SUPERGO®

2 BIKE STAND

Our own design… Superior to wood and lower cost than aluminum models.
All welded steel tubing.
PVC coated arms can't damage bike.
Fully adjustable arms level all bike sizes and types. Minor assembly.
#5034-0650 $59.95

"It took us less than fifteen minutes to assemble our Bike Stacker. The hangers are easily adjustable and lock tight with thumb screws. The Bike Stacker saves space and can be used as a repair stand in a pinch. It is a sturdy way to store your bike."
– Mountain Bike Action Mag.

"The Supergo Bike Stacker is a bunk bed for bicycles that squeezes more bikes into less space."
– Mountain Bike Action Mag.

Sloping Frames

Level frames

Easily adjustable hangers with thumb screw setting.

New wider base and all 1˝x2˝ tubing is strong enough for heavy cruisers.

Birdy

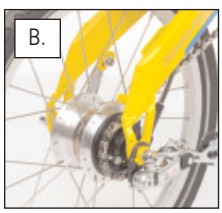

If you have been to a any major European train station recently, you've probably seen commuters unfold their Birdys and pedal off to work. It's the number one selling commuter bike in Japan, Germany, England, and Nederlands. As urban space decreases and bike theft increases, Birdy's portability makes it a logical solution to a range of transportation problems.

There are no "off the shelf" parts in the Birdy frame. Everything is CAD-CAM designed exclusively for Birdy and made of the lightest weight, heat-treated aluminum alloy. Mechanisms are made by CNC machining and the tubing is custom drawn and formed for maximum strength and light weight. The folding mechanisms are rugged yet very simple to operate. Folding or opening take no more than 15 seconds. And Birdy is so compact, it fits in a suitcase (optional below).

A. **Red** is the Sportier version with forward tilting handlebar/stem and Shimano 9 speed derailleur.
#7989-2000 $849

B. **Gold** is the comfort version with Shimano Nexus internal 7-speed transmision of the world's first the first small folding bike that handled like a full size road bike.
#7989-1000 $949

Shimano Nexus 7 speed transmission is very high tech and trouble-free.

Aluminum crankset

Rubberized pedal surfaces for grip

Complete fold.

SUITCASE

Optional custom carry case with wheels and collapsible handle.
#7933-1000 $99.95

NEMA

A. GROOVETECH JERSEY

Nema's most technical jersey ever! Long 12˝ front zipper, with 100% polyester microfiber that wicks sweat, and stealth side venting to keep you cool!

A1. Pewter/Blk M-XL #5649-418
A2. Pewter/Navy M-XL #5649-416 $***65***

B. SPACE CABBY JERSEY

Cool 2-tone cut & sew styling, in edgy colors and advanced technical fabrics that'll keep you comfortable on any ride or adventure. Front zip allows vent control, complimenting the loose, airy fit.

Navy/Pewter M-XL #5649-417 $***45***

C. SKYLAB JERSEY

Baggy fit, technical materials, and enough cool-factor to make this a sweet choice for a day on the mountain bike or the BMX track.

C1. Navy/Wht M-XL #5649-438,
C2. Pewter/Wht M-XL #5649-442 $***37***

D. SLACKER JERSEY

No pockets, no zips, 2-tone colors, in high-tech materials that'll keep you cool and dry.

Blk/Sky M-XL #5649-414 $***35***

Nema's Crown Jewel & Jewel - the absolute best "baggy" MTB short ever! 100% nylon shell with a Lycra inner lining short and mesh gaiter system at the legs.

E. CROWN JEWEL SHORT

The outer shell short features include a seamless gusseted crotch and a waistband system with a fixed back, and elasticized front waist with drawcord. The fitted liners are made from wicking Hydrofoil nylon/lycra for maximum moisture management and feature an ultrasuede chamois, non-slip elastic leg grippers, breathable nylon mesh gaiters built in to the short to prevent "parachuting", and ventilated nylon/lycra mesh panels and leg bands for added breathability. Distinctive shell features a dual side cargo pocket with Velcro closure and separate side-zip pocket.

E1. Blk/Pwtr S-XXL #5752-536,
E2. Pewter/Navy S-XXL #5752-537,
E3. Blk/Sky S-XXL #5752-535 $***80***

F. JEWEL SHORT

The outer shell features include a seamless gusseted crotch and a waistband system with a fixed back. Elasticized front with drawcord. The fitted liners are made from wicking nylon/lycra for maximum moisture management and feature a microsuede chamois, non-slip elastic leg bands and breathable nylon mesh gaiters built-in to the short to prevent "parachuting." Eight-panel shell features two on-seam mesh side pockets and one back pocket with Velcro closure.

F1. Black S-XXL #5752-570
F2. Pewter S-XXL #5752-535,
F3. Navy S-XXL #5752-572 $***55***

M.

A. SWEEP LONG SLEEVE
Loose fitting protective style long sleeve made of breathable polyester pique.
Red, Gry, Navy M-XL #5650-23 $***33***

B. RACE SHORT SLEEVE
Permafiber wicking fabric, and wild Fox graphics keep you stylin. Micro mesh side panels for added breathability, an extra long 20˝ hidden zipper, and 3 racing-style back pockets.
Gray, Navy M-XL #5649-99 $***65***

C. FLOW SHORT SLEEVE
Short sleeve cut-panel V-neck design, with a dropped tail & loose, relaxed fit. Wicking 100% micro-fiber interlock polyester, and rear zippered pocket.
Khaki, Red, Navy/Gray M-XL #5649-29 $***55***

D. TORQUE SHORT SLEEVE
Sublimated & cool – the polyester mock-neck jersey wicks moisture away from your skin, and the bold graphics offer distinctive styling.
Blk/Red M-XL #5649-28,
Navy M-XL #5649-29 $***50***

E. BASE SHORT SLEEVE
Polyester mini-mesh hydro-phobic fabric. Loose fitting with drop tail for good coverage in riding position. Back has a stash pocket with zipper closure for extra security.
Red, Gry, Navy M-XL #5649-29 $***35***

F. BASE SLEEVELESS
The same bike-specific fit and moisture lifting fabric as the Base Jersery but without the sleeves.
Navy, Gry M-XL #5649-38 $***30***

SUPERGO®

BEST SHORTS BARGAIN!

For starters, the body is DuPont antron nylon/lycra or Dryline just like the most expensive (overpriced?) brands. Second, the shape is formed of 6 or 8 anatomically correct panels (for a reasonably fit 25-30 year old.) Plus each panel is pre-stretched to lay down smooth without puckering and binding along the seams. The thread is extremely soft and silky, unlike the rough and scratchy thread our big mail order competitor uses. Our grippers are high grade rubber covered with a "clean-finish" bottom edge, instead of scraggly stitching.

All of our new 2002 8 panel models have upgraded chamois. Genuine Eschler materials from Switzerland, considered the world's finest and used in money's-no-object events like the Tour de France. Finally, the Supergo logos are a fused-on stretchy rubberized material that won't chip off or discolor. And if you'll help us advertise by wearing the large logo, we'll pay you in the form of a special lower price.

A. DRYLINE 8 PANEL

Miracle Dryline fabric is light weight, ultra-breathable and super hydraphobic. Our highest level Eschler chamois has different thicknesses, placing padding only where it's beneficial. Upgraded flat-stitching that moves on the body better than overlock. Typical retail is $80+.

Men's: S, M, L, XL, 2XL #5751-921
Women's: XS, S, M, L, XL #5751-924 ***$55***

B. 8 PANEL

More rugged 8.4 oz nylon/lycra is formed in 8 contoured panels for high powered long distance riding in total comfort. Higher grade, Eschler 3 piece chamois is "Y" shaped for a superb fit and is typically found in $60+ brands.

Large Logo:
Men's: S, M, L, XL, XXL #5751-921
Women's: XS, S, M, L, XL #5751-924 ***$40***
Small Logo:
Men's: S, M, L, XL, XXL #5751-922 ***$45***

CHAMOIS

8 Panel Nylon/Lycro | **8 Panel Dryline** | **6 Panel**

6 PANEL MEN'S

Lighter weight 6oz nylon/lycra in a comfortable fitting and economical 6 panel design. One piece contoured chamois offers unheard of moisture transfer and comfort for the price. Overlock stitching, 1˝ elastic waistband with drawstring.

ABSOLUTE BEST CHAMOIS!

PRT Pressure Relief Technology (PRT) uses multiple levels of padding, placed to optimize comfort, and to eliminate any possible friction points. Every aspect of the chamois, from the size, to padding design, toconstruction and materials - all have been engineered together, as an integrated system, for the ultimate in comfort and performance.

