SARACEN - THE BREED MATURES

For Saracen, complacency has always been a dirty word. Every bike year is a new beginning. Okay, the successful formulas remain... they simply evolve and mature to cater for the needs of an always evolving, always maturing market place. The Saracen aim is to keep riders happy, and to achieve that with a flair that stays ahead of the game.

So... winning formulas remain, new formulas come to the fore and all the old favourites score the advantages of experience, economies of scale and the inspired progression that comes with each and every new year of product development.

Genius in bike building is a potent mix of common sense, forward thinking and a

thorough understanding of the diversification that's made mountain biking what it is today. Saracen are one of the longest serving companies in the MTB establishment. While other companies are still in the game of serving apprenticeships, Saracen's maturity and wisdom is an irrepressible force. The sparks of genius have never stopped flying.

Saracen are totally confident that their time served experience and accumulation of knowledge looks after the business of serving the average rider way beyond the usual call of duty.

The 2001 bike range is not simply the end product of the previous year's planning. It's the logical conclusion of all that has gone before in the evolution of the bicycle. With every conceivable and desirable bike genre represented, from hard knocks hardnut MTBs, to new-school cross country MTBs, to BMX, to hybrids, to road race bikes and beyond, it's the most comprehensive and complete range to date.

2001 Range

Critical Mass

What The Press Say:

"With it's white paint job and black components it's a great looking bike. The second thing is that it's got first rate spec for a bike at this price....it's truly excellent value for money" TOTAL MOUNTAIN BIKE on the X-ess. .... *"Saracen's bikes crop up time and time again when the 'good value for money' question rears its head."* what MOUNTAIN BIKE? *Buyers guide.* ..... "Saracen bikes have been consistently good: well finished, well speced, well assembled and always a good ride." Mountain Biking UK .... **"For general trail use with added comfort, it's a hard act to follow at this price."** Mountain Biking UK **on the Havoc. .....** *"Saracen appear to treat their £200 customers with the same respect as their £500 ones and why not?"* Mountain Biking UK .... *"Excellent. Ultralight smooth speed chassis ready for riding"* what MOUNTAIN BIKE? *on the 2000 Hy-Flyer Gold award in the What Mountain Bike 100 bike test* .... **"Assuming that we're setting the minimum MTB start price at £199 the best bike we've seen at this price is the Saracen Rufftrax"** Mountain Biking UK **on the Rufftrax. .....** "Attention to detail is perhaps what separates Saracens from many MTB's on the market" mbr MOUNTAIN BIKE RIDER ..... *"Saracen's full suspension Havoc could cause bike buying mayhem"* TOTAL MOUNTAIN BIKE *on the Havoc.* ..... "A fully loaded top flight downhill bike, tricked to the gills with everything you could possibly need for serious DH - all for less than three grand." mountain biker INTERNATIONAL on the Addiction. ..... "Saracen have made their mark on the race scene over the last couple of years and we suspect it is this aspect of their ear to the ground, R&D approach that has resulted in such a marked improvement in the performance of their bikes." MOUNTAIN BIKE .... *"First of all, you are forced to stand back and admire the view. This is an impressively imposing lump of bike."* mbr MOUNTAIN BIKE RIDER *on the Raw.* .... "Mighty UK bike boffins Saracen are firing on all cylinders this season" mountain biker INTERNATIONAL .... "Absolutely the very best 300 quid bike we've ever seen...10/10" TOTAL MOUNTAIN BIKE **....As Hybrids go, the Hy-Flyer has an air of seriousness about it, and the intentions are not unfounded"** Cycling Today & MOUNTAIN BIKING **on the 2000 Hy-Flyer...** "The frame looks like it could take a severe beating and come out on top!" mountain biker INTERNATIONAL on the D-Tox. ..... **"Saracen have got this entry-level bike bang on. The Raw looks the part of the bomb proof full-suspension bike."** mbr MOUNTAIN BIKE RIDER **on the Raw. .... "To produce a complete suspension bike at this price, Saracen have had to juggle the factors of weight, function and durability. We think they've done an amazing job."** Mountain Biking UK **on the Havoc....** "It's great fun to ride, and astounding value" TOTAL MOUNTAIN BIKE on the N-zyme.... "The Kili Flyer's superlight magnesium frame shows from the off that this is a bike that's definitely wired for speed." what MOUNTAIN BIKE? on the 2000 Hy-Flyer...."**Blasts downhill without flinching"** Mountain Biking UK **on the the 2000 Havoc ....**

What more can we say!

THE R&D STORY

Does anyone actually care about what goes on behind the scenes? Or is it just end products that matter? Well... in truth, the behind the scenes R & D is inseperable from the end product that you see in the shops, or being ridden. A look behind the scenes at Saracen is a look at the hard graft that goes into making sure that each bike does the job as well as possible for the rider who invests in it... and that isn't always easy.

No one bike is perfect for everything. Bikes suit rider types and riding styles. The knack of effective R & D is to identify those types and styles and create the perfect bike for them. At Saracen that's an ongoing process. Nothing in the bike world stays still.

