THE BEST OF BOTH WORLDS

Alpinestars USA, the World's Leader for 27 years in off-road racing products, continues to break new ground in developing winning performance equipment for the world's greatest off-road champions. We've combined this wealth of knowledge and experience with the competitive background and talent of 1989 European Champion Michael Kloser to build mountain bikes that combine the best of both worlds; American mountain bike technology and European racing experience.

America, the birthplace of mountain bikes, continues to set the pace in off-road design by constantly pioneering and perfecting new technology like the Alpinestars USA oversize Mega Tubing™ and Revolutionary Oversize Headset. We've complemented our American design with European racing experience. One thing our years of product development has taught us is not to settle for second best. This led us to combine forces with 1988 European World Champion/1989 European Champion Mike Kloser to race prove our products on the course, in competition, where things happen a lot faster than on the drafting board.

By combining the finest racing experience in the world with state of the art mountain bike technology from America, the Alpinestars USA line of MNT Xross bikes truly represent the Best of Both Worlds.

Alpinestars USA, azienda leader da 27 anni nel fuoristrada agonistico, continua ad applicare la propria esperienza nello sviluppo di nuovi prodotti vincenti per i più grandi campioni del fuoristrada. Abbiamo unito la nostra ricchezza di conoscenze ed esperienze al talento di Michael Kloser, campione europeo 1989, per creare le mountain bike che uniscono il meglio dei due mondi: tecnologia americana ed esperienza europea.

L'America, il paese natale del mountain bike, continua a segnare il passo nelle innovazioni tecniche e nel loro perfezionamento, come i telai Mega Tubing™ Alpinestars ed il rivoluzionario Oversize Headset per lo sterzo. Abbiamo unito la nostra tecnologia americana con l'esperienza europea nelle competizioni.

In molti anni di esperienza abbiamo imparato a puntare sempre al risultato più alto. Questo ci ha portato ad unire le nostre forze a quelle del Campione del Mondo 1988 e Campione Europeo 1989 Mike Kloser, per collaudare i nostri prodotti nelle competizioni, dove tutto succede molto più rapidamente che sui banchi di prova.

Combinando l'esperienza nelle competizioni a livello mondiale con la miglior tecnologia americana, la linea MNT Xross Alpinestars USA rappresenta veramente il meglio dei due mondi.

ALPINESTARS USA, Leader dans le monde des produits de course tout terrain depuis 27 ans, continue son oeuvre de pionnier dans le développement d'équipements aux performances gagnantes, pour les plus grande Champions du Monde de tout terrain.

Nous avons associé cette richesse du savoir et de l'expérience avec nos années de formation en compétition, et le talent du Champion d'Europe 1989 Michael KLOSER, pour construire des "MOUNTAIN BIKES" qui combinent le meilleur des deux mondes, la technologie des "MOUNTAIN BIKES" Américains et l'expérience des courses Européennes.

L'Amérique, le pays de naissance du "MOUNTAIN BIKE" continue d'améliorer la place du design en tout terrain, par sa recherche constante et sa nouvelle technologie de perfection, comme les "MEGA" tubes surdimensionnés et la colonne de direction révolutionaire et aussi surdimensionnée ALPINESTARS USA.

Nous avons completé notre design Américain avec l'expérience des courses Européennes. Nos années d'expérience quant au développement du produit, nous ont appris à ne pas rester le meilleur second; cela nous conduit à associer nos forces avec Mike KLOSER, Champion d'Europe et du Monde 1988 et Champion d'Europe 1989, pour tester en course et en compétition nos produits, où les choses se concrétisent beaucoup plus vite que sur une table à dessin.

En combinant la meilleure expérience des courses Mondiales, avec l'art du "MOUNTAIN BIKE" et la technologie Américaine, la gamme des vélos "MTN XROSS" ALPINESTARS USA représente véritablement et indéniablement le meilleur des deux mondes.

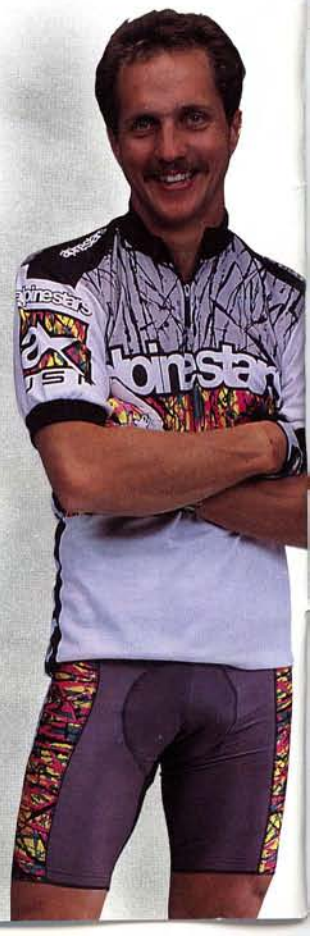

Alpinestars USA, seit 27 Jahren weltweit führender Hersteller von Offroad-Rennsportprodukten, beschreitet weiterhin neue Wege in der Entwicklung von Hochleistungsgeräten für die größten Offroad-Sieger der Welt.

