SAN RAFAEL
MARIN
USA
CALIFORNIA

We take our name from the Northern California county where we are based. Marin is where mountain biking literally began with a small group of cycling pioneers who re-invented the bicycle back in the 1970's. Tempted by the hundreds of miles of fire roads and single track trails criss-crossing over the surrounding terrain, they began to modify their bikes to handle the soaring downhills and breathtaking climbs of Mt Tamalpais, the central feature of this area. These pioneers were the originators of the mountain bike as we know it today and it's evolution continues right here on the trails of Mt Tam.

With the birthplace of mountain biking right in our backyard, we don't take bike design lightly, and neither should you. After all, our efforts are the only thing standing between you and the trail ahead. You need to know that your bike will perform in all conditions and in all situations. Marin mountain bikes do just that.

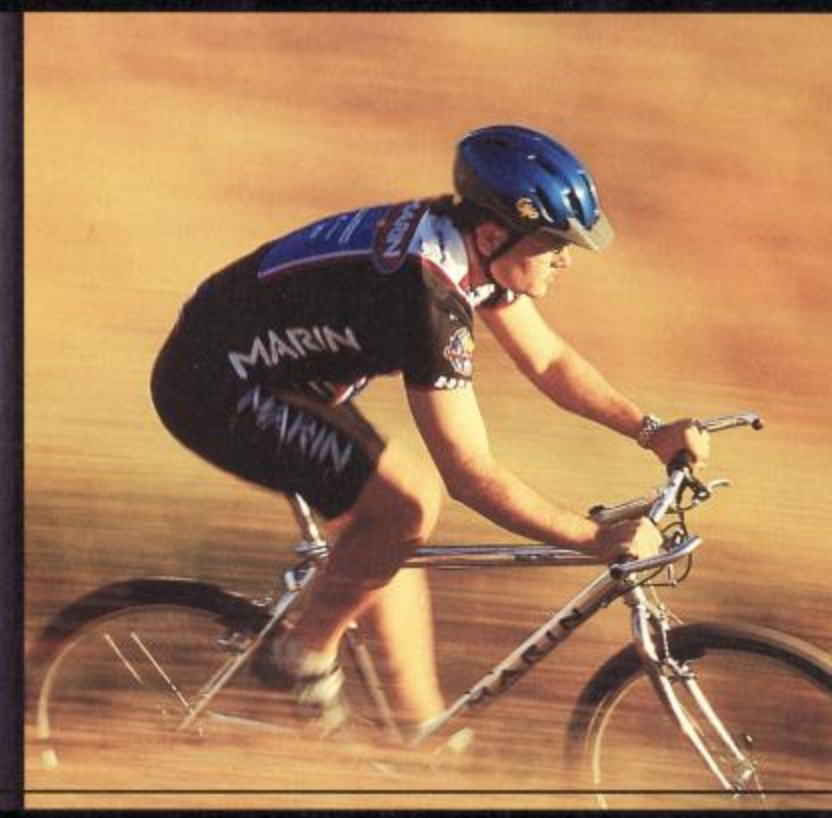

Robert Buckley - President

Birthplace of a Legend

While our designs originate in Marin County, California, they are respected around the globe. From Sydney to Berlin, from Tokyo to London, Marin bikes allow people to see things they have never seen and go places they've never been, all with the performance and handling superiority they have come to expect from the Marin name.

Marin isn't just about building the best mountain bikes, it's about the experiences that those bikes allow you to have, over and over, again and again. We stand behind our bikes, our designs and our philosophy because we use our own products daily right where it all began, on Mt Tamalpais. And that's the best guarantee in the business. The pages ahead give you a look at the fruits of our labor and when you're ready, give a Marin a test ride. We guarantee you'll like what you find.

