05 Chambery™ • Aluminum Carbon/Damping Composite

the aluminum frame redefined.

E The thought process behind the new LeMond AC/DC frame is very similar to the Spine designs- utilize a composite of materials, each in the optimum location to maximize ride quality. The new AC/DC frame combines a very light double butted 6066 aluminum main frame with carbon fiber seat stays, chainstays and front fork. The featherweight result is an extremely efficient pedaling platform with road smoothing carbon between the rider and either wheel.

F Composite en aluminium et carbone à pouvoir amortissant : le cadre en aluminium repensé. Le processus à la base de la création de ce nouveau cadre LeMond AC/DC est très similaire à celui de conception Spine. Il utilise tout un ensemble de matériaux, chacun se trouvant à l'endroit idéal pour renforcer encore davantage la tenue de route. Le nouveau cadre AC/DC est équipé d'une structure en aluminium 6066 très légère à doubles renforts latéraux avec haubans, fourche arrière et fourche avant en fibre de carbone. La légèreté de l'ensemble conduit à une plate-forme de pédalage extrêmement efficace dans laquelle le carbone amortit les chocs entre la roue et le coureur.

G Aluminium/Carbon Mischung: Der Aluminium Rahmen neu definiert. Der Gedanke, der hinter dem neuen LeMond AC/DC Rahmen steht, ist den Spine Designs sehr ähnlich: man setze eine Kombination von Materialien ein, jedes an seiner optimalen Stelle, um maximale Fahrqualität zu erzielen. Der neue AC/DC Rahmen kombiniert sehr leichtes double butted 6066 Aluminium für den Hauptrahmen und Carbon Sitz- und Kettenstreben, sowie eine Carbon Gabel. Das federleichte Ergebnis ist eine extrem effiziente Pedalplattform mit dämpfendem Carbon zwischen Fahrer und Reifen.

Versailles Women's® • OX Platinum steel / OCLV 120

E Over the years, some of the fastest women in the world have raced on LeMond Racing Cycles. With their input, we have designed women-specific versions of our most popular frames and outfitted them with equipment designed for women riders. We've added a woman-specific saddle, reach-adjustable brake levers for smaller hands, shorter crank arms, shorter stems, and a smaller, shorter-reach version of our famous LeMond geometry. It features the same balanced position. Same comfortable, stable ride. Same relaxed seat tube angles, putting the rider slightly behind the crank arms, to take advantage of a woman's proportionally longer femur.

F Les mêmes vélos, mais mieux adaptés. Vélos de course pour femmes LeMond Certaines des femmes les plus rapides du monde ont utilisé les vélos de course LeMond. Avec leur aide, nous avons conçu des versions tout particulièrement dédiées aux femmes de nos cadres les plus demandés et nous les avons agrémentés d'équipements adaptés à leur morphologie. Nous avons équipé ces vélos de selles spécifiquement conçues pour les femmes, de poignées de frein ajustables, de potences plus courtes et nous avons insisté sur la géométrie LeMond désormais renommée en raccourcissant son écartement. Ces vélos offrent une position de conduite tout aussi équilibrée. Un confort identique et une conduite tout aussi stable. Ils sont équipés des mêmes angles de tiges de selle, légèrement en retrait par rapport aux manivelles, pour tirer pleinement avantage du fémur de la femme, proportionnellement plus long.

G Im Laufe der Jahre sind einige der schnellsten Frauen der Welt auf LeMond Rennrädern gefahren. Mit ihrer Hilfe haben wir für unsere beiden beliebtesten Rennräder frauenspezifische Rahmensätze entworfen und nach den Design-Anforderungen der Fahrerinnen ausgestattet. Wir haben sie mit einen frauenspezifischen Sattel, mit kürzeren Kurbeln, einem kürzeren Vorbau, sowie einer proportional kleineren Version unserer LeMond-Geometrie ausgestattet. Unverändert lockere Sitzposition. Unverändert komfortable und stabile Fahreigenschaften. Unveränderter Sitzwinkel mit leicht nach hinten versetzten Kurbeln, um die bei Frauen proportional längeren Oberschenkel optimal zu nutzen.

05 Tourmalet® • 6066 T6 Aluminum

The aluminum frame redefined.
Stable. Comfortable. Fast.

E Like a rider who cuts through the wind, sprints with the best and climbs like a goat, the LeMond Performance Aluminum Series excels in all regards. Using the latest advancements in forming technology, the multi-shaped tubeset reduces aerodynamic drag yet increases front-end stiffness and bottom bracket pedaling efficiency. With double-butted tubing throughout, the frame is feather-light and provides a supple road feel. Using Greg's classic geometry in a new sloping top tube design, the LeMond Performance Series is ideal for the competitive road racer or, with the addition of aero bars, the perfect choice for the time trail or multi-sport athlete.

F Le meilleur de tous. Tout comme un coureur qui fendrait l'air, qui se lancerait dans un sprint endiablé ou qui grimperait comme un cabri, le nouveau modèle LeMond Performance Aluminum Series excelle dans tous les domaines. Grâce aux dernières avancées en matière de technologie de formage, son jeu de tubes multiforme diminue la résistance mais accroît également la rigidité de la partie avant et la puissance de pédalage du jeu de pédalier. Équipé de tubes à doubles renforts latéraux, ce cadre est léger comme l'air et procure une grande souplesse de conduite. Le nouveau modèle LeMond Performance Series utilise la géométrie classique de Greg avec un tube supérieur incurvé et apparaît comme étant idéal dans les compétitions sur route. En outre, en lui rajoutant un guidon aérodynamique, il se révèle le choix incontournable pour les athlètes des courses contre la montre et des disciplines multisports.