Wir haben dieses Wissen und diese erfahrung mit Michael Kloser's, Sieger bei den 1989er Europamelsterschaften, Rennsportbackground und Talent kombiniert, um Mountain Bikes zu bauen, in denen sich das Beste aus beiden Welten vereint: die Amerikanische Mountain Bike Technologie und die Europäische Rennsporterfahrung.

Durch ständige Pionierabeit und Vervollkommnung neuer Technologien, wie z.B. das Alpinestars USA Oversize Mega Tubing und der revolutionäre Oversized Steuersatz, bestimmt Amerika, das Geburtsland des Mountain Bikes, auch weiterhin den Trend, den das Design der Mountain Bikes geht. Wir haben unser Amerikanisches Design mit der Euopaischen Erfahrung ergänzt. Eines haben wir aus unserer langjahrigen Erfahrung bei der Entwicklung unserer Produkte gelernt: sich nicht mit dem zweiten Rang zu begnügen.

Dies veranlasste uns, unsere Kräfte mit denen Mike Kloser's, 1988er Weltmeister und Europameister 1989, zu vereinen, um unserer Produkte im Rennen, auf dem Parcours und im Wettbewerb zu testen, d.h. dort, wo alles so viel schneller abläuft, als auf dem Zeichenbrett.

Indem sich die beste Rennerfahrung in der Welt mit der neuesten Mountain Bike Technologie aus Amerika vereint, stellt die Alpinestars USA-Serie der MTN-XROSS-Bikes wahrlich das Beste beider Welten dar.

Mike Kloser
European champion

Masters USA

BUILT TO BE THE BEST

OVERSIZE STEM

With the oversize steering column, the internal diameter increases from 22.2 to 26.8 mm. This means the stem's diameter can be increased and its wall thickness reduced to save weight without giving up strength. Our oversize stem is both lighter and stronger.

ALUMINUM MEGA™ TUBING

The aluminum Mega™ tubeset was designed to maximize the properties of aluminum by creating a frame that is lighter, stronger, and stiffer for the ultimate in performance.

To achieve this unique combination, the design capitalizes on the physical relationship between a tube's diameter, wall thickness, rigidity, and weight.

By increasing the tubing diameters and reducing their wall thickness to their optimum ratios, the Mega™ tubeset was born. This tubing offers the ultimate combination of lightweight, strength, and stiffness.

FRAME DIMENSIONS

MEGA™ DRIVE FORK

We've extended the concept of oversize to the forks as well, with blades that taper only slightly and end in a 23mm diameter at the dropouts. The unique design of our oversize blades has a uniform wall thickness their entire length which yields a light responsive fork for pinpoint control.

INVESTMENT CAST LEADING AXLE DROPOUTS

These dropouts were specially developed to work without oversize blades. The combination of oversize and a leading axle gives improved control and shock absorption.

OVERSIZE SEAT POST

By increasing the diameter of our seat post and reducing the wall thickness, we've been able to save weight without giving up strength.

OBRS™ OUTER BUTTED REINFORCEMENT SYSTEM

Our seat tube is externally butted to strengthen the area which clamps the seatpost. Combined with our heat treated aluminum seat clamp, this system makes seat height adjustments a breeze and will provide years of reliability.