A. MICROSENSOR

The absolute best in Pearl Izumi's arsenal of cycling shorts, with a unique panel design of advanced Stretch Microsensor fabric for the ultimate in moisture-wicking performance, flat-locked seams and spandex leg grippers to ensure a perfect fit, and a PRT chamois – Pearl Izumi's most advanced, most comfortable chamois ever!

Men's S-XL #5751-639, Women's XS-L #5751-647 $***110***

B. ULTRASENSOR

Pearl Izumi's most popular cycling short! 8-panel stretch Ultrasensor moisture-transfer fabric is comfortable and lightweight, and with the addition of the PRT chamois, the Ultrasensor Short provides an excellent combination of comfort, performance, and value.

Men's S-XXL #5751-643, Women's XS–XL #5751-652 $***80***

C. WOMENS' SHORT CUT

This shorter inseam version of the Women's Ultrasensor Short features Pearl Izumi's PRT chamois for century-class comfort, along with Stretch Ultrasensor fabric and a modified 8-panel design with spandex leg grippers for a secure, exacting fit.

Women's XS-L #5751-663 $***80***

D. ATTACK

Feature-packed, Pearl Izumi's Attack Short features their Base Fabric, a comfortable & durable blend of nylon/spandex, in a modified 8-panel design without an inseam, eliminating pressure points and improving fit. Top quality PRT Chamois is the same as used on their top-level shorts!

Men's S-XL #5751-621, Women's XS-XL #5751-625 $***60***

E. QUEST

One of our top-rated values in cycling shorts! Durable, comfortable nylon/spandex blend fabric in a 6-panel design, with Pearl Izumi's legendary fit, and their Seamless Molded Technology (SMT) 1-piece chamois with CoolMax surface.

Men's S-XXL #5751-622, Women's XS-XL #5751-626 $***40***

Arm-saving armor! Guards your elbows and forearms from abrasions, with hard shell armor and full lycra trim for comfort.

Blk One Size Fits All #5861-1615 $***30***

CAMELBAK®
HYDRATE OR DIE®

A. FLASHFLO
The ideal waist-mounted hydration system for cyclists! Stable, lightweight design with breathable mesh waist-belt keeps the weight low and comfortable. Insulated 45oz reservoir holds as much water as two bottles, and zippered pockets can hold gear or energy bars.

Ozone Blue #4113-1048, Mango #4113-1047 $40

B. LOBO
An ideal pack for off-road adventure in unpredictable climates! Classic 70oz insulated reservoir, secure cargo pockets & mini-pump port, and 4-point bungee compression straps that can easily hold a jacket or vest.

Slate #4113-1027, Red #4113-1028 $60

C. RAZOR
Designed for speed! This roadie-specific hydration pack has a sleek profile that actually increases your aerodynamics & makes you faster - and it won't interfere with your jersey pockets! Low profile 72oz insulated reservoir.

Blue #4113-1032 $65

D. MULE
For longer adventures! Large amounts of cargo space to carry extra food, clothing, tools - as well as an insulated 100oz water reservoir! There are even internal pocket organizers keep your gear accessible & easy to find!

Black, Green, Mango #4113-106 $75

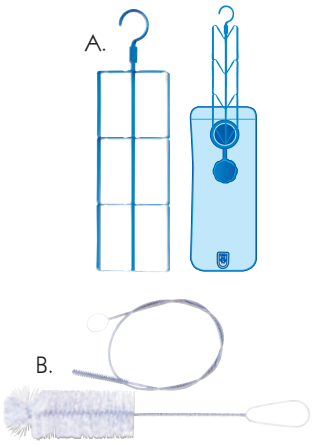

E. BLOWFISH
The Blowfish works for any length ride! Versatile expandable design quickly transforms from a minimalist hydration pack, to a high-volume adventure pack! Features an insulated 100oz reservoir, wishbone harness straps, and waist/sternum straps.

Slate #4113-1037, Blue #4113-1038 $85

F. H.A.W.G.
Action sports racers, here's your pack! Do anything, go anywhere - and take almost everything with you! Suspension harness and load-stabilizing waist harness keep the H.A.W.G totally stable, even when the insulated 100oz reservoir and 16.7L of cargo space are full of water & gear!

Black #4113-1012,
Red #4113-1013 $100

A. RESERVOIR DRYER
Holds your reservoir open to dry after washing or rinsing. Convenient hook allows you to hang it just about anywhere.

#4113-1085 $9.95

B. BRUSH KIT
Includes brushes for cleaning your Camelbak Reservoir. The long, narrow brush reaches inside the tube, and the large brush is ideal for scrubbing the inside of the reservoir.

#4113-0110 $10

C. OMEGA RESERVOIR
Camelback's newest innovation makes accessing and cleaning your reservoir easier than ever. Ergonomic handle allows for easy refilling. Includes bite valve.

#4113-1098 50 oz. $25
#4113-1099 70 oz. $28
#4113-1100 100 oz. $30

D. CATCAGE
Revolutionary side entry water bottle cage can be mounted facing right, left, or center. Works on all types of frames, particularly small and full-suspension, providing easy entry and exit. Only 50 grams.

Black #4114-1102 $9

E. SUPERGO • CAGE
6mm alloy. Quality paint or ano finish.

PC: Red, Yel, Blk
Ano: Sil, Blu, #4114-010 $6

Total Factory Buyout Below Dealers Cost.

A. BLACKBURN• PIPELINE
A full side zipper allows you fast, easy access to the new 70oz EasyClean Hydrasak reservoir, and your gear can be carried in the 2 zippered pockets, mesh pocket, and large external pouch.

ORDER BY TELEPHONE
Please complete the order form even if you're ordering by telephone. It helps you remember everything and it synchronizes you with us for the info you'll be asked. Please have your credit card in hand.

ABOUT SHIPPING
We use fast, reliable UPS Surface. Delivery is 1-7 business days depending upon your distance from Los Angeles. NEXT DAY and 2ND DAY are available as shown. Note that UPS delivers to street addresses only—NOT P.O. BOX.

DAMAGED CARTON
Everything leaves in new, rugged cartons. But if you receive a crushed or opened carton, you must PROTEST to the delivery person. The UPS delivery person will handle the paperwork and instruct you. UPS will handle any claim fairly and immediately. Customers are never "stuck."

DEFECTIVE GOODS
All merchandise is guaranteed new and free of visible defects. However, if your closer inspection or usage reveals a defect, please call us or e-mail Line 3 below at once to explain the situation. Do not return goods without contacting us first.

CUSTOMER ORDERING ERRORS
Due to the technical nature of our merchandise, customer ordering errors sometimes occur. The most common areas are front derailleur, stem, seat post, and headset measurements. If we ship as you specified but the problem is that you specified wrong, we'll replace the item provided you *1) pay return shipping fees, and; 2) pay a restocking fee of 10% of the item's price, or $3.00, whichever is higher.*
All returns must be in "new condition" and within 30 days of your receipt.
Since we are selling famous name brand items at discount prices, we cannot accept returns for frivolous or other reasons beyond our control such as, *"just changed my mind," "can't afford it," "my wife went ballistic when she saw how much I spent," etc.*

REFUNDS You'll get a prompt, cheerful refund whenever you:
• Overpay • Cancel an outstanding backorder which was prepaid • Prepay order by check, specifying, "no backorders" • Return merchandise for credit Remember, there is no way you can overpay with a credit card because we don't charge you until the time we ship the merchandise...it's the law.

SUPERGO PRICING POLICY
All prices are subject to change. Since prices, especially of imports, fluctuate you should verify the price you expect to pay with our telephone sales agent or by checking our web site. Our web prices are the current price and supercede those in our catalog and magazine ads. Most prices are the same in our catalog and bike shops. Some catalog prices are the minimum retail that a manufacturer permits for publication, telephone quoting, and mail order. Certain of these are priced lower in our shops.

PROBLEM/QUESTIONS AFTER ORDERING (orderstatus@supergo.com)
Try to have your invoice available. Most problems can be adjusted easily, while you are on the line. Emails are answered within 24 hrs.

BACKORDERS (orderstatus@supergo.com)
We will advise you of the stock status of each item while you're on the line. If you order online, or if an item goes out of stock before we process your order, you will receive an immediate backorder status report on it by mail or e-mail. Or, you can instruct, "NO BACKORDERS."

RECEIVING MULTIPLE COPIES OF CATALOG? (catalog@supergo.com)
Help us keep our prices low is by eliminating mailing waste. Please send us the address label on all of the catalogs coming to your residence, noting which one is correct. Use fax, e-mail or regulor mail. Lastest catalog included with every order.

