360

onZa stuff rules.

Want a second opinion? Ask the Pros. Don't be surprised when they say we RIP!

Still, there are some knuckleheads who think we only make bar ends.

Yeah, right...

check out our veritable cornucopia of righteous rubber and high-tech metal.

Decide for yourself.

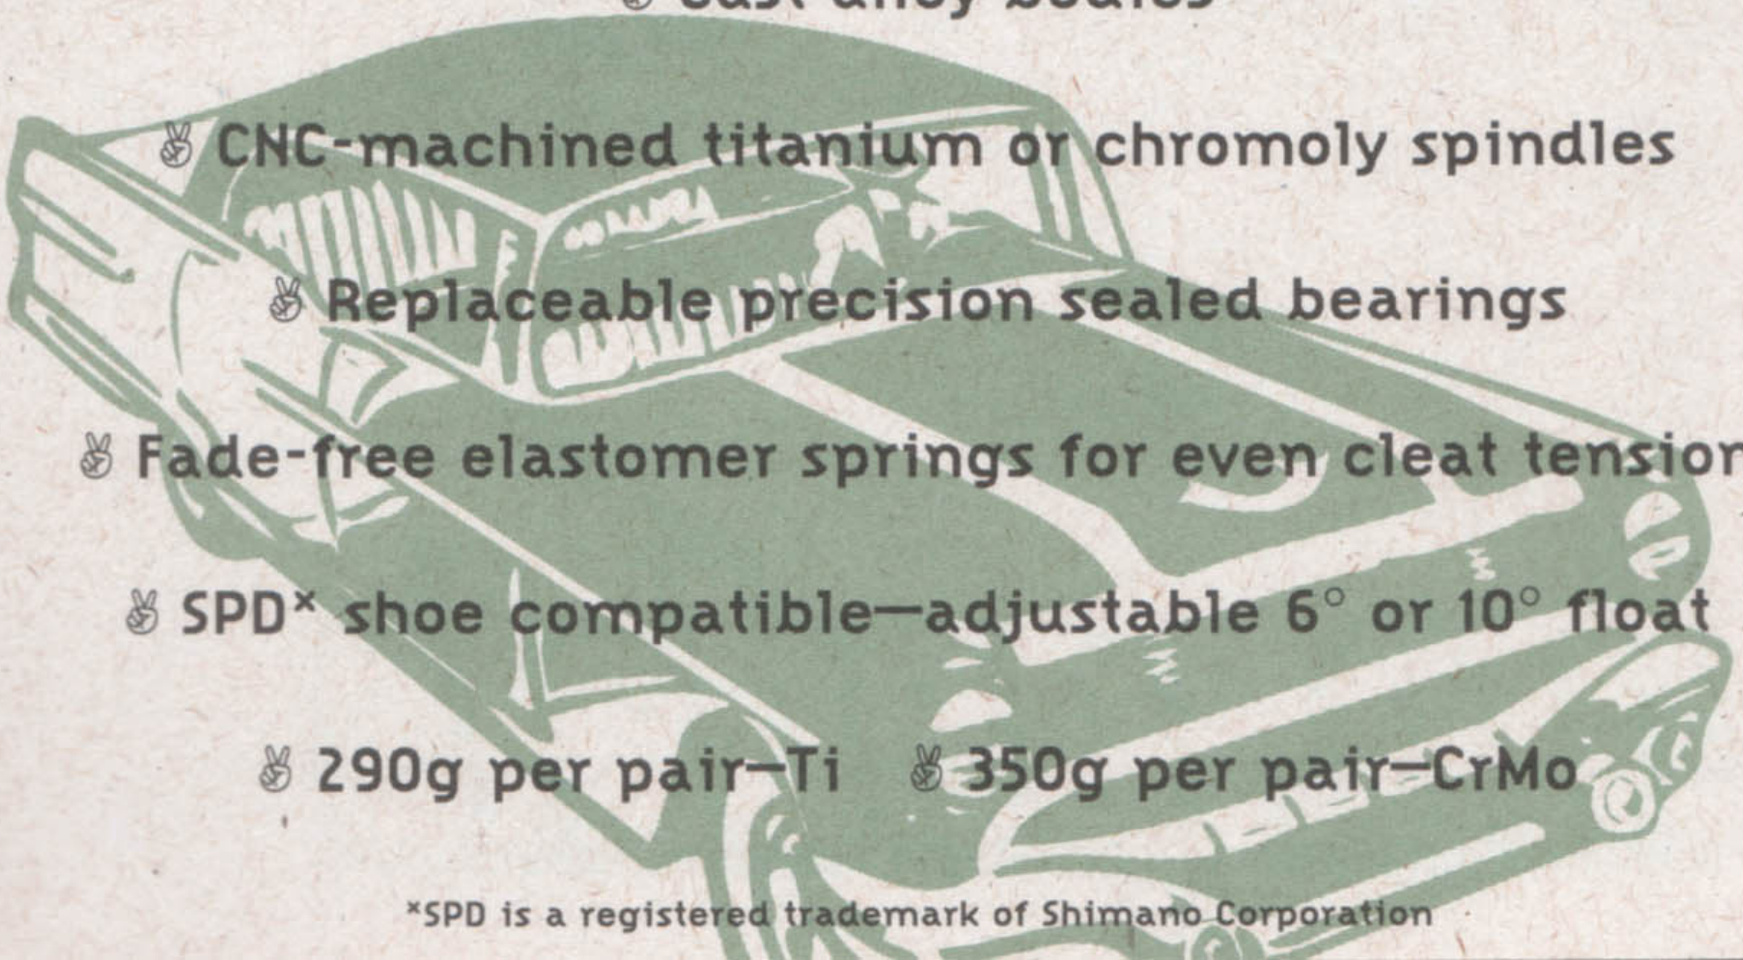

h.o. pedals

pedals

