When you're ready to move up to the best.

FORK BRACE

QUICK ADJUST BRAKES

Proven Suspension Technology. Available Now!

Boulder Bicycles, Inc. proudly presents its flagship model for 1992, the ***Intrepid.*** *Available in medium and large sizes, the Intrepid can be ordered in 4130 Chromoly, Easton 7005 Aluminum, or Titanium. With 3.25" rear wheel travel and radical styling, the Intrepid is our most aggressive model.*

We've also stepped into the componentry world, with a twist taming fork brace and cantilever brakes that are easy to set up and really work!

Defiant *is the new name for the bike we introduced in 1991. Its unique design has become the standard by which all other suspension bikes are judged. It continues as our most versatile model. Available in small (26" standover), medium and large sizes, the Defiant fits most every rider and most every riding style.*

All frame styles are available as frameset with standard ROCK SHOX Mag 20 or optional Answer Manitou forks. All models are available as complete bikes with your choice of Shimano or SunTour gruppos or our own All American parts pick.

The first and still the finest.

DEFIANT

"The safest and most comfortable of any mountain bike around...

...no other mountain bike handled as well and was as controllable..."
