- More efficient braking
- Better compatibility with all the rims
- Lighter weight

Campagnolo

2000 RANGE

RECORD PEDALS

NEW

PRO-FIT

- New material for the cleats to improve durability
  - Black = fixed
  - Grey = floating

Campagnolo

2000 RANGE

CYCLING PLUS:
HUB REVIEW

BEST BUY !

◀ **HUBS** £97.59 (rear), £46.54 (front)

Few components have ever deserved our Best Buy award more than these completely redesigned hubs. While retaining the user-serviceable ball bearing arrangement of old, the aluminium oversized axle provides a greater contact area for the bearing surfaces than any other hub, and adjustments to the bearings are simplicity itself.

...e lightest we've seen. As ...ore dishing is needed ... this is offset by the fact ...the holes, ensuring that ...

VERDICT:

Simply the best hub ever made

Campagnolo®

2000 RANGE

NEW RECORD LOGO

RECORD

More modern and visible

Campagnolo

2000 RANGE

COMPUTER

Campagnolo

2000 RANGE

NEW

ergoBrain COMPUTER

- A truly “racing” component with some new exclusive functions
- Unprecedented Performance
- Unique design

Campagnolo

2000 RANGE

NEW

ergoBrain COMPUTER

The 1st self-learning computer :

- Very easy set-up and programming
- Allows wheel changes during a race without loss of any functions

Campagnolo

2000 RANGE

NEW

ergoBrain COMPUTER

- The 1st computer that displays sprocket / chainring combination (ex. 14/40) beside showing the chain position.

Campagnolo

2000 RANGE

NEW

ergoBrain COMPUTER

- The 1st computer with EEPROM memory that allows partial set-up update and battery change without data loss

Campagnolo

2000 RANGE

NEW

ergoBrain COMPUTER

- The 1st computer

with detachable speed

and cadence sensors.

Campagnolo

2000 RANGE

NEW

ergoBrain COMPUTER

- The 1st computer with cadence magnet hidden inside the pedal's axle (except for "99 Record).

Campagnolo

2000 RANGE

NEW

ergoBrain COMPUTER

- Plus, beside all classical cycle-computer functions:
  - Cadence
  - Gear development (gear ratio multiplied by wheel circumference)
  - Dual wheel memory (including sprockets) with one millimetre resolution
  - Stopwatch function
