# A String of Accomplishments...

DISK DRIVE
GEODESIC WEBBING

## THE RESULTS SPEAK FOR THEMSELVES...

**1989:** The Disk Drive passes the acid test as John Tomac shatters the "Kamikaze" downhill world record at Mammoth Mountain.

**1990:** A four-member ATB assault team blasts through 7,500 miles of grueling terrain on the US-Soviet Transcycle trek. The Disk Drive registers zero failure rate.

**1991:** With the Disk Drive advantage, John Tomac dominates the circuit, winning three more titles: NORBA National Downhill Champion, Grundig World Cup Champion and UCI World Champion. Paul Thomasberg, Greg Herbold and Tinker Juarez join other international pros in adopting the Disk Drive for a competitive edge.

**1992:** High tech enhances the ATB experience as thousands of serious riders demonstrate the advantages of the Disk Drive over conventional spoked wheels.

Discover for yourself how Kevlar® cord and geodesic innovation make the Disk Drive the most ridable wheel ever.

**AVAILABLE NOW** at participating Tioga dealers.

• • •

*This ball is the actual amount of Kevlar® cord it takes to produce the strong, lightweight Disk Drive.*

**TIOGA®**

*Tioga® recommends that you ride with care, and only on approved trails. Always wear a helmet and other appropriate safety equipment. Respect the environment, and those who share it with you.*
