COMPOSITE

Trek's ultimate example of bicycle technology, and according to the experts, the world's as well. Quite simply, there has never been a machine that packs all of this performance into such a light package. Trek composite framesets are covered by a lifetime warranty.

Wheels for everyone else to chase. Matrix aerodynamic Iso-C rims and Kevlar™-beaded 125 psi, CD5 tires, built around Dura Ace hubs.

Shimano's elite, Dura Ace, racing component group now includes advanced Look™-type clipless pedals.

Trek's space-age composite frame bonds together cast aluminum lugs, butted carbon fiber tubing, and a super-stiff aluminum rear triangle into the optimal performance frame.

Available in natural finish as shown.

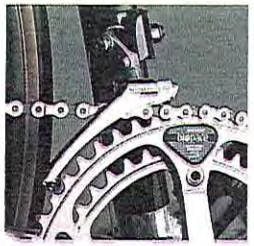

2300

COMPOSITE

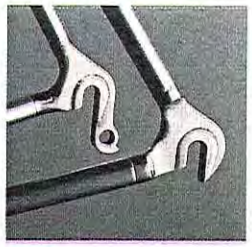

A well-matched assembly of Trek's carbon fiber frame and Shimano 600 Ultegra group puts composite performance within closer reach than ever before.

Fast and light Matrix aero wheel system features 7-speed cassette freehub.

Shimano new 600 Ultegra group takes 600 excellence a step further. Biopace, cassette, S.I.S. shifting, ergonomic design and modern styling all add up to the best in racing performance.

Stainless steel dropouts prevent tip damage during rapid wheel changes.

Available in natural finish as shown.

1500

ALUMINUM

Easton 7000-series aluminum has been transformed by Trek into this incredible machine. Lighter, stronger, and more comfortable than conventional framesets, it fast approaches the ultimate in cycling performance.

Bonded aluminum fork dampens road shock, tracks precisely and lets you handle the road with confidence.

Shimano's new 600 Ultegra group couples S.I.S. index shifting performance with 14-speeds of exhilaration.

Avocet Gelflex™ racing saddle offers better comfort than conventional molded designs.

Available in bright red with white decals and teal blue with magenta decals.

1200

ALUMINUM

Bonded 6061 heat-treated aluminum frame with responsive chromoly fork makes this the best Shimano 105-equipped bicycle ever. A tremendous value for the racer or serious recreational rider.

Heat-treated Alcoa aluminum is bonded using Trek's meticulous engineering methods into a light-weight, responsive frame.

Shimano's new 105 component group is a click-shift into the future. With S.I.S., refined linear-response aero brakeset and Biopace crank.

