

PIVOT® CYCLES 2013

PIVOT

MACH 429
CARBON

Welcome to Pivot Cycles

It's been another exciting year and we'd like to take the opportunity to thank all of our current Pivot fans and customers as well as those looking to join the Pivot family in the coming year.

2012 marked the introduction of our first carbon Pivot (the Mach 5.7) with much anticipation and excitement. We always said that we would not introduce a carbon bike just for the sake of having a carbon bike. It had to have a true performance benefit and offer the benefits of lighter weight, increased stiffness, and added strength. With the 5.7 Carbon we achieved our goals of building a lighter, stiffer, and stronger frame and in the process made a lot of really happy new friends and customers all over the world.

Given the success of the 5.7 Carbon, it's quite natural that we would apply what we've learned to even more products in our line. In what has to be the worst kept secret in Pivot history, we are introducing the all new Mach 429 carbon. Many expected to see this one from us sooner, but like all great things, the new 429 was certainly worth the wait. I get excited just thinking about it. The new 429 has been well over two years in the making as it is not just a lighter, stiffer, carbon version of the aluminum model, but an all new design that builds on the stunning reputation of the existing aluminum 429, featuring increased stand-over clearance and an overall, lighter, and more compact frame design. Trust me; it's a bike you cannot wait to throw a leg over.

And… just like the 429 was the worst kept secret; the new Pivot Les has to be one of the best. Just like it sounds, the new Les is an ultra lightweight carbon 29er hardtail frame. We've had Pivot riders and racers asking for this for a long time and we couldn't think of a more perfect time to offer a one two punch of 29er carbon nirvana with both the Mach 429 Carbon and the Les. The Les features Pivot's proven geometry and Pivot's attention to detail in a 29er hardtail package with a twist: Our new patent pending Swinger™ adjustable dropout system option allows the perfect set up for both geared and single speed riders. Without giving away too much (you still need to read the catalog), the Swinger system should prove to be the answer to single speed riders prayers. It's a design that's simple, adjustable, easy to use, and takes single speed set up and functionality to a whole new level. Our testers didn't want to return the bikes!

As for the rest of our line, we have models that deliver class-leading performance in almost every category. Our goal is to continually develop bikes that meet the needs of our customers. We are always listening and we love to hear how your new Pivot has made you a better rider or simply allowed you to enjoy your riding experience more. We love what we do and love to hear from our customers and those thinking of becoming Pivot riders. It's our passion, our life, and our duty to serve our customers. I'd like to thank you again for your support and welcome you to the Pivot family.

Chris Cocalis
President/CEO
Pivot Cycles

MACH429
CARBON

Team Green
w/Shimano XT/XTR Pro Build

Pivot has upped the ante once again by taking the proven performance of the Mach 429 and adding carbon. All new geometry, a revised dw-link® suspension design and the same Pivot hollow box internal molding technology developed on the Carbon Mach 5.7 has allowed us to achieve a new level of frame strength and stiffness with superior ride performance in a lightweight 29er package. The Mach 429 Carbon delivers a perfect balance by taking all of the riding efficiencies of the 29er and delivering the handling characteristics of a 26". It will make short work of any climb, descents a breeze and all with the comfort and proficiency of full suspension so you can ride at your best all day!

Two years were dedicated to the testing and design of the 429 Carbon, the result is a bicycle with uncompromising performance, and that's simply, just plain fun to ride! Once again Pivot is "PERFORMANCE REDEFINED" with the Mach 429 Carbon.

Natural Carbon/Blue w/SRAM XO Build

Team Green w/SRAM XX1 Build

Natural Carbon/Red w/Shimano XTR Build

- Pivot exclusive hollow box, high-compression internal molding technology allows for greater compaction and smoother internal walls resulting in a lighter, stronger, highly optimized frame design with the best stiffness to weight ratio in the class.
- New geometry and a revised dw-link® suspension design with position-sensitive anti-squat makes for a 29er that pedals, accelerates and handles like a 26" wheel bike.
- New Pivot specific, custom tuned Fox CTD shock technology: Increased performance and adjustment range allows riders to quickly and easily adjust for changing course or ride conditions.
- 100mm rear travel with 100-125mm travel fork compatibility.
- 142mm rear spacing with 12mm through axle and 160mm post mount dropouts for maximum frame stiffness.
- New under top tube internal shift cable routing with clean brake and dropper seat post routing.
- Rubberized leather chainstay, inner seat stay, and down tube protectors for a quiet ride and higher impact resistance.
- Tapered 1.5" headtube, PF92 bottom bracket, and direct mount front derailleur.
- New ISCG 05 (chainguide) mounts included on frame.

