GENUINE Spot BRAND

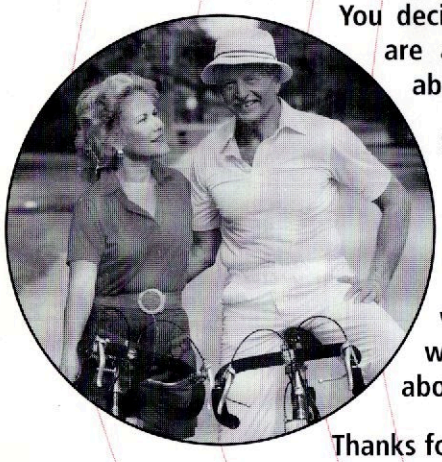

BICYCLE COMPONENTS

1999 CATALOG

Our Philosophy

Why single speeds? Why gears? Our bikes have one gear, one speed and one purpose...riding. These are race proven mountain bikes, not high fashion coffee cruisers. Don't get us wrong, you could ride a Spot all the way to Starbucks with a smile on your face, or you could go race Shasta Lemurian. You decide. Either way our single speeds are about the ride, about simplicity, about smiling.

Some industry folks didn't give single speeds, or us, six months but we are still here and we are here to stay. Single speeds may not appeal to everyone, but that was never the intention. We just want to make products that we care about and that people love to use.

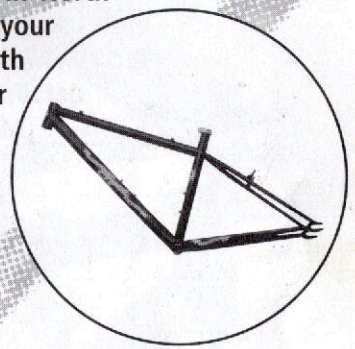

Thanks for keeping the dream alive,

Michael & Jessica

Michael and Jessica

Steel Frame

When we started single speeding, the number of affordable frames was non-existent. Sure you could contract someone to build you a custom ride but most people don't want to spend huge coin on another frame. Our frame, handbuilt in North America, is priced to allow it to be your second, third or in some cases seventh bike. You may want to make it your only bike.

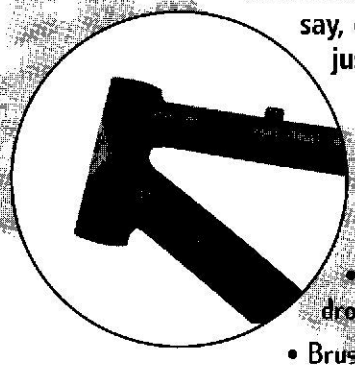

- Proprietary blend of steel with a Columbus megadowntube
- Sloping top tube for increased clearance
- Very cool Spot Brand single speed dropouts
- CNC machined and anodized seat collar
- Custom machined seat tube
- Powder coated metallic red, matte black or deep blue

	15.5"	17.5"	19.0"	21.0"
Top Tube	21.25"	22.5"	23.5"	24.25"
Chainstays	16.9"	16.9"	16.9"	16.9"
BB Height	11.9"	11.9"	11.9"	11.9"
Head Angle	70.5	71.0	71.0	71.5
Seat Angle	73.5	73.0	72.5	72.5

Titanium

A production single speed bike built from titanium...what the hell, we needed an excuse to use our custom machined titanium single speed/bottle opener dropouts on something more practical that a keychain. Our titanium frame is built using aircraft grade 3-2.5 tubing from Anco-Tech and features the same precision building and details as the steel frames. What more can we say, excess doesn't need to be justified, just enjoyed.

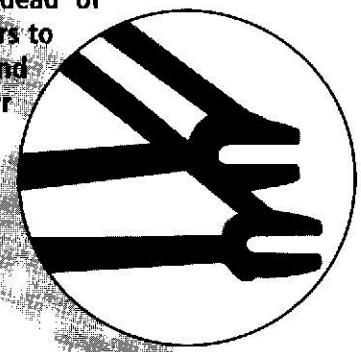

- Anco-Tech 3-2.5 aircraft grade titanium tubing
- Sloping top tube for increased clearance
- Cooler than cool single speed dropouts/beverage accessory
- Brushed titanium finish

	15.5"	17.5"	19.0"	21.0"
Top Tube	21.25"	22.5"	23.5"	24.25"
Chainstays	16.9"	16.9"	16.9"	16.9"
BB Height	11.9"	11.9"	11.9"	11.9"
Head Angle	70.5	71.0	71.0	71.5
Seat Angle	73.5	73.0	72.5	72.5