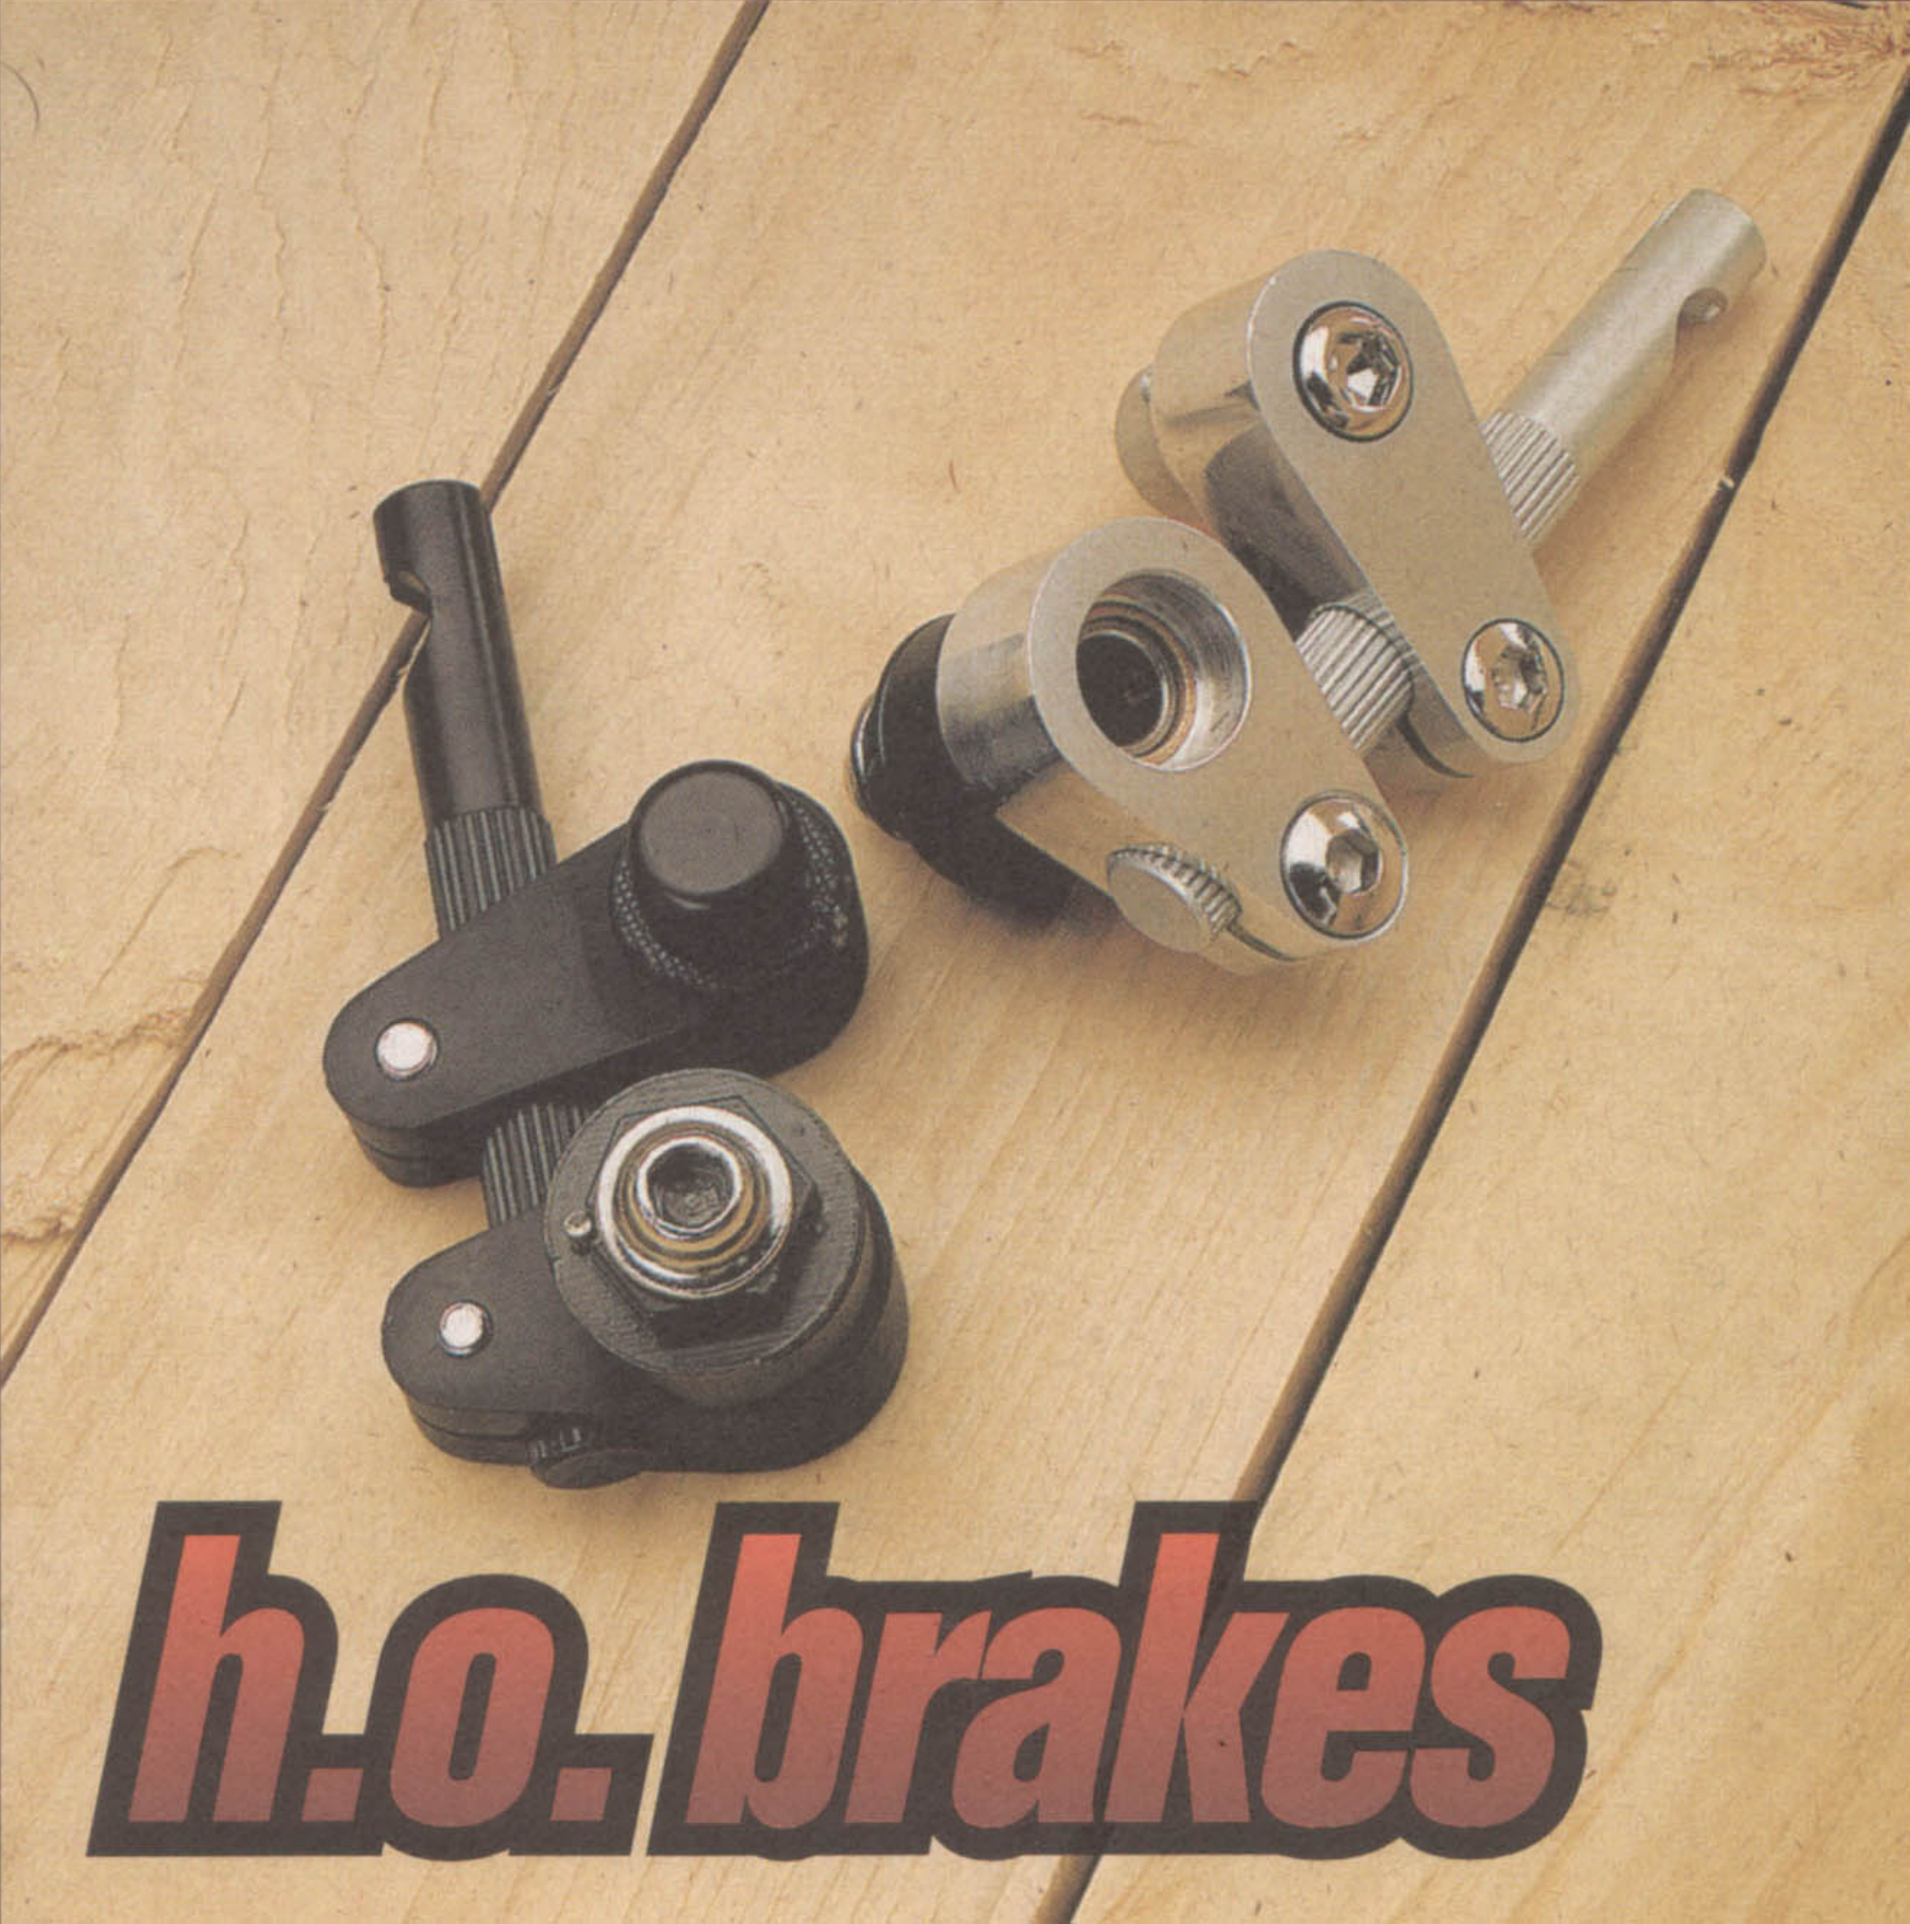

Put your foot on the pedal and gas it.

This baby's built for speed.

- Cast alloy bodies
- CNC-machined titanium or chromoly spindles
- Replaceable precision sealed bearings
- Fade-free elastomer springs for even cleat tension
- SPD* shoe compatible—adjustable 6° or 10° float
- 290g per pair—Ti
- 350g per pair—CrMo