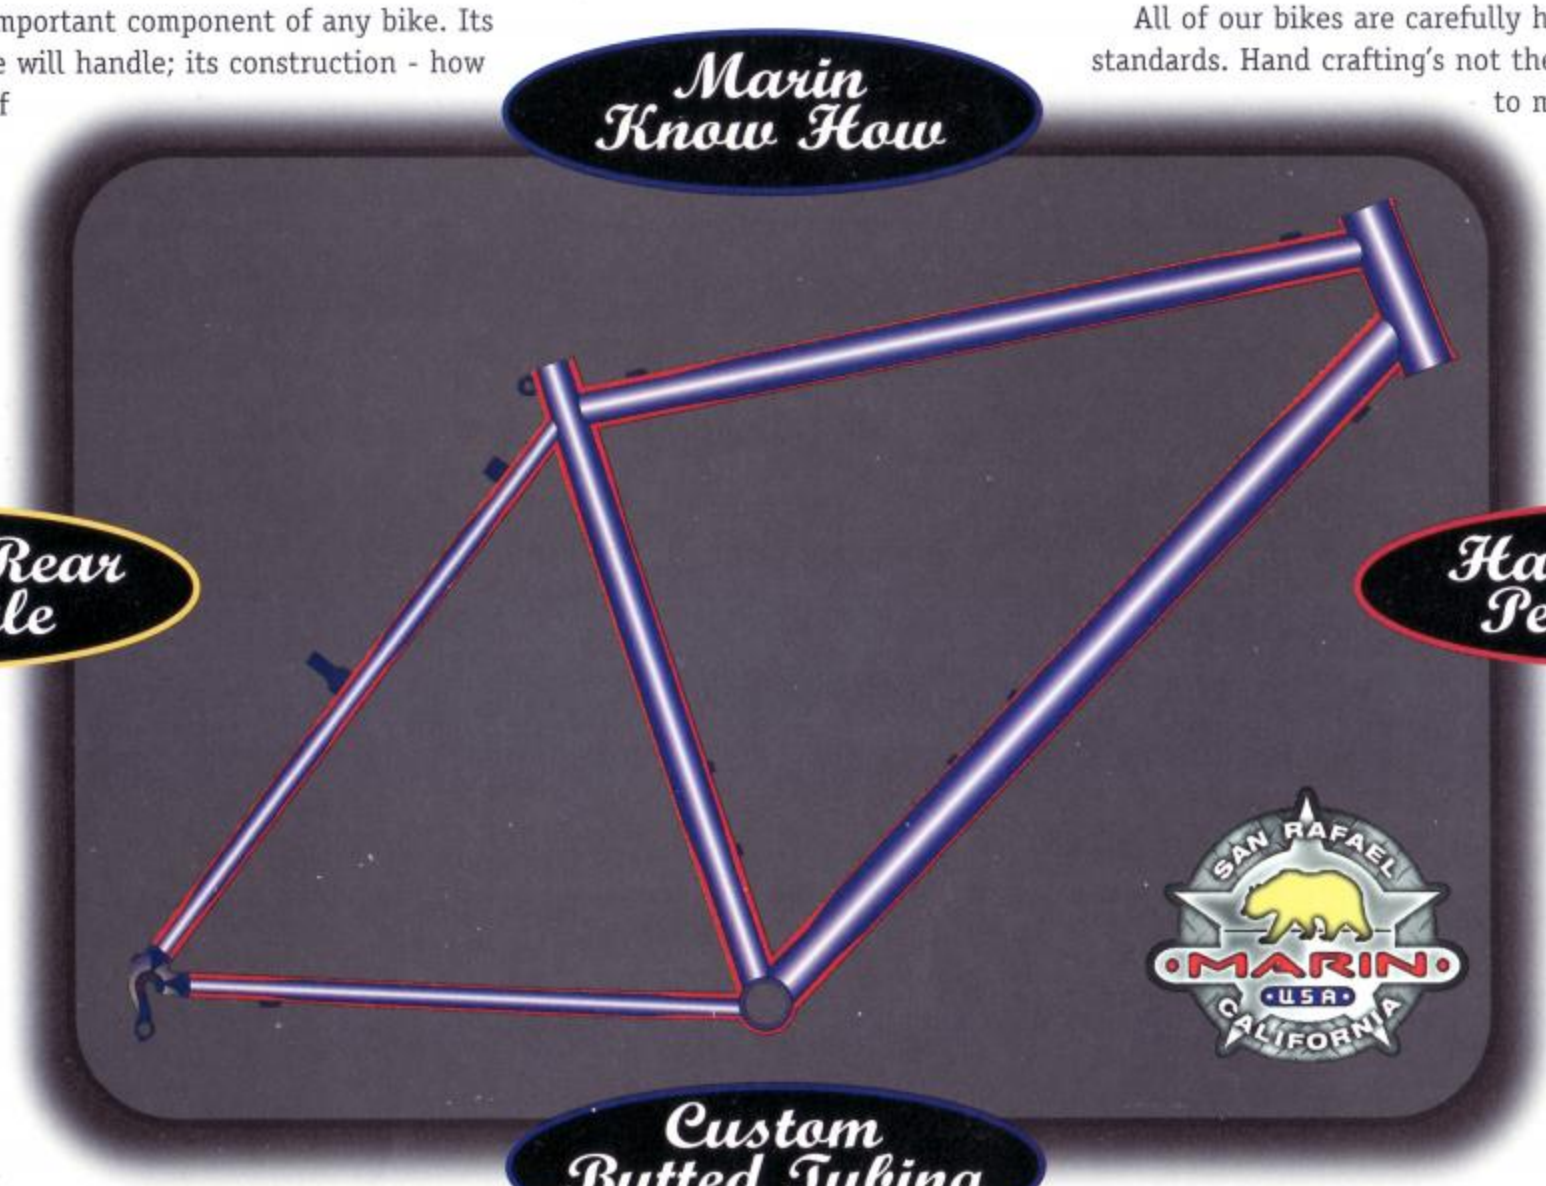

Custom Frame Of Mind

The frame is the single most important component of any bike. Its geometry defines how the bike will handle; its construction - how strong it will be; the quality of tubing - how light. Our bikes are renowned world wide for the quality, light weight and superb handling that has come from years of intensive development right here in Marin County.

Hand Crafted

All of our bikes are carefully hand-built to the highest possible standards. Hand crafting's not the fastest, easiest or cheapest way to make bikes, but we wouldn't have it any other way. Only by using this method can we insure the consistently high quality that mountain bikers the world over have come to expect from the Marin name.

Afterburner Rear Triangle

One of the major contributing factors to the Marin feel is the layout of the rear triangle. We have developed a system that is rigid yet light with shock absorbing properties that make for a very comfortable ride. We call it the Marin Afterburner Concept.

Constant diameter butted seat and chain stays brazed to our beautifully crafted Marin rear dropout with 360° of contact. All of these parts are fabricated specially for Marin and painstakingly welded together by skilled craftsmen.

The Marin Custom Short Butted Frame Illustration. The more red, the thicker the wall of the tubing, especially in high stress areas for added strength.

Marin Construction

Two bikes that appear to have similar geometry can often feel completely different out on the trail. The reason? The quality of the tubing.