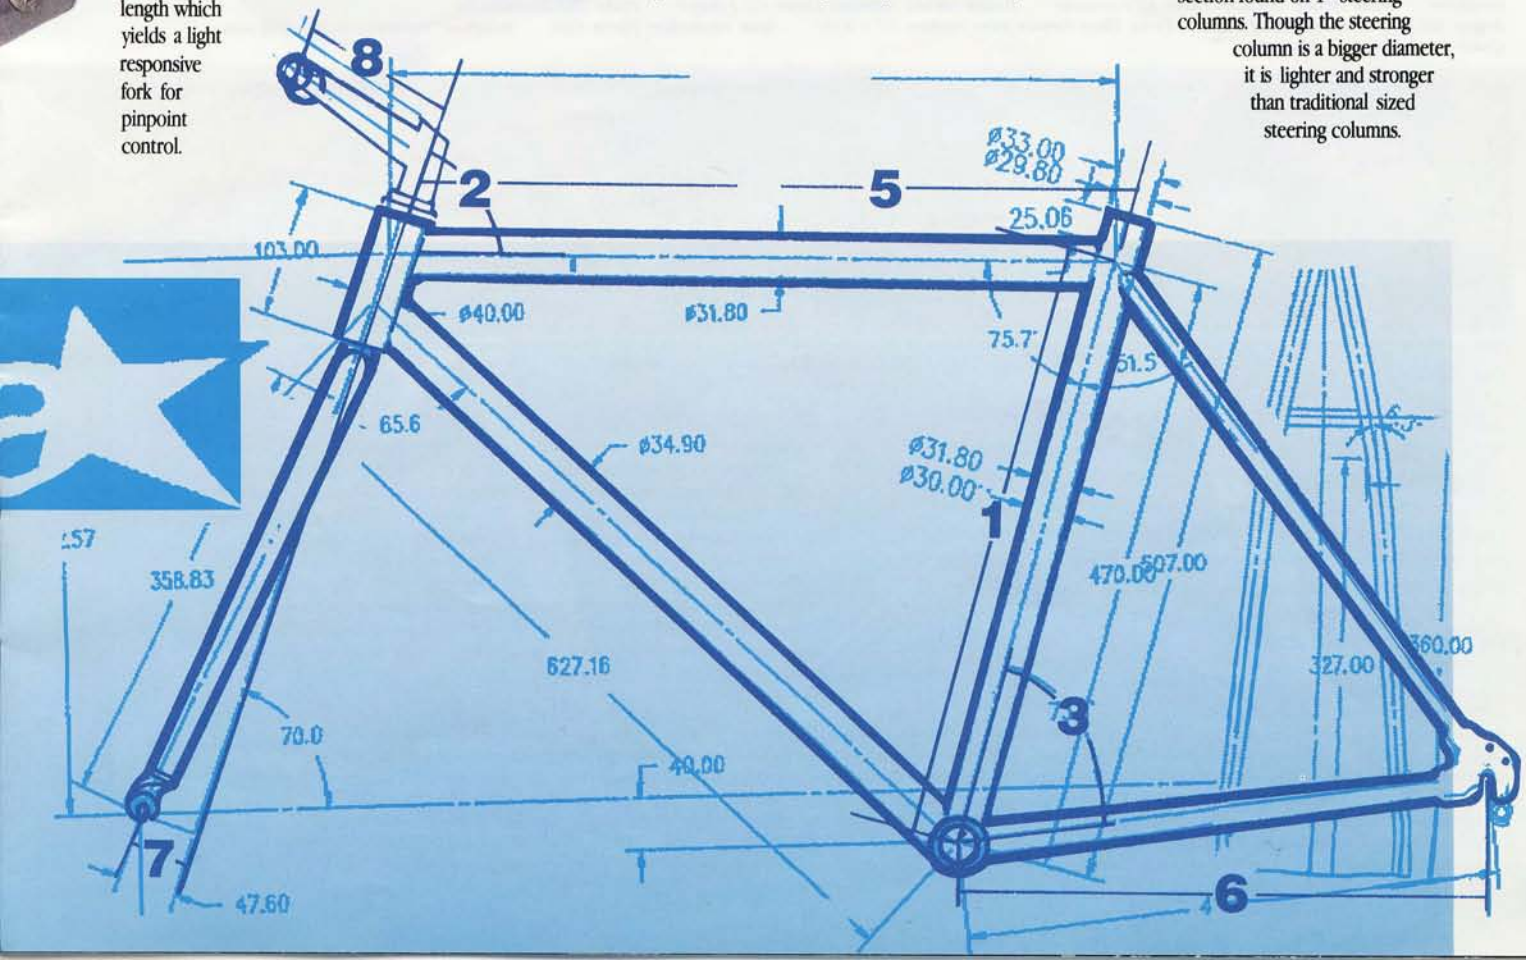

OVERSIZE HEADSET ADVANTAGES

The first headset truly designed for off-road—*not adapted from road bikes*—the oversize 1¼" headset has many advantages over its little brothers.

There are 30% more ball bearings available to distribute the forces of road shock, thus promoting headset life.