GIFT CERTIFICATES
Any amount over $25.

INSTALLATION INSTRUCTIONS
There's another advantage to buying from one of "USA's TOP 100 BIKE SHOPS" and a real store, as opposed to a pure mailorder operation. We work with these components in our stores, learning many special installation and maintenance tricks that we pass along when we deliver.

HOW TO E-MAIL US

1. To order, if you know exactly what you want, price, etc. Be sure to state whether you are ordering from ad, catalog, web, other:
   orders@supergo.com
   (Note: Ordering from the web is best. Use encrypted, secure order form.)
2. To discuss an order after it was placed but before it is delivered (top priority):
   orderstatus@supergo.com
3. For customer service after order delivery or about backorders, billing/shipping errors (top priority):
   customerservice@supergo.com
4. If you need more information to place an order (next day):
   salesinfo@supergo.com
5. Suggestions on how we can improve our catalog, operations, etc (normally no reply):
   suggestions@supergo.com
6. To request a free catalog (no reply):
   catalog@supergo.com
   (Note: Customers will receive all new catalog editions for one year after ordering. All catalog requests get you one year of new editions. Allow 3-4 wks deliv.)
7. To receive our Weekly e-mail Newsletter & Hot Deal
   sign up online @ www.supergo.com

AIREON™

A. MAG-33 TRAINER

High quality, value-priced indoor training! Features a rugged, sturdy tubular steel frame, and a quiet & reliable 3-level magnetic resistance unit that spins on precision sealed bearings. Fits almost all bikes - 700c road or 26˝ MTB! Folds flat for easy storage. Backed by a 5-year limited warranty.

#8427–2000 $79.95

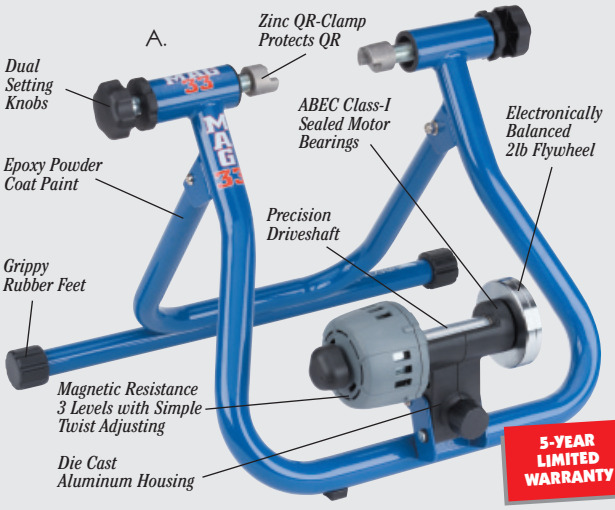

Best Value On Market! $79.95

Easy-to-use knob allows you to choose between three resistance settings for a customized workout.

Electronically-balanced flywheel and drive cylinder ensure smooth, consistent resistance without any vibration.

B. TACX • T1460 CYCLEFORCE SWING

The CycleForce Swing is designed to provide maximum resistance for hard, low-cadence workouts. A handlebar-mounted remote controls the high-power magnetic resistance, and the folding design makes it easy to store. Holland

#8427-0500 ***Reg.*** $190 ***Sale*** $139

C. MINOURA • HYPERMAG W/REMOTE

Featuring an oversized precision-machined roller and sealed bearing assembly - 23% larger than found on standard Minoura trainers. This increase in size increases durability, decreases heat build-up, and ensures more consistent resistance levels. Encased in an alloy outer shell, the resistance unit is nearly noiseless, and it's adjustable via a handlebar-mounted remote for easy mid-workout intensity changes.

#8427-0420 ***Reg.*** $150 ***Sale*** $139

D. MINOURA • MAGTURBO ERGO

Ergo-10 Mag has a stiffer frame with improved seven level magnetic eddy resistance unit for a wide range of resistance, and quiet operation.

#8427-0401 ***Reg.*** $100 ***Sale*** $89.95

E. MINOURA • RISER BLOCK

Accessory for holding the front wheel straight and at the same height as the trainer mounted rear provides a more level riding position.

#8427-0410 $9

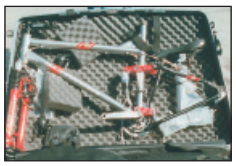

SUPERGO • BIKE HARDCASE

Easily, safely, and securely transport your bike in this rugged travel case! In just minutes, you can have your bike disassembled and safely nestled between thick layers of protective foam, surrounded by a sturdy armored casing, and locked shut, ready for travel across the country, or around the world. So sturdy it can withstand 200lb. impacts! Includes 2 padded, zippered wheelbags, and a padded pouch for your pedals. Internal nylon straps hold everything securely in place. There are even roller wheels and a side-mounted pull-handle make it easy to manage when you're not on the plane!

#5033-0300 $209

IMPROVED STRONGER BASE & WHEELS

Many airlines check it as luggage...Don't volunteer that it's a bike.

Road: Maximum 62cm
MTB: All Sizes hardtail & Suspension.
Rear derailleur removal req'd.

Panaracer

FIRE XC PRO DESIGN

Technological breakthrough. All around XC tires in two price versions. Factory-direct prices. Adaptable to front or rear use by changing direction of travel. Both models feature ultralight Aramid Kevlar folding bead. Differential height knobs offer improved cornering and climbing traction in all types of terrain. Hard compound center panel (black) rubber ensures durability. Soft colored side knobs red, blue, or yellow improve cornering grip.

FIRE XC PRO *(w/Anti-SnakeBite)*

Check out all the pro's and top racers using these. State-of-art quality 127TPI casing from Panaracer's Japan factory. Finer casing threads produce a smooth, more compliant ride. Anti-SnakeBike chafer strip protects against "pinch" punctures caused by tire/inner tube friction. Best quality high silica rubber compounds. At 580gm, one of world's lightest racing tires.

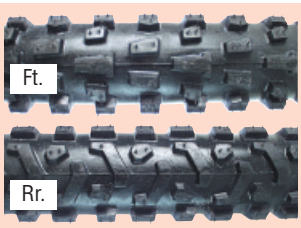

2.1˝ Red, Yel, Blue #1806-102
MSRP $49.95 Only $27 ea.

FIRE XC PRO *(w/o Anti-SnakeBite)*

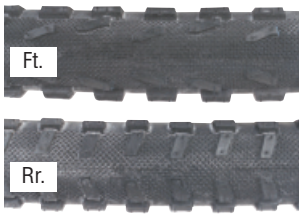

Most of Pro's traction and handling qualities. Coarser 60TPI casing, and thicker rubber on the side walls, without Anti-SnakeBite. 680gm.

2.1˝ Blk, Red, Blu
#1806-102 ***MSRP $35 Only $19.95 ea.***

MSRP $35 Only $25 ea.

KENDA

KONCEPT

Save $15-20 Just For Trying Something New

For years, Kenda has been making high quality, famous private label brand tires that US consumers buy for $30-40. Finally, Kenda realized that since it was doing so much of the work, it deserved some of the profit and recognition involved in aftermarket sales. This is why you see those big Kenda ads in all the bike magazines.

Under private label, Koncept retails for $35. Kenda's own MSRP is $25. But to encourage more US riders to try the brand, Kenda is giving Supergo a special promo.

Koncept is the top of the line Kevlar bead model. Rubber is Kenda's best high traction, fast rolling natural (instead of synthetic) rubber. All purpose design for racing, training, recreation. The colors have no affect on performance. The nylon casing is 60TPI. 110psi.

700x23c Blk, Yell, Red, Blu #1806-096 ***$15ea.***

A.

B.

C.

E.

F.

G.

A. CONTINENTAL • GRAND PRIX 3000 KEV

Innovative Silica rubber compound helps make this Continental's lightest, fastest, strongest road clincher ever. Tested to provide 30% better dry weather traction and 15% lower rolling resistance than their standard natural rubber compound. Utilizes a five-ply polyamide casing woven of super-fine threads. A protective sidewall layer protects against scuffs. Kevlar bead. 200gm

700x23 Black #1806-0601 ***MSRP $49.95*** ***Sale $35***

B. CONTINENTAL • ULTRA GATORSKIN

Ultra Gatorskin - it's as tough as it sounds! This tougher-than-nails tread offers the ultimate no-worries ride, with a trio of flat-resistant technologies that help to eliminate punctures and pinch flats. 246gm

700x23c Black #1806-0642 ***$32***

C. CONTINENTAL • ULTRA 2000

Slick tread provides exceptional grip, especially in sprints and other high-speed conditions. High thread-count casing, very low rolling resistance, and high puncture resistance. Kevlar.