Cyclocross

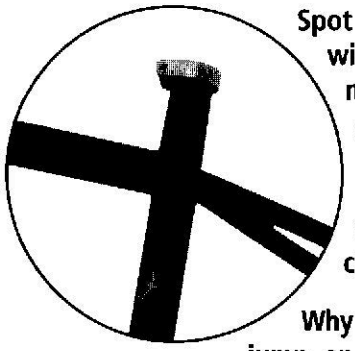

Our 'cross bikes don't fit the norm, but then again neither do most 'cross racers. We figured the least we could do was give this hardy bunch an option to dealing with chain suck, missed shifts and dropped chains, while riding around in the dead of winter in rain and mud. With no gears to get in the way, the Spot Brand Cyclocross is the only answer to your winter-time mud fantasies.

- Proprietary blend of steel with a Columbus megadowntube
- 1 1/8" headset, 135 mm rear spacing
- Sloping top tube for increased clearance
- 1 1/8" straight blade cyclocross fork
- Powder coated metallic red, matte black or deep blue

	CENTER – EFFECTIVE TOP				
	51cm	53cm	55cm	57cm	59cm
Top Tube	50.0	52.0	54.0	56.0	58.0
Chainstays	42.5	42.5	42.5	42.5	42.5
BB Drop	6.05	6.05	6.05	6.05	6.05
Head Angle	71.5	71.5	72.0	72.0	72.0
Seat Angle	72.5	72.5	72.5	72.0	72.0

BMX

Spot Brand is making a 24" BMX cruiser with total old school geometry (we are not going to tell you whose geometry we ripped off, but man does it ever work). The frames are built from chromoly using the same dropouts and down tubes as on our chromoly single speed frames.

Why chromoly? Well, we are not going to jump on the band wagon and build using some 'new' aluminum if we do not totally believe in it. Is it going to 'go off' like a time bomb, and if so, do you want to be sitting on it when it does? We thought not.

- 24" cruiser geometry!
- Custom CNC machined dropouts
- Megadowntube for extra rigidity
- Powder coated black, black or black

Soft Goods

Highly technical Spot Brand stuff featuring advanced materials, superior construction and a single speed attitude.

T-Shirts (medium and large)

- Spot Brand Ringer Tee
  White with black collar & cuffs – small Spot logo front, big logo back
- Spot Brand Dog
  White – Dog logo
  That's all we're going to divulge!
- "ONE F**KING SPEED"
  Black – Spot logo front, ONE F**KING SPEED back.
  Actual swear word on shirt!

Cookie Monster Vest (blue – medium and large)

Plush blue synthetic fur vest, perfect for riding your bike to the coffee store.

Musette Bag

Italian road racers stuff these cotton beauties with salami sandwiches and glass vials. Unscientific test conducted by us also show that they can carry beer.

Patches

3" Spot Brand logo patches

Baseball Caps

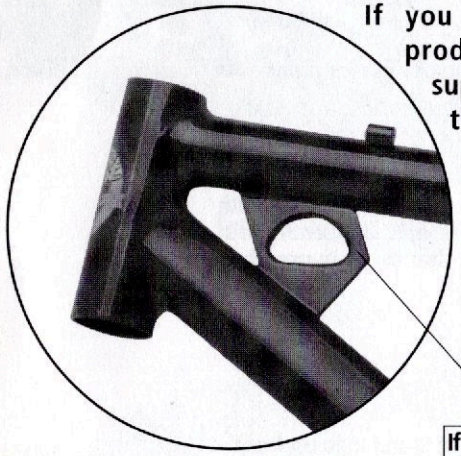

Black – adjustable, with Spot Brand logo on front

Warranty

So I guess you really want to know what our warranty policy is. If we put a policy in writing it makes it difficult for us to deal with those weird problems that show up. Instead we are going to look at each situation and deal with it in a manner that we hope you will find amicable.

If one of our products has a problem due to material or workmanship in the first two years and you are the original owner we will repair or replace that part. If you send us back a chainring with 12,000 winter miles on it after only four months we'll probably just make fun of you around the office.

If you plan on racing Spot Brand products you can count on our support as we want you to enjoy the products as we do.

If you ask us nicely, and pay lots of money, we'll include this cool headtube bottle opener
