1999 Tour de France
Champion

REAL BIKES. REAL PEOPLE.

Real bikes. Real people. It's what we do. And who we are. It's been that way since 1976. Today you see it in the pride of Trek employees. The passion of Trek pro racers, like '99 Tour de France winner Lance Armstrong and NORBA national champion Travis Brown. The loyalty of Trek customers. The inspiration behind innovative designs that use the latest technology. And our dedication to creating real bikes for real people. Like you.

Five steps to finding the perfect bike.

1 **Decide how you want to ride.**
There are different bikes for different types of riding. Finding the right bike for you starts with choosing the riding category that best suits your style.

2 **Choose the frame that's right for you.**
About 70% of how a bike rides is determined by the frame. Because the material a frame's made of, how it's designed and how it's crafted impacts efficiency, comfort and handling.

3 **Check the specs.**
After the frame, the wheels, suspension and drivetrain components, in that order, have the most effect on how a bike rides and performs.

4 **Get the right fit.**
Take time with your dealer to make sure the bike you select is the right size and is properly adjusted to give you maximum performance and comfort.

5 **Select the right accessories.**
The right accessories, along with the right bike, make cycling safe and fun.

The Mountain, Road and City & Bike Path bike categories are organized by skill level to help you start your search in the right spot:

PRO LEVEL
- Pro level bikes have the best frames, materials and components out there. Top shelf, stem to stays. But you don't have to be a pro to ride – and love – one.

COMPETITION LEVEL
- Competition level bikes have many of the same features of Pro level bikes, minus the higher price tag.

RECREATION LEVEL
- Recreation level bikes are for the rider who wants a quality, reliable bike loaded with added comfort features.

I love to ride my bike.

– Chad Bailey,
Somewhere in Utah.

RIDING CATEGORIES

8 **MOUNTAIN** Mountain bikes lay a world of riding experiences at your feet. Downhill bombing. Cross country racing. Cruising the campus. Riding on rail-trails. Which path will you choose?
FULL SUSPENSION | 14 HARDTAIL | 22

38 **ROAD** Proven in the Tour de France, Road bikes answer the call of the open road – or off road, in the case of the new cyclocross bike. Also new this year – the Hilo triathlon bikes. Sprint past your personal best, or pace yourself over a week in the country. Here's where you'll find your ride.
PERFORMANCE | 43 TOURING | 69

70 **CITY & BIKE PATH** City & Bike Path bikes add comfort and fun to commutes, morning workouts, shopping trips, or weekends with friends and family. They're all-purpose rides that anyone can enjoy.
HYBRID | 72 COMFORT | 80 CRUISER | 83

50 **BMX** BMX bikes have a style all their own. No matter if your operation is dirt, air or concrete, there's a Trek BMX bike ready to hit it hard.

58 **KIDS** Kids bikes get young riders started on a lifetime of cycling fun. Built with the same quality and attention to detail as Trek adult bikes, they teach proper riding techniques safely and comfortably.

IN DEPTH: TECH

MOUNTAIN TECH
11 SOFT TAIL PRO: The lightest, fastest full suspension racer. Period.
16 VARIABLE RATE SUSPENSION: Full suspension that feels right anywhere.
19 OCLV HC CARBON RACE: Feed your need for strength and speed.
24 ALPHA ALUMINUM RACE: Superlight and race-ready.
27 WOMEN'S SPECIFIC DESIGN: We've closed the gap between women cyclists and performance mountain bikes.

ROAD TECH
40 OCLV CARBON RACE: Ride the real thing.
46 ALPHA ALUMINUM RACE: Aluminum that goes off the front or around the world.
60 WOMEN'S SPECIFIC DESIGN: The shortest distance between you and ultimate road performance.

CITY & BIKE PATH TECH
71 HYBRID: Great bikes for work and play.
80 COMFORT: For fun rides that won't numb your brain – or your butt.

IN DEPTH: FINDING YOUR PERFECT BIKE

6 **FRAME MATERIALS** Find the Trek frame material that meets your performance, weight and quality requirements.

84 **GEOMETRIES** Explore the angles and distances that make up a Mountain, Road or City & Bike Path frame size and style.

86 **SPECIFICATIONS** Get all the details on the 2000 Trek bike line, including framesets, wheels, cockpit components, drivetrains and more.

92 **ACCESSORIES** Here's where you'll find the things that make any ride safer and more comfortable, from the essentials to the nice-to-haves.

GET TO THE HEART OF YOUR RIDE.
Most of your bike's ride comes from the frame. That's why Trek devotes so much time and energy to developing new frame designs. Working out of Waterloo, Wisconsin – in the most sophisticated bicycle manufacturing facility in the world – we study the features that make a great frame: light weight for efficiency, stiffness for speed, shock absorbency for comfort.

Then we apply our experience, industry knowledge and advanced engineering techniques to create patented, innovative designs that bring those features to life. The result is a complete line of frame styles, from race to recreation.

Which frame's right for you?

OCLV® carbon:
Trek pioneered using this aerospace material in bike frames. Today we've taken it a step further, testing the material at the highest level in the Tour de France and introducing the revolutionary Honeycomb Nomax® material. The strength-to-weight ratios of OCLV blow away any other frame material.

Alpha™ aluminum:
Trek Alpha aluminum has revolutionized aluminum at all levels of performance. From high-end Alpha SLR racing frames to value-added Alpha comfort frames, Alpha aluminum bikes are engineered and hand-built by the world's finest craftsmen.

Trek steel:
Steel's where we started. And where we continue to excel over the rest of the industry, with innovations that maximize steel's shock absorbency and minimize weight while maintaining its value.

STP SOFT / TAIL / PRO

TREK SOFT TAIL PRO™ (STP) FULL SUSPENSION RACE BIKES ARE THE LIGHTEST YOU CAN RIDE.

- Optimum Compaction Low Void (OCLV) carbon fiber, molded and bonded into a lightweight, 3.6-pound, true double diamond frame.
- OCLV's infinite fatigue life and the frame's warranty ensure a lifetime of racing performance.
- OCLV's directional properties create a rear triangle that's vertically responsive and laterally stiff.
- The compliant rear triangle has an air shock with 1.25" of adjustable travel instead of a monostay, creating a pivotless rear suspension that takes the edge off rough singletrack.
- The Trek Pro Geometry gives you balance and control at race speed.

XC FULL SUSPENSION

STP 400™

The lightest full suspension bike available anywhere.