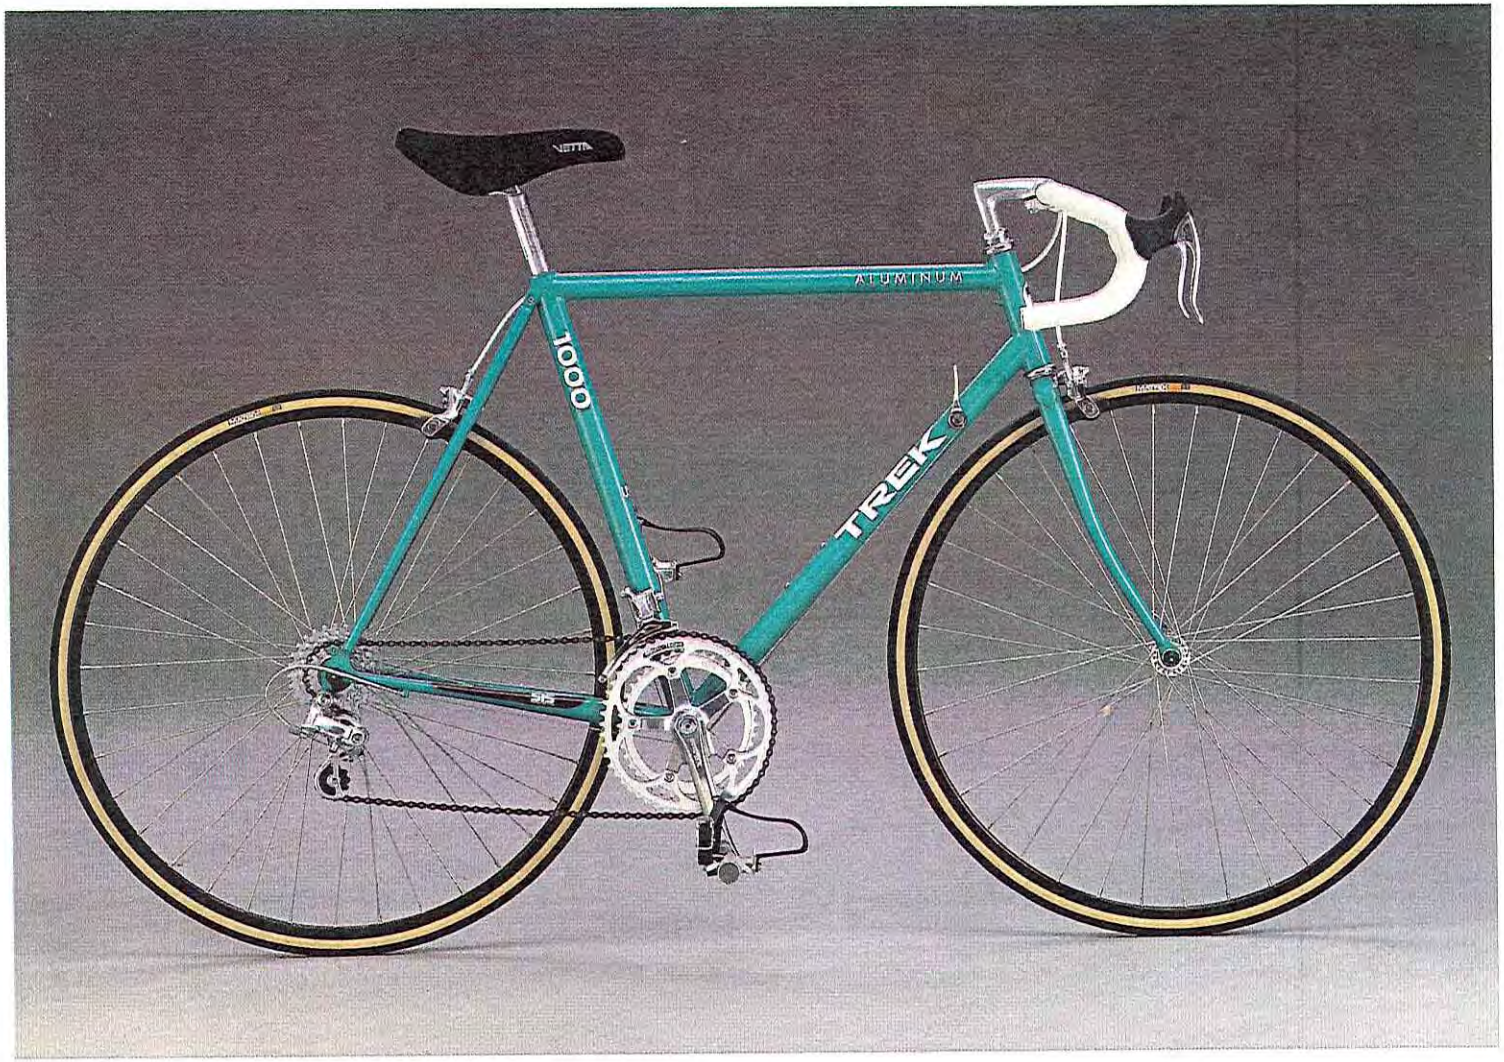

Matrix wheel system includes ISO-C heat-treated aerodynamic rims, 100 psi, CD-3 tires, and 32-hole sealed mechanism Matrix hubs. The fastest name on wheels.

TREK KIT BICYCLES

Trek kit bikes incorporate the finest Trek frames with the most refined components available in the world. Ask your dealer about having the ultimate custom Trek built for you.

2500 COMPOSITE FRAMESET

The finest Carbon composite frame available. Computer designed lug system bonds together bias woven double butted composite tubing and heat treated tapered aluminum stays.

2000 ALUMINUM FRAMESET

Rated "The finest all around racing bike we've tested" by "Bicycling" magazine, you'll love riding the 2000. Trek bonded aluminum is lighter, handles better, and goes faster than you'd think possible. Available in teal blue with magenta decals as shown. Also available in bright white with red decals.

770 REYNOLDS 531 FRAMESET

The classic full Reynolds 531 racing frame. More winners of the Tour de France raced full Reynolds frames than any other. Reynolds 531 built with Trek's unique cast lugs and low temperature silver brazing process gives you the most advanced steel alloy racing frameset. Available in yellow with blue decals as shown.

You can purchase a Trek frameset with or without your choice of groups shown.

CAMPAGNOLO CHORUS GROUP

Group includes alloy stem and bar, Suntour freewheel, Vetta saddle, and Sedisport chain.

SUNTOUR SUBERBE PRO GROUP

Group includes alloy stem and bar, Matrix hubs, American Classic seat post, Vetta saddle, and Suntour chain. Pedals not supplied.

SHIMANO SANTE GROUP

Group includes alloy stem and bar, American Classic seat post, Vetta saddle, and Shimano chain. Pedals not supplied.