The 1¼" steering column takes advantage of the relationship between a tube's diameter, strength, wall thickness, and weight. This steering column has a 1.6mm wall through its entire length without adding the weight of the butted section found on 1" steering columns. Though the steering column is a bigger diameter, it is lighter and stronger than traditional sized steering columns.

"Mega" size straight blade fork

Shimano SG® round chain rings

Oversize seat post

Heat treated Aluminum seat clamp

16½" Chainstays

AL-MEGA™XT

Utilizing the future of technology and craftsmanship, the Al-Mega™XT is the definition of a world class racer. The all aluminum frame is designed around a front triangle of 7005 series aluminum oversized "Mega" tubing. Pushing the material to its optimum, our tube diameters and wall thicknesses represent the strongest combination, yet without adding weight.

The oversize rear triangle design provides seatstays with a more rigid base for braking, and wider chainstays for greater tire clearance, while the oversize Cro-mo straight blade fork and 1¼" oversize headset increases steering accuracy and strength.

Now combine this design with Shimano's top of the line component group—Deore XT STI.®, and this one's more than ready to roll out to the races . . . it's ready to win.

AL-MEGA XT

Risultato ottenuto con tecnologie del futuro e cura artigianale, la AL-MEGA XT è un prodotto di classe mondiale.

Con un telaio tutto in alluminio 7005 sviluppato su un triangolo maggiore in MEGA tubi, utilizzando i materiali al meglio delle loro caratteristiche per il massimo delle prestazioni, abbiamo ottenuto il rapporto perfetto fra diametro dei tubi e loro spessore, e di conseguenza la perfetta combinazione fra resistenza e leggerezza.

Il triangolo posteriore Oversize permette di avere una maggior rigidità in frenata. I tubi orizzontali sono stati convenientemente posizionati per lasciare più spazio alla ruota. Le forcelle Oversize CRO-MO con foderi diritti e il movimento dello sterzo Oversize di l pollice e 1/4 garantiscono precisione di sterzata.

AL-MEGA XT

Utilisant la technologie du futur et la connaissance du métier, le "AL-MEGA XT" est le vélo de classe mondiale.

Le cadre tout Aluminum est concu autour d'un triangle avant de tubes surdimensionnés en "MEGA ALUMINIUM" de série 7005.

En poussant le matériel jusqu'à ses limites, nos diamètres du tubes et l'épaisseur des parois représentent la meilleure combinaison, et encore, sans adjonction de poids.

Le dessein du triangle arrière surdimensionné pourvoit les bases arrières d'une meilleure rigidité pour le freinage, et l'extension des haubans pour un plus grand écartement nécessaire au passage du pneu, tandis que la fourche coupée droite en CROM-MO surdimensionné et la colonne de direction surdimensionnée (1 pouce 1/4) accroissent la précision de l'intensité de direction.

Maintenant, alliez ce dessein à la ligne top niveau des composants du groupe "SHIMANO DEORE XT STI" et ce dernier est plus que prêt à vous inciter aux courses . . . C'est prêt pour gagner!

AL MEGA XT

Unter Verwendung von futuristischer Technologie und handwerklichem Geschick ist das AL-MEGA XT das, was man unter einem Weltklasse-Mountain Bike versteht.

Die Hauptrohre sind aus Aluminium (Serie 7005). Der extra-breite Alu-Hinterbau läßt dem Reifen viol Platz Sokann das Hinterrad auch hoischworen Schlamm-Fahrten nicht blockieren. Die speziell verstärkten Sattelstreben verbessern die Wirkung der hinteren Cantilever-Bremse.

Die gerade Cromoly-Gabel und der oversized Steuersatz verbessern die Steuereigenschaften und die Stabilität.

Durch die Optimierung von Rohrdurchmesser und Wandstärke ist das AL-Mega XT das Beste, was man aus Alu machen kann.

Zusammen mit Shimano's Top-Komponenten-Deore XT STI-ist es wie geschaffen für Rennen...., geschaffen zum Gewinnen.

AL-MEGA™DX

The Mega trend continues with Al-Mega™DX by sharing the same winning frame technology, the same exceptional design, geometry, materials, and construction—this time with Shimano's aggressive Deore DX STI® components throughout. This finished machine represents the perfect choice for your first race bike.

AL-MEGA DX

Di diretta derivazione dalla AL-MEGA XT, è stata creata con gli stessi materiali, tecnologia, geometria e cura nella costruzione. Montata con il gruppo SHIMANO DEORE DX STI in ogni sua componente.