Saracen's bikes evolve because there's a demand for that type of bike. It's an organic process that often produces surprises. The beauty of R & D is that it often finds ways of catering for niches that hardly anyone even knew existed. As bike styles and ride expectations become increasingly specialised, this aspect of Saracen R & D has become more crucial than ever. To put it bluntly, Saracen find ways of staying ahead of the game in the best possible way... by setting the game plan.

Before going to final production, Saracen's R & D facility tries all manner of variations on a theme. New chassis and componentry designs and materials are ridden to limits that go way beyond the boundaries of the average rider. Parts are only chosen for the final production runs when all the feedback from the test teams has been compiled, assessed and discussed with regard to build quality, durability, comfort and ease of use for the end consumer. It's a tough job, but someone's gotta do it, as they say...

The final outcome of Saracen's ongoing R & D is that there's a bike for everyone in the Saracen range. And you can be sure that the bike you choose will be at the leading edge of its genre.

QUALITY MAKES ALL THE DIFFERENCE

During the 20 year evolution of mountain bikes and their offspring, the Saracen name has been a major player at all the major turning points. Saracen leads, inspires, influences and follows... in short, whatever it takes to stay ahead and to maintain the second-to-none quality control that has kept the Saracen name at the forefront.

Saracen has always been associated with top quality no nonsense bikes, a theme that stands prouder than ever before for the 2001 range. Alongside all the MTBs that have built the Saracen name into a market leader among shops and riders alike, there are five superb value high quality road bikes making a timely appearance in the new range. And, as if to recognise a return to the values of cycling's heritage, the Classic Hardtail range makes a welcome resurgence, perhaps in acceptance that the 'traditional' MTB is as strong as ever.

It seems strange talking about MTBs in terms of 'traditional'. But like Saracen itself, the MTB really has become a solid and dependable part of cycling history. A lot has happened in the last two decades, and Saracen has been there along almost every step of the way.

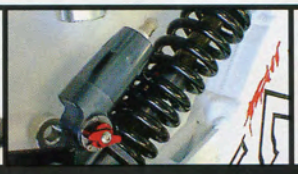

At Saracen's Warwick factory, great pride is taken in assembling machines by hand. Quality control is number one on the agenda. Frames are checked then re-checked before being assembled with componentry sourced from the world's leading specialists. Good looks, top durability, technical performance and value for money are all equally important to Saracen's production managers.

The trickle down effect from top end product development to the lower price categories has been increasingly impressive over the last few years. Even Saracen's beginner bikes now offer comfort attributes and superb performance relating to new developments in suspension, gears and braking systems that were originally only seen on race bikes.

In short, Saracen's 2001 ranges are a reflection of all the leading edge themes happening in cycling culture at large. From the casual town rider to hardnut trials and trails enthusiasts, there really is a perfect bike here for all and sundry.

What Mountain Bike

Hex

rrp £164.99

Kids bikes need to score as many damage limitation credentials as they can. Suspension at both ends is a good start, a tough frame and fat tyres will help along the way and the icing on the cake as far as the Hex goes is a comfy adaptable ride position, a good gear range and great brakes.

SHIMANO SRAM

Co-ax

rrp £139.99

It's practical, it's simple and it's got bags of image. The Co-Ax offers all the comfort and damage limitation of much more costly bikes plus an easy-riding style that'll have every kid in the street hassling their parents to get them one.

BICYCLE WARRANTY

Saracen Cycles Ltd warrants the replacement of original components of Saracen Bikes due to defects in material and/or workmanship according to the following conditions and limitations: Steel frames and forks are warranted for a period of 5 years. Aluminium frames and Full Suspension frames are warranted for a period of 2 years. Suspension forks and rear suspension units are warranted for a period of 1 year. The original components, other than the frame and forks, are warranted for a period of 1 year (labour and transportation charges are not included). The warranty is limited to the original retail purchaser only and proof of purchase is required to validate this warranty.

The warranty does not cover damage or failure due to abuse, neglect, accident, improper re-assembly, lack of maintenance, commercial hiring, normal wear and tear or installation of parts or accessories not originally intended for or incompatible with the bicycle as sold, racing, stunt riding, free-styling or similar activities or training for such activities.

Saracen Cycles Ltd shall not be responsible for accidental or consequential damage or loss. The user assumes the risk for any and all personal injury or damage of the bicycle, or other losses if Saracen bicycles are used at any time in any competitive event (including bicycle racing, dirt biking, freestyling or similar activities or training for such activities).

Mountain bikes, although tough, are not indestructible. Excessively rough use may result in damage to your machine or you - take care and always use an approved helmet. Optimum riding performance depends on having your bike serviced regularly at your Saracen dealer.

OTHER PRODUCTS WARRANTY

All other branded Saracen products not covered by the above are warranted for a period of 1 year from date of purchase against faulty manufacture.

The warranty is limited to the original purchaser only and proof of purchase is required to validate this warranty.

All claims must be made through an authorised dealer.

Saracen Cycles' policy is one of continuous improvement; therefore specification may be changed, without prior notice.

All riders in this brochure are professionals or experts. Much of the action depicted in this brochure is dangerous....

Do not exceed your abilities!