MACH429

Alpine White
w/Shimano XT/XTR Pro Build

The Mach 429 is another feather in the cap for Pivot in its growing line up of award winning designs. The Mach 429 has garnered awards and high praise from Outside Magazine, Dirt Rag, MTBR and MBA. Like its smaller wheeled siblings, the Mach 429 sets the standard for 29er suspension, ride quality and all out performance. The combination of Pivot design, incredible attention to detail and dw-link® suspension makes for a bike that accelerates, descends, climbs, and corners unlike anything else. The feeling is instantaneous and powerful. When you throw a leg over the Mach 429 you know immediately that you're riding the most efficient and fastest 29er full suspension bike in the world.

- dw-link® suspension design with position-sensitive anti-squat makes for the most efficient pedaling and best performing 29er race/trail bike made. You pedal and it goes!
- New Pivot specific, custom tuned Fox CTD shock technology: Increased performance and adjustment range allows riders to quickly and easily adjust for changing course or trail conditions.
- 100mm rear travel with 100-125mm travel fork compatibility.
- 142mm rear spacing with 12mm through axle and 160mm post mount dropouts for maximum frame stiffness.
- Tapered 1.5" headtube, PF92 bottom bracket, direct mount front derailleur, double row bearing carbon dw-link®, and high-modulus carbon rocker add to the Mach 429's superior frame stiffness and incredible long-term durability.

LES

Solar Orange
w/Shimano XT/XTR Pro Build

There are some days when the race just demands something a little (or a lot) more rigid. We know that weight matters and that the pursuit of the win is often based on having the lightest, fastest machine possible. We are excited to introduce something different and still uniquely Pivot to our line: A Pivot without a pivot. With the all new full carbon Pivot Les 29er we've created a frame that offers the complete package: A balance of frame stiffness, tuned compliance and straight up performance (and we look good doing it too). In addition to the sub 2.5lb frame weight and incredible ride performance, the Les features our all new patent pending switchable Swinger adjustable dropout System.

The Swinger System adds versatility to your bike X2. The included high modulus carbon dropout features our 12 x 142mm through axle design while the optional Swinger adjustable system allows single speed riders the simplicity of a vertical dropout design with quick click indexed adjustable chain tensioning. For single speed riders this is a revelation in simplicity and pure functionality. So, for those wanting to go fast with gears or without, the new Pivot Les offers you the ultimate ultra lightweight go fast tool in a high performance race package like only Pivot can provide. Once again Pivot is "PERFORMANCE REDEFINED" with the all new Pivot Les.

- Pivot exclusive hollow box, high-compression internal molding technology allows for greater compaction and smoother internal walls resulting in a lighter, stronger, highly optimized, ride tuned frame design.
- Included full carbon molded 12mm X 142mm dropouts with replaceable hanger.
- Optional Patent Pending Swinger adjustable dropout system provides quick, consistent, indexed chain adjustments for single speed use along with fast wheel changes and no change in brake adjustments.
- Full internal shift cable routing with under bottom bracket access port design for hassle free installation.
- Tapered 1.5" headtube, Press Fit 92mm wide bottom bracket, and direct mount front derailleur simplify set up and maximize stiffness.

Natural Carbon/Red w/Shimano XTR Build

Natural Carbon/Blue w/Swinger SS Dropouts

Natural Carbon/Red w/Shimano XTR Build

MACH4

Anodized Jet Black
w/Shimano XTR Build

The Mach 4 is the ultimate lightweight cross country and marathon race bike. With a 24 hour endurance world championship and multiple MTBR best XC full suspension awards it's easy to see why the Mach 4 has garnered such an incredible reputation. With Superior pedaling performance, light weight, and unrivaled stiffness, this Mach 4 is designed to go fast.

Anodized Cobalt Blue w/SRAM X9 Build

Alpine White/Pink w/Shimano XT/XTR Pro Build

Alpine White/Blue w/Shimano SLX/XT Build

- dw-link® suspension design with position-sensitive anti-squat makes for the most efficient pedaling and best performing race bike on the market. With a true 4" (100mm) of travel, incredible square edge bump performance and unrivaled climbing traction, the Mach 4 is the most well rounded race bike as well.
- New Pivot specific, custom tuned Fox CTD shock technology: Increased performance and adjustment range allows riders to quickly and easily adjust for changing course or ride conditions.
- Ultra-lightweight, with a stiffness to weight ratio that puts all other premium XC frames to shame. Race team bikes are being built as light as 20lbs (9kg)-Jason English's World Championship winning Mach 4 and we offer a 21.8 lbs (9.8kg) XX equipped Mach 4 as well. How will you build yours?
- Press Fit 92mm wide bottom bracket, direct mount front derailleur, double row bearing carbon dw-link®, and high-modulus carbon rocker add to the Mach 4's lightweight and superior frame stiffness.