Every single one of our bikes features tubing that is unique to us, whether it be steel, aluminum or titanium. We have it butted to our precise specifications so that we can be sure that each bike in the range has that unique Marin feel built in. By using size specific tubing we can also insure that each frame size has the optimal butting dimensions for the perfect strength and weight for every model.

Marin Lite 96 features our most performance oriented components yet. Over the years we have become known for producing some of the lightest bikes around. Marin Lite parts have helped us do this. Shaving weight from components can sometimes lead to failure. Our high quality range of components however, are built strong enough to withstand the harshest conditions and avoid that risk.

We've continued our collaboration with Wilderness Trail Bikes, one of the industry leaders in innovative design, to perfect the Marin Lite Brakes and Quake 7.0 & 7.1 tires. The brake design offers ease of adjustment along with great stopping power at the touch of a finger. The cold forged post is ultra-light and stiff and combined with Ritchey brake pads the stopping power is awesome.

Marin Lite Components

The Quake tires are front (7.0) and rear (7.1) specific and have been warmly received by riders and magazine testers alike. The front tire tracks precisely through a variety of terrain, while the rear tire offers levels of grip that make even the most technical climbs possible.

Marin Lite 96 also features our Alloy Bar, Cold-Forged Stem with two-bolt removable front plate for easy bar changes; one-piece anatomically shaped Bar Ends; new Marin logo asymmetrical firm rubber Grip and our new easy-adjust one bolt seatpost design.

Marin Lite
Performance Oriented Design

Shimano

Shimano's new components for '96 increase shifting ease by 30%. Shimano means consistent performance.

