Preface

At OMNIUM, we are driven by a simple yet sincere desire: to create bicycles that not only move you and your gear from place to place, but also bring people together, and enable adventures big and small. Our journey, like cycling itself, has been one of constant discovery and shared experiences.

Take the story of Allan Shaw. Riding an OMNIUM Cargo, he took on the 2023 Silk Road Mountain Race, an epic 1,880km race across Kyrgyzstan's Tian Shan Mountains.

Arriving at the start of the race in Karakol, Allan's small act of helping four fellow riders carry their enormous bike boxes across town on his OMNIUM sparked instant camaraderie—a true reflection of the community spirit that cycling inspires.

Over the past year, we've celebrated milestones and weathered the industry's storms. We expanded into a new warehouse, revamped our Copenhagen store, welcomed many new dealers world-wide, and survived our first Eurobike experience. We've also fostered friendships within our community through the first of our 'cargopacking' trips.

This year, expect us at Eurobike once again, the Sea Otter Classic in California, as well as exciting collaborations, innovative new products, further community trips, and more events in our store and wherever else we can reach.

As our story evolves, we remain driven by the belief that our bikes have a transformative power—empowering creativity, defying convention, and enabling people to do some pretty amazing things. Every week we see new experiences, unique customisations and inspiring stories shared within our community.

Seeing our bikes in action across the globe truly warms our hearts. From extraordinary expeditions to leisurely trips with kids, each ride is a source of delight for us, reaffirming the versatility and joy our bicycles bring to people's lives.

Thank you for joining us on this journey. Your enthusiasm and support fuel our commitment to building bikes that aren't just vehicles, but partners in your daily quest for utility, freedom and fun. Together we continue to prove that with OMNIUM bikes, anything is possible, anywhere, anytime. Here's to many more miles and smiles, more adventures to come and the simple pleasure of riding together, wherever the road may lead.

— The OMNIUM Team

OMNIUM

OMNIUM

ANYTHING ANYWHERE ANYTIME

A glimpse into the daily experiences of proud OMNIUM owners

People often ask us what can be done with our bikes. But, we think the real question is: what can't be done with them? Equally adept at handling everyday errands and competing in the most demanding ultracycling races — our range of bicycles can do it all.

We believe our flagship Cargo and Mini-Max models, with their generous rack space, are some of the most versatile bikes on the planet. For over a decade, owners all over the world have tested the limits of these in the most challenging environments.

Our bikes defy the typical cargo bike stereotype. Not only are they fast, agile, lightweight, and robust, but they're also familiar, unfussy, and capable of handling the heaviest, most awkward loads imaginable — and, might we add, they're beautiful and also extremely fun to ride.

Truly all-purpose, our bikes empower people to do just about anything, anywhere, anytime.

MOD

OELS

DAY RIPPER

Embrace the spontaneity of urban adventure with the Day Ripper, perfect for weaving through bustling streets and darting down gravel tracks on your way home.

More than your average commuter, it's a comfortable city slicker for the spirited soul—inviting you to redefine what a mundane commute is all about whether you're treading tarmac or crusty paths.

Constructed from high-quality double-butted chromoly steel and paired with 38mm tyres, it promises durability and comfort. The Sram Apex gears and Sram Level TL hydraulic brakes put control and stopping power at your fingertips. It comes with mounts for front and rear racks, mudguards and a kickstand.

The Day Ripper is more than just a bike — it's made to infuse a little joy into your daily commutes.

Electric belt drive

The Cargo is an incredibly versatile, lightweight and fast cargo bike that can handle heavy loads and big objects with ease.

The best part is, it rides like a normal bike when unloaded, due to its clever construction and familiar geometry.

The Cargo is also the model with the longest wheelbase, which calls for very stable handling. The wheelbase also allows for great stability when loading the rack on your own, as the weight is positioned in the middle of the front wheel and the kickstand.

Need to pick up your new dream sofa? Easy. Bringing your kid to daycare before work? No problem! Carry a month's worth of groceries home? You're good to go. Rain, hail or shine, all year long.

MINI-MAX

Options

1 × 11 external

Belt drive Alfine 8

Electric belt drive

The Mini-Max is the middle child of the lot, with the best of both the Cargo and Mini. It is an ideal choice for riders who prioritize snappy turns and compact parking.

Although the rack lacks the horns as seen on the Cargo, it retains extender bar compatibility, and can still take some pretty impressive loads.