All groups supplied as shown and include Matrix ISO-C hard anodized aero rims and Matrix CD-5 high pressure Kevlar bead tires.

660

REYNOLDS 531

Bring the names Reynolds, Shimano new 600 Ultegra, and Matrix together and what have you got? A modern Trek classic which offers high-speed response and precise handling under rigorous road racing conditions.

Double-butted Reynolds 531 frame, the racer's traditional favorite, is brazed into a rigid geometry using Trek's unique investment cast lugs for unsurpassed performance.

Shimano's new 600 Ultegra drivetrain includes S.I.S. shifting across all 14-speeds, and 52/42 Biopace crank with sealed bottom bracket.

Trek cast lug frame system gives you a strong, precisely aligned frame.

400T

CHROMOLY

This Trek 400 is easy to pedal with three oval chainrings, 18-speeds, S.I.S. Deore shifting, and an anatomical saddle.

Sealed mechanism quick-release hub fits into a Trek investment cast dropout with an eyelet that's ready to accept any high-quality rack.

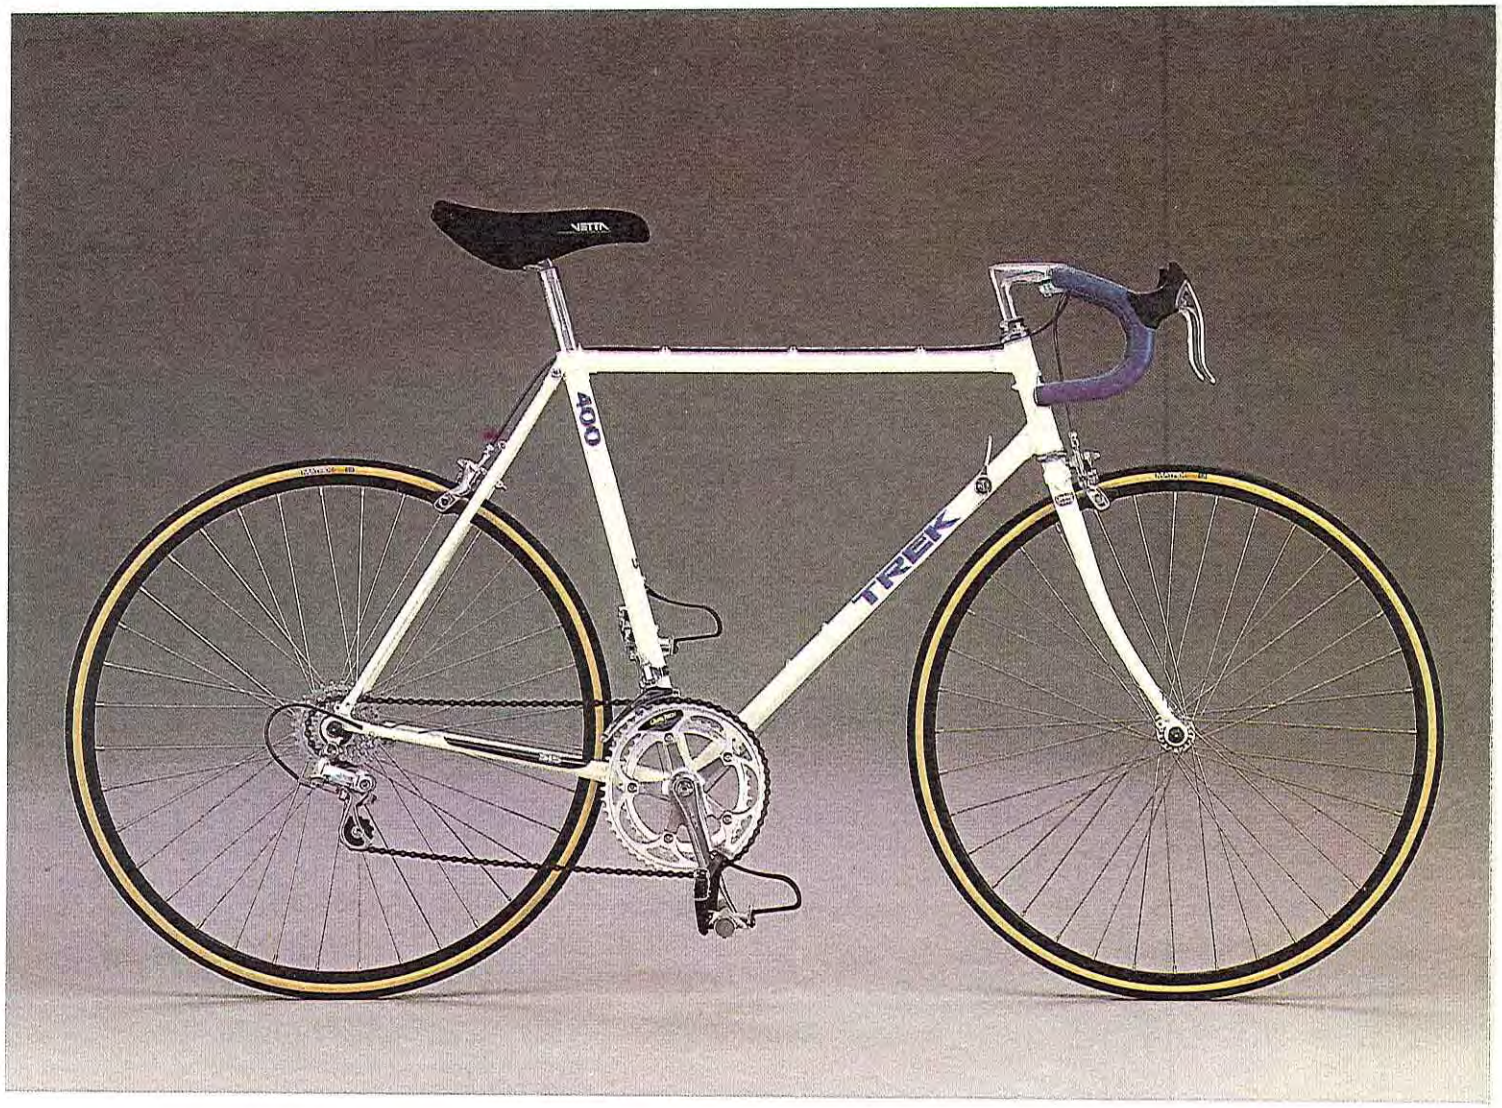

Oval-tech triple crank smooths out your power stroke for more relaxed riding over even the hilliest terrain.

Matrix Titan-S heat-treated wheel system offers lightweight durability.

Available in bright red with black decals and soft bl with yellow decal

400

CHROMOLY

True Temper Gold Label RC-1 tubing, built by Trek into a responsive sport touring geometry. Shimano light-action index shifting lets you command all 12-speeds with ease.

Shimano aero linear response brake system puts you firmly in control.

Shimano S.I.S. shifting means no more fumbling with gears—you're in perfect synch every time.

Performance from the ground up: Matrix Titan-S rims, CD-2 tires, and low maintenance sealed mechanism hubs.

Available in ecru with blue decals and bright red with black decals.

870

CHROMOLY

This lightweight, custom designed frame with True Temper standard diameter tubeset will redefine ATB performance.

Silver brazing and Trek investment cast lugs make this one of the lightest production chromoly machines in the all-terrain category.

Shimano Deore drivetrain featuring 18-speed S.I.S. and computer-designed Biopace chainrings will power you onward and upward.