AL MEGA DX

La tendance au "MEGA" continue avec le "AL MEGA DX," avec la répartition de la même technologie gagnante pour le cadre, le même design ainsi que la même géométrie, les mêmes matériaux et la même construction, tout autante d'éléments exceptionnels, avec au travers cette fois les composants agressifs du groupe "SHIMANO DEORE DX STI." Cette machine terminée représente le choix parfait pour votre première course de vélo.

AL-MEGA DX

Der Mega-Trend wird mit dem AL-Mega DX fortgesetzt; es wurde die gleiche gewinnbringende Rahmentechnologie verwendet, das gleiche außergewöhnliche Design, die gleiche Geometrie, die gleichen Materialien und die gleiche Konstruktion - diesmal mit Shimansos agressiven Deore DX STI Komponenten. Dieses Rad verspricht, die richtige Wahl für ihr erstes Mountain Bike zu sein.

ALPINE XROSS™DX

A totally unique blend, the Alpine Xross™ is just that—a cross between a road bike and a mountain xross bike. Engineered to provide the highest level of performance for street or dirt, we added Shimano's Deore DX® components with 21 usable speeds for either terrain. This bike combines the best from both rides.

ALPINE XROSS DX

Una perfetta combinazione fra prestazioni su strada e robustezza in fuoristrada. Equipaggiata con i componenti SHIMANO DEORE DX con 21 rapporti di velocità adattabili sia alla strada che allo sterrato. E' il mezzo ideale per ottenere il meglio in tutte le situazioni.

ALPINES XROSS DX

Un mélange totalement unique, le "ALPINE XROSS DX" c'est tout juste ca, un croisement entre un vélo de route et un vélo de montagne. Construit pour fournir le plus haut niveau de performances pour la route ou le tout terrain, nous avons ajouté les composants du groupe "SHIMANO DEORE DX" avec 21 vitesses utilisables pour 1'un ou l'autre des terrains (Route ou cross).

Cette combinaison associe le meilleur des deux vélos.

ALPINE XROSS DX

Das Alpine Xross ist eine absolut einmalige Mischung - sine Kreuzung zwischen Straßenrad und Mountain-Xross-Rad. Konstruiert, um das Maximum an Leistungsfähigkeit, sowohl auf der Straße als auch im Gelände zu bieten, haben wir Shimano's Deore DX Komponente mit 21 Gängen montiert, die man wirklich in jedem Gelände anwenden kann. Dieses Rad verbindet beides: flottes Vorankommen auf der Straße und viel Spaß im Gelände.

MTN XROSS TEAM ISSUE SHOE

Race tested by Mike Kloser, our team has created the newest breakthrough in mountain biking footwear. Our upper, made of genuine leather and nylon mesh, is cut slightly higher to give additional ankle support. We've also added our unique adjustable tension heel holding device that allows you to custom fit the shoe to your foot. This reduces heel lift and allows maximum energy transfer for ultimate performance. Also, the same concept has been designed into our aero dynamic lace cover for maximum efficiency. No world class racing shoe is complete without a great sole and cleat system. Both full and half cleats are available with this system.

MTN XROSS ACTION SHOE

The Mtn Xross Action Shoe, with the same feature packed upper as our Team Issue, incorporates a specially designed reinforced race ready rubber sole for those who prefer to go cleatless.

SCARPE MNT XROSS TEAM

Progettata dal team di tecnici Alpinestars e collaudata in gara da Mike Kloser, è la più avanzata e innovativa calzatura per il mountain-bike. La tomaia, in rete di nylon e Lorica, è leggermente più alta per dare maggiore supporto alla caviglia. E' dotata di un cinturino posteriore per poterla adattare perfettamente ad ogni tipo di piede. Questo accorgimento riduce il movimento del piede nella scarpa e permette di trasferire tutta l'energia sul pedale per le migliori prestazioni. Lo stesso concetto è applicato alla copertura aerodinamica dei lacci, per ottenere il massimo dell'efficenza. Particolare attenzione è stata messa anche nel disegno della suola e della tacchetta. La tacchetta è disponibile sia nella versione intera che solo anteriore.

SCARPA MNT XROSS ACTION

Stesse caratteristiche della scarpa TEAM ma adatta a chi preferisce non usare gli attacchi per il pedale e vuole una suola specificatamente studiata e con dei rinforzi adeguati.

