brodie™

BRODIE RESEARCH AND TECHNOLOGY INC.

The production of the 4000th Brodie frame looms on the horizon in 1995. Each frame we build embodies our belief that the frame is the heart of the bicycle and that a high quality frame is directly related to superior ride qualities. Brodie's frame builders design and construct each frame with the same meticulous workmanship they devote to their own personal bikes.

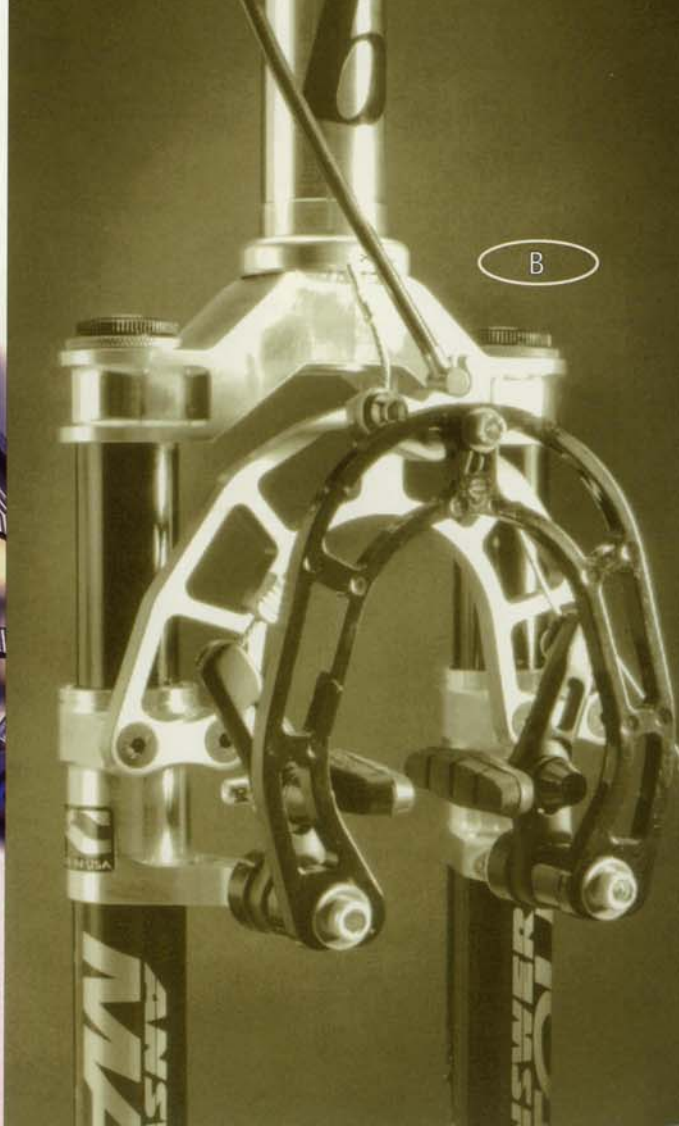

Paul Brodie, the president and founder of Brodie Research and Technology Inc., has a passion for bicycles. For Paul, bicycles are a lifestyle which entails endless hours of frame and component design and building, a daily commute and frequent rides both on and off the road. A similar enthusiasm for the bicycle is apparent in the lifestyle of every Brodie employee. Our staff parking stalls accommodate bicycles rather than cars, and we all take an active interest in product design and testing.

The birthplace and current home of Brodie Research is Vancouver, British Columbia, on the West Coast of Canada. We like to think that our famous trails are some of the best in the world. Inspired by the needs of mountain bike enthusiasts and racers, Brodie products reflect the demands that the serious rider puts on equipment.

ROOSTERS

Fortify your suspension forks with CNC machined 7075-T651 Aluminum Roosters. Attacks lateral fork leg flex.

A.-rock rooster: CNC machined aluminum fork brace compatible with Rock Shox, Manitou, and Marzocchi arrests lateral suspension fork leg flex. Anodized sapphire blue, gunmetal grey, black and silver.

B.-rockin' rooster: the ultimate in fork rigidity and braking power for Rock Shox and Manitou. Package contains a magnesium canti booster and aluminum fork brace plus interconnecting hardware (Mr. Stiff).

b

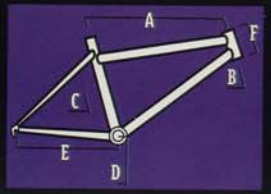

Maximize the power of cantilever brakes by reducing seatstay flex with Brodie Boosters! Perfect for mounting lights or mud guards, our boosters are available in the original magnesium version, and the new CNC machined aluminum version.

A.- canti booster: precision die cast from AZ 91D magnesium. Weight: 46 grams. Powder coated black.
B.- CNC machined aluminum canti booster: oversized for maximum stiffness and mud clearance. Anodized: sapphire blue, gunmetal grey, black and silver.

SOVEREIGN

Lightweight Tange Prestige Logic and Ultimate Ultralight tubing, deluxe Imron paint work, masterful TIG welding and brazing make for a beautiful frame with a solid, responsive ride.

EXPRESSO

Value oriented, the hand-built eXpresso is an excellent deal! Racy geometry, a carefully selected blend of high quality Prestige Cro-Mo tubing and fine TIG welding make for an amazing frame which tackles everything from technical trails to a daily commute with ease.

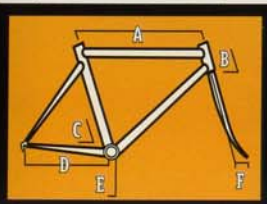

SIZE	A	B	C	D	E	F	WEIGHT
