WILDERNESS TRAIL BIKES

TRAILGRIP PRESS RELEASE

Announcing the Wilderness Trail Bikes Trailgrip. This "New for '92" ergonomically designed grip is more comfortable for use with gloves due to the smaller diameter. Made of soft, durable craton rubber, with an octagonally faceted convex shape, the Wilderness Trail Bikes Trailgrip has been developed from years of hard core riding. Trailgrips have extra end thickness to prevent tearing and punch-out for extra durability and rider safety. The Wilderness Trail Bikes logo is cleanly imprinted in the grip end for value added name recognition. "More bitchin' than the competition." Also available pre-cut for bar-ends. Suggested retail $9.95.