700X23 220gm Blk, Yel, Blu, #1806-063 ***$30***

D. MICHELIN • AXIAL PRO

The first clincher to ever win the Paris-Roubaix! Dual-compound tread uses silica rubber compounds for decreased rolling resistance, and increased grip in wet weather and on corners. Not a "cap design" tread: the silica center section goes all the way to the casing! Co-extrusion process guarantees a constant tire profile for smooth transitions. 127 TPI armored casing, 230 grams

700x23c Blk/Blk, Grn/Blk #1806-13

MSRP $45 ***Sale $29.95***

E. VITTORIA • OPEN CORSA CX TWIN TREAD

Ideal for professional level racing! Highest quality 290 TPI casing! Slick center strip, textured tread edges. Twin Tread design minimizes rolling resistance by using a harder rubber compound along the center contact patch, and maximizes cornering traction by using a softer compound on the side contact patches. Proprietary Kevlar 3D reinforced rubber compound allows lower weight, increased puncture resistance, and longer tread life. Folding bead, 23c (230 gm.)

Yellow #1806-0279 ***MSRP $55*** ***Sale $35***

F. VITTORIA • RUBINO PRO

Race-quality clincher with Aramid-enhanced tread for longer life and lower rolling resistance, Intrepid PRB Puncture Resistant Belting for improved flat resistance, and a supple 242-ply 120-tpi casing with Kevlar beads. 230g.

700x23c #1806-0286 ***MSRP $41*** ***Sale $25***

G. TORELLI • TDF

Overstock buyout below dealer cost

The price would be double if only we could name the real make and model of this tire that was private labeled for Torelli, the US distributor. The farthest we're allowed to go are these clues: It's made in France by one of the two premier bike tire brands...the one that doesn't make cars tires. Many riders feel the French tires are in an elite class by themselves. Road racing design with folding Kevlar bead, 60tpi casing, skin sidewalls, and high adhesion rubber compound. Tires this light and narrow should only be used by top conditioned, lightweight, expert riders for racing and training. 700x20c 160gm.

SHIMANO

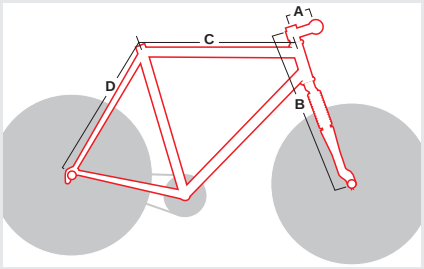

XT DISC

The new standard in cross-country disc brakes! Fully hydraulic system, with 4 pistons per caliper: two smaller leading edge pistons engage first to eliminate chatter and squealing, and then the larger trailing pistons kick in, serving up serious braking power! Differentiated piston design also improves modulation! International perpendicular mounting tabs (or parallel mount adaptor - call for availability of adaptors) required for installation. Braided steel housing (req'd, available separately) is bombproof, and won't pull out or leak! 6˝ stainless steel rotors included, compatible with all 6-bolt international standard hubs.

Includes 1 caliper, 1 lever, 1 rotor, bleed Kit, and mineral oil. Hoses and hubs not included.

B. SHIMANO • DEORE MECHANICAL

Shimano's newest disc option for those who want to avoid the downsides of rim-based brakes, and enjoy consistent performance in all conditions! Combined with the convenience of being able to use your existing levers & standard cables, and not ever having to deal with messy fluids or leaky seals, the Deore Mechanical Discs are a great upgrade for recreational riders looking for improved stopping power!

Front, Rear #2702-034$***44***

HAYES

C.

C. HAYES • HYDRAULIC DISC

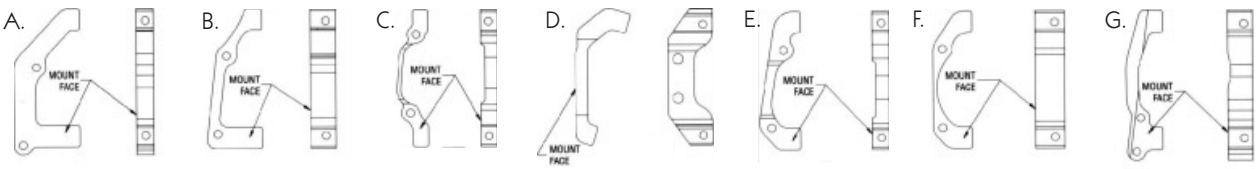

This fully hydraulic system features dual retracting pistons to completely eliminate rotor drag – no noise, no uneven pad wear, and best of all, no drag! Hayes patented "open sealed" system prevent thermal-expansion; combined with high-performance DOT-4 brake fluid, heat-induced lock-up is eliminated. Each kit includes the legendary Hayes Stainless Steel rotor – a patented R&D masterpiece that's light enough for XC, and burly enough for DH!

Brake Kits
Includes 1 Lever, 1 Rotor w/pads, 1 Caliper, Kevlar-braided hydraulic hose, and all req'd fittings. $***195***
Replacement Hayes Pads #2805-1310 $***22***

BETTER BRAKES MAKE YOU GO FASTER...HERE'S WHY!

It's simple, really - The more powerful your brakes are, the shorter your stopping distance is. By decreasing your stopping distance, you're also decreasing the amount of time you spend decelerating, and thereby increasing the time you're spending hammering at full speed – and the less time you spend slowing down, the faster you cross the finish line!

PLUSH™ BASE

3 Great Concepts In 1

AIREON by Velo

You know Velo, one of the world's most creative bike seat makers and the real factory behind no less than 10 very famous national brands. Aireon asked Velo for all of the most popular but proven valid concepts, the best quality materials, and no-middleman factory direct prices. The result is one of the best values in this catalog.

Terry Designs came up with the clever idea of placing a hole in the nose area to give the padding an "escape valve" under pressure. This reduces chafing against delicate tissues. Velo's own "Plush™" is a proprietary combination of firm nylon "framing" and suspension rubber-type material for comfort under the sit bones. The void center channel relieves pressure on arteries and nerves to prevent numbness.

The black leather-like material is a new vinyl called, "Soft-Touch." It not only feels and looks like leather but it also stretches and offers more weather/wear resistance. Dual density foam padding. Rails are hollow chromoly for lightweight. All models are sub 400gm.

A. AIREON RACE
Comfortable racing seat with Flite styling. Ti rail, only 310gm.
#3805-5030 ***$35***

B. AIREON TOUR
Thicker padding, deep groove. Cromoly Rails, 400gms
Women's Blk/Blu, Blk/Red, Blk/White, Blk/Sil #3805-501 ***$25***
Men's Blk/Sil, Blk/Blk #3805-500 ***$25***

CARBON PRO CRANKSETS

The latest 3D computer modeling and Finite Element Analysis is used along with state of the art forging and heat treating. Carbon cranksets are made by wrapping a center core of forged aluminum with a hardening foam body and outer carbon fiber wrapping. Spiders are CNC machined 7075/T6 aluminum. Chainrings are ramped and pinned according to CAD-CAM optimized shifting standard.

WEYLESS™

CARBON CRANKSETS

Weyless carbon cranksets are the performance and value leader. Compared to other brands the price difference is like getting our high quality chainrings free of charge.

THREE LAYER CONSTRUCTION:

The skeleton is a thin forged alloy center spine resembling a crankset arm. This is surrounded by a strength-enhancing but super light closed cell foam body that creates the final crankarm shape. These are wrapped in a carbon fiber fabric blanket that forms the final outer shell. Everything is cooked in a high temperature, high pressure "waffle maker" that assures proper alignment and material placement. Arms are painted high gloss clear.

Crank arms and forged aluminum "spider" weight only 390gm. Complete MTB crankset weighs only 582grams. Both MTB and road are offered in classic tapered square spindle and Shimano Octalink compatible splined. The new ISIS 10 groove spline sytstem is not available.

CAD-CAM 7075 CHAINRINGS

All chainrings are 7075-T6 aluminum with black anodization and precision ground silver teeth.

IMBA'S RULES OF THE TRAIL

1. **Ride on Open Trails Only:**
Respect "no bikes" signs.

2. CONTROL YOUR BIKE:
Particularly when you meet hikers, horses and other riders on the trail. Good balance and braking are essential MTN biking skills.

3. ALWAYS YIELD THE TRAIL:
Slow down, establish communication with the people you meet and pass safely. Yield doesn't always mean stopping and dismounting, though sometimes that's the best idea particularly when passing horses.

4. NEVER SCARE ANIMALS:
It doesn't matter if it's a horse, fox, cow, deer, elk or lion. Give them plenty of room and try not to startle them.