Manitou

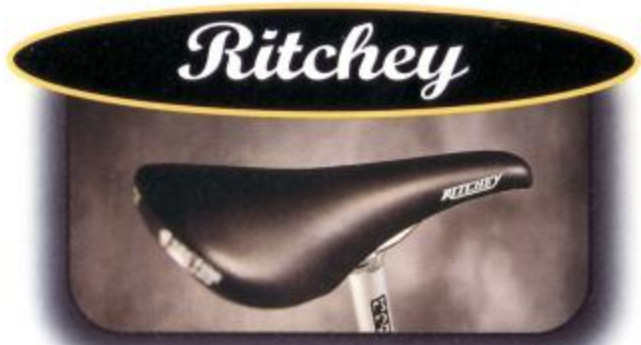

We proudly offer Answer Manitou suspension forks with their new oil dampening cartridge, as an option on all of our mountain bikes. With this option you can fully customize your riding set-up.

Grip Shift

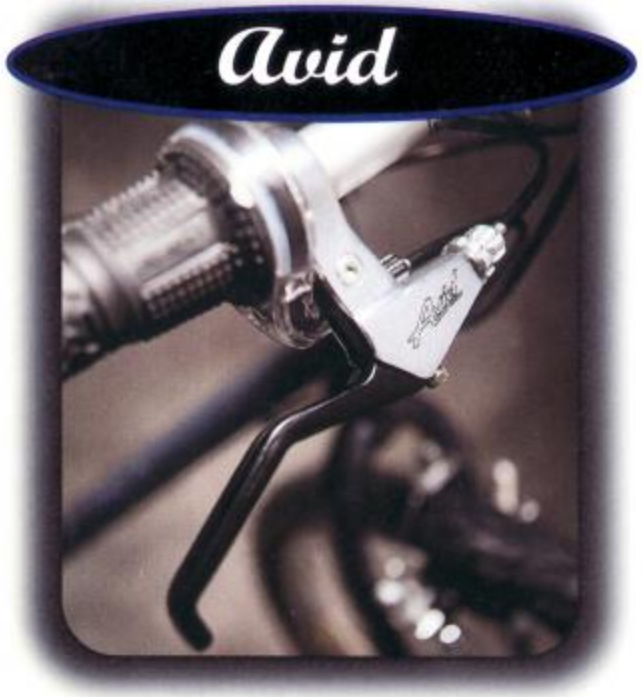

Grip Shift lightweight twist shifting

Ritchey

Ritchey Vector Plus leather saddles.

Avid

Avid Speed Dial 2.0 Brake Levers provide sure braking power right at your finger tips.

White Industries

White Industries' Hubs & Cranks are regarded as the best in the industry for their respective stiffness and aesthetic appeal. That means great power transfer for you and sharp looking components as well.

Mavic

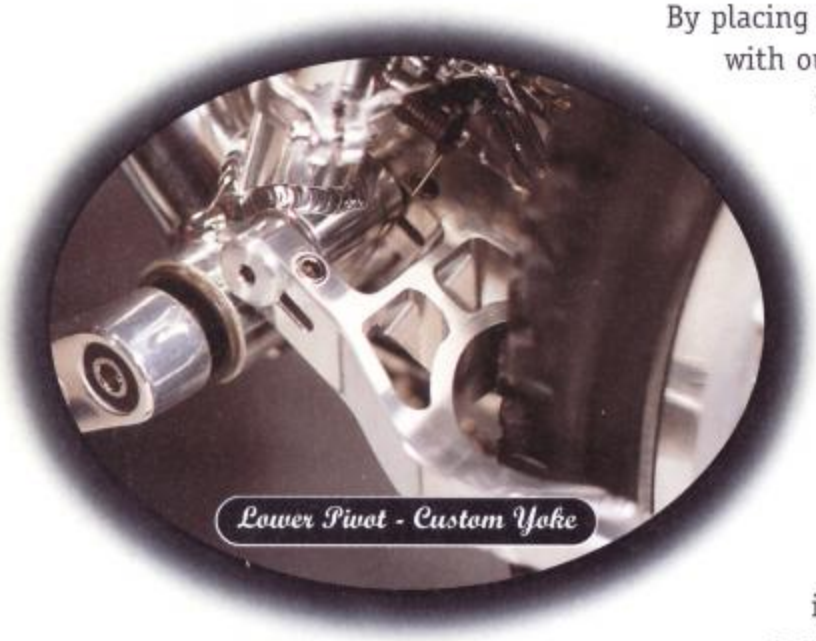

Mavic Rims, torture tested by Team Marin, have delivered again and again. Durable & Light Weight!