MACH5.7 CARBON

Natural Carbon/Blue
w/Shimano XT/XTR Pro Build

The Mach 5.7 Carbon has set a new standard for what is possible with carbon fiber and suspension bike design. We've developed a bike that is lighter, stronger and stiffer than anything that's come before it. Applying our ground breaking composite technology to the best performing trail bike made and you have a bike that stands atop the competition. Not only will the Mach 5.7 Carbon leave your friends with plenty of bike envy, you will be having a blast leaving them behind!

Natural Carbon/Red w/SRAM XX1 Build

Natural Carbon/Pink w/Shimano XT/XTR Pro Build

Natural Carbon/Green w/Shimano XTR Build

- Pivot exclusive hollow box, high-compression internal molding technology allows for greater compaction and smoother internal walls resulting in a lighter, stronger, highly optimized frame design with the best stiffness to weight ratio in the class.
- dw-link® suspension with position sensitive anti-squat allows us to achieve the stable handling and increased cornering benefits of a lower bottom bracket with more travel, all with better pedaling efficiency and a plusher feel.
- New Pivot specific, custom valved Fox CTD shock technology featuring increased rider tunability and incredible small bump sensitivity.
- 142mm rear spacing with 12mm through axle and 160mm post mount dropouts for maximum frame stiffness.
- Under top tube cable guides with straightforward dropper seat post routing.
- Rubberized leather chainstay, inner seat stay, and down tube protectors for a quiet ride and higher impact resistance.
- 5.7" (145mm) rear travel.
- Tapered 1.5" headtube, Press Fit 92mm wide bottom bracket, direct mount front derailleur, and high-modulus carbon rocker add to the Mach 5.7 Carbon's superior frame stiffness and incredible long-term durability.

MACH5.7

Anodized Cobalt Blue
w/Shimano XT/XTR Pro Build

The Mach 5.7 is the ultimate do-all bike for riding just about any trail, anywhere. Whether you are an endurance racer, super D rider, or just looking for the perfect bike for any trail you ride, chances are good that the Mach 5.7 is the perfect mountain bike for you. Superior Pivot engineering combined with dw-link® suspension is the foundation of this ultimate trail bike. Anything you can throw at the Mach 5.7 can be handled with aggression and confidence!

The 5.7 strikes an unrivaled balance of superior pedaling efficiency, fully active travel, incredible chassis stiffness and award winning handling. With an ever growing list of awards to its credit, the Mach 5.7 is the reigning and undisputed all mountain trail bike champion!

Anodized Jet Black w/SRAM XO Build

Alpine White/Pink w/Shimano XT/XTR Pro Build

Alpine White/Blue w/Shimano XT/XTR Pro Build

- Optimized lightweight aluminum frame design: Only 5.6lbs with shock!
- 5.7" (145mm) of dw-link® suspension travel with position sensitive anti-squat allows us to achieve the stable handling and increased cornering benefits of a lower bottom bracket with more travel, all with better pedaling efficiency and a plusher feel.
- New Pivot specific, custom valved Fox CTD shock technology featuring increased rider tunability and incredible small bump sensitivity.
- 142mm rear spacing with 12mm through axle and 160mm post mount dropouts for maximum frame stiffness.
- Direct Mount front derailleur design accommodates Shimano and SRAM systems. The direct mount design, eases set up, and provides a more rigid mount for the most efficient front shifting possible.
- Double row bearing carbon dw-link®, and high-modulus carbon rocker cartridge bearings add to the Mach 5.7's superior frames stiffness and incredible long-term durability.
- Press Fit 92mm wide bb shell allows for wider pivots and better bearing support for increased frame strength and stiffness.

FIREBIRD

Anodized Jet Black
w/Shimano XT Build

The Firebird is the ultimate technical terrain, all-mountain weapon. For everything from enduro events to the gnarliest trail rides; there is no better tool for the job. With 6.6" (167mm) of travel packaged in the most efficient pedaling suspension design ever developed, it's no wonder why the Firebird is a favorite among magazine editors, Enduro and Super D riders all over the world.

The Firebird's climbing traction, acceleration, and descending capabilities are legendary and unsurpassed in the world of long travel trail bikes. No matter if you're sending it in Whistler, going for the overall in Downieville or riding a 6 hour epic through the Rockies, the Firebird will impress. Simply put, it is the definition of the ultimate long travel trail bike.

Alpine White/Blue w/SRAM X9 Build

Alpine White/Red w/Shimano SLX/XT Build

Alpine White/Green w/Shimano XT Build

White Firebirds ship with Red decals installed:
Blue and Green decal sets included for customizing your Bird!