*SPD is a registered trademark of Shimano Corporation

h.o. brakes

Avid Brakes

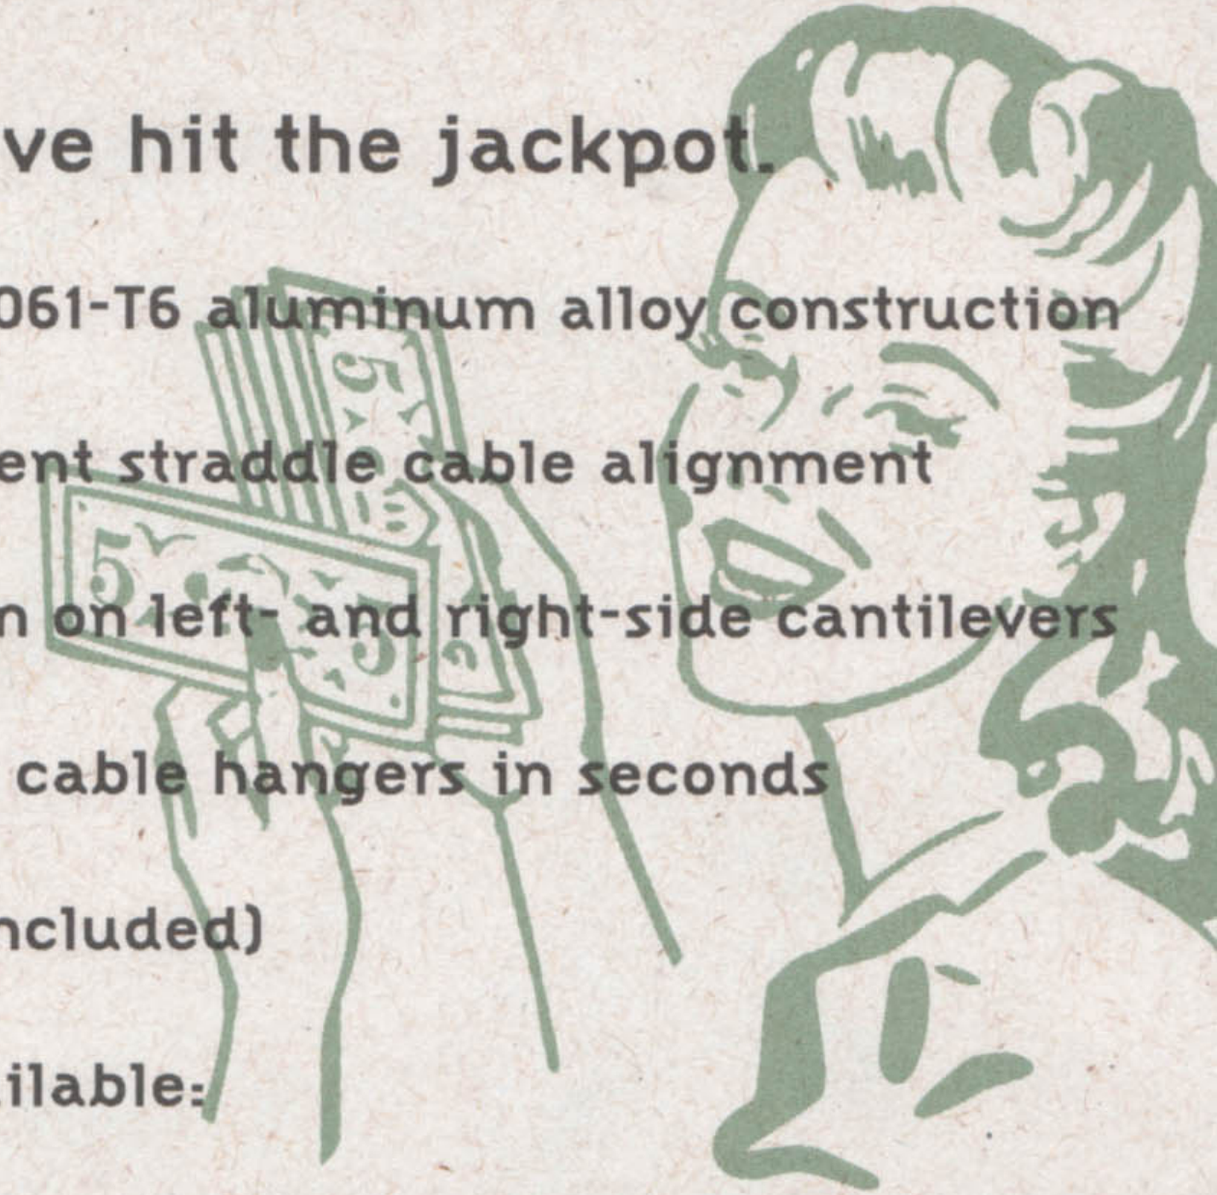

Ain't nothing stopping us until we say so.

- Cam activation delivers precise modulation and powerful stopping
- CNC-machined 7075 T-6 aluminum construction
- Installation & tuning is a no-brainer
- 125g per wheel

chill pills

This time we've hit the jackpot.