- The OCLV Soft Tail Pro carbon frame, handbuilt in the U.S., is a proven Pro World Cup winner.
- The simple STP pivotless rear suspension takes the edge off and puts the power on.
- The durable, lightweight Rolf Propel paired spoke wheelset is the pros' weapon of choice.
- The Rock Shox SID Racelite 63mm fork and SID Adjust 1.25" rear air shock are dialed for XC racing.
- Shimano XTR crank and 9-speed derailleurs.

- The OCLV Soft Tail Pro carbon frame, handbuilt in the U.S., is a proven Pro World Cup winner.
- The simple STP pivotless rear suspension takes the edge off and puts the power on.
- The Rolf Dolomite wheelset drops spoke count and weight without sacrificing strength or durability.
- The Rock Shox Judy Race 80mm fork and SID Adjust 1.25" rear air shock are dialed for XC racing.
- ICON Graphite crank and Shimano LX/XT 9-speed derailleurs.

PRO COMP REC

VRX

Full suspension that feels right anywhere.

VRX (Variable Rate Suspension) proves that full suspension really can be a fun, all-purpose ride. Maybe even the best ride you've ever had. The keys? A new, lighter design. A redesigned **Fully Independent Linkage (F.I.L.)** bar. And a single pivot, cantilever swingarm.

F.I.L. varies the rear shock's leverage ratio as your terrain changes, so travel begins supple and plush, but ramps up quick on big hits to give you a non-bottoming-out range. F.I.L. also provides the connection between the lightweight air shock and swingarm, enhancing the travel of the rear shock while absorbing the loads and stresses that cut short shock life. And because F.I.L.'s independent of the rear wheel, there's no interference with tracking.

VRX also comes in a **Long Travel version** - all the beauty of VRX plus the bonus of bomber spec. Now you can blow your mind on a downhill run, and still have some left for fun at the bottom.

Pro Geometry: The ride is balanced and responsive at high speeds.

The redesigned F.I.L. bar and rear, adjustable air shock let you dial your travel to match the day's environment. The new rear suspension system also helps the VRX bike shed two pounds.

A bombproof Alpha FS aluminum frame.

The large single pivot and oversized, extruded truss-reinforced, Alpha aluminum swingarm keep the rear wheel tracking in all conditions.

XC FULL SUSPENSION

VRX 300™

The best all-around full suspension bike on the market.

- The Alpha FS aluminum frame, handbuilt in the U.S., is gusseted, oversized and bombproof.
- The Fully Independent Linkage (F.I.L.) bar varies the rate of the rear shock – it starts supple, but ramps up on big hits so you don't bottom out.
- F.I.L. has two shock positions (all conditions and cross country) to let you dial in the ride.
- The Rolf Dolomite wheelset drops spoke count and weight without sacrificing strength or durability.
- The Manitou SX 80mm fork and Cane Creek air shock with up to 5" of rear wheel travel are tuned for all-around cross country rides.
- ICON Graphite crank and Shimano LX/XT 9-speed derailleurs.

TREK RACING TEAM

ALPHA CUSTOM ALUMINUM SLR

Superlight and race-ready.

MATERIAL AND DESIGN COME TOGETHER IN A WINNING FRAME. SLR is not just another frame designation. It's our revolutionary Alpha Superlight Race frame – 3.4 pounds of pure power that devours courses and other racers. "R" is also our new pro geometry, and it stands for race. Or rip it up, rocket fast, and ready for the podium. Put them together, and you get one high speed, impact resistant, downright nasty acronym. Alpha SLR comes in two versions – light-and-fast racing or big-hit long travel.

PRO RACE GEOMETRY FEATURES

The front wheel's pushed further ahead to get your body in race mode.

Your shoulders stay over the frame centerline, so the bike's more balanced when you're trying to hold your line.

The shorter stem and longer top tube put control of the bike in your hands instead of your shoulders so you descend and climb with no compromise.

You spend more time in the saddle so you're in a better position to keep the power flowing.

XC HARDTAIL

8000™

Light and fast – this baby's built to be raced.

KRISTA SCHNEIDER, ANNE DOCTER & FRIENDS: Somewhere near the Kettles

Out with the grrrls.

Krista (in blue) is a mountain biker. Anne (in green) prefers the open road. But the Trek sales rep and Trek clothing product manager agree that a Women's Specific Design bike fits like no other. Krista and Anne should know, because they – and other female cyclists from around the world – talked with Trek engineers. Told them what it would take to give women the ideal blend of performance and comfort. The engineers listened, and came back with the solution: WSD.

http://www.trekbikes.com/wsd/

WSD
women's SPECIFIC DESIGN

A TREK WSD IS THE MOUNTAIN BIKE UNIQUELY ENGINEERED TO FIT A WOMAN'S BODY.

- Modified tube lengths and angles for stability and comfort.
- A custom-tuned suspension fork that's active for smaller, lighter riders.
- Specially selected components, including shorter cranks, narrower bars, thinner grips and short reach brake levers, for better performance.

XC HARDTAIL

8000 WSD™

The high performance race ride for women.

- The Alpha SLR aluminum frame, handbuilt in the U.S., is race light and ready.
- The custom WSD frame design and specially spec'ed components address key performance and comfort issues for women.
- The Rolf Satellite paired spoke wheelset is light, stiff and fast.
- The Rock Shox Judy Race 80mm fork is custom tuned for smaller, lighter riders.
- ICON Graphite crank and Shimano LX/XT 9-speed derailleurs.

CHRIS EATOUGH: Trek/VW East Coast Factory Team | Canaan, WV

Sleep or win? They'll take the win.

The 24 Hours Of Canaan. It's Woodstock meets Le Mans. Organized race teams and loosely-allied beer buddies alike descend on a makeshift tent city outside of Davis, West Virginia to compete in one of mountain biking's most challenging races. The race starts at noon on Saturday, and for the next 24 hours riders try to complete as many laps as they can. They eat on the fly, or wait until the lap's done – if they don't collapse from exhaustion first. They ride all night, praying their lights don't fail. They ride all morning, praying their bodies don't fail.

In '99, Chris and his teammates Sue Haywood, Katie Compton and David Duvall won the Pro class race – the second straight for the Trek/VW East Coast Factory team – in a record 21 laps. That's about six hours of saddle time for each. They've earned the rest.

KEN WHELPDALE (right) & STEVE TOLO: Trek Tech Support | Austin, TX

Taking it to the streets.

