

RIGID TOOLS

No matter how or where you ride, you can count on the Syncros Cattleprod™ stem for totally dialed No Bull Steering. The massive, ultra-stiff extension tube provides unparalleled ground feel and precise fingertip response for twistin' through the single track. Because it's hand built from low modulus aircraft grade aluminum, the Cattleprod absorbs major shock and dampens vibration for a chatter free ride through the rough stuff.

So before you crank up the adrenalin again, retool your machine with a Cattleprod stem and attack with confidence!