Our '96 full suspension design comes to you direct from the podiums of World Cup Downhill Racing. Extensively tested by our downhill team, our new Rocker Suspension technology is very responsive and supple without stealing power from the rear wheel. The Titanium FRS, available as a frameset only, provides 5.3" of rear travel, while the aluminum Team FRS and Nail FRS have 3.3" of rear travel. Evenly balanced with Manitou's new Mach 5 front shock, the 1996 Marin FRS design is the best handling full suspension today!

Full Suspension Perfection

By placing the upper pivot at the seat cluster with our new mono shock design, we can maintain the lateral rigidity of the traditional diamond frame. This creates several major benefits including traditional water bottle placement, and better clearance with a low profile swingarm pivot.

With the lower pivot placed just above and behind the bottom bracket, we eliminate the pogo effect commonly found in full suspension. And that means a smooth and responsive ride for you.

The Team FRS and Nail FRS both take advantage of our new Rocker Suspension design. When paired with the natural stiffness of a main triangle made from 7000 Series aluminum tubing, these bikes create the ultimate full suspension set up. With the ability to fine tune both the front and rear shocks to fit your riding style, The Team and Nail FRS can be dialed in for excellent cross-country riding as well as downhill high performance.

Titanium tubing creates a truly memorable ride. It's natural shock absorbing properties take the edge off bumps while maintaining a rigid ride. We were the first company to offer a production titanium bike and we've been in love with this material ever since. The Team Titanium is also the official cross country bike for Team Marin.

Marin's most innovative design to date, the 1996 Monocoque features a unique and lightweight alloy frame. The construction of the hollow frame body provides for extreme lateral stiffness and a strong platform for power transfer. The shape of the frame also allows for greater stand over height and a traditional water bottle mount on the seat tube. By pushing the envelope of R&D, we can bring advanced design concepts to market and make tomorrow's technology available today.

The '96 Indian Fire Trail features a brand new frame design. By decreasing the diameter of the down tube we have shaved several ounces from the frame, without affecting stiffness or strength. We have also redesigned the chain stay yolk to allow for added tire clearance. The Indian also features a truly custom component spec with White Industries cranks & hubs, Avid levers, Ritchey saddle, and Mavic rims, as well as top line Marin Lite and Shimano parts.

All of our alloy bikes now share the same custom 44mm down tube which is lighter and more resilient than in previous years. With it's ultra light weight wheels complimenting the new frame, this year's Rocky equals very impressive performance.

Another fabulous success story looks set to continue with the 1996 version of the Nail Trail. We have upgraded the 7000 series polished alloy frame with our new custom butted 44mm down tube, and added a whole range of custom parts like Dia Compe PC 7 levers, Mavic rims and new Ritchey saddle. The Nail Trail is performance aluminum that rides as good as it looks.

The ever popular Eldridge Grade has received an upgraded frame for the 1996 season. Higher grade tubing and special butting will improve performance and make this classic bike ride better than ever.

For 1996 there have been frame and component upgrades on a bike that has become a firm favorite with sport class racers. The SE now sports Avid Speed Dial 2.0 levers, upgraded STX RC components, threadless cold forged stem, and the new Ritchey saddle. With custom butted tubing we have reduced frame weight and improved handling still further. Lighter, smoother, faster - better than ever.

Don't let it's sophisticated looks fool you. This bike is at home in the dirt. The Bear Valley shares the same geometry as our high end models so the performance that you need is always on hand. Upgrades for 1996 include a lighter frame, Mavic rims, Ritchey Saddle, and the new Shimano STX/STX RC components.

If you are looking for a top quality machine that offers a range of high quality features, a great ride and effortless performance, the Muirwoods will fit the bill. The frame has all of the classic Marin features, ultra lightweight butted tubes, and Afterburner rear triangle all meticulously hand built. This gives a frame of rare quality at this price level.