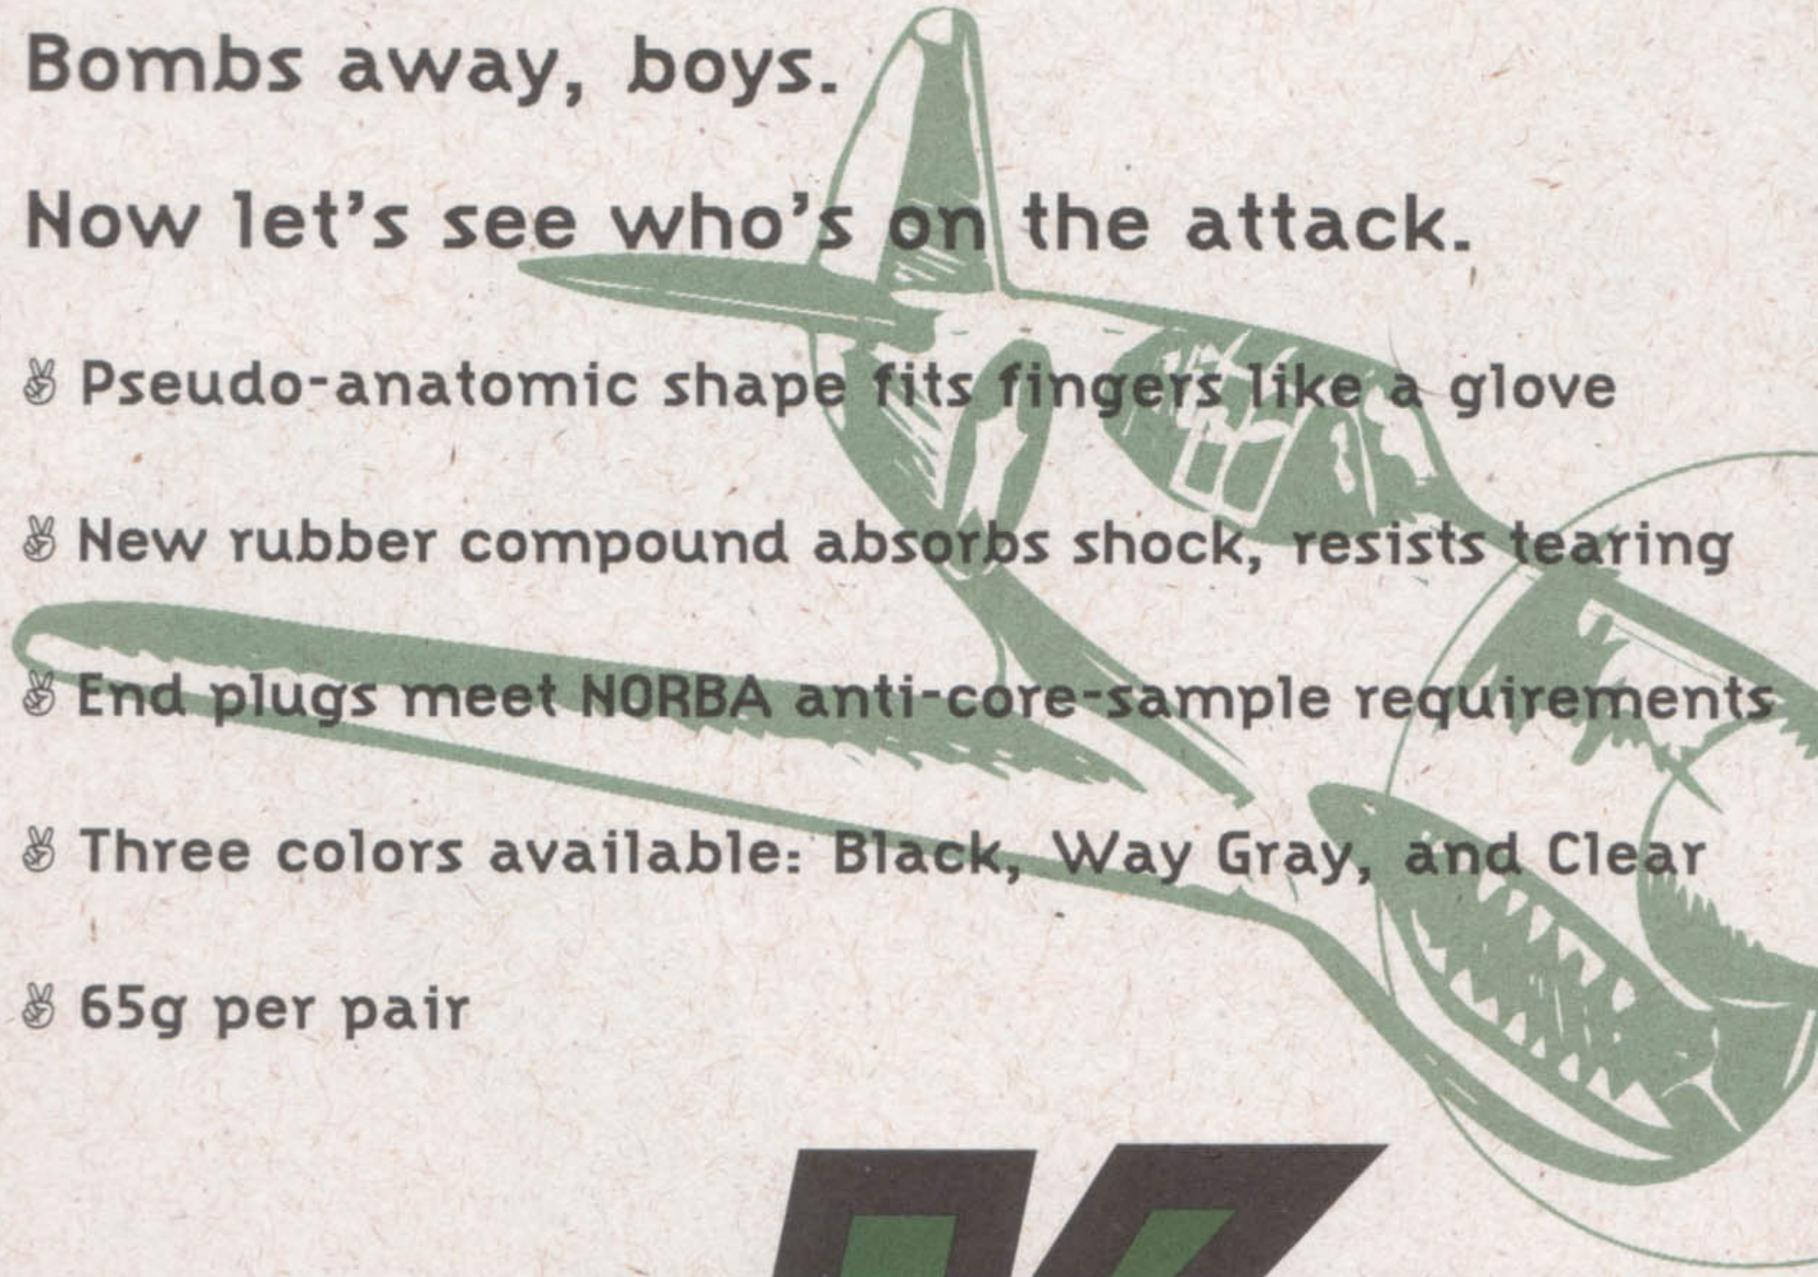

- CNC-machined 6061-T6 aluminum alloy construction
- Provides consistent straddle cable alignment
- Equalized tension on left- and right-side cantilevers
- Replaces cheesy cable hangers in seconds

  (Allen wrench included)
- Seven colors available:

  Red, Black, Blue, Green, Silver, Turquoise, Purple
- 8.5g per pair

chil

ulés

Bombs away, boys.

Now let's see who's on the attack.

- Pseudo-anatomic shape fits fingers like a glove
- New rubber compound absorbs shock, resists tearing
- End plugs meet NORBA anti-core-sample requirements
- Three colors available: Black, Way Gray, and Clear
- 65g per pair

ulés

porcipaws

Jane knows a nice squeeze

when she feels one.

- Ultra thin walls reduce hand fatigue
- Supersoft molded Kraton construction
- Tough resin end plugs
- Three colors available: Black, Purple, and Clear
- 54g per pair

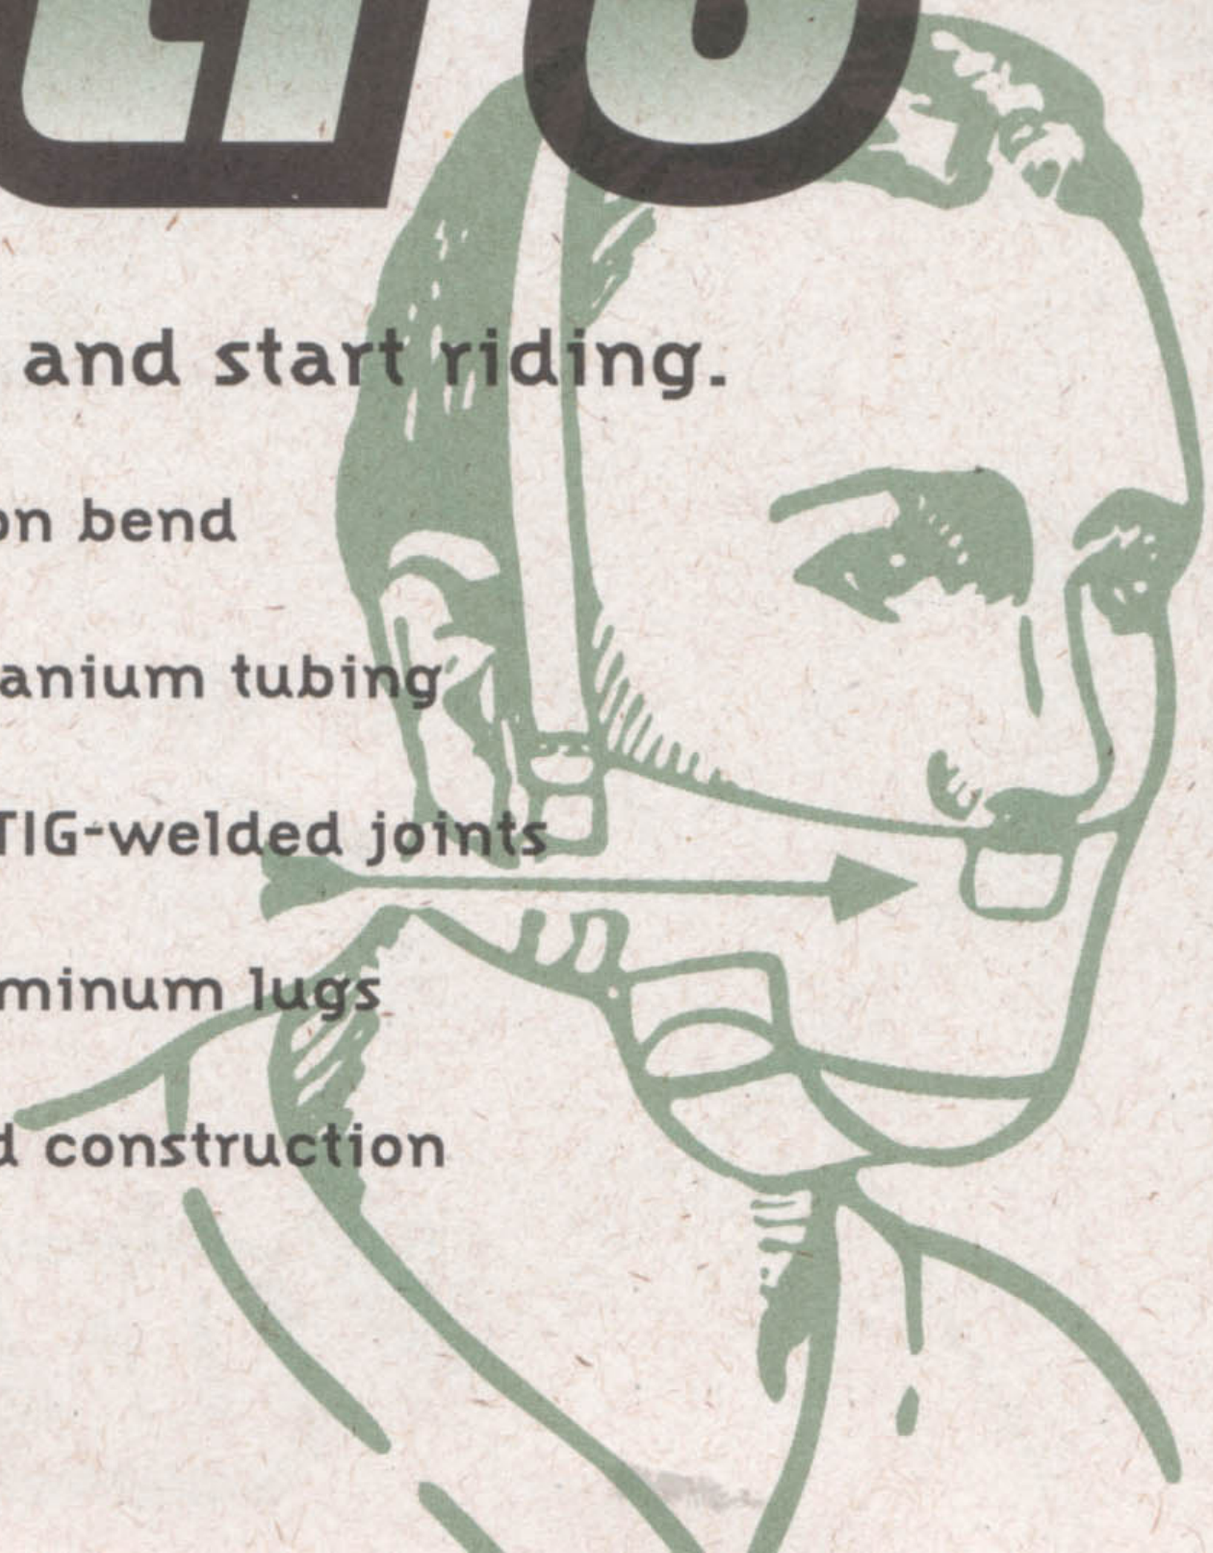

porcip

oz-ti's

onZa-tiS

Quit whining and start riding.