CHAUSSURES DE MOUNTAIN BIKE REGLEMENTAIRES "MTN XROSS TEAM ISSUE"

Notre Team a créé la plus nouvelle et la plus révolutionnaire chaussure de MOUNTAIN BIKE, testée en course par Mike KLOSER. Notre haut de gamme, fabriquée en Lorica[t] peau est coupée plus mince en haut, pour donner un support supplémentaire à la cheville. Nous avons aussi ajouté notre système unique de tension réglable, pour un bon maintien du talon, ce qui vous permet de fixer librement la chaussure sur votre pied. Ceci réduit la poussée du talon et permet un transfert d'énergie maximum pour des performances ultimes. Aussi, le même concept a été étudié pour notre couvre lacet aérodynamique pour un maximum d'efficacité. Une chaussure de course de classe mondiale n'est pas complète sans un bon système d'attache. Attaches à la fois complete ou semi-complete sont disponibles avec ce système.

CHAUSSURES DE MOUNTAIN BIKE "MTN XROSS ACTION"

La chaussure de MOUNTAIN BIKE "MTN XROSS ACTION" avec les memes caractéristiques d'enveloppe supérieure, que notre modèle "TEAM ISSUE," incorpore une semelle en caoutchouc renforcée et spécialement concue pour les courses, pour ceux qui préfèrent rouler sans système de fixation.

MTN XROSS TEAM SCHUH

Von Mike Kloser in Rennen getestet, hat unser Team einen Durch bruch geschafft was Neuerungen bei Mountain Bike Rennschuhen betrifft. Das Obermaterial aus echtem Lorica[t] und Nylonnetz ist etwas höher geschnitten und gewährieistet somit eine zusätzliche.

Unterstutzung des Fußgelenks. Die Schuhbander sind mit einer zusätzlichen Lasche abgedeckt. Ein zusätzliche Klettverschluss über dem Rist dient der optimalen Fersenfixierung im Schuh.

Das Anheben der Ferse wird vermindert, eine maximale Energieübertragung und Höchstleistungen sind das Ergebnis.

Kein Weltklasse-Rennschuh ist komplett ohne eine erstklassige Sohle mit Platte. Sie erhalten bei uns ganze und halbe Sohlenplatten.

MTN XROSS ACTION SCHUH

Der MTN Action Schuh, mit den gleichen Elgenschaften wie unser Team Schuh, besitzt eine speziell angefertigte, extraverstärkte, für Rennen geeignete Gummisohle für diejenigen, die es vorziehen ohne Sohlenplatte zu fahren.

MTN XROSS PRO LONG SLEEVE JERSEY

This Pro jersey is made of the same great materials as our Pro Flow. We've added long sleeves and a closed back for those cold days.

Light Grey	Bright Yellow
Small	Small
Medium	Medium
Large	Large
X-Large	X-Large

MAGLIA MNT XROSS PRO - Manica Lunga

E' la versione invernale della Pro-Flow. Ha maniche lunghe e tessuto Polycotton per i giorni più freddi.

MAILLOT "MTN XROSS PRO"

Ce maillot "MNT XROSS PRO" est fabriqué avec les mêmes grands matériaux que notre maillot "PRO FLOW;" nous avons seulement ajouté des manches longues et un dos fermé pour les jours frais.

MTN XROSS PRO LONG LANGARM TRIKOT

Dieses PRO Trikot ist aus den gleichen hervorragenden Materialien hergestellt wie unser PRO FLOW. Das Langarmtrikot hat eine dichtgewebte Rückenseite (Weniger luftdurchlässig) für kalte Tage.

2

MTN XROSS TIGHTS (LYCRA)

The hot graphics combined with an anatomical cut for the perfect fit, will keep you warm on those cool mornings.

CALZAMAGLIA MNT XROSS (LYCRA)

Grafica aggressiva e forma anatomica per una perfetta vestibilità. Confortevolmente calda anche nei giorni più freddi.

COLLANTS LYCRA "MTN XROSS"

Des graphiques vifs, associés à une coupe épousant la silhouette pour un confort parfait, vous garderont au chaud lors des matins frais.

MTN XROSS TRIKOTANZUGE (LYCRA)

"Heiße" Muster kombiniert mit einem der Anatomie angepaßten Schnitt für den perfekten Sitz werden Sie an kalten Tagen warm halten.

3

MTN XROSS TEAM SHORTS (LYCRA)

MTN Xross shorts offer the same quality fit and durability as our team shorts.

PANTALONCINI MNT XROSS (LYCRA)

Offrono la stessa qualità, vestibilità e durata dei pantaloncini TEAM.

CUISSARD LYCRA "MTN XROSS"

Ce cuissard "MTN XROSS" offre les mêmes qualités de confort et de résistance que nos cuissards "TEAM."

