BAD GOODS BY SYNCROS .... WHAT THE?

Syncros came into existence nine years ago to fill a need for lightweight, bombproof off road components. Our Bad Goods line of killer, on-and-off the bike wear has been developed to meet a similar need. We recognized the necessity to put The Funk into functional daily cycling apparel. The lycra look is great for racing, but every day isn't race day. Everyday gear needs to look so hip - it hurts and be able to survive the inevitable biffs and bails that are part of every ride. We've designed a collection of laid back, casual garments that work, whether in the saddle or jockeying for style points at your local mosh pit.

We put the same unremitting attention to detail into our clothing as we do with our components that you know and rely on. Only the most cutting edge US and Canadian made technical fabrics like waterproof, breathable polyesters, wickable cottons and windproofing laminates have been selected to optimize the performance features of our clothing. Everything we make is dialed, styled and sewn in Vancouver to bring you totally North American garments. Because we're our own best customers, we've designed Bad Goods to meet our own demands for high quality, functional, casual clothing. If we're satisfied we know you will be too.

So whether you're ripping down your fave single track or just lounging, the Fashion Police won't hassle you if you're wearing Bad Goods rags cause we've put The Funk into function. Bike clothes will never be the same again!
