travel. The consistent damping of the A.B. Zorb shock offers extremely high energy dissipation. The adjustable spring rate lets you dial in the desired preload for your weight.

Up front, the new Trek DDS3™ suspension fork also boasts an adjustable spring rate and progressive damping. What's more, the damping is also adjustable, so you can control its action on varying terrains.

The dual suspension 9000 series. All the thrill you can handle, on a bike made to handle it all.

9500

Dual Suspension

The "king of the hill" in mountain bikes. T3C™ Rear Suspension. Trek DDS3™ Front Suspension fork. And the brand new premiere XTR component group from Shimano. Go discourage the competition.