MTN XROSS RENNHOSE (LYCRA)

MTN Xross Rennhosen bieten die gleiche Qualitat in Sitz und Haltbarkeit wie unsere Team-Rennhosen.

4

MTN XROSS PRO FLOW JERSEY

The unique design of the Pro Flow jersey offers the ultimate in breathability. A polycotton front is mated to a synthetic mesh back to draw air through for a cooling effect.

Light Grey	Bright Yellow
Small	Small
Medium	Medium
Large	Large
X-Large	X-Large

MAGLIA MNT XROSS PRO FLO

L'esclusivo disegno permette una perfetta traspirazione. Il tessuto Polycotton nella parte anteriore e il tessuto traforato nella parte posteriore creano una circolazione d'aria che rinfresca il corpo.

MAILLOT "MTN XROSS PRO FLOW"

Le design du maillot "MTN XROSS PRO FLOW" offrela meilleure aération. Le mélange Polyester et Coton utilisé pour le devant est associé à un tissu synthétique aéré pour le dos, vous assurant une parfaite ventilation.

MTN XROSS PRO FLOW TRIKOT

Das einzigartige Design des PRO FLOW-Trikot gewährleistet maximale Atmungsfähigkeit. Die Vorderseite ist aus einem Baumwollmischgewebe, die Rückseite aus einem synthetischen Maschennetz, das luftdurchlässig ist und somit einen kühlenden Effekt erzielt.

5

MTN XROSS TEAM SHORTS (LYCRA)

Druable Lycra combined with an anatomical 8 panel design make these shorts the ultimate in both form and function. These high quality shorts are race proven by our Alpiinestars MTN Xross Team.

PANTALONCINI MNT XROSS TEAM (LYCRA)

Il resistentissimo tessuto Lycra e l'imbottitura anatomica per la zona della sella fanno di questi pantaloncini il massimo in vestibilità e funzionalità. Disegnati e messi a punto in gara dai componenti del Team Alpinestars MNT Xross.

CUISSARD LYCRA "MTN XROSS TEAM"

Un lycra résistant associé à 8 piéces concues spécialement pour épouser parfaitement votre silhouette, font de ce cuissard le summum en ce qui concerne la forme et la fonction. Ce cuissard de haute qualité a été testé en course par notre team ALPINESTARS.

MTN XROSS TEAM-RENNHOSE (LYCRA)

Haltbares Lycra kombiniert mit einem anatomischen 8-Bahnen-Design geben diesen Rennhosen ein Maximum an Form und Funktion. Diese Rennhosen sind von bester Qualität und wurden von unserem Alpinestars MTN Xross Team in Rennen erprobt.

6

MTN XROSS HELMET COVER

Tops off the team look with coordinated graphics. One size fits all helmets.

COPRI CASCO MNT XROSS

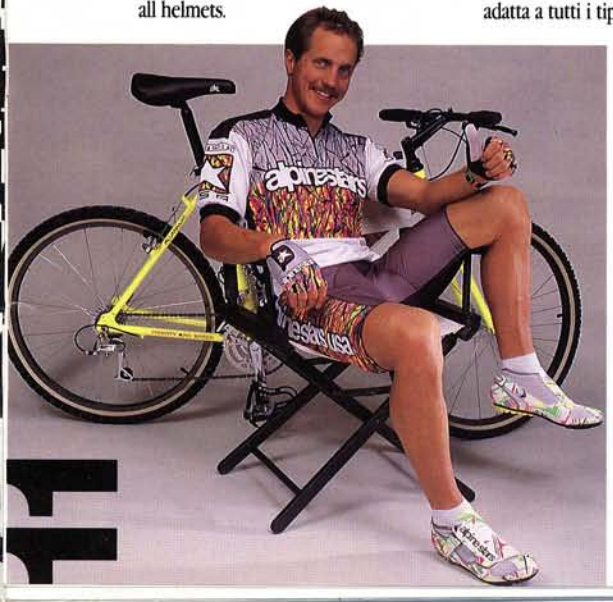

Grafica aggressiva coordinata all'abbigliamento TEAM. Taglia unica adatta a tutti i tipi di casco.

COUVRE CASQUE "MTN XROSS"

Le summum à l'image du Team, avec graphiques coordonnés. Taille unique s'adaptant sur tous les casques.

