. Tailored to optimize weight distribution on each frame size.
center to top	CT	"	The distance from the center of the bottom bracket to the top of the seat tube. Because some people still feel they need to know.
inseam range	I	"	If your inseam is within this range, this size of bike should fit you.

GARY FISHER LIMITED LIFETIME WARRANTY

Gary Fisher Bicycles provides each original retail purchaser of the bicycle a lifetime warranty against defects in materials and workmanship in the bicycle frame and rigid fork when purchased from an authorized Gary Fisher dealer. Gary Fisher Bicycles likewise warrants all original parts on the bicycle, excluding suspension forks and rear shock absorbers, for a period of one year from the date of purchase. Suspension forks and rear shock absorbers shall be covered by the stated warranty of their original manufacturers. Paint and decals are warranted for one year. This warranty is expressly limited to the repair or replacement of a defective frame, fork, or defective part and is the sole remedy of the warranty. This warranty applies only to the original owner and is not transferable. Claims under this warranty must be made through an authorized Gary Fisher dealer. Proof of purchase is required. A warranty registration card must be completed and received by Gary Fisher Bicycles before a warranty claim may be processed. This warranty covers bicycles and components outside the United States only if purchased through an authorized international Gary Fisher distributor or Gary Fisher dealer within the country of purchase.

The warranty does not cover normal wear and tear, improper assembly or follow-up maintenance, installation of parts or accessories not originally intended or compatible with the bicycle as sold, damage or failure due to accident, misuse or neglect, or modification of the frame, fork, or components. Gary Fisher Bicycles shall not be responsible for incidental or consequential damages. Some states do not allow the exclusion of incidental or consequential damages, so the above exclusion may not apply to you. This warranty gives the consumer specific legal rights, and these rights may vary from place to place. This warranty does not affect the statutory rights of the consumer.

All photos, illustrations, colors, weights, and specifications contained in this catalog are based on the latest production information at the time of publication. Gary Fisher reserves the right to make changes at any time, without notice, in colors, materials, equipment, specifications and models. Any variations in colors shown may be due to the reproductive variations of the printing process. Photos may include non U.S. equipment. Some models may be shown with optional equipment.

very special thanks:
michel, andrew, kevin, scott, jon, harry, brian, go performance crew and to all
the fine men along the path who entertained sweet young owa after hours.

gotta put love in here somewhere, and honey and brands of course, anyone else?
giavanni! can't forget giavanni!

can we go home now?