The Trek/VW Demo Tour. It's about guys hauling a truckload of Trek bikes to some of America's most popular cycling spots. Giving people of all ages and skill levels a chance to get on a new Trek mountain or road bike, take it through its paces, and find out for themselves how investing in the right bike makes the ride better. Ken, Steve and the rest of the tech support group travel the entire country, hitting 80 to 85 events a year. About half are on the Demo Tour. The rest are at fun rides, where the guys get to flex their wrench muscle and keep the participants riding.

Check the Trek website to see when the Trek Demo Tour's stopping in your town.

http://www.trekbikes.com/demo/

JUSTON HUFFMAN: College Student | Hood River, OR

Making the grade.

Juston's one busy 20-year-old. When he's not on campus, he manages one of the hottest coffee shops in town. Good thing he's got the right escape pod – namely a Trek Mountain bike. It takes him to some awesome trails and paths. And far away from the world of lecture halls and espresso machines.

Ride the real thing.

46 **Alpha Aluminum Race:**
Aluminum that goes off the front or around the world.

60 **Women's Specific Design:**
The shortest distance between you and ultimate road performance.

JULIEN de VRIES: Head Mechanic, USPS Pro Cycling Team | Tour de France

The wrench that wins the race.

Julien is a renowned mechanic. He's tuned and repaired bikes for cycling legends like Merckx, LeMond, and now Armstrong. He's race proven, just like his team's OCLV carbon bikes – which he's still amazed have performed so well with production frames, not the custom frames he's worked on for other teams.

http://www.trekbikes.com/usps/

OCLV CARBON

Ride the real thing – Lance Armstrong's Tour de France-winning OCLV carbon bike.

No other material rides like carbon. And no other carbon rides like **Optimum Compaction Low Void (OCLV)** carbon. 1999 Tour de France winner Lance Armstrong and the rest of the Postal boys agree. The USPS Pro Cycling team spent three Tour de France campaigns on stock production Trek OCLV frames. Simply the praises of lightweight climbs, stiff sprints, and Tour-winning endurance. Just ask Lance, George, Frankie, Tyler, Kevin, Christian, Pascal, Peter, and Jonathan.

Pro Geometry Feature: The top tube's long for even weight distribution.

Optimum Compaction is the process of compacting a perfect blend of 65% carbon fiber with 35% thermoset epoxy matrix.

A 2.44 lb OCLV carbon frame – the lightest production road frame in the world.

Pro Geometry Feature: The seat tube angle and chainstay length are ideal for smooth, strong strokes.

Low Void is the resulting minimization of air pockets to a level below 1% voids, which is on par with aerospace standards for jet fighter wings.

ICON Air Rail OCLV carbon fork is light, stiff and aerodynamic.

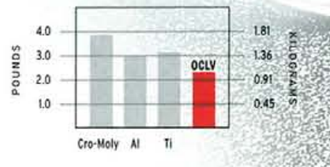

Pro Geometry Feature: The bottom bracket's position gives you great clearance through turns.

The stiff bottom bracket means nothing's lost in the transmission of pedal power to attack speed.

OCLV uses custom multi-directional layering techniques. We pinpoint specific stress areas and apply reinforcements precisely where needed. Higher ultimate strength without using excess carbon.

Full Comfort: OCLV's unique design and natural properties are dialed for comfort over the long haul. Great for centuries or winning the Tour de France.

▸ OCLV carbon is the lightest production road frame you can ride. It weighs only 2.44 pounds – including paint!

WATCH FOR THE USPS TEAM AND THEIR OCLV STOCK PRODUCTION BIKES AT THE 87TH TOUR. SEE HOW YELLOW COMPLEMENTS POSTAL BLUE – AGAIN.

UNITED STATES POSTAL SERVICE. Pro Cycling Team

LANCE ARMSTRONG: Stage 9: Le Grand Bornand/Sestrières

He Delivers.

Before Stage 9, Lance was already a Tour stage winner, time trial master, Olympian, and world champion. But on July 13, 1999, he conquered the Alps to become the world's choice to win the 86th Tour de France. What made it all the more amazing was another title Lance holds: cancer survivor. Diagnosed in 1996, Lance left the sport to beat the disease that had spread throughout his body. Eighteen months later, he was back in the saddle. He quickly made his way back amongst cycling's elite with wins at the 1998 Tour de Luxembourg and Rheinland Pfalz. Now he's where he belongs. On the podium, wearing the Maillot Jaune for the USPS Pro Cycling team. He's the first American to win the Tour riding for an American team. And he did it on an American made bike.

http://www.trekbikes.com/usps/

ALPHA CUSTOM ALUMINUM SL

Aluminum that goes off the front or around the world.

WHAT MAKES 'EM TICK – AND KICK? We had the history of making great aluminum road bikes. But when you have access to new tech and the practical, in-the-cockpit experiences of world-class time trial and road racers, you just gotta push that envelope. So we created not one, but two new Alpha SL aluminum frames. You may prefer the lighter, Alpha SLR frame of the 2300. The "R" stands for race-ready, because this bike's built to get you on a podium. Or maybe it's the all-around frame of the 2200, with a rack dropout that opens your ride options to include a little light touring. Whichever way you choose, you win. Because Alpha SL kicks out stage-winning sprints as easily as it carries you cross country.

Tube superiority comes from aluminum that's heat treated, fabricated using seamless dies, and drawn into tubes with lighter, thinner and stronger walls.

Trek welds are works of art. And they're all natural - no sanding, buffing or "Bondo" retouches here. What are other bike frames trying to hide?

We don't let just anybody weld Alpha SL frames. Only the best of the best are qualified for this job. It shows.

The custom butted headtube adds strength up front, not weight.

The 3-D forged monostay's wishbone shape keeps it stiff during harsh climbs and hard rear braking.

Light and laterally ridged, double butted aero tubing keeps the connection flowing between you, pedal force and pure speed.

The beefy, elliptical chainstays are stiff and power efficient. A replaceable derailleur hanger lets you keep the frame after a crash.

PRO GEOMETRY FEATURES

The top tube's long for even weight distribution.

The seat tube angle and chainstay length are ideal for smooth, strong strokes.

The bottom bracket's position gives you great clearance through turns.

PERFORMANCE

2300™

The Alpha SLR aluminum pro performance racing machine.

