HAND CRAFTED CYCLES MANUFACTURED IN STRATFORD-UPON-AVON ENGLAND

Serving industry since 1926

Pashley WORKBIKES

Since being founded in the 1920s, Pashley has become a world leading manufacturer of bicycles and tricycles for industrial and commercial use.

As customers have realised the economic benefit of using workbikes, so Pashley's reputation and products have spread … with sales to over 50 countries world wide.

The Pashley Courier and Pronto work bikes demonstrate how the knowledge and experience gained over the years has brought workbikes into the 21st Century. Specially designed and engineered with practicality, safety, ease of use and low maintenance in mind, they are the solution for modern day transport and delivery requirements.

The Pashley work trikes continue to carry the heavier, bulkier loads and fulfill a number of important duties in line with customer demand.

Some of our 'Heritage' models are still available, upgraded with modern braking systems to satisfy health and safety legislation. Take a look at the classic Delibike, Courier and the famous Classic 33 'Stop Me and Buy One' Ice Cream tricycle. These are functional yet make an excellent eye-catching point of sale display in their own right.

As a UK company with our own in-house design and manufacture facilities, we are able to offer a full custom 'one stop shop' service to our industrial and commercial clients. Our broad experience of industrial cycles and related vehicles gives us a unique advantage in the development of products for commercial use.

Our diverse product range often allows us to use many stock components to keep costs down and reduce time to market. We are also able to provide consultancy services with regard to the technical aspects of operating and maintaining our cycles in an industrial/commercial environment.

Pronto

The Pronto is a new generation workbike which has been designed by Pashley to meet the varying needs of industrial users, retail outlets and delivery services.

The healthy option for moving personnel around large sites; instantly available for use, with minimal running costs. Ideal for maintenance and delivery personnel, and for access to restricted areas such as motor-vehicle free zones and sensitive sites. The Pronto is the safe choice for your light delivery.

Pronto shown with optional Maxi size front and rear carriers and Eurobox carrier inserts.

LIGHT DELIVERY

FEATURES

The Pronto can be supplied in any of our standard house colours, or if you have a special corporate colour requirement we can supply a custom colour.

Specification can be individually tailored from a wide range of options, including:
Front and rear tubular steel carriers fitted to integrated frame mounts.
3 or 5 speed hub gears with low maintenance hub brakes.
Wheel lock with extension cable and heavy duty propstand.

The frame is a radical departure from our traditional workbike configuration and features a low step-through style for ease of mounting and dismounting. Two frame sizes and a long, quick release seat pillar, give the equivalent adjustment range of conventional 18" to 24" frame sizes (27" to 40" inside leg).

Mounting points for front and rear carriers are fitted as standard, making the pronto easily adaptable from a simple run-around or tow-bike, to a fully equipped heavy-duty load carrier.

The design is well balanced, even when fully loaded, thanks to the enhanced ergonomics. Progressive, all-weather stopping power is provided by SRAM hub brakes, operated by heavy-duty, automotive standard cables.

Multi-surface tyres incorporate high visibility reflective side stripes, and the transmission is protected by a shatterproof polycarbonate chainguard. Independent tests confirm that pronto meets or exceeds all relevant sections of BS 6102/1.

Pronto has been configured to reduce and simplify routine maintenance, using a proven component package. Mudguards are pre-coat aluminium for corrosion resistance, and feature triple point fitting. The heavy-duty headset incorporates a locking top head locknut to secure bearing adjustment. Hub brake cables have custom fittings to simplify adjustment, and wheels are built with 13 gauge spokes and 25mm section aluminium rims for durability.

Front and rear wheel removal has been simplified, and the integral chain tensioner reduces chain wear and eliminates rear wheel adjustment due to chain stretch.

The Pronto is our commercial version of the MailStar mail delivery cycle. Designed to exacting standards in 2001 the MailStar underwent a rigorous testing period before being chosen by the Royal Mail. By beating off the competition the MailStar and Pronto have shown themselves to be capable of withstanding the day to day rigours of industry and commerce.