The front wheel's positioning in the middle of the rack allows for improved steering and handling, allowing first time cargo-bike users to adapt in seconds, making it a great option for navigating through city streets. You'll wonder how you survived without a Mini-Max in your life.

MINI

Options

1 × 11 external

Belt drive Alfine 8

The Mini almost speaks for itself. It's a normal bike with a mighty powerful front rack.

Its manageable size makes handling familiar, and multimodal transportation a breeze. The rack is ideal for getting around with a load too big for a backpack, and perfect for putting it out front where you can keep an eye on it.

Significant loads on the mini are a non-issue as long as they are more or less kept within the rack's size. The weight of the load has very little influence on steering, giving you surprising amounts of confidence, as the rack's support is built directly into the frame.

We like to think this is the most playful cargo bike out there!

Single speed

1 × 11 flat bar

1 × 11 drop bar

The OMNIUM CXC stands for Cyclo Cross City, and it does just that. Commute, gravel, cyclocross, world tour, or alleycat – the CXC will work for you. With 700x45c tire clearance and triple cage fork mounts, this thing is even adventure ready!

Adjustable rocker dropouts let you run singlespeed, fixed, internal gear hub, belt-drive or derailleur.

Run it simple and all stripped down, or go fully functional with mudguards and racks. We could go on about possibilities, but in short the CXC is a true Swiss Army knife. There is nothing more versatile.

1 x 11 EXTERNAL

Those who favour traditional or purist mechanics might lean towards the well-established 1x11 external derailleur drivetrain system. With its reliable and responsive shifting, it offers a broad gear range perfect for tackling varied terrain, from cityscapes to hillier regions. If needed, you can effortlessly switch to an even wider range to suit your riding preferences. Known for its mechanical simplicity, this system ensures the most efficient transfer of pedal power to pavement, making it a go-to for cyclists who count every watt.

BELT DRIVE

Step into the future of cycling with the belt drive system, a beacon of low maintenance and discreet design. Say goodbye to grease stains—the carbon kevlar belt is near-indestructible in daily use and doesn't require the constant care a chain does. This means no lubrication, minimal cleaning, and significantly less overall maintenance. Coupled with the Shimano Alfine 8-speed internal hub, it's built for seamless urban riding, allowing gear changes even when stationary. While slightly heavier, the belt system won't succumb to rust and offers an impressively smooth and quiet operation, ensuring longevity that outpaces the traditional 1x11 setup.

SYSTEM

You can get an E-Cargo or E-Mini-Max with an integrated Shimano EP801 Cargo power unit. The EP801 is by far the best system for an electric bike – we tested a lot of options and we are certain this is the e-bike that will take you to the very TOP of the hill.

ELECTRIC

DRIVETRAIN

Lightweight yet rigid crankset for direct power transfer. Specced with Gates Carbon Drive chainring, belt, and rear sprocket for a low maintenance, durable, and strong drivetrain.

MOTOR

The powerful SHIMANO EP801 motor is strong enough to handle the steepest of hills, designed specifically to give you the natural feel of riding a normal bike. Weighs only 2.6kg, one of the lightest motors on the market. Solidly supports speeds up to 25 km/h.

BATTERY

Ultra-durable, replaceable, powerful battery specially designed for the rigours of cargo biking. Low profile design for improved impact and vibration resistance. High capacity long-lasting Li-Ion battery of 504 Wh to cover more territory. Supported travel up to 100 km on one charge. Holds 60% of maximum capacity after 1,000 complete charge cycles.

TI UPGRADES / ACCESSORIES

With the Ti-line OMNIUM is introducing the On-Demand ordering process which is a unique demand focused way of producing our bikes.

You get to order the exact model and size bike you want, which will be produced to your unique specifications.

We open up orders for Ti On-Demand for about a week at a time, every 3-4 months. Lead time is from when production starts to the time they arrive to our warehouse. This time starts from when the order window closes, and takes approximately 5-6 months.

Sign up to our newsletter for notification of when the next On-Demand process will take place.

SILK ROAD MOU

The Silk Road Mountain Race is a fixed route, unsupported, single-stage cycling race through the mountains of Kyrgyzstan. The clock does not stop and there are no prizes. It follows gravel, single and double track and old Soviet roads that have long been forgotten and fallen into disrepair. There is very little tarmac. There is some hike a bike, and at times there is great distances between resupply points.