5. LEAVE NO TRACE:
All trail users affect the trailbed and the natural environment. Your goal should be to minimize your impact. Staying on the trail and not skidding are 2 easy steps. Staying off muddy trails is another.

6. PLAN AHEAD:
Carry everything you need for a good ride: spare tube, pump, rain jacket, tools. Know where you're riding. Wear a helmet.

HELP! MY FAVORITE TRAIL IS BEING CLOSED… WHAT SHOULD I DO?

1. Get the facts, don't rely on rumors. Who is making the decision, what section is proposed for closure? When does it happen?

2. Get involved with your local MTN bike people. Full list of IMBA affiliated clubs is available at: www.imba.com. Membership Hotline: 888-442-IMBA (4622).

3. Ask the decision makers if you can provide input. Ask for a delay.

4. Contact IMBA. 303-545-9011.

5. Help mobilize your group. Volunteer. Hold meetings.

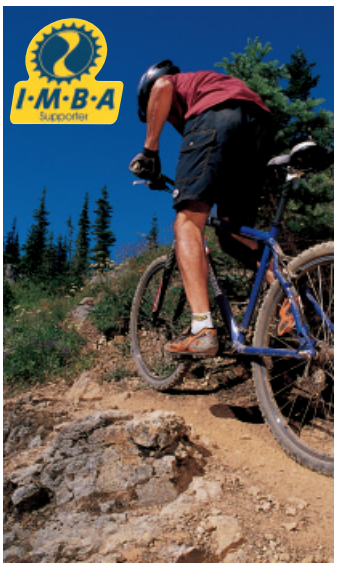

6. Enlist the support of businesses (like Supergo) with economic interest in keeping the trail open.

7. Be respectful and develop a responsible reputation. Ranting and raving freaks never influence the political process.

8. Lean from the process to anticipate future problems.

SUPERGO PROVIDES FINANCIAL SUPPORT TO:

- **IMBA • CORBA**
- **CALIFORNIA BICYCLE COALITION**
- **BIKES BELONG**

A. EASTON • MG60 VRS DH MAGNESIUM

Lightweight CNC'd Magnesium! Tough DOW-7 surface treatment for corrosion protection. Magnesium damping characteristics reduce vibrations and hand fatigue. Black

25°x50mm, 15°x75mm #1305-1610 $139

B. EASTON • MG60 VRS XC MAGNESIUM

This machined magnesium stem offers incredible impact and fatigue strength beyond all traditional standards, as well as vibration damping for decreased hand fatigue! 120mm (180gm)

0°x90, 100, 110, 120mm #1305-163 $139

C. EASTON • EA50 ALLOY

Custom cold-forged Easton design, with squared profile for added stiffness and strength. Shot peened finish increases fatigue life, and reversed bolt rear clamp design increases connection power. 225gm (110mm) 0º or 10º rise.

90mm to 120mm. #1305-16 $45

D. KALLOY • MTB

Hot new hooked faceplate design (similar to Kore Elite and Icon Durante!), with dual handlebar clamp bolts - compatible with all riser bars! Welded 6061-T6 alloy weighs a scant 186gm (100mm), yet is incredibly stiff, thanks to CAD/CAM shaped extrusion and wide handlebar clamp.

7°x90, 120mm #1305-11
17°x100, 120mm #1305-112 $15

E. KORE • LITE FORGED

CAD-CAM based 3-D forging process creates a strong stem with a minimum amount of material. 3-bolt faceplate securely locks the stem to the bars! Consumer Alert: This one's more precise, stronger, and lighter than many $100+ stems!

0° or 10°x120mm Sil, Blk #1305-14 $25

F. RACEFACE • SYSTEM

No welded seams! Unique three-piece design offers incredible fatigue and impact strength. 210gm.

Size	Silver	Black

5°x130mm	#1305-0922	#1305-0912

All Models $69

G. WEYLESS • DH

Stiff & solid race-quality DH stem - CNC machined 6061-T6 alloy. Anodized finish. Two lengths - 45mm (218gm) and 80mm (310gm).

45, 80mm x 10° Blk #1305-01 $25

H. TAHOMA SONNE4

The CNC and cut/weld look might be popular but for the best strength-weight-cost ratio, no other stem equals the quality of this Sonne4.. At 202gm (150mm) it's one of the lightest, and the beefy handlebar clamp makes it exceptionally stiff. Cold-forged 6061 alloy, your choice of anodized high polished silver or satin black. Original equipment on many top-brand $1000+ bikes!

JAMIS • DAKAR COMP *(Frame)*

This fully-active linkage design is a proven winner in any conditions, from Dual Slalom to XC, with 90mm of plush travel and a progressive spring rate for supple response to small bumps & total control on big hits. Thanks to genuine Specialized FSR Link, pivot location and linkage design are optimized to isolate braking and pedaling forces - no bob, and no brake-induced suspension lockout! Oversized 7005 butted aluminum main frame, with square chainstays and a triangulated downtube to add lateral rigidity for responsive sprinting ability and improved strength & stiffness. Cold forged aluminum chainstay yoke, disc-compatible rear dropouts, and shock add further performance and value! Just 6.10lbs w/Fox Vanilla Float Air rear shock (15˝).

This frame is the heart of Jamis' $1399 Dakar Comp complete bike - winner of Mountain Biking Magazine's "bike of the year" award in the $800-$1500 category!

15, 17, 19, 21˝ #7380-801 $349

FSR Link is a registered trademark of Specialized Bicycle Components.

"...one of our fave rides this year! There's no unwanted bobbing that takes away from climbing, and the four-link design worked rock-solid all the time. The Fox Vanilla shock was up to the job and provided smooth suspension performance that could not be beat."

-Mountain Biking Magazine

2001 CLEARANCE!

A. MARZOCCHI • X-FLY 100

Marzocchi's internal air-spring/oil-damping design offers complete adjustability, with an externally adjustable open bath oil damper and low-pressure/high-volume air chamber - as low as 15psi! It's as supple as a coil-sprung fork over small bumps, without sacricing the big-hit control of an air spring. 4.1˝ (100mm) travel. Stiff matte black anodized MAG PowerWrap M-Arch, along with stout 30mm Easton EA70 Aluminum stanchions bonded into the polished BAM Crown through Marzocchi's exclusive Cryofit liquid nitrogen heating/cooling method. 3.7lbs. Compatible with V-Brakes or disc brakes. Includes air valve adaptor. High pressure pump not included.

Black-100 #1408-0018
MSRP $600 Sale $279

B. ROCK SHOX • PSYLO XC

This coil-sprung, Hydracoil-damped fork is ideal for every ride, no matter how extreme - even dual slalom racing! The Psylo XC can easily be converted from 80mm (3˝) to 125mm (5˝) of travel, or anywhere in between!

Is it stiff? You bet! Massive 30mm alloy stanchions, an oversized 1-piece magnesium casting, and tubular forged alloy crown all combine to make this one seriously rigid single crown fork!

New XXX seals, an external rebound damping adjuster knob, and international disc mounts. Silver, Yellow 4.41lbs.

#1408-05 ***MSRP $300 Sale $189***

FORK STAR NUTS

Set of 3 different sizes of top quality star nuts to fit all steel or aluminum steerer tubes, except 1-1/4˝.
Not for use in carbon steerer tubes.

WEYLESS™

THE TRUTH ABOUT MANY CARBON FORK BRANDS.

The number of carbon fork brands is growing faster than dot.coms are shrinking. Ever wonder how it is that so many aluminum or steel tube manufacturers, bike manufacturers, and others could have gotten into the carbon fiber fork business so quickly? The answer is that most "brands" are just private label marketing of forks made by other, highly specialized fork companies.

PRICE BREAKTHRU!

Since every rider's first concern about a fork is safety, many brands that are famous for high quality items other than forks, have been able to charge substantial retail prices by slapping their strong trademark on another factory's product. Let's face it, a solid trademark offers most people more assurance of quality and value.

We can sell Weyless for approximately one half less because of lower overhead distribution to the consumer. Supergo buys factory-direct, works on a lower profit margin, and passes the savings to you.