MailStar

The MailStar is the latest design of mail delivery cycle and is the choice of the Royal Mail for service throughout the UK.

Designed to operate in the toughest of conditions this cutting edge machine is easy to maintain, dependable and capable of carrying loads of up to twenty four kilos.

The step through frame design allows a quick and easy dismount ideally suited to short journeys and the stop/start nature of mail delivery.

These features and Pashley's reputation for quality have made the MailStar a firm favourite with posties across the country.

POSTAL DELIVERY

FEATURES

With over five thousand MailStars in active service with the Royal Mail the bike has proven its reliability and design excellence, showing it to be the future of mail delivery.

5-speed internal hub gears.
Tubular front carrier.
Heavy duty propstand.
Rear carrier with integrated light.
Heavy-duty saddle.
Wheel lock with extension cable.
Heavy duty puncture resistant tyres.
Reflective Royal Mail frame logos.

Loadstar

The Loadstar continues to serve customers worldwide who highly regard its traditional construction and dependable load carrying capabilities.

With a load carrying capacity of 250 kilos (including rider) the Loadstar is more than capable of taking on the biggest challenges. Awkward loads are easily carried on its flat load platform which can be customised to your requirements.

The trike comes equipped with either single speed or three speed hub gears depending on your site specifics and is fitted with a powerful front hub brake with parking brake function and twin rear caliper brakes.

LOAD CARRYING

FEATURES

Since its debut in 1979 the Loadstar has travelled the world, with active service in Africa, the Middle East, India, South America and even oil rigs in the North Sea.

Heavy duty welded steel tricycle frame.
20" frame size.
Single or 3 speed gears.
Front hub brake with parking brake.
Large rear load area with 200kg capacity.
Optional traditional style leather saddle.
Heavy duty wheels with puncture resistant tyres.
Integrated chain guard and chain tensioner.

FreightMate

For heavy duty load carrying and delivery nothing beats our new FreightMate.

With electric power assist this innovative design can carry a payload of up to one hundred kilos in its ergonomically shaped front box at up to 12 miles per hour. Smooth Ackermann type steering gives balance and manoeuvrability at all speeds to assist in tight site layouts.

The FreightMate also comes equiped with lights, indicators and a horn to conform to your sites health and safety regulations. Full customisation to your specifications can easily be arranged and with our complete spares backup the FreightMate is sure to prove its worth.

FEATURES

The FreightMate is the ideal tool if your company has a strong environmental policy and is looking to reduce pollution and cost on large site deliveries.

5-speed internal hub gears.
Electric power assistance from rear hub.
Powerful hydraulic front disc brakes.
GRP lockable front carrying box.
20 miles between battery recharge.
Cast aluminium front wheels.
Front lights, directional indicators and horn.
Fully rechargable sealed batteries.

Patrol

The Patrol is our newest recruit specifically designed for the police and security markets.

Toughness and agility are the key words for this stealthy workhorse, equiped with puncture resistant tyres and wide ratio 27 speed gears the Patrol won't be stopped in its tracks.

Quality suspension forks and a rear rack are also provided along with a leather covered gel filled saddle to enhance rider comfort.

The bike can be tailored to your exact requirements with additional fittings for batteries, water bottles or carriers.

Patrol shown with rear carrier with integrated light, lock with external cable, propstand. Options include rear bag for carrier and front disc brake.

FEATURES

To help your force get to know the Patrol we are able to offer maintenance and cycle safety advice to your officers or guards.

Cro-Moly 15.5, 18 or 21 inch frame. Lightweight and durable, with modern styling.
Rockshox Judy suspension forks, for reduced rider fatigue.
Powerful 'V'-type brakes are standard.
Wide ratio 27 speed hybrid hub / derailleur gears.

Courier

The Courier is the latest in the range of Pashley work bikes, for industrial and commercial use. Built to withstand the toughest of conditions this trusty steed will not let you down.