ACCESS

SORIES

Child seat rack

Secure your child seat onto the front rack with ease. Allows quick-fastening/release of your seat and engaging rides with your little human. Durable, lightweight aluminium, just 628g.

Extender

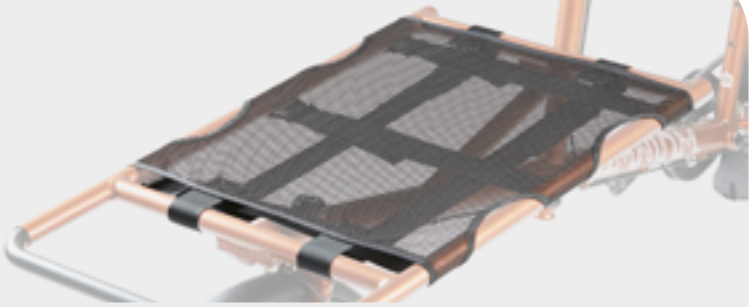

Matt black aluminium rack extender. Adds length seamlessly to the front rack and increases the cargo area, weighing just 490g. First 20cm unpainted for easy mounting.

Extender cover

Lightweight and made with Cordura nylon. Fixed by Velcro and very, very strong. A mere 115g, handmade in Germany. A complementary accessory to the Backrest or child seats.

SL mesh cover

This superlight (300g) cover for Cargo / Mini-Max racks combines strength and weight savings, designed for bikepacking. 585g lighter than our standard webbing and up to 40kg capacity.

Webbing

Velcro fastening system for effortless mounting and tension adjustment. Sleek, durable, and exclusively in black. Available for Cargo, Mini-Max, Mini models. Made in Taiwan.

Foldable cargo box

Multipurpose collapsible box, perfect for pets, groceries, and more. Attaches with Velcro straps, 60kg limit, shock-resistant rails. Folds to 4cm and weighs only 2kg.

Backrest

Boost passenger comfort with our quick-release backrest for Cargo or Mini-Max. Suitable for children and even adults. No tools needed, and includes seatbelt. Made in Taiwan.

Mudguards

Protect your ride with durable guards and rubber flaps. Keep your backside dry and extend drivetrain life. Matte finish, all fixtures included. Made in Taiwan.

Kickstand

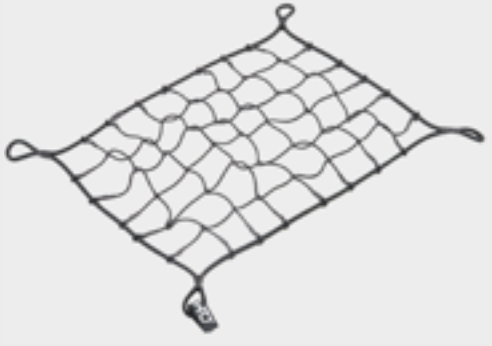

Double-leg design for superior stability and ease of parking. Robust build for enduring strength. Compatible with all Mini, Mini-Max, and Cargo models.

Straps

Secure bulkier loads with ease on your rack with our strong nylon straps. Cam buckle for quick tensioning, complete with the Omnium logo.

Net

Effortlessly keep shopping bags, pizzas, or any loose cargo secure on your front rack with our elasticated net, featuring a quick hook-fastening system. Lightweight and dependable.

Supernova lights

Illuminate your path and stay visible with our ultra-bright set for Cargo & Mini-Max. A complete kit for seamless setup, solid beams in front & rear. 175g, and made in Germany.

Stem bag

Handy and easily-accessible bag for all your small essentials. Crafted from water-resistant Cordura. Ideal for phones, bottles, or snacks. Handmade in Germany.

Wedgie bag

Immensely useful bag to fit jackets, tools, locks and more under the Cargo or Mini-Max rack. Black, water-resistant Cordura with YKK zippers and expanded mesh pouch. 295g, German-made.

OMNIUM logo caps

Five vibrant colours to complement your frame.
Universal size, crafted from 100% nylon.
Made in Italy.

OMNIUM logo socks

Stylish and comfortably fitting socks in five frame-matching colours. Available in S/M and L/XL to cover all foot sizes. A cosy blend of 94% cotton, 6% Lycra, made in Poland.