- The double-butted Alpha SLR aluminum racing frame, handbuilt in the USA, is light on weight and strong on performance.
- The same responsive Trek Pro Geometry the USPS Pro Cycling team performs on.
- The ICON Air Rail carbon fork, raced by the USPS Pro Cycling team, is ultralight and responsive.
- The Rolf Vector Comp wheelset is light, stiff and aerodynamic.
- Shimano Ultegra crank and 9-speed derailleurs (double or triple).

- Pads, training wheels and a hand brake help kids gain confidence, safely.

KIDS 12" WHEELS

Mt. Cub™ 12

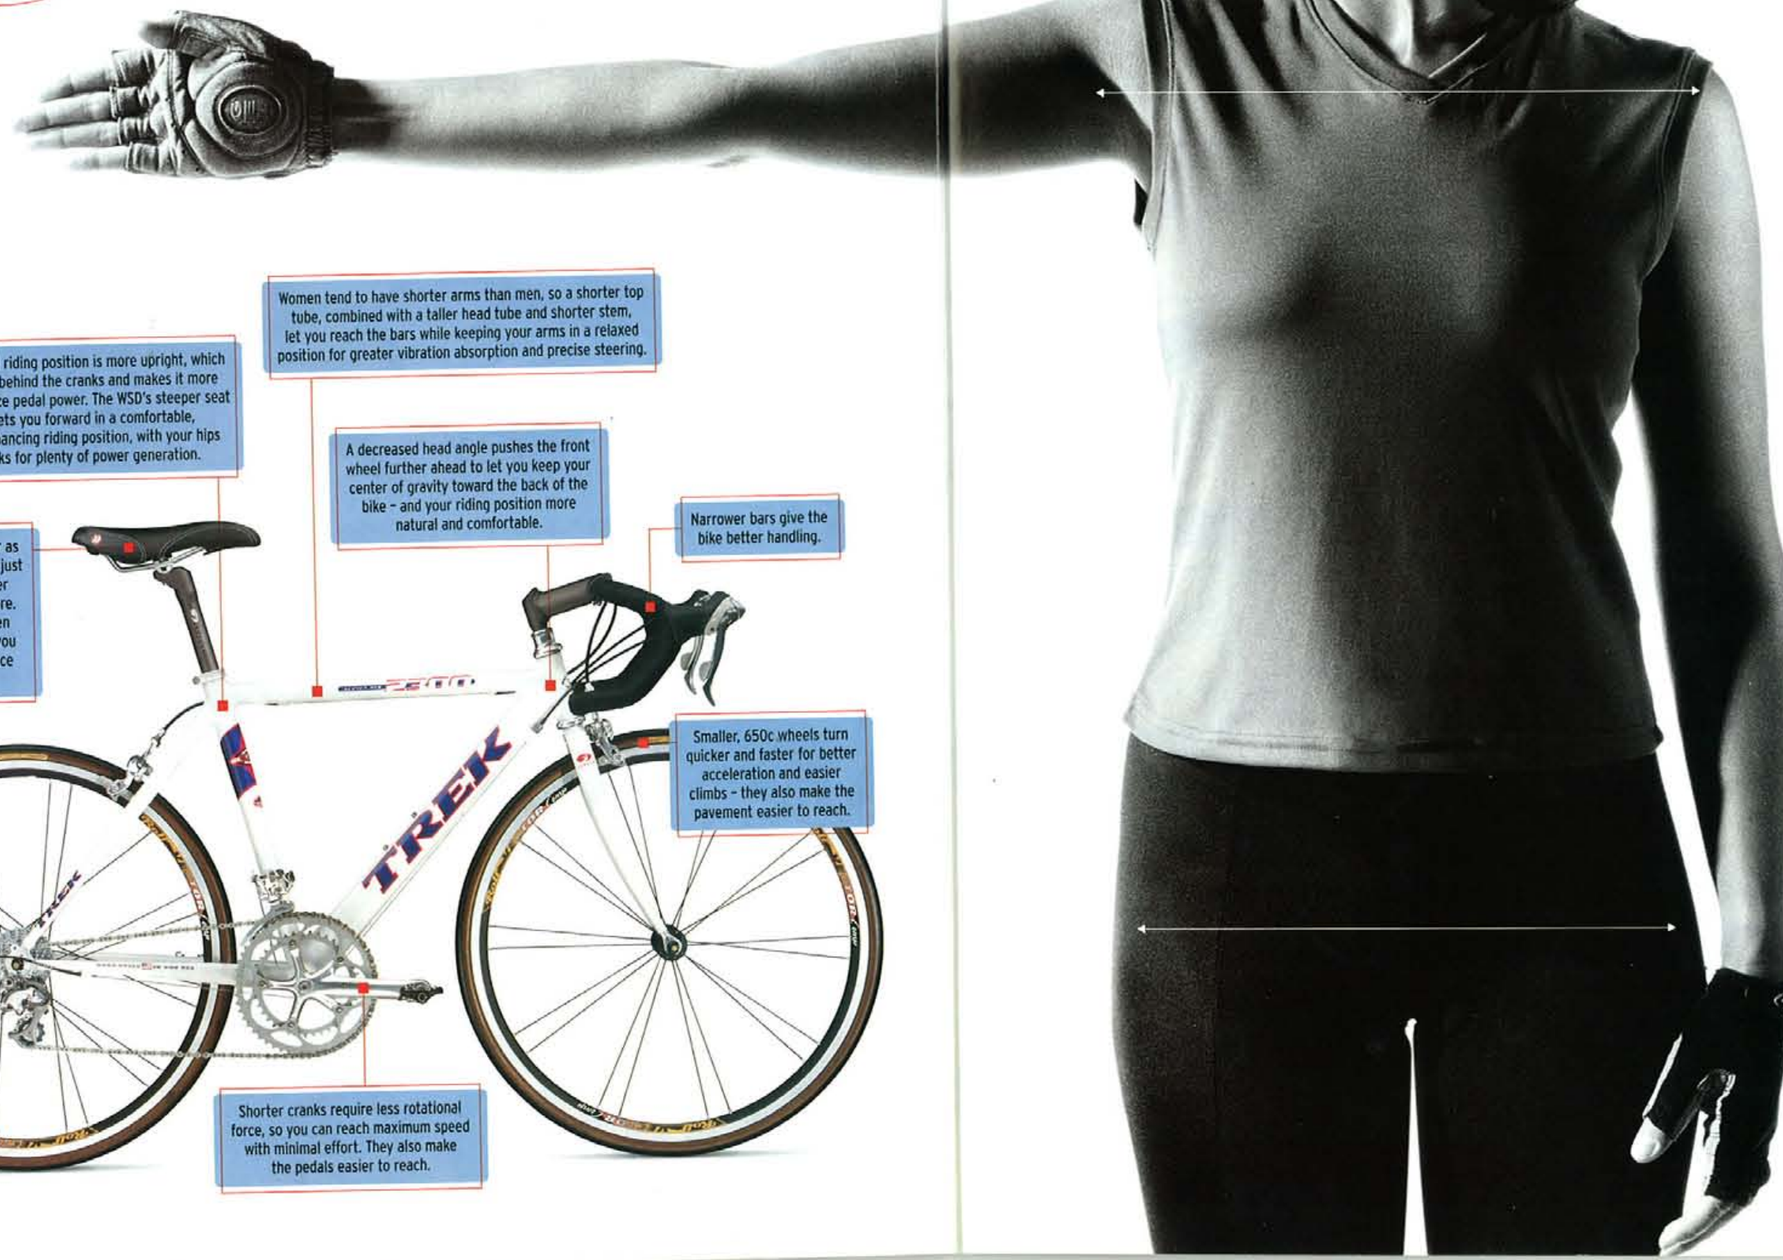

It all starts here.

- The all-steel Y frame is kid-proof and fun to ride.
- The steel rims and Trek Paw design tires are traction-filled.
- Pads, fenders and training wheels help kids gain confidence, safely.

WSD
women's SPECIFIC DESIGN

The shortest distance between you and ultimate road performance.

You can stop settling for a man's road frame. Now you can get a bike specially tailored and spec'ed to fit your body. It's all thanks to Women's Specific Design. And it's only available from Trek. Now it's your turn to say "on your left!".

A woman's natural riding position is more upright, which places your hips behind the cranks and makes it more difficult to maximize pedal power. The WSD's steeper seat tube angle gets you forward in a comfortable, performance-enhancing riding position, with your hips over the cranks for plenty of power generation.

Women tend to have shorter arms than men, so a shorter top tube, combined with a taller head tube and shorter stem, let you reach the bars while keeping your arms in a relaxed position for greater vibration absorption and precise steering.

A decreased head angle pushes the front wheel further ahead to let you keep your center of gravity toward the back of the bike – and your riding position more natural and comfortable.

Narrower bars give the bike better handling.

You already know that as far as comfort goes, men's saddles just don't cut it. Especially after spending the whole day there. So the WSD saddle has been carefully designed to give you the right mix of performance and comfort.

Smaller, 650c wheels turn quicker and faster for better acceleration and easier climbs – they also make the pavement easier to reach.

Shorter cranks require less rotational force, so you can reach maximum speed with minimal effort. They also make the pavement easier to reach.

In creating WSD, Trek focused on the key physiological differences that can impact a woman's performance when she rides a bike designed for a man:

1 NARROWER SHOULDERS.

2 SHORTER ARMS.

3 WIDER HIPS.

4 SMALLER HANDS.

WSD
women's SPECIFIC DESIGN

A TREK WSD IS THE ROAD BIKE UNIQUELY ENGINEERED TO FIT A WOMAN'S BODY.

- Modified tube lengths and angles for stability and comfort.
- Specially selected components, including shorter cranks and narrower bars, for better performance.