G Wie ein Radfahrer, der sich mit dem Wind misst, mit den besten mitsprintet und wie eine Gemse klettert, brilliert die neue LeMond Performanc Aluminium Serie in allen Bereichen. Durch Einsatz der neuesten Technologien, reduzieren unsere komplex geformten Rohre den aerodynamischen Widerstand und erhöhen die Steifigkeit des Rahmens und damit die Treteff zienz. Durch die zweifach konifizierten Rohre ist der Rahmen auch federlei und sorgt für ein dynamisches Strassenfeeling. Durch die klassische Greg Lemond Rahmengeometrie, neu mit einem sloping Oberrohr, ist die neue LeMond Performance Serie ideal für den ambitionierten Rennfahrer oder durch Ergänzung mit einem Aero-Lenker, die perfekte Wahl für Zeitfahr- od Triathleten.

05 Big Sky™ SLT • 6061 T6 Aluminum

The aluminum frame redefined.
Make it for the long road.

E Drawing inspiration from both Greg's fast-paced past and his down-home Montana ranch, the Big Sky Series combines the lightweight, efficient design of a traditional road racing bike with a number of creature comfort upgrades. Features include a suspension seatpost (not available in all models), Bar Top brake levers, a shorter reach with a higher riding position and a wider, softer saddle. Built of 6061 aluminum for a lightweight and efficient ride, the frame also features LeMond's unique road-smoothing seatstays. Coupled with a smoothing carbon fork, gel-filled bar tape and all the frame details needed to easily add fenders, racks or wider tires, the new LeMond Big Sky Series may quickly become your favorite bike-ever.

F Puisant son inspiration dans le passé turbulent de Greg et la sérénité de son ranch du Montana, le modèle Big Sky Series possède la légèreté et l'efficacité d'un vélo de course traditionnel, auxquels s'ajoutent un certain nombre d'améliorations en matière de confort. Il intègre un tube de selle à suspension, des leviers de freins sur la base du guidon, un écartement plus court et une position de conduite plus haute avec une selle plus large et plus souple. Conçu en aluminium 6061 pour une conduite efficace et légère, son cadre utilise les haubans LeMond qui compensent les irrégularités de la route. Si l'on y ajoute une fourche en carbone capable d'amortir les chocs, une guidoline gélifiée et tous les détails du cadre permettant de rajouter des garde-boue, un porte-bagages ou des pneus plus larges, le nouveau modèle Big Sky Series de LeMond pourrait très vite devenir votre choix de prédilection.

G Inspiriert durch Greg Lemonds schnelle Vergangenheit und den Ansprüchen gemächlicherer Gangart, kombiniert die Big Sky Serie Leichtgewicht und Effizienz eines Rennrades mit Merkmalen eines Komfortrades. Die Ausstattungsmerkmale sind unter anderem: gefederte Sattelstütze, horizontale Bremshebel Erweiterungen, eine aufrechtere Sitzposition und einen breiteren, weicheren Sattel. Der Rahmen ist aus 6061 Aluminium und sorgt zusammen mit LeMonds einzigartigen, strassenglättenden Sitzstreben für ein leichtfüssiges und effizientes Vorankommen. Dies zusammen mit der Vibrationsdämpfenden Carbon Gabel , dem gelgefüllten Lenkerband und dem Rahmen, an den auf einfachste Weise Schutzbleche, Gepäckträger oder breitere Reifen montiert werden können, dürfte das neue LeMond Big Sky schnell zu ihrem Lieblingsrad werden.

05 Croix de Fer® • True Temper OX Platinum steel

The aluminum frame redefined. Classic Steel.

E For the purists of the peloton: A double-butted steel masterpiece handcrafted in the USA. Our LeMond Classic steel frames feature air-hardened True Temper OX3 Platinum tubing that actually becomes stronger when welded, allowing the use of a lighter gauge of tubing without sacrificing strength or stiffness. The resulting ride quality is unsurpassed - expect to be impressed. For 2005, the classic frame can be found in three different versions, road, cyclocross and track.

F Acier Classic Pour les puristes du peloton : Une véritable oeuvre d'art en acier avec doubles renforts latéraux fabriqués à la main aux États-Unis. Nos cadres LeMond Classic en acier utilisent des tubes True Temper OX3 Platinum trempés à l'air qui deviennent plus solides encore une fois soudés et qui permettent d'utiliser une épaisseur de tubes moindre, sans pour autant sacrifier la solidité ou la rigidité de l'ensemble. La tenue de route obtenue est sans précédent. Vous serez étonné ! Ce cadre classique sera disponible en trois versions différentes en 2005 : route, cyclocross et piste.

G Für die Puristen im Feld: Ein doppelt konifiziertes Stahlmeisterwerk, Handgemacht in den USA. Unser LeMond Classic Stahl Rahmen aus einem Luft gehärtetem [True Temper OX3 Platinum] Rohrsatz, welcher durch das Schweissen noch widerstandsfähige wird. Aus diesem Grund können wir die Wandstärken reduzieren, ohne Stabiltät und Steifigkeit zu verlieren. Die daraus resultierende Fahrqualität ist unübertrefflich – Sie werden beeindruckt sein. Der klassische Rahmen wird für 2005 in drei verschiedenen Versionen hergestellt: Strasse, Quer und Cross.