- onZa Competition bend
- Super-strong titanium tubing
- Hand-mitered, TIG-welded joints
- Cold-forged aluminum lugs
- Thermal-bonded construction
- 180g per pair

cwa's

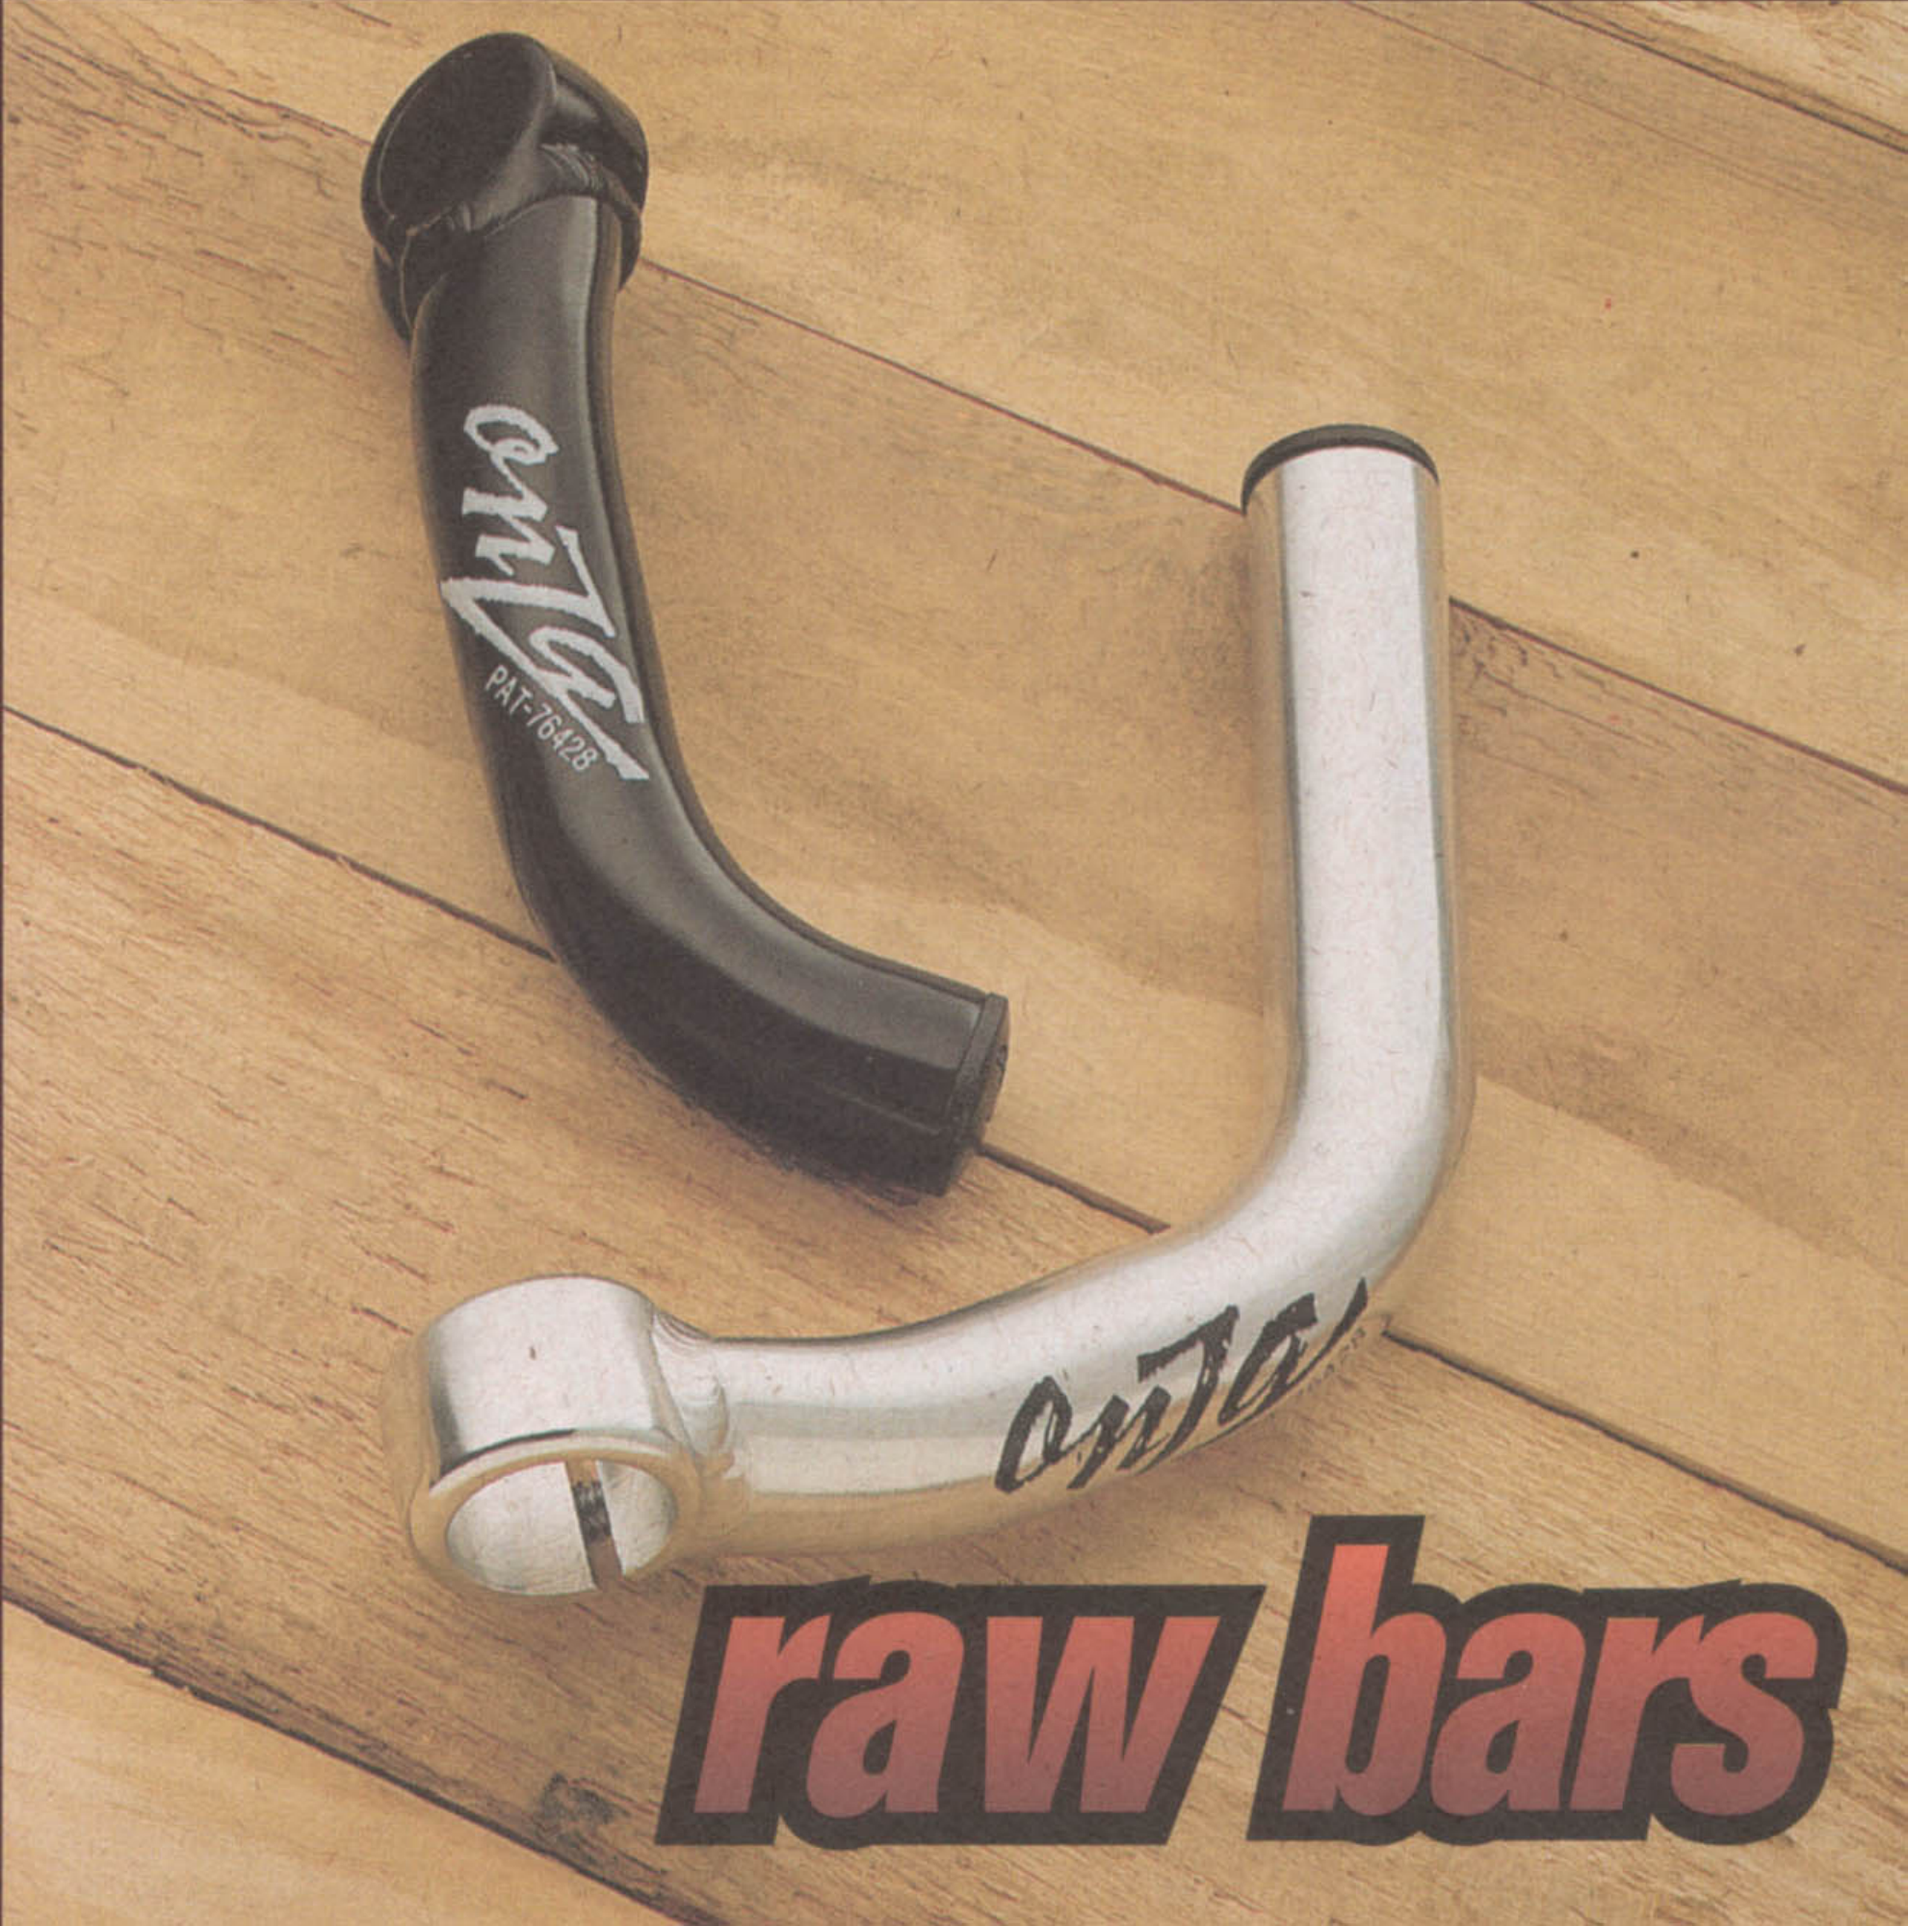

Dig in, kids—mom's serving it up hot.

CWA's

- Cut, Welded Aluminum (CWA) construction