- Smaller, 650c wheels for improved climbing and accelerating.
- A triple chainring on the 2200 WSD and 2000 WSD for wider gear options.

PERFORMANCE

2300 WSD™

A road race bike truly designed for women.

- The Vuelta Vision rims with machined sidewalls and Millenia Comfort tires provide superior braking and smooth-rolling comfort.
- The Cro-Moly fork, shock absorbing seatpost, saddle, and suspension stem soften rough riding surfaces.
- Shimano C202 crank and C201 8-speed derailleurs.

PRO COMP **RECREATION**

Also available in Gloss Black with Silver decals

COMFORT

Navigator 200™

Comfort made simple.

- The enjoyable, upright-riding Alpha aluminum frame is light and durable.
- The alloy rims and Millenia Comfort tires provide superior braking and smooth-rolling comfort.
- The comfort steel fork and shock absorbing seatpost soften rough riding surfaces.
- Shimano C102 crank and C101 7-speed derailleurs.

PRO COMP **RECREATION**

Also available in Bright Silver/Metallic Slate Fade with Blue decals

REBECCA BARSTOW & SIMON: Trek Sales Rep | Miami Beach, FL

Living the good life.

The urban landscape's built for cruiser bikes. Block after block of classic architecture. Cool sidewalk cafes. Hot clubs. People-watching that pays off with the occasional celebrity. And, if you're really lucky, a beach. All the ingredients for a perfectly laid-back lifestyle. Is it any wonder Rebecca's been doing this for 10 years?

http://www.trekbikes.com/cruiser/

CRUISER

Town & Country™

Retro fun on the beach or around town.

- The high tensile steel frame has long life and shock absorbing comfort.
- The alloy rims and fat, whitewall tires look smooth, ride smooth.
- The alloy 33T crank and Shimano Nexus 4-speed rear hub are easy to use and maintain.

PRO COMP **RECREATION**

Also available in Mirror Black with Red decals

CRUISER

Calypso™

Take a ride into the past.

- The high tensile steel frame has long life and shock absorbing comfort.
- The alloy rims and fat, whitewall tires look smooth, ride smooth.
- The 40T crank and Shimano Tourney 6-speed rear derailleur are easy to use and maintain.

PRO COMP **RECREATION**

Also available in Ice Red with White decals

CRUISER

Cruiser Classic®

Single-speed fun.

- The high tensile steel frame has long life and shock absorbing comfort.
- The alloy rims and fat, whitewall tires look smooth, ride smooth.
- The single-speed drivetrain is more than a component – it's a lifestyle.

When it's time to attack.

TAKE THE NEXT STEP WITH PERFORMANCE UPGRADES. Designed to meet the strict standards of elite racers – including our pro racing teams – performance upgrade accessories can handle the most intense cycling environments. And take your performance off the front.

BONTRAGER RE-1™

- Proprietary off-road binding and cleat design eliminates mud clogging.
- Low profile design for easy entry/exit.
- Broad pedal platform for stability.
- Six degrees of lateral float.