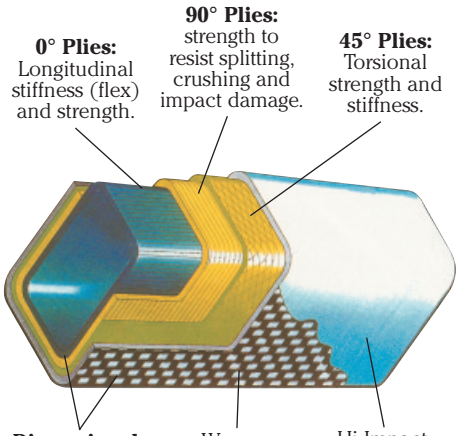

5 Popular Models with 43mm Offset (rake)

C. Intergrated 425gm #1405-0262 ***$149***

FABRIC DESIGN AND FUNCTIONS

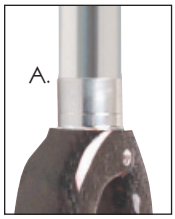

FORK DESIGN & MANUFACTURE

Forks are designed by CAD-CAM to meet very high requirements of lightweight, durability, rigidity, performance, and safety. These objectives control all aspects of carbon fiber lay-up, internal voids, and joint design.

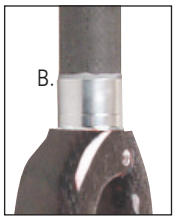

The carbon fiber technology used is hand lay-up of prepreg material made in Japan. Inner pressure during the hot molding process is created by an air filled bladder. High strength Aero grade resin is used.

100% of production gets QC testing for rigidity, alignment, weight, and paint. Strength, energy absorption, and fatigue testing is part of the quality assurance in every fork.

Ahead w/Alum Steerer

Ahead w/Carbon Steerer

A. EASTON • EC70

Our big factory overstock buyout saves you half! Ultralight carbon legs andfull carbon steerer, with strength enhansing cold-forged aluminum crown. Immaculate Easton finish. (1″ 395gm).

F.

A. SUPERFLATE Co2 INFLATOR

12 gram BB gun type Co2 cylinders. Push on for presta, screw on for schrader. Includes 1 12 gram non threaded Co2 cylinder.

#4720-1380 $12

B. ULTRAFLATE

Accepts non threaded BB gun type cylinders along with all sizes of larger threaded cylinders. Push on for presta and screw on for schrader valves, includes one 12 gram cylinder.

#4720-1301 $16

C. MICROFLATE

Push on for presta, screw on for Schrader valves. Tough nylon with all metal inner valve parts. Uses threaded Co2 cylinders.

#4720-1376 $8

D. AIR CHUCK

No threads on the valve port, just push on to the valve for either presta or schrader. The Air Chuck will automatically detect which type. All metal construction. Uses threaded Co2 cylinders.

#4720-1374 $8

E. POWERED INFLATION MTB

Same as above, except with Big Air! 25 gram cylinder.

#4720-1377 $19

F. AIR STATION WITH Co2 CARTRIDGE

Triple function!: hand pump, floor pump, instant Co2! Pull out hose, flip the foot lever down, and open the T-handle and you have a floor pump. For instant inflation using Co2, pull out the internal hose, unscrew the pump head and now you are holding a mini Co2 inflator which is completely controllable and accepts all size of threaded cylinder and our Big Air! Cylinder. Presta and schrader valves and comes with a convenient frame mount bracket. Includes 1 16 gram threaded cylinder.

#4720-1375 $24

AIREON®

A. FLOOR

All steel means rugged durability plus no leaks. An amazing feature is the exclusive, new Clever Valve. A single aperture attaches snugly to both presta and Schrader valves with out changing internal parts. Simply twist the locking lever and pump. The valve knows whether it's filling a presta or Schrader.

The top mounted gauge's easy to read dial has silver letters (160psi) on a black background. Extra long hose really comes in handy, too. The black dots in the steel foot pedal are rubber to prevent slippage. Anti-slip and comfortable Kraton rubber insert in handle. Bright yellow epoxy paint stands out amidst garage clutter.

#4720-0420 $29.95

B. SHOCK

This remarkable little 3rd generation pump has a lot of features for its size. Cast aluminum head and seamless aluminum tube are rugged, precision, and light weight (only 206gm/7.25oz.) The big, easy to read gauge mechanism is machined from solid brass. The plastic handle is molded for comfort and power. The hose swivels 360 degrees to fit the wide variety of hard-to-reach shock valves. Instant pressure release button. Includes nylon mount to fit bottle screws. Shock makers' brand pumps retail for $30-40 yet offer no better and sometimes lower performance.

100psi: Marzocchi #4720-0401
300psi: Rox, Manit, Fox, White #4720-0400 ***Only $19.95***

A.

Top mounted pressure gauge is extremely easy to read, and accurate up to 160psi.

Unique clever valve head attaches instantly to Schrader or Presta valves without the need to change internal parts.

B.

C.

D.

C. HI-LO DUAL PRESSURE MIDI

This is the trend in frame pumps. Works for both Hi volume fat tires and Hi Pressure road tires. Each mode is easily accessed by rotating the switch-handle to either the V or P notch. Durable 6063-T6 precision aluminum barrel. Same Clever Valve used in Aireon floor pump fits both presta and Schrader without any parts changing. Non-slip Kraton rubber rotating handle provides traction and comfort. Bottle cage mounting clip included. 199gm/7oz. 12.75˝ length

#4720-0440 $19.95

D. DUAL ACTION HI PRESSURE MINI W/GAUGE

Throw away your old road pump and go modern. Produces very high pressure by pumping in both directions. 6063-T6 Aluminum barrel and ergo plastic head and handle with Kraton grip. Brass gauge with plastic display covered by magnifying bezel. Clever Valve. 169gm/6oz, 7˝ length.

#4720-0430 $19.95

E. CRANK BROS • POWER PUMP ALLOY

Telescoping, adjustable air volume design, improved with the addition of an aluminum barrel and high-precision pressure gauge. Protective & mud-proof carrying bracket and emergency patch kit included. Pumps to 130 psi.

#4720-0901 $27

F. CRANK BROS • POWER PUMP

Dual head for Schrader or Presta. Only 89gr and 5.5˝ long. Twist knob on handle puts pump into a hi-output, low pressure mode for quick filling following by switching to the hi-power mode when resistance requires muscle power.

#4720-0900 $19

G. X-FUSION • MINI PUMP

A quality tire pump and shock pump in one! Extend the large volume shaft for quick tire inflation, or extend the internal small volume shaft to easily pump up any rear air shock! Quick Shift™ head fits both Schrader & Presta with a simple turn of a dial, and the 360° swiveling, flexible hose makes it easy to use.

#4720-0450 ***MSRP $30 Sale $19.95***

H. X-FUSION • PRESSURE GAUGE

Combine this with the X-Fusion mini pump (or any other high-pressure pump) to accurately read pressures up to 300psi. An essential tool for perfect rear shock inflation!

#4720-0452 $20

SHIMANO • FLITE DECK

Design seamlessly integrates with your Shimano shifters, with your choice of wireless or wired harnesses. Buttons mount into your road brake hoods, for easy operation without moving your hands. Advanced circuitry reads your gear selection and displays it on screen in an easy-to-read format, along with your current speed, and a third line to scroll through additional functions:

Clock, Stopwatch, Trip Distance, Odometer, Trip Time, Maximum Speed, Average Speed, Lap Counter, Pace Arrow (visually indicates whether you're above or below Average Speed)

Low Battery Warning, Virtual Cadence. The most unique feature! Based on your speed and gear selection, the Flite Deck calculates your pedal cadence!

At last, you can have the benefit of measuring how smooth and how fast your pedal stroke is, without a tangle of downtube-mounted wires and crankarm-mounted magnets!

TO MEGATUBES

scatolone, n.m. Large box.
scattare, v.i. To spring up, to dash, to start; to go off (of a gun); to fly into a rage, to get excited. — **in piedi**, to spring to one's feet.
scatto, n.m. Spring, leap; outburst; sudden movement, jerk, click; spring-lock (of a door); detent (of clock, etc.).
scaturigine [scatur'igine], n.f. Source, origin.
scaturimento, n.m. Gushing out.
scaturire, v.i. To spring, to gush out; to

SCATTANTE™

Scattante is the hottest new brand on the market. The reason isn't hard to figure out if you've been stunned by the high prices of most frames in Scattante's quality range. The heart of every road racing frame is materials.

These Scattante models are 100% Columbus of Italy, the undisputed top mark in cycling. Both frames include sealed bearing internal headset and 260gm cold-forged Weyless seat post.

While the heart of a frame is material, the "soul" is geometry. Scattante measurements are consistent with frames used in Tour de France. But there's more. Materials and measurements are meaningless without the high tech tooling and machine operations, skilled hands, and care that bring it all together.

How can Scattante offer frames priced at least half those of other brands using the same materials? By taking the Italian materials and know-how out of astronomical priced Italy, and making the frames where quality is equal but overhead is low. Scattante can't take all the credit for that…its factory already builds private label frames for some very famous Italian brands. That, combined with Supergo's direct-import, high volume, low overhead strategy completes the winning recipe for remarkable consumer value.