- 6.6" (167mm) rear travel and 160mm to 180mm fork compatibility (170mm standard).
- Rearward wheel travel path for incredible square edge bump performance and unparalleled pedaling performance.
- New Pivot specific, custom valved Fox CTD shock technology featuring increased rider tunability and incredible small bump sensitivity.
- Full 1.5 headtube accepts the Cane Creek Angleset, allowing the rider to further tune the handling. Several Firebird models now come with the Angleset as part of the stock build.
- ISCG 05 mounts included for single ring and chain guide compatibility.
- Patented Pivot floating front derailleur mount keeps the chain in the sweet spot of the derailleur for better chain retention. Combine with our custom MRP LRP 2X chain guide for perfect shifting performance and worry free chain retention in even the roughest conditions.
- 142mm rear spacing with 12mm through axle and 160mm post mount dropouts for maximum frame stiffness.
- The Firebird (like many bikes in our line) is all about versatility; allowing riders to do everything from 24 hour endurance races, to park/gravity riding, Super D and the occasional DH race but its real home is aggressive trails where the ride up is just as technical as the ride down.

PHOENIX DH

Alpine White w/Blue decal kit
SRAM XO Team Build

The pinnacle of dw-link® performance: Pivot has delivered a bike with over 8" of rear travel and proven World Cup performance. With the heritage of 6 World Championships built into it and plenty of podiums on its own, the Phoenix is a serious DH rig, for the serious DH rider. No other DH bike can boast the bump compliance, consistency & control, pedaling efficiency and frame stiffness of the Phoenix. Add to that the incredible attention to detail, quality and long term durability and you have a bike that allows you to set new personal bests run after run.

Ask any rider that has thrown a leg over this bike and they will rave about the performance, speed and confidence it has brought to their riding. The Phoenix is the performance benchmark for all other DH bikes to follow.

Night Black w/Green decal kit
SRAM XO Team Build

- 8.15" (207mm) of travel.
- Adjustable head angle with 0, and +/- ½, 1, or 1.375 degree settings via the Cane Creek Angleset.
- Changeable dropouts allow easy adjustment of wheelbase to suit course conditions and rider preferences.
- Shock and main linkage are mounted as low as possible in the frame, giving the Phoenix DH excellent cornering and handling characteristics and access to all damping adjustments on the Fox RC4 Kashima shock.
- Complete bikes weigh in at sub 38lbs. (17kg). Race team bikes as low as 35 lbs!
- Standard 83mm Threaded shell with ISCG mounts.
- 150mm rear spacing with 12mm through axle.
- Black Phoenix frames ship with Green decals installed with additional sets of Blue and Orange decals included. White frames ship with Blue decals installed with additional sets of Green and Orange decals included so you can customize your rig!

M4X

True to Pivot form, we've redefined the slalom and big air categories with the M4X. The M4X is the choice of top riders and legends of the sport. It's already taken dual slalom podium finishes and won best trick competitions across the globe. We've combined 4" of dw-link tuned suspension, Pivot proven frame stiffness and the perfect slalom geometry to create the M4X, A machine of pure gravity delight. The M4X is perfect for dirt jumps, slalom, pump track and technical jump filled trails. If you like having fun on a bike what's not to like about the M4X.

- dw-link® suspension design, with position-sensitive anti-squat, tuned for instant acceleration and superior control while railing corners and boosting jump faces.
- 100mm rear travel.
- Two sizes (short and long) to fit a wide range of rider heights and preferences.
- ISCG 05 mounts.
- 1.5" tapered headtube.
- FOX Adaptive Logic Kashima shock with custom M4X slalom/dirt jump Boost Valve and compression tuning.
- Additional cable routing for dropper seat posts making the M4X a great trail bike option as well.
- 142mm rear spacing with 12mm through axle and 160mm post mount dropouts for maximum frame stiffness.

Night Black w/Pivot Team Ultra Lime decal kit

POINT

Nothing beats the feeling of going big and hitting that perfect line on a bike that feels like a natural extension of your body pushing you to go bigger. The Point is that bike! Built with the superior feel and strength of quality chromoly steel combined with a category first tapered 1.5" head tube, ISCG 05 mounts, interchangeable dropouts and the perfect geometry for hitting the pump track, the local bike park or for sending it in the Big Air comp at Crankworx, the Point has you covered. No matter your riding style, the Point is a must have addition to any bike stable.

- High end DMR Double Butted Chromoly Steel.
- 1.5" tapered and integrated headtube.
- ISCG 05 mount for single ring guide.
- Full length rear derailleur cable housing.
- Changeable standard and slotted (single speed) rear dropouts.
- Long top tube, low BB, short seat tube, and compact chainstays. Combined with the feel of steel, this bike is the ultimate ripper on jump lines, at skate parks, BMX tracks, pump tracks and slalom courses.
- Available as frameset only.