HIMAL™

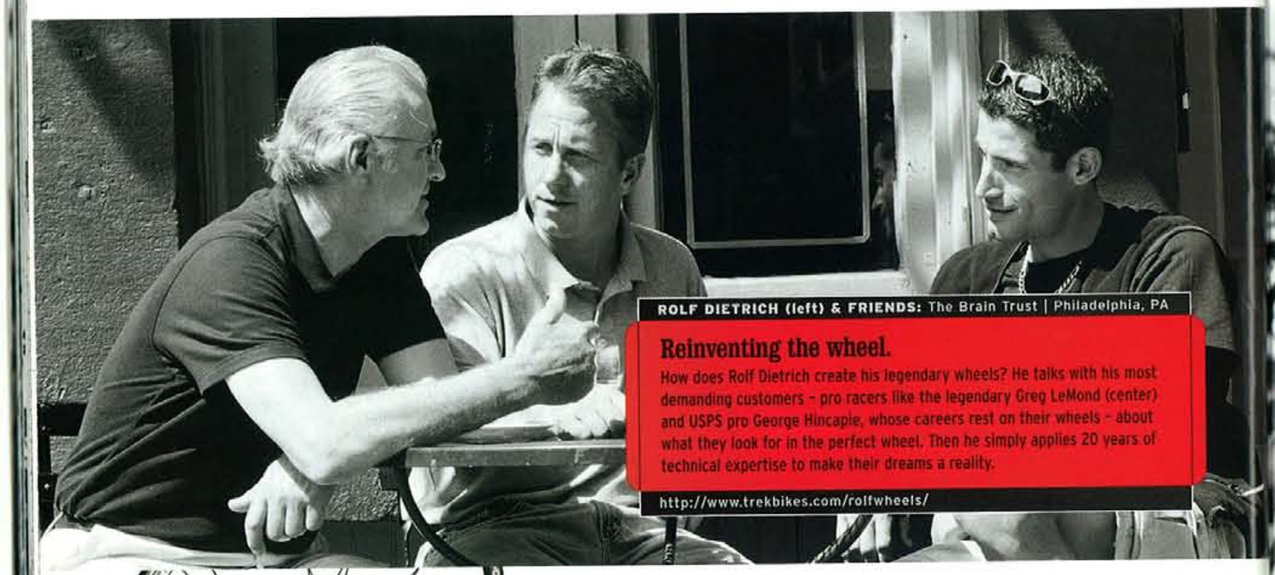

- Molded in-shell provides maximum weight savings.
- 18 large vents for extreme ventilation.

TEAM TREK/VW™ JERSEY/SHORTS

JERSEY
- 100% Polyester Air Control.
- Made in Italy by DeMarchi, team sponsor for 1999.

SHORTS
- Eight-panel Lycra construction means the shorts move with you.
- Flat-seamed baseball cut wicks away moisture for a comfortable ride.

ROLF DIETRICH (left) & FRIENDS: The Brain Trust | Philadelphia, PA

Reinventing the wheel.

How does Rolf Dietrich create his legendary wheels? He talks with his most demanding customers – pro racers like the legendary Greg LeMond (center) and USPS pro George Hincapie, whose careers rest on their wheels – about what they look for in the perfect wheel. Then he simply applies 20 years of technical expertise to make their dreams a reality.

http://www.trekbikes.com/rolfwheels/

ROLF WHEELS. Rolf Off Road wheel systems have the strength and stiffness to withstand the most rigorous racecourses, with the light weight to get you flying to the podium. Rolf Road wheel systems are designed to be the lightest, most aerodynamic wheel you'll ever ride.

DOLOMITE DISC (EXPERT)

- Strong, paired spoke design (24/24).
- Light (1789 grams/pair)
- Asymmetrical, disc-specific rim design.

Other Rolf off road wheelsets available: Propel (pro), Urraco (elite), Dolomite (expert) and Satellite (sport).

VECTOR COMP (ELITE)

- Fast, bladed paired spokes (18/20)
- Light (1903 grams/pair)
- Lightweight, precision cartridge-bearing hubset.

Other Rolf road wheelsets available: Vector Pro (pro) and Vector (sport).