Based on the proven Pashley Pronto model, the Courier features a centre frame crossbar and name plate.

Durable handbuilt construction and reliable hub gears and brakes reduce maintenance and provide the toughness your company demands.

Front carrier and nameplate are standard fittings , options shown are plastic carrier insert and rear carrier.

LIGHT DELIVERY

FEATURES

Part of the Pronto family the Courier is the choice when a traditional cross bar is more your style and you need the central nameplate to display your company's brand.

18 inch frame, suitable for inside leg measurements from 27 to 33 inches.
3 or 5 speed hub gear with trigger control.
26 inch rear wheel and 24 inch front wheel with puncture resistant tyres.
Fully enclosed, all weather brake hubs front and rear, with heavy duty cables.

Courier Classic

The Courier Classic is our traditional delivery cycle for light load carrying and site transport needs.

With its traditional construction and classic design the Courier Classic also provides the ideal stage for mobile advertising and marketing. Signwriting can be tailored to your requirements to further customise this practical machine.

Front carrier and nameplate are standard fittings , options shown are plastic carrier insert and traditional leather saddle.

FEATURES

The Courier Classic is the perfect compliment to traditional businesses and heritage sites where a more period machine will be appreciated by all.

- Hand brazed frame with reinforced carrier lugs.
- Three speed low maintenance SRAM hub gears.
- Fully enclosed all weather brake hubs.
- Optional plastic insert for front carrier.
- Heavy duty 26" wheels and tyres.
- Central frame mounted nameplate.
- Optional traditional leather saddle.
- Tubular frame mounted front carrier.

Delibike

The Delibike is a classic in its own right, bringing back fond memories of an age gone by with its traditional construction and timeless "butchers boy" style and grace.

Ideally suited to mobile advertising and display, the Delibike can be tailored to sport your company's colours and logo on its large name plate. Fully equipped with hub gears and brakes, the Delibike comes fitted with a heavy duty tubular steel front carrier with a load capacity of 25 kilos.

FEATURES

Our Delibike remains the only one of its type traditionally handbuilt in England by the finest craftsmen. It is a sign of quality that is a fine addition to any company's fleet.

- Hand brazed frame with reinforced carrier lugs.
- Three speed low maintenance SRAM hub gears.
- Fully enclosed all weather brake hubs.
- Wicker insert for front carrier.
- Heavy duty 26" rear / 20" front wheels and tyres.
- Large tubular front carrier.
- Optional traditional leather saddle.
- Options illustrated are wicker basket and leather saddle.

Classic 33

The Classic 33 is our traditionally styled vending tricycle for ice-cream, soft drinks, hot and cold food, confectionery, literature and many more applications.

With a front load capacity of up to 200 kilos this traditional tricycle design can be tailored to suit your vending requirements. Heavy duty construction and three speed hub gears add to the Classic 33's dependability and help create a machine that will provide many years of willing service.

VENDING

FEATURES

Heavy duty 22.5" lugged frame.
Heavy duty front wheels with annular bearings.
Rear hub brake with parking brake.
Load capacity of up to 200kg.
Platform size up to 710mm wide, 1060mm long.
Holder for display umbrella.
Rear frame mounted carrier.
Traditional leather saddle.

Remember that demand for our Classic 33 is always high during the summer months and to plan ahead when ordering your custom machine.

MPVC & special projects

The Multi Purpose Vending Cart is our universal product for street side and special event vending.

Whether selling hot or cold food, ice-cream or refreshing drinks the MPVC can be adapted to suit your requirements and specification. Finished in your company colours with additional umbrellas and signage, the MPVC is sure to attract a crowd eager to sample its wares.

We also offer a complete bespoke service to help you create any machine to your exact specifications. Let your imagination run wild and see the potential of an eye catching and interesting concept.

No project is too small and we are happy to assist in your planning.

BESPOKE DESIGN

FEATURES

Let your imagination run wild, the Starburst rocket above features electric power, an opening canopy, realistic rocket sound effects and a freezer box.

MPVC