You can also see Scattante on-line. And our stores have demo bikes. But don't take our word alone. Read Scattante riders' here and in www.roadbikereview.com.

AIRPLANE-CARVE/CARVE

Columbus tubing of Milan got its start in the 1920's when graceful, artistic tubing was need for the new Art Deco and Bahaus furniture designs. It eventually transformed into the premier maker of bicycle tubing. The current wide range of frame tubing is topped by Starlight, a very limited production hard to process grade of alloy. The top "production grade" set is Airplane. Lightweight and precise handling are so important that Airplane is produced in Milan, Italy in separate sizes for large and small frames (see diagram).

Columbus is also a top name in Carbon fiber. The Columbus Carve coordinated fork and monostay offers great vibration damping and classic beauty with race-tough reliability.

TO MEGATUBES

Forged alloy dropouts, with replaceable derailleur hanger.

Flawless TIG welds, beautiful semi-transparent paint, and custom-shaped Columbus tubing - all the details found on frames costing thousands more!

Oversized teardrop profiled downtube provides phenomenal lateral rigidity and optimized aerodynamics, at the lightest possible weight.

Externally butted head tube with an integrated invisible headset that adds steering rigidity and decreases overall weight.

ZONAL/CARBON

The undisputed value leader.

Most riders want to know the difference among various tube models. Columbus's ranking is: Airplane, Altec2+, and Zonal. There is only one Zonal tube set used for all frame sizes. The teardrop shaped "Megatube" is very similar to Airplane. The 7000 series alloy composition is slightly different and wall thickness is a bit stouter. However, Zonal frame weights are within 3-4oz of Airplane. A 56cm weighs only 3.3Lbs.

The price is also helped by using the more economical Weyless carbon fork and monostay. Try to find a full Zonal frame—even with cheaper aluminum seat stay—for less than $900! Geometry is identical to Airplane.
Pearlescent Blue, White.

"Access is a good pick for any mountain bike buyer who whats the custom bike experience but can't come up with the bucks."

– Mountain Bike Action Magazine

"I wish I had known about this frame years ago. I have ridden frames worth thousands of dollars over the past 12 years...this one is every bit as good if not better. For the money you save on the frame, you can buy some mighty fine light parts and build a very sweet fast and light X-Country ride."

– Gerard, AU

Forged dropouts with replaceable derailleur hanger.

"S" bend stiffens seat stays and positions brake bosses in more central location.

Beefy welds and brazed cable guides for lasting strength… lightweight post and clamp included

Big 51mm diameter downtube with cad-cam designed gusset

ACCESS

FACTORY DIRECT SAVINGS

The simple answer to "why is this so economical?" lies in our factory-direct buying power. Other bike dealers buy from import-distributors that mark-up frames up to 50% above factory cost. We are able to buy the same quality frames used in bikes bearing the most famous bicycle brand names.

ACCESS ALU FRAME

Typical frame of $1,000 bikes.

Alu has become lighter weight and lower priced every year since Mountain Bike Action Magazine described it as "a classic NORBA race-ready design." The big 51mm diameter butted, multi-shaped downtube is flawlessly TIG welded to custom selected round tubes in classic 71/73° geometry. Everything is adjusted for 80-100mm fork travel.

Hundreds of riders (mtbr.com and supergo.com) have raved about its balanced, predictable, and agile ride and amazing money value.

Alu looks as good as it rides. Seven new colors allow creative matching to the wide variety of forks, colored tires, and other goodies on the market. These expensive colors are glass smooth and covered with UV protected clear coat. Even includes a bottle of touch-up.

Frames include a high quality, lightweight (260gm) forged aluminum seat post ($25 value) and post clamp ($10 value) in black anodize. Replaceable derailleur hanger.

Forged dropouts with universal disc mount and replaceable derailleur hanger

Swingarm pivot aligned with center of seat tube and teeth of middle chaining for zero pedal induced biopace effect. Custom CNC fittings pivot on sealed needle bearings. Asymmetrical chain stays prevents contact between front derailleur and stay

Our unique ThruAccess cable routing avoids the usual tangle of cables, managing them cleanly through the downtube for frictionless, trouble-free shifting and braking performance!

Externally machined head tube…double gussets

ACCESS • FS-01

A true lightweight cross-country machine – the ideal upgrade for hardtail riders looking to upgrade to full suspension, or suspension riders looking for a lighter, faster frame! At our factory-direct prices, there is no easier way to enjoy the performance advantages of full suspension!

At just 6.0 lbs. w/rear shock, the Access FS-01 is a true lightweight contender on long climbs, and with its rigid design & stiff machined alloy rocker, it instantly converts your energy into race-winning sprints, speedy ascents, or blazing downhill speeds!

Low maintenance Delrin bushings and cartridge bearing pivots combine performance, durability, serviceability & lightweight, and the gusseted head tube and reinforced seat mast add strength and reliability – you can have all the benefits of a full suspension ride, without the worry of durability or service issues!

REAR SHOCK

RockShox Sid XC rear shock with hard anodized 6061-T6 alloy body and an advanced floating piston design that offers adjustable positive and negative air springs, so you can really dial in the ride to match your riding style, terrain, and front fork selection!

Includes seat post and clamp.
Fork/headset not included. ***$399***

Fork, Headset, Stem, Seat Post Not Included

Custom CNC dropouts with disc mount. Bolt-on solid CNC brace resists disc force on this light weight frame.

Asymmetrical chain stays designed to prevent Fr derailleur/stay interference.

"S" bend stiffens seat stays and positions brake bosses in more central location. Custom made Ulta light-stiff mono-stay is a work of art.

44mm Easton Ultra Lite down-tube has "cavity" style gusset. Externally machined head tube strengthens headset mount.

WEYLESS™

Weyless (weighs less... get it?) is a new brand name from one of the truly great frame factories. The Weyless trademark stands for the very lightest weight and highest quality in every component and frame.

MATERIALS & CONSTRUCTION

Both frames are butted and shaped 7005 aluminum. The suspension model is proprietary 7005. The hardtail is genuine Easton Ultra Lite. All frame parts—rocker, shock mounts, pivots, dropouts, monostay block– are custom designed and CNC machined for maximum strength with light weight. To save an extra 81 grams (paint) Weyless frames are anodized. This also strengthens the aluminum.

ULTRA

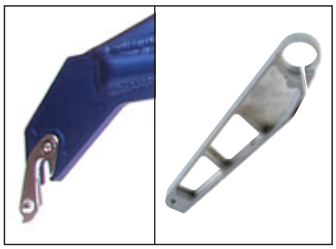

Named after its top-of-the-line Easton USA tubing, Ultra is a sub 3 lb. screamer. Asymmetrical chain stays provide derailleur clearance. The disc brake mounts include two clever features. Tubular sleeves are welded into the rear six inches of both left stays to double the wall thickness. An exclusive bolt-on reinforcement bar to manage the extra power of a disc brake is included with each frame. The CNC,s custom monostay brace adds stiffness without weight penalty. CAD-CAM downtube gusset provides front-end rigidity. S,M,L,XL.

C. I-DRIVE TEAM

Components

Full XTR componentry. Mavic CrossMax-UST tubeless wheels. Supplied with WTB or Michelin tube-type due to shortage of tubeless tires at production time.

Includes special valve stem for tubeless. Carbon bar & post. World's lightest fork—Rockshox adj 80mm travel SID Race weighs only 2.5lbs.

Frameset

This 3.2˝ travel custom butted Easton 6061-T6 alloy frame delivers incredible stiffness, sprinting power, and climbing ability, in a chassis that weighs just 5.5lbs! Made in USA with GT's "Race Edition" geometry: longer top tubes, shorter chainstays, and 3˝ of rear travel!

2ND GENERATION I-DRIVE

4Bar linkage design isolates suspension from pedaling forces by suspending the crankset independently from the univied rear triangle. Ride-Tune system with adjustable travel makes rear suspension adjustment simple. Align two arrows on the BB shell to increase or decrease shock pressure according to rider weight.