AirTag holder

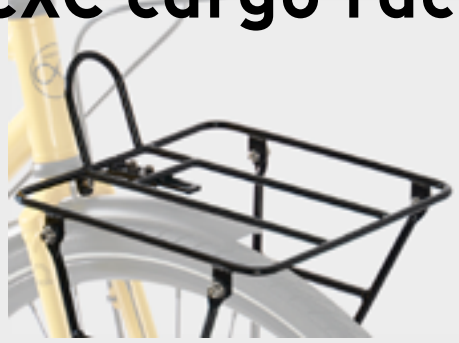

Discreet, secure mount for Apple AirTag. Additional security measure in case of theft and for peace-of-mind. Durable, includes stainless fixtures. 26g, manufactured in Germany.

Multitool

Your sturdy companion with a range of Allen keys, chain breaker, screwdrivers, and tyre lever. Everything you need for on-the-go adjustments.

CXC cargo rack

Robust construction, designed for our steel CXC bikes, able to push the 10kg load limit with ease. Includes all fixings. 1.3kg, black steel, with spacers for varied setups. Made in Taiwan.

Platform pedals

BMX-inspired, low profile pedals with ultra-grip. Perfect for large feet or wet rides. Gentle on shoes, with durable sealed bearings. 332g and made in Taiwan.

Billboard

Advertise your business with our aluminium billboard sheet. Print the foil yourself or use our partners' services to help you. Includes clamps, bolts, and nuts for a solid fit.

COMPO

ONENTS

Titanium parts

Add a dash of refinement and elevate your beautiful build with our range of titanium components including a stem, headset, top cap, seatpost, clamp, bottle cage, and spacers. Offering durability and a touch of cool.

Dynamo front wheel

Effortlessly power your ride's lighting with our dynamo front wheel and say goodbye to recharging and removing lights.

Reliable and designed for V3 and WiFi models, it features a Shutter Precision SP Dynamo Hub PD-8X, sealed bearings, 6-bolt disc mount, a robust 32-spoke construction, and a sleek black rim.

Lights, wires, tire and tube not included.

Dropper post

Smooth and quickly adjustable seatpost offering 125mm travel for easy bike sharing. Sealed, air-sprung cartridge, matte black alloy build. Lever actuation. 731g.

Standard grip

Comfortable, straight lock-on foam grips with reflective logo plugs. Offering secure grip in the dry and wet. Sleek black. 90g, made in Taiwan.

Ergo grips

Upgrade for daily comfort with supportive wings that ease wrist strain and numbness. Perfect for long rides. Fits all Omnium handlebars. Black, made in Taiwan.

Wunderbar

Enhanced handling with 800mm width, 15mm rise and 27° backsweep for ergonomic wrist positioning. Offers leisurely control at a light 360g. Matt black aluminium. Made in Taiwan.

Trekking bar

Upright positioning meets wrist comfort with 680mm width and 37° backsweep. Perfect for relaxed, controlled rides. Matt black finish at 328g. Made in Taiwan.

Riser bar

Our standard riser bar strikes a balance between comfort and control with 700mm width, 15mm rise, and 8° backsweep. Matt black aluminium, 261g, and made in Taiwan.

Drop bar

Drop bars not bombs. Ideal for a road / cross / gravel oriented CXC build. Offering 46cm width, 125mm drop, and 6° flare. Matt black, 308g. Made in Taiwan.

Stores

Our lovely OMNIUM flagship store opened it's doors in February 2019. Having operated out of a basement storage unit since day one in 2012, this was a bit of an upgrade to say the least.

We are incredibly proud to have more than 350 official OMNIUM dealers across the world selling our bikes. We have every bit of confidence that all of them represent the spirit of OMNIUM, and we encourage you to ask your local OMNIUM pusher if you have any questions regarding our bikes.

The OMNIUM store in Copenhagen is now the home to our massive repairs workshop, show room, and point of local sales. In here, the music is vibing, the coffee is hot, and the smiles are big. Our doors are almost always open, so come say hi!

Webshop

If you cant find any dealers in your area, visit us on our webshop at

omniumcargo.com

Here you can learn more about the bikes, check out specifications, and buy everything from accessories and frame-kits to complete bikes!

For our North-American readers head to **omniumcargo.us**

To stay up to date, follow us on Instagram, Facebook or subscribe to our newsletter at the bottom of the site.

CUSTOM BUILDS

OMNIUM bikes can be built in an infinite number of ways. Nothing quite says 'bike-enthusiast' like a curated selection of components and some hand built wheels. Sometimes you need that little bit of extra to make your ride that much more enjoyable. Maybe it's a specific colour theme, or some high-end components you're after.

Chances are the shop you're standing in is more than happy to help.