- onZa Competition bend—the choice of pros
- Cold-forged 6061 T-6 alloy lugs
- Four polished & anodized colors:

  Black, Blue, Red, Green
- 173g per pair

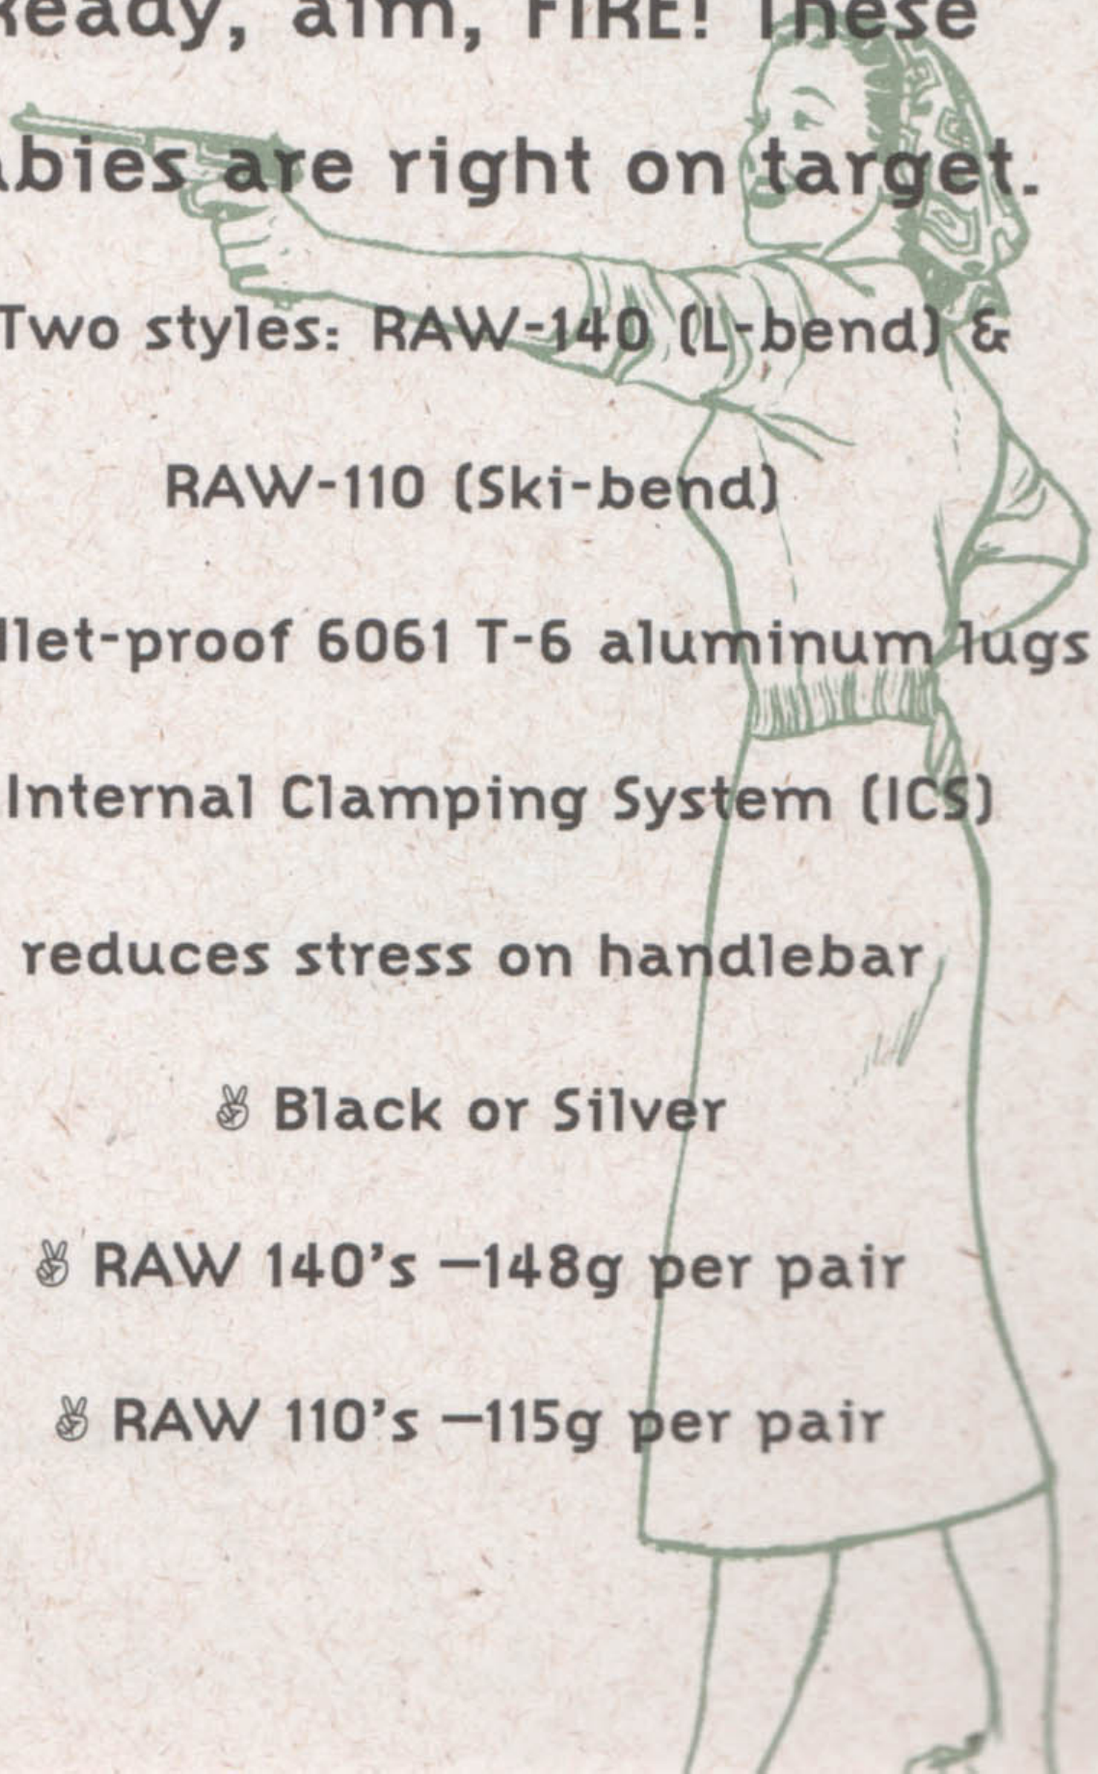

raw bars

Easton

Ready, aim, FIRE! These babies are right on target.

