The Spine Design.

A whole new way to look at frame composition.

The goal was simple: provide the legendary ride of LeMond steel and titanium frames in a stiffer, lighter weight design. With an optimal combination of OCLV carbon fiber and steel or titanium, LeMond Spine Technology has pioneered a whole new way of looking at the bicycle frame.

The Spine: The spine consists of the headtube, downtube, bottom bracket and chainstays. It defines a bike's road feel: how it climbs, handles, corners and sprints. LeMond Spines are handmade of Reynolds butted titanium or double-butted steel, materials legendary for their ride quality.

The Cockpit: The top tube, seat tube and seat stay combination are molded from the lightest material possible: OCLV carbon fiber. Created with a patented, highly secret process, OCLV carbon uses high-pressure molds that optimally compact the layers of epoxy-impregnated carbon fibers, squeezing out voids that create weak spots. It's the best carbon fiber process ever used for bicycle frames. The end result is a cockpit that's fantastically light, yet incredibly strong and stiff.

The Ride: The resulting frame is a marriage of supreme ride quality with impressively low weight. The spine maintains the outstanding road feel of steel and titanium, while the carbon upper minimizes weight while muting road shock before it is transferred to the rider. The combination is a lighter, stiffer, more comfortable execution of Greg's original geometry in a sloping top tube design.

Reno™ · 6066 T6 Aluminum

When Greg was 14 years old, the NorCal-Nevada state road championships raced right past his Reno home. It would be many years before the cycling world would have a chance to pass Greg again. The LeMond Reno is designed for those who want to join the peloton, not watch it from the front yard. With a Shimano 105/Tiagra drivetrain and a Bontrager Race carbon fork on Greg's new aluminum performance series frame, the Reno gets you off the porch and down the road in no time.

Same bikes, better fit.

LeMond Racing Cycles for women.

The women of Team Saturn have won many races on LeMond Racing Cycles. With their input, we have designed woman-specific framesets for our two most popular bikes and outfitted them with equipment designed for women riders.

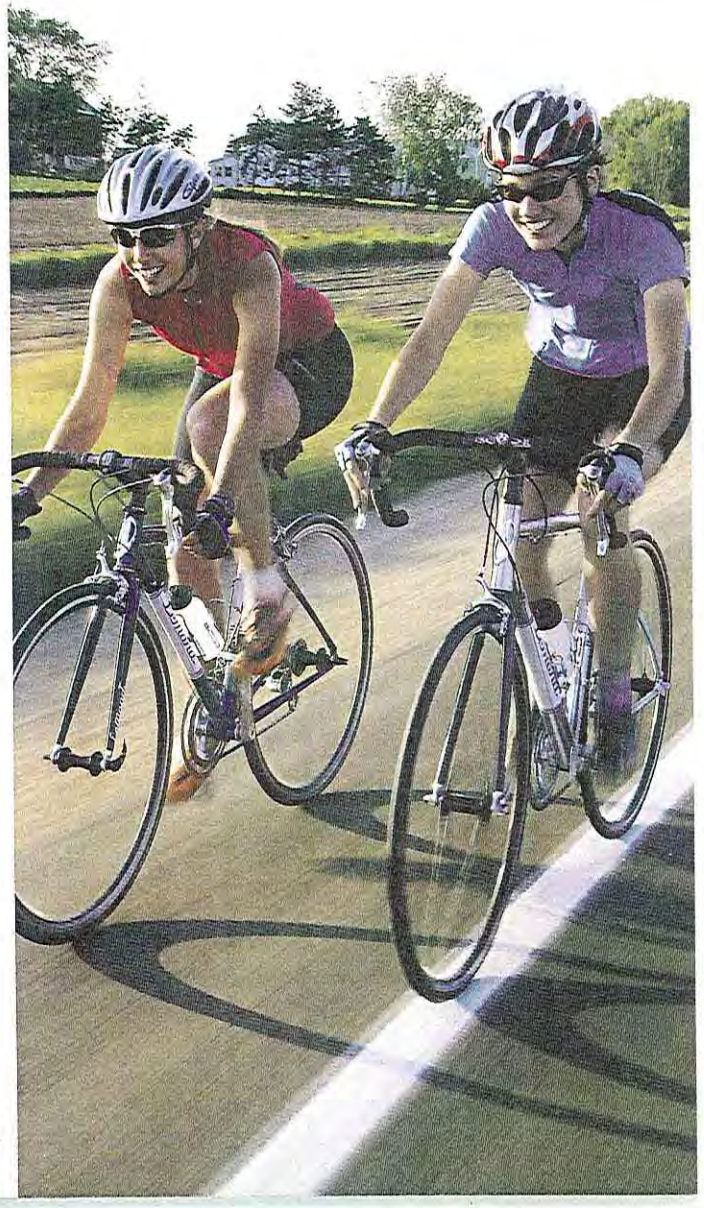

Zurich Women's · Double-butted steel / OCLV 120

see page 30 for details.

To make the Zurich a better bike for women, we've added a woman-specific saddle, reach-adjustable brake levers for smaller hands, shorter crank arms, stems, and a smaller, shorter-reach version of our famous LeMond geometry. Same balanced position. Same comfortable, stable ride. Same relaxed seat tube angles, slightly behind the crank arms, to take advantage of a woman's proportionally longer femur.

Reno Women's · 6066 T6 Aluminum

For the Reno Women's, we've customized the fit of the lightweight 6066 T6 sloping top tube aluminum frame and selected components to best meet the needs of women riders. The Reno is available in three sizes, each with a women's wider saddle, shorter cranks to match smaller legs and a tailored geometry to best fit a woman's height and reach.