D. I-DRIVE 2.0

Custom butted and machined monocoque frame. Rockshox SID-XC with rebound adjustment rear/Psylo SL 100mm fork w/alloy steer. Shimano LX/XT/XTR Drivetrain deliver faultless shifting performance, while the lightweight Avid Magnesium brakes keep your speed under control – and the disc-compatible GT hubset makes upgrading to disc brakes an easy option in the future. WTB motoraptor tires w/DNA casing, WTB rims, Syncros stem, bars & seatpost, and Time Atac Pedals complete the package, ensuring total reliability for confidence on any epic ride. Black/Teal

GT Bankruptcy

"Makes drops seem effortless...Bike feels so plush on the rough stuff and feels great to jump, just point the front wheel and hold on! ...I can't say enough good things about the bike, so just go out and try one for yourself!"
– Mike, MA

"amazing plush feel, no bob at all - idrive eliminates feedback from pedal strokes that normal DH bikes get. it's a dream to ride uphill and then huck huge going down...tough as hell and it'll take everything you give it."
– G.N., OR from mtbr.com

$2799
MSRP $3800

Thru-Axle Hadley Racing Rear Hub, XTR derailleur, Hayes Hydraulic Disc Brake.

Custom Long-Stroke Fox Vanilla RC Rear Shock.

XTR DH Cranks with MRP Chain guide, Shimano DX Pedals.

Dual 8" Hayes Hydraulic disc brakes - the DH reference for unfailing stopping power.

GT®

DHI RACE

There is simply nothing that's beyond the capabilities of the DHi Race! With 9˝ of rear wheel travel, 7˝ of front wheel travel, and a suspension design proven again and again at World Cup and Norba Races, the DHi is the ultimate factory-equipped downhill machine!

Ready-to-race out of the box, the DHi comes complete with a massive Marzocchi Monster-T fork, dual Hayes hydraulic disc brakes with 8˝ rotors, Thru-axle GT front and Hadley Racing rear hubs, Mavic D321 rims, MRP Chainguide, XTR drivetrain, and other bomber gear from Azonic, WTB, SDG, and Nokian!

Thanks to the advanced i-Drive suspension design, the DHi enjoys incredible sprinting ability and stunning high-speed handling characteristics, inspiring confidence on even the steepest, gnarliest descents. The eccentric bottom bracket pivot, unique to GT's i-Drive platform, eliminates pedal feedback without compromising performance, whether you're rolling through a set of doubles or sprinting across a sea of boulders.

AK, HI, PR		$50

Forged dropouts are stiff and lightweight, aiding sprinting performance and climbing prowess. Derailleur hanger included.

Easton Ultralite Tubeset with butted, bi-axially ovalized downtube for stiffness and strength at the lightest possible weight.

GT's exclusive Triple Triangle design adds distinctive style and lateral stiffness without affecting vertical compliance.

Bi-Axially ovalized downtube and shaped top tube maximize front end stiffness and steering precision.

B. **ZR 1.0** *(Road Frame)*

ZR 1.0 is GT's top of the line road frame... identical to the Lotto Team frame that won the 2000 Tour of Flanders. Only the classic GT blue & yellow color and decal are different.

Made of custom designed butted Easton 6061 tubing. BB shell, brake bridge, and head tube are CNC machined for ultimate light weight and strength. Triple-triangle technology. Dropouts are made with 3-D forging. Curved chainstays optimize pedaling clearance and frame efficiency.

Headset, fork, seat post pictured are not included.

SCHWINN Bankruptcy

Spare no expense approach that helped drive Schwinn into Bankruptcy. Homegrowns are the lightest production frames on the market. Ride-Tuned super-butted aluminum frames of exotic custom tubing. Ram air seat stay yoke, asymmetrical chain stay yoke, custom dropouts all create extra strength to support the light-weight tubing. Schwinn's revolutionary ICBM head tube design integrates headset cups directly into the headtube. This spaces top and downtubes farther apart, which reduces stress. Weight is lowered by eliminating traditional bearing cups. Anodizing eliminates 80grams of paint.

A. **FACTORY** *(21" Only)*
2.9Lb frame/Manitou Mars Super fork with Anti-Bob Lockout and TPC adj damping. XTR/XT drivetrain. Avid brake. Edco Swiss hubs. Mich. Wildgripper Kev tires, Fizik Ti seat, Titec alum bar/stem. Pedal not incld. Matte black anodized.

SUPERGO BIKE SHOPS
SCHWINN MTB

One of the truly brilliant XC Suspension platforms! Raved about by riders, racers, and magazines alike, the Rocket-88 blends sprinting performance with the plush feel of a 4-bar linkage design, now improved for `01 with optimized pivot placement, each now featuring sealed cartridge bearings for smooth, frictionless performance!

Built with Schwinn's proprietary N'Litened Gold-Label aluminum tubing, radically butted & shaped to combine lightweight and responsiveness with the strength needed to handle the speeds that the Hi/Lo 88mm-travel suspension will allow you to reach!

Rocket Disc, 2 and 3 have:
- **Michelin XL-S tires with folding Kevlar bead**
- **Satinless steel 15g spokes**
- **Shimano SPD 515 pedals**
- **SRAM 7.0 11-34 9-Spd cassette**
- **Fox Float-R rear air shock**
- **Manitou suspension fork**

A. **DISC** *(19˝ Only)*
Rear damping control matched to an 80mm travel Mars Elite fork with externally adjustable TPC damping, making it easy to fine tune the suspension to your riding style and terrain. The Shimano Drivetrain is highlighted by XT & LX derailleurs, Hayes hydraulic disc brakes for phenomenal stopping ability, and Mavic X223 disc-specific rims laced to Swiss-made EDCO cartridge-bearing disc hubs.
19˝ #6680-0510 ***MSRP $2000 Sale $1299***

B. **STAGE 2**
Rear damping control matched to an 80mm travel Mars fork with externally adjustable TPC damping, making it easy to fine tune the suspension to your riding style and terrain. Shimano Drivetrain by XTR & LX derailleurs, Avid SD-5.0 V- brakes* keep all the control you need at your fingertips, and the Tioga CNC'd double wall rims offer fantastic strength.
17, 19˝ #6680-0514 ***MSRP $1700 Sale $999***

C. **STAGE 3**
80mm travel Manitou SX-R suspension fork with externally adjustable TPC damping. XT & LX derailleurs, Avid SD-3.0 V-brakes*. Tioga CNC'd double wall rims.
19, 21˝ #6680-0518 ***MSRP $1400 Sale $797***

D. **STAGE 4**
Fox Vanilla/coil-Manitou Magnum LX/Deore derailleurs/shifters. Standard pedals, Michelin with steel bead. Kore 10° stem

* "V" Brake is a registered Trade Mark of Shimano American Corp.

"...this new rocket is lighter, stiffer, stonger, and more reliable... Rear suspension is more active while climbing both inand out of the saddle... It's 3.5˝ of rear travel is plushed and feels more like four when riding at speed.. A good all around suspension bike that's light..."
– Bicycling Magazine's Report on Stage 1 (same frame)

"One of 10 best suspension designs of all time"
– Mountain Bike Magazine

"High-Tech Rocket! Careful Hi/Lo pivot location (two above chainline and two below) makes Schwinn's suspension neutral but ready to soak up bumps. Sealed cartridge bearing pivots eliminate inevitable slop of worn out cheaper bushings."
– Bicycling, Apr/01

- **PRECISION CHIPS**

A. 9-FUNCTION

Easy-to-read oversized dual-line display. Constantly displays current speed and a visual comparison to your average speed, along with a secondary display line for maximum speed, average speed, trip distance, odometer, and clock. Also features auto start/stop and on/off, Low power indicator, and a tough heavy-gauge wire.

#5021-2080 $14.95

B. WL-17 *(Wireless Backlit)*

New, advanced wireless design, with backlit display, improved mounting system, and improved button feel! Features speedometer, trip distance, automatic trip timer, maximum speed, average speed, 12/24-Hr clock, dual trip timer, dual average speed, dual maximum speed, dual odometer with save function, dual wheel size option, automatic start/stop, automatic power on/off, MPH/KPH option, and low power indicator.

#5021-0295 $24.95

C. HRM-1000

From the world's top manufacturer of cycle computers - the same company that makes most of the major brand names! A top quality, 19-function Cycle Computer and Heart Rate Monitor, for less than most of the "name brand" basic non-HRM models that came from the same factory!

Heart Rate Monitor Functions

Feature-loaded WIRELESS heart rate monitor, with constant heart rate display, programmable upper and lower limits with visual out-of-zone alarms, and training zone memory. Wireless, adjustable chest strap included.

Cyclocomputer Functions

Every necessary cycling function: speed, average & maximum speed, clock, stopwatch, odometer, trip distance, and a freeze-frame function to save info for review later. Heavy-duty cable runs from cradle to fork-mounted sensor.

#5021-0300 $34.95 *(Available November 10th)*

Oct. 24-31 Wed. thru Wed.
Nov. 14-21 Wed. thru Wed.