- Two styles: RAW-140 (L-bend) & RAW-110 (Ski-bend)
- Bullet-proof 6061 T-6 aluminum lugs
- Internal Clamping System (ICS) reduces stress on handlebar
- Black or Silver
- RAW 140's –148g per pair
- RAW 110's –115g per pair

mongo II

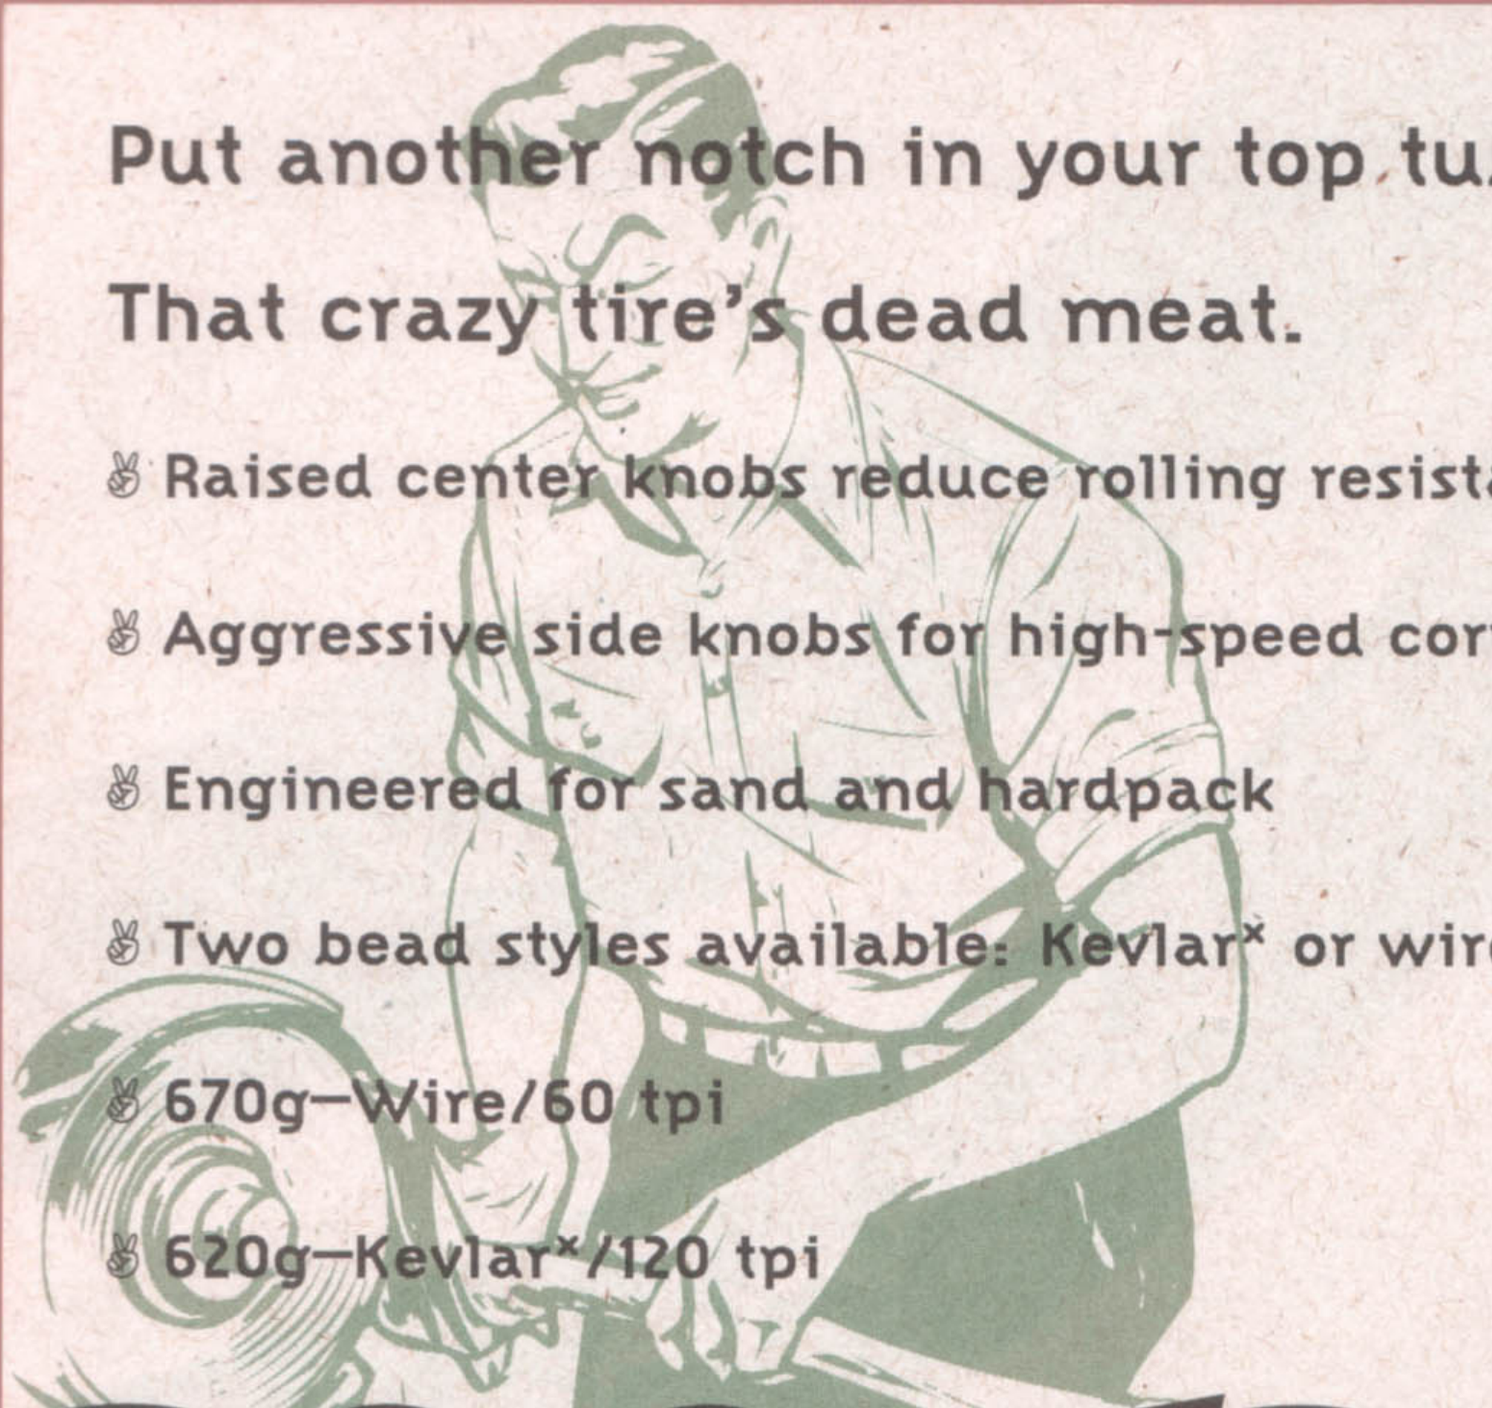

Don't adjust your headset, Captain—we have you on radar.

- Compact design lowers handlebar
- One-key lock release—no special tools required
- 100% machined alloy construction with hardened steel bearing races
- Precision sealed-mechanism needle bearings
- 1-1/4"—127g
- 1-1/8"—113g
- Black or Silver

mon

aggro

Put another notch in your top tube.

That crazy tire's dead meat.