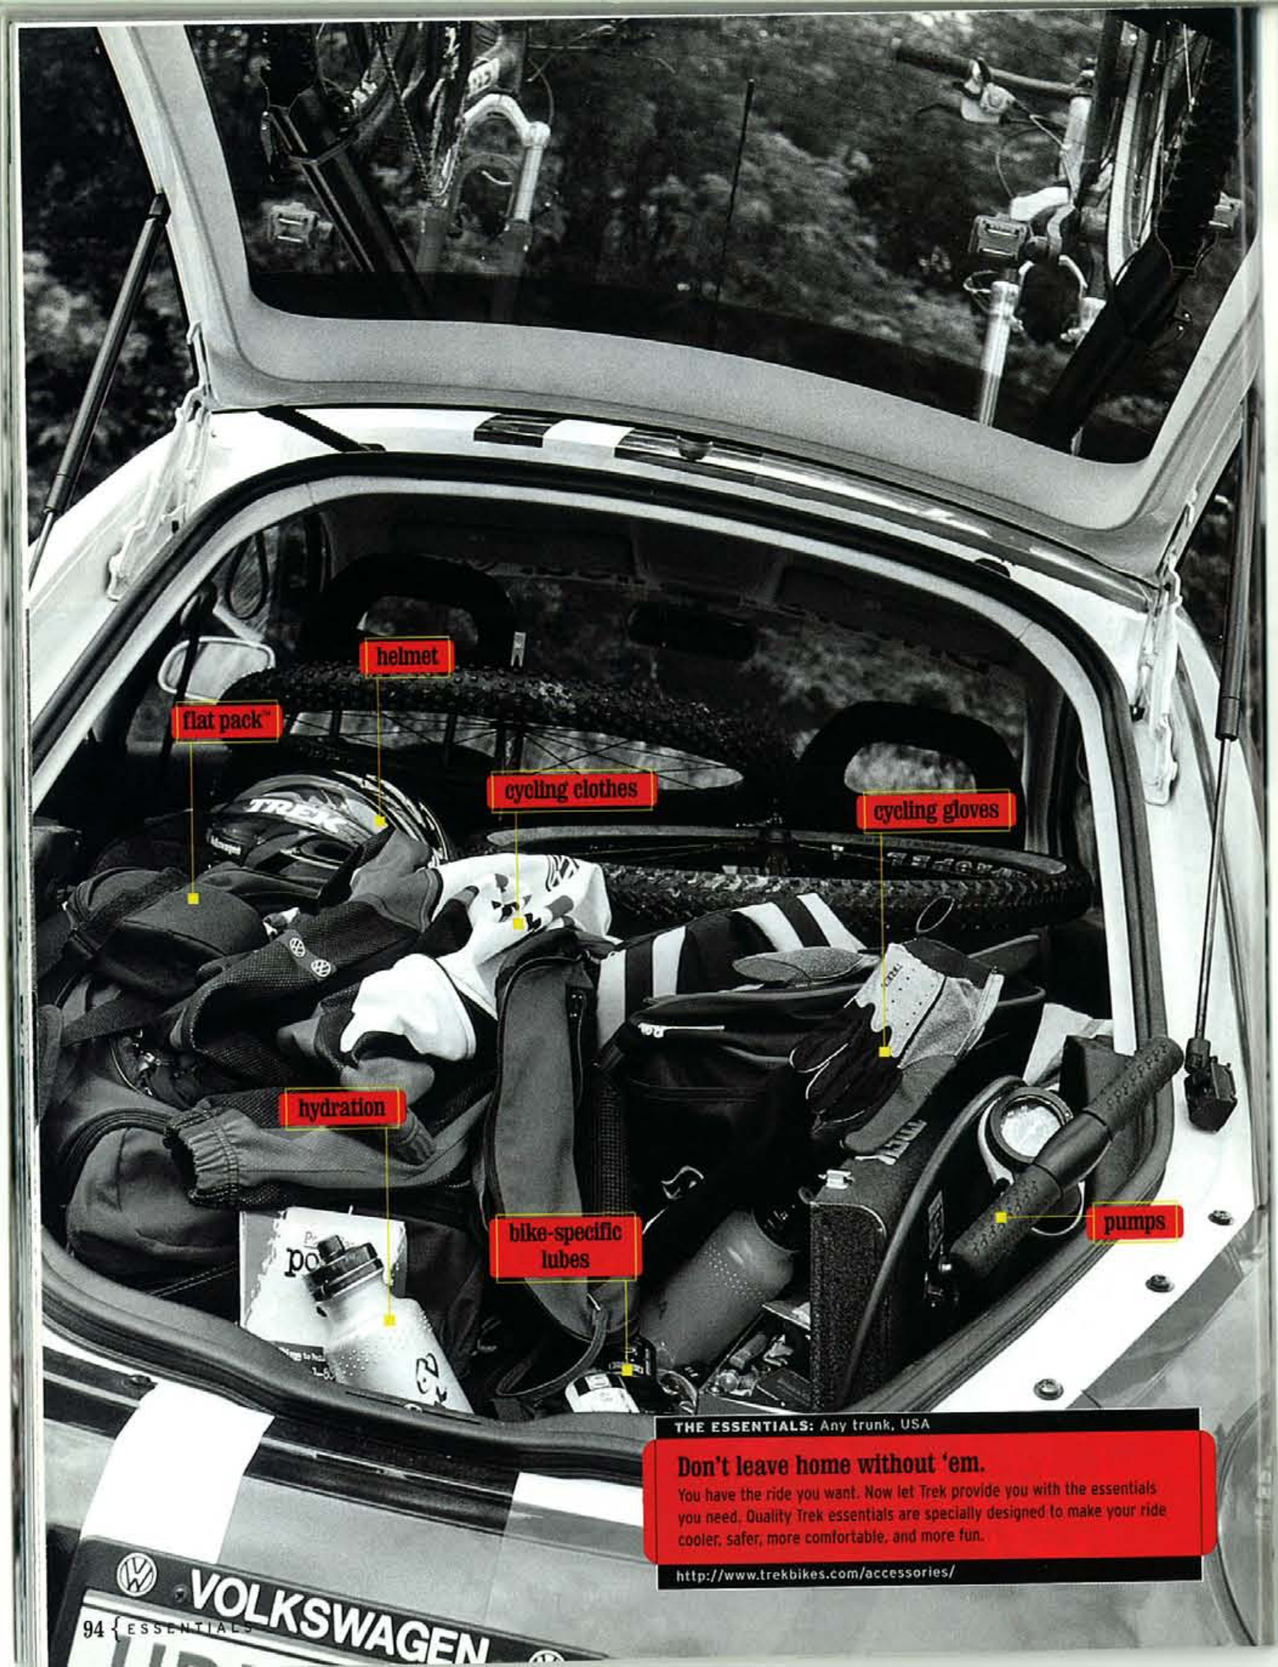

Rolf WHEELS

The best bikes demand the best wheels.

Without question, wheels are the single most performance-enhancing component of a bike. Which is why you should consider upgrading to Rolf wheelsets. Rolf Dietrich has spent the better part of twenty years obsessing over every aspect of his wheels. Making them stiffer. Stronger. And, yes, lighter. So you can negotiate mile after mile with uncommon agility. Speed Guaranteed.™

THE ESSENTIALS: Any trunk, USA

Don't leave home without 'em.

You have the ride you want. Now let Trek provide you with the essentials you need. Quality Trek essentials are specially designed to make your ride cooler, safer, more comfortable, and more fun.

http://www.trekbikes.com/accessories/

TREK ESSENTIALS

HELMETS

Protect the organ you use the most while enjoying any ride - your brain. Whether the places you ride require a helmet or not, using a Trek helmet should be a no-brainer. Lightweight and well-vented, it's serious safety equipment that looks and feels great.

EUPHORIA™

- All new internal shape for a great fit.
- Full Adjustable Cinch Retention System holds the helmet securely in place.
- 19 air vents and interior channels keep the head cool.
- Snap-on visor keeps out sun, dirt and rain.
- Ultra-soft webbing and rotary strap adjusters provide a comfortable and secure fit.

PHOTON™

- One of the market's lightest weight helmets.
- 26 vents maximize ventilation.
- New Cinch Retention System for precise fit.

VAPOR™

- New internal shape for a great fit.
- 19 air vents keep you cool.
- Snap-on visor keeps the sun out.
- New, ultra-soft webbing for comfort.

SCOUT YOUTH™

- New Cinch Retention System helps keep helmet properly positioned.
- 19 air vents generate ample air flow.
- Anti-pinch chin pads protect skin when securing.

LITTLE DIPPER™

- Anti-pinch chin pad protects skin when securing.
- Ear cut outs comfortably fit over ears.
- Eight air vents keep heads cool.
- New ultra-soft webbing for maximum comfort.

TREK ESSENTIALS

GLOVES

Your hands keep you in control. Keep them warm, dry and well-protected with well-padded Trek gloves. Your Trek dealer has lots of styles to choose from.