Performance where it counts: the 870's tightly configured rear triangle for increased response when the hammer's down.

Specially engineered for this model, True Temper AT tubing is a high-quality chromoly with standard outside diameter and slightly greater wall thickness. For lightweight performance and all terrain durability.

Available in bright red with black decals as shown.

850

CHROMOLY

Tange tri-butted chromoly frameset, Shimano Deore componentry with S.I.S., Biopace and sealed mechanism Matrix-Araya wheels for 18-speeds of pure off-road excitement.

Command Shimano S.I.S. thumb-shifting and Deore brake system from a competition alloy handlebar set.

Shimano's Deore Biopace crankset with sealed bottom bracket will power you over any terrain.

Matrix CD-X tires mounted on Araya RM-20 rims with Matrix hubs can dish it out in the fat lane.

MATRIX

WHEEL SYSTEMS

Trek engineers have taken the systems approach to designing and building the finest wheels available.

Individual wheel components have been designed to maximize the performance of every element. As the sum of its parts, Matrix Wheel Systems outperform conventional wheels.

Heat treated rims, high pressure tires, stainless steel spokes and forged shell hubs are available as a complete system, or as components.

RIMS: Heat-treated to form a molecular "Matrix", these lightweight 6061 T-6 aluminum alloy rims are the most advanced available. Each Matrix rim profile is all computer designed to optimize strength at very low weights.

TIRES: Newly designed from the ground up, Matrix tires combine advanced technolgy with true all-around performance. Exclusive Matrix tread patterns offer the perfect balance of low rolling resistance, tight handling, and traction. The Matrix rubber compound is also the longest wearing, most puncture resistant available. The high-quality high thread count casings hold greater pressure and absorb shock while rolling more efficiently.

HUBS: Matrix hubs, the center piece of the new Matrix wheel system. One piece forged hubs are milled and polished. Axles are chromoly and bearing races are ground and polished. Available in 32 or 36 holes, with either sealed ball bearing, or sealed cartridge bearing.

Matrix wheels can be found as original equipment on Trek bicycles, or can be ordered separately from your Matrix dealer.