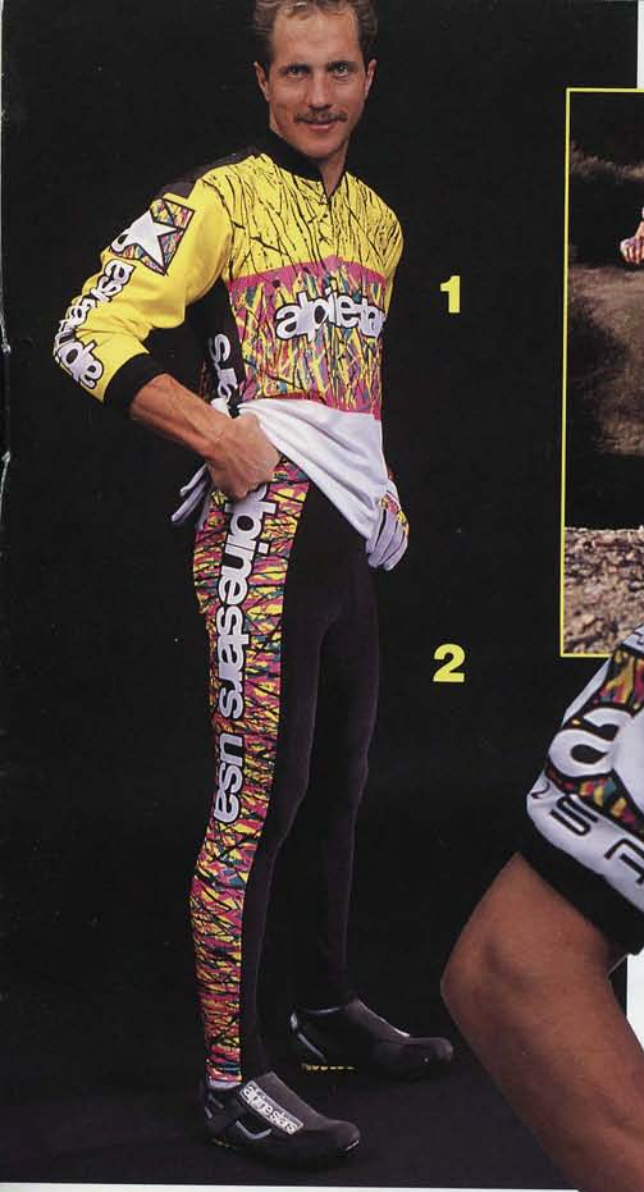

MTN XROSS HELMUBERZUG

Den Teamlook auf die Spitze getrieben...., im Design genau abgestimmt. Eine Größe passend für alle Helme.

MTN XROSS THUMBS DOWN™ TEAM HANDSCHUHE

Shimano hat damit begonnen -wir haben es vollendet!.

Der Thumbs Down-Handschuh wurde speziell für die unter dem Lenker montierten STI-Schalthebel konzipiert.

Er hat einen verstarkten Daumen aus Lycra, um Blasen und Verletzungen vorzubeugen. So können Sie noch mehr von den Neuerungen bei Shimano profitieren!

MTN XROSS THUMBS DOWN™ TEAM HANDSCHUH (mit langen Fingem)

Das Thumbs Down™ System macht ihn zum perfekten Handschuh für die kalte Jahreszeit.

MTN XROSS GEAR BAG

Aus strapazierianigen Nylon, diese Tasche ist perfect für rauhe Straßen.

MTN XROSS T-SHIRTS

Unsere original MTN Xross Qualitätsdesigns auf 100% USA-Baumwolle zieren Vorder-und Rückseite.

The complete Alpinestars Mountain Xross Center is available—check with your local distributor.

WARRANTY

Alpinestars USA warrants this new Alpinestars bicycle frame and fork against defects in materials and workmanship for the lifetime of the original owner. Alpinestars USA further warrants all original parts for a period of one year from the date of original purchase. This warranty is expressly limited to the repair or replacement of a defective frame, fork, or part, and is the sole remedy of the warranty.

Claims under this warranty must be made through an authorized Alpinestars USA dealer. To claim a warranty, proof of purchase is required.

This warranty does not cover damage or failure due to abuse, neglect, accident, improper assembly or maintenance, normal wear and tear, or installation of parts or accessories not originally intended or incompatible with the bicycle as sold.

Alpinestars USA shall not be responsible for incidental or consequential damage. The user assumes the risk of any and all personal injury, or damage of the bicycle, or other losses if Alpinestars USA bicycles are used at anytime in any competitive event (including bicycle racing, or bicycle motocross, dirt biking, freestyling, or similar activities, or training for such activities); or altered any way inconsistent with the bicycle's original design purpose; or anything other than normal use. This limited warranty gives you specific legal rights; you may also have other rights which vary from state to state.