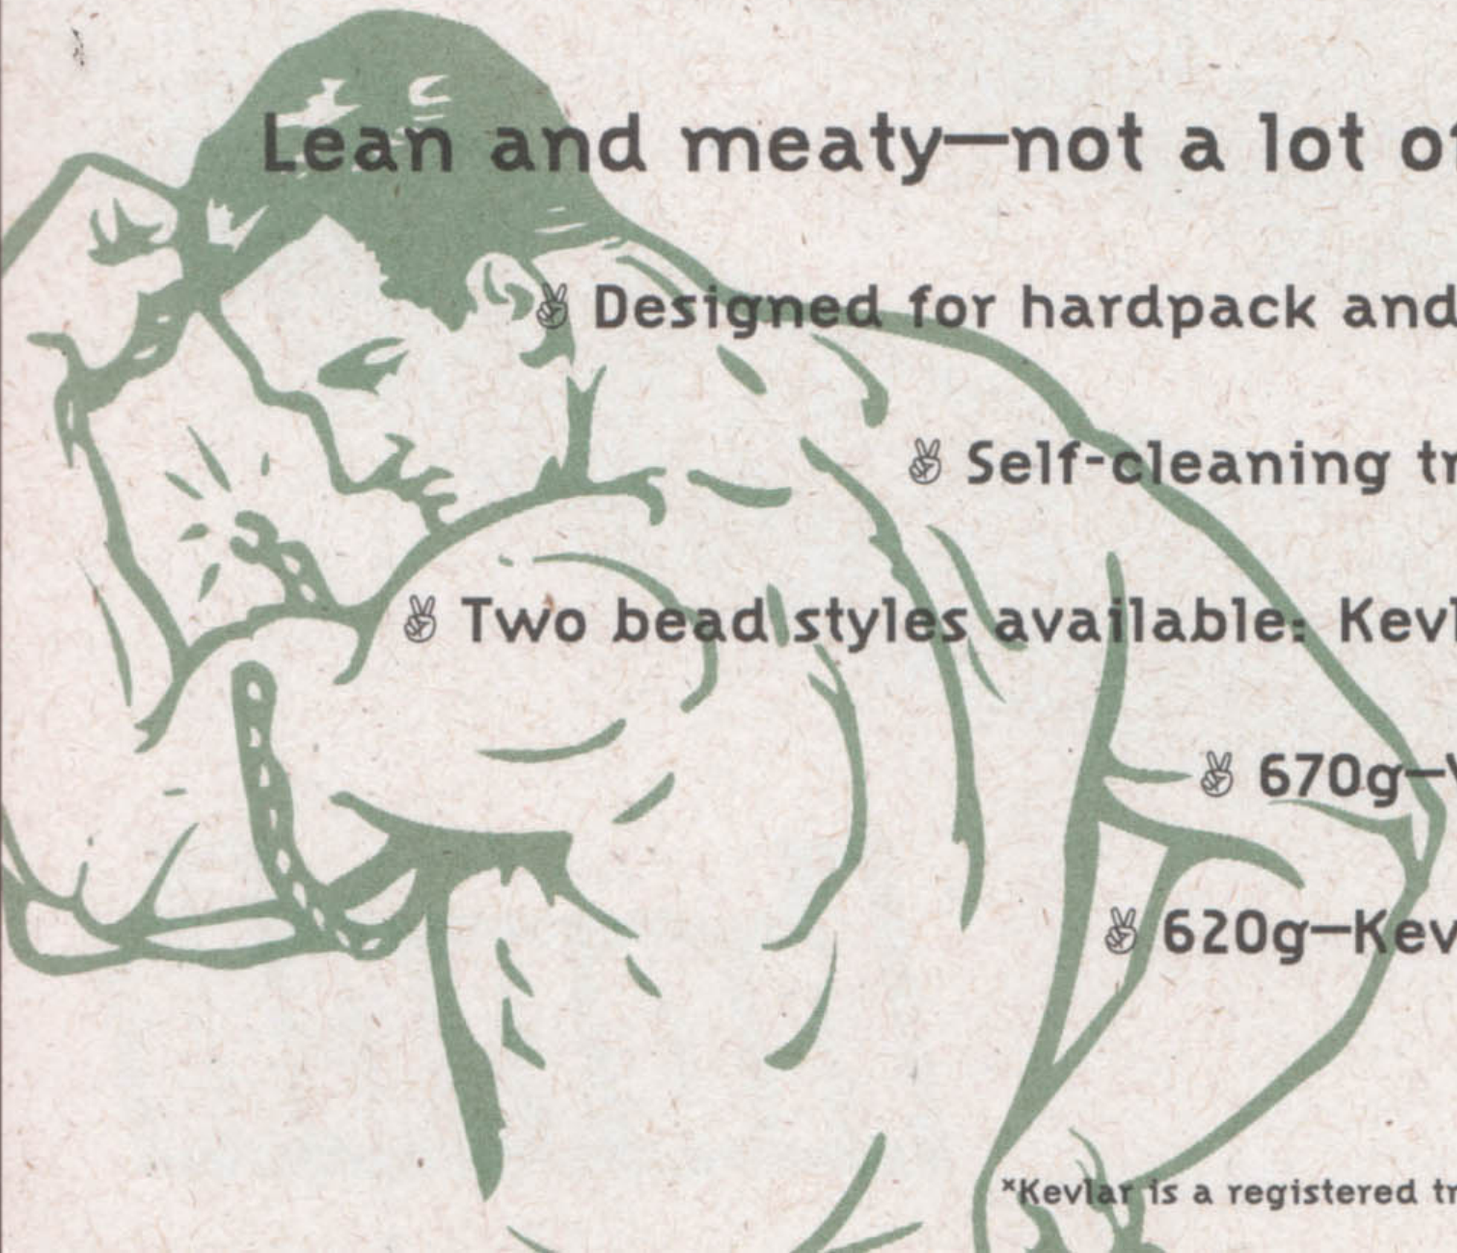

- Raised center knobs reduce rolling resistance
- Aggressive side knobs for high-speed cornering
- Engineered for sand and hardpack
- Two bead styles available: Kevlar* or wire
- 670g—Wire/60 tpi
- 620g—Kevlar*/120 tpi

aggro

honch

honch

Lean and meaty—not a lot of hot air.

- Designed for hardpack and loose sand
- Self-cleaning tread design
- Two bead styles available: Kevlar* or wire
- 670g—Wire/60 tpi
- 620g—Kevlar*/120 tpi

*Kevlar is a registered trademark of Dupont

rail

rail

Ground control to Major Tom?

Not on this mission.

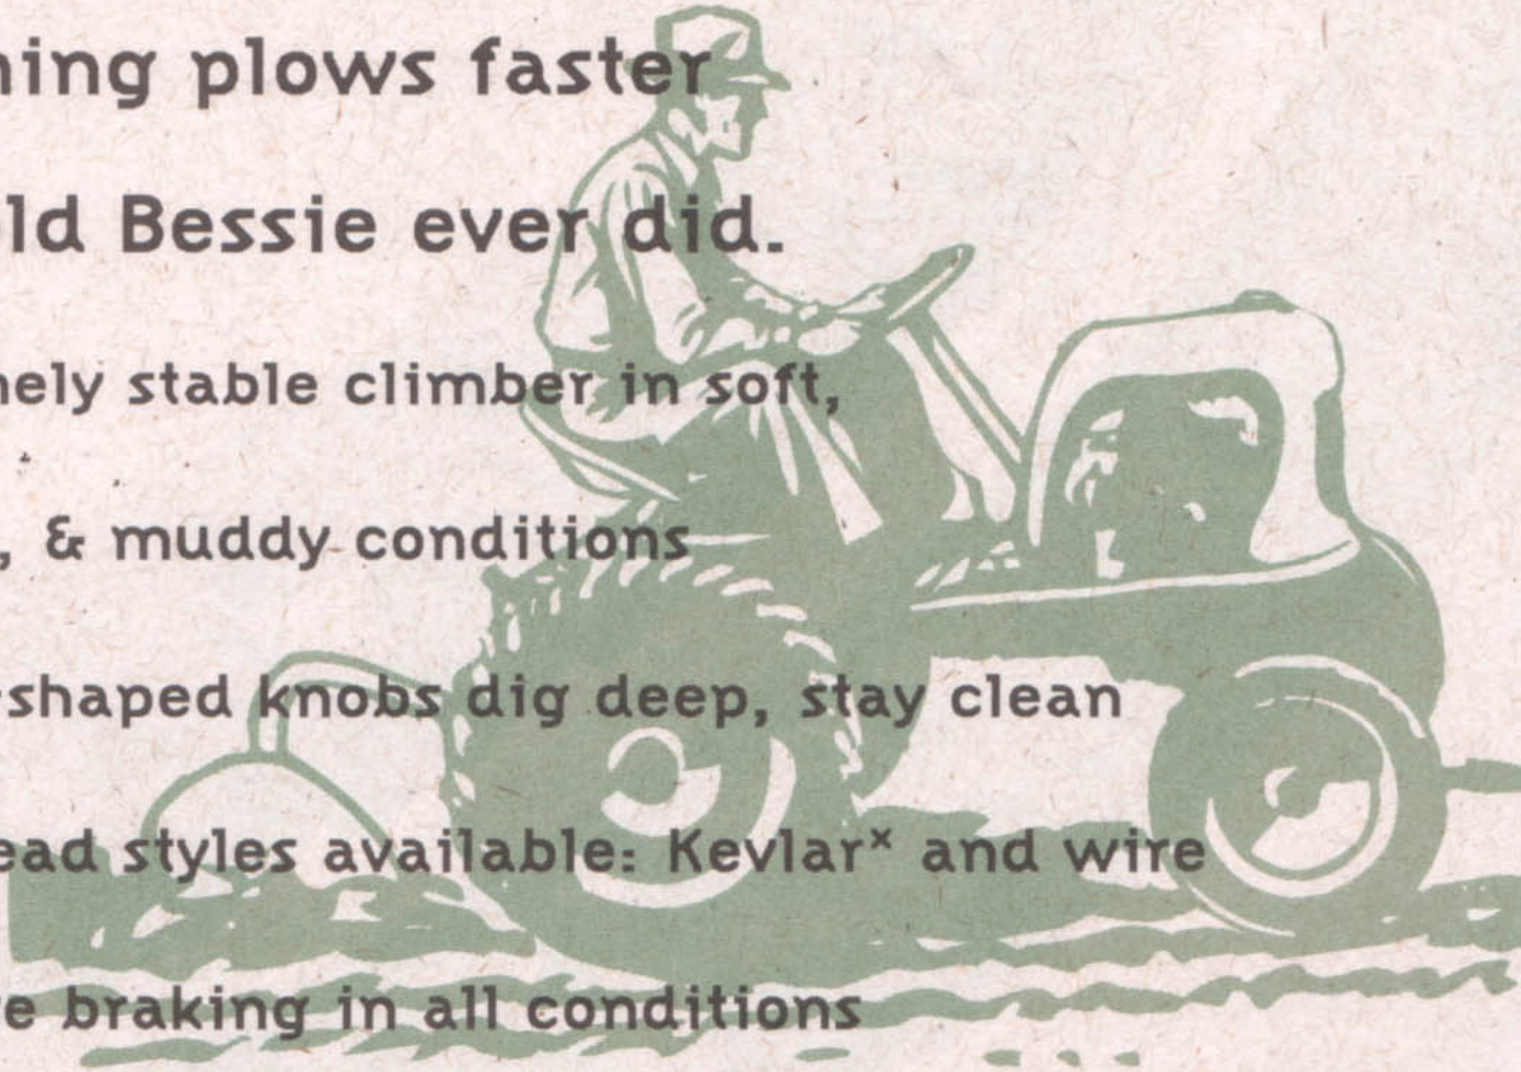

- Works great on dry, sandy soil
- Sticks like a pin in wet, sloppy conditions
- Self-cleaning tread design
- Two styles available: Kevlar* or wire bead
- 620g—Wire/60 tpi
- 560g—Kevlar*/120 tpi

*Kevlar is a registered trademark of Dupont

rip

This thing plows faster than old Bessie ever did.

- Extremely stable climber in soft, loamy, & muddy conditions
- Chisel-shaped knobs dig deep, stay clean
- Two bead styles available: Kevlar* and wire
- Positive braking in all conditions
- 620g—Wire/60 tpi
- 560g—Kevlar*/120 tpi

*Kevlar is a registered trademark of Dupont

We live, breathe, and eat racing. It's in our blood, and our designs prove it. We build to race, and race to learn. Our mission: To take bicycle racing to the next level. Period. We've accepted it... Will you?