FRAME	Marin Custom Butted Cromoly, Investment Cast Dropouts

The Golden Gate Bridge spans the distance between Marin County and one of the most famous cities in the world. San Francisco is well known for it's spectacular hills and winding streets, which has inspired us to design the ultimate bikes to tackle this unique city. Our line of 6 City Bikes incorporates much of the award winning design that we have learned from our work with mountain bikes, and also takes advantage of the 700c size wheels found on road bikes. With durable 36 hole-14 gauge spoke wheelsets built to handle harsh city streets, and a lively ultralight frame equipped with rack mounts, our City Bikes meet the challenges of urban riding with elegance and style.

An ultra light 7000 series alloy frame is at the heart of this fabulous bike. Complimented by our super light wheel set and Marin Lite components, this makes for a very fast and responsive ride. Shifting is a breeze thanks to Grip Shift shifters and a Shimano drivetrain and you'll find the Marin Lite brakes provide awesome stopping power. The Point Reyes is the ultimate city bike.

The Redwoods features the same superb alloy frame as the Point Reyes, which guarantees great handling through the urban environment. Fitted with Rapidfire Plus shifters, Shimano STX components and top quality wheels, this is a quality package.

The Sausalito has been an extremely popular bike since it's introduction into the Marin line thanks to it's low key looks, light weight and agile handling. The Sausalito takes it's name and style from the elegant city on the shore opposite San Francisco which is a popular weekend destination for riders from all over the Bay area.

The San Rafael takes it's name from the location of our headquarters here in Marin County. With it's responsive cromoly tubing, Grip Shift & Shimano drivetrain, and tough wheelset, the San Rafael will keep you rolling across the city streets.

The Stinson is a high quality bike at a sensible price. It features a responsive cromoly frame with all of Marin's "know-how" built in. Add to that, 21 easy shifting gears to get you up the steepest hills, powerful brakes and predictable handling.

New for the 1996 season this bike takes it's name from the small Marin County town that is home to the ferry terminal that takes Marin residents the short sail across the bay into the heart of San Francisco. This model shares the same great handling as our more expensive city bikes, at a price that won't break the bank. Great for commuting and light trail use.

Marin Mountain Bikes, Inc. Limited Warranty

Subject to the terms, conditions and limitations set forth below, Marin Mountain Bikes, Inc. (a California Corporation) located in San Rafael, California warrants to the original owner of each new Marin bicycle that this bicycle is free from defects in workmanship and materials provided it is purchased from an authorized Marin Bicycle Dealer.

This Limited Warranty covers frames and rigid forks of Marin Bicycles and shall be for the lifetime of the original owner.

Marin likewise warrants all original parts including paint and decals for one year from the date of purchase.

Suspension forks shall be covered under the stated warranty of the original manufacturers.

This warranty is expressly limited to the repair or replacement of a defective frame, fork, or defective part and is the sole remedy of the warranty.

This warranty applies only to the original owner and is not transferable. Claims under this warranty are to be made through an authorized Marin dealer. Proof of purchase is required.

A warranty registration card must be completed and received by Marin Mountain Bikes before a warranty claim may be processed. Please include the bicycle serial number on the warranty registration card.

The warranty does not cover normal wear and tear, improper assembly, follow-up maintenance, or installation of parts or accessories not originally intended or compatible with the bicycle as sold.

This warranty does not apply to damage or failure due to accident, abuse or neglect.

Marin shall not be responsible for incidental or consequential damages.

Labor charges for parts changeovers or incidental costs such as transportation to and from an authorized dealer for repair or replacement of any defective part or accessory are not covered in the warranty.

The user assumes the risk of any personal injury or damage to the bicycle or other losses if the bicycle is used at any time for stunt riding, jumping, acrobatics, dirt biking or similar activities, competitive riding, with power or motor assistance of any kind, or anything other than normal use. This warranty gives you specific legal rights, and your rights may vary from state to state.

Marin does not authorize or permit anyone else, including it's dealers, to make any other warranties, express or implied, for Marin.

This warranty applies only for those bicycles purchased in the U.S.A.

If purchasing a Marin Bicycle outside the U.S.A. ask your dealer for the specific warranty in your country.