BRUSH BEATER™

- 3/4-finger glove gives you great knuckle coverage.
- Amara™ palm designed with padding where needed.
- Sculpted PVC vinyl knuckle and back padding keep knuckles safe.
- Elastic mesh finger back panel for flexibility and cooling.

ABSORB GEL™

- Gel palm provides optimal shock absorption.
- Synthetic leather palm is machine washable.
- Reinforced forefinger construction prevents wear.
- Adjustable closure on back of wrist for snug fit.

CLUB GLOVE™

- Stretch back and fourchettes provide the most universal fit.
- Leather palm is durable, abrasion resistant, and the color won't bleed.
- Reinforced forefinger construction prevents wear, and gives better shift and brake control.

CHAINSLAP™

- Full-finger provides protection and warmth.
- Waterproof Amara synthetic leather palm is durable and keeps you dry.
- Gummy Amara "Wrap Tight" thumb and forefinger construction gives longer life.
- Perforated back and palm for breathability and venting.
- Inner wrist Velcro™ fastener eliminates constructive bands for a more comfortable fit.

FAST EDDY™

- Cool, light and fast.
- 3/4 mesh back or complete breathability.
- 1/4 terry back for absorbency.
- Padded Amara palm is completely washable.

TREK ESSENTIALS

CYCLING CLOTHES

Once you try 'em, you'll never go back. Special, strategically-placed padding and moisture-wicking fabric help you get the most out of your ride.

WSD WOMEN'S SPECIFIC DESIGN

CLUB JERSEY™

- Microdri, closed mesh jersey fabric is lightweight and comfortable.
- Long zipper allows for better venting and makes jersey easier to get on and off.
- Relaxed cut for the active rider who does not want a competition fit.
- A separate fit for men and women means a better fit for you.

MEN'S TRAIL RIDING SHORTS™

- Trail Cloth outer shell fabric is lightweight and durable.
- Full nylon/Lycra spandex cycling short liner.
- Contoured seams provide an anatomical fit.
- Plenty of secure pockets provide carrying capacity.

FACTORY TEAM™ JERSEY/SHORTS

JERSEY
- 100% Polyester Air Control.
- Made in Italy by DeMarchi, team sponsor for 1999.

SHORTS
- Eight-panel Lycra construction means the shorts move with you.
- Flat-seamed baseball cut wicks away moisture for a comfortable ride.

CLUB SHORTS™

- Anatomically designed six-panel construction curves with you.
- Separate fit for men and women.
- Hydrofil pad with flat seams prevents chafing and wicks away moisture.

EVO SHORTS™

- Polyester on the inside wicks moisture away from your skin and the nylon face offers added abrasion resistance.
- Eight-panel, 8 oz. Lycra creates a contoured, comfortable fit.
- Extra long back rise is perfect for riding position.
- Flat seams for added comfort.

TREK ESSENTIALS

HYDRATION

Staying hydrated is the key to a safe, comfortable ride. And you won't find a better return on investment anywhere.

WATER BOTTLES™

- Triple seal top for leak-proof drinking.
- Wide mouth design fits ice cubes and makes for easy cleaning.
- Inversed flow allows for easy drinking.
- Available in 20 and 26 ounce sizes.

FLAT BELLY CAGE™

- Firmly holds bottles in place while reducing scuffing.
- Side entry/exit is perfect for small bike frames.
- Two-piece mounting bracket offers strength.
- Lifetime warranty.

H2O BACKPACK™

- Compact and lightweight design.
- Expandable main sleeve for full-size bladder.
- Half sleeve for second bladder or gear.
- Separate pockets for emergency tools.
- Fits most popular hydration bladders.

TREK ESSENTIALS

LUBES

Your bike's got plenty of moving parts. If you keep those parts well conditioned and lubricated, your bike will give you years of epic cycling experiences.

WET LUBES™

- Polymer additives bond to chain in even the wettest conditions.
- Added level of corrosion and rust protection.

DRY LUBES™

- Dirt and dust build up minimized with dry formula.
- Specially formulated for bicycle chains used in dry conditions.

TREK ESSENTIALS

FLAT PACK™

Be prepared for the unexpected with the right pack - one with a tube, tire levers, patch kit and pump - and practice. It's the ounce of prevention that keeps the ride going strong.

FLAT PACK™

- All the essentials to fix a flat in one pack.
- Simple one-stop insurance against roadside emergencies.
- Includes quality Trek pump, seat pack, tube, tire levers and fast patches.

TREK ESSENTIALS

PUMPS

Start your rides out right. Spend a little time up front putting the right level of air pressure in your tires, and you'll enjoy huge performance and enjoyment dividends.

WRENCH FORCE® AIR DADDY FLOOR PUMP

- Pressure gauge is easily visible.
- Large base keeps the pump stable.
- Super durable aluminum barrel.
- Dual head fits both Presta and Schreader valves with no adapters.
- Extra long hose for use with a repair stand.

ATB ALUMINUM PUMP™

- Pivoting handle makes it comfortable to use.
- Rugged aluminum barrel stands up to all kinds of abuse.
- Built-in tire levers, Fast Patches and spoke wrench for emergency repairs.
- Schreader and Presta valve adaptable.

TRAILERS

Enjoy family rides with members of the family who are too young to ride. Durable and light, trailers keep infants and young children comfortable and protected from the elements.

CC RYDER™

- Carries two children comfortably and securely in a lightweight aluminum trailer.
- Lightweight spoked wheels with quick release for speedy disassembly.
- New quick release hitch system gets you on the road faster than ever.
- Easily folds for storage or transportation.
- Wheels fit inside while folded.
- Ventilation keeps passengers comfortable.
- Limited lifetime warranty.

TRANSIT™

- Carries up to two children.
- Extra durable mag wheels.
- New quick release hitch gets you on the road faster than ever.
- Five-point safety harness holds passengers comfortably in place.
- Stroller and jogger conversion kit available.

TRANSIT DELUXE™

- Carries two children comfortably and securely in a lightweight aluminum trailer.
- Lightweight spoked wheels with quick release for speedy disassembly.
- New quick release hitch system gets you on the road faster than ever.
- Easily folds for storage or transportation.
- Wheels fit inside while folded.
- Ventilation keeps passengers comfortable.
- Limited lifetime warranty.

TRANSIT DELUXE (FOLDED)

ROCKET™

- High performance jogging stroller converts to a single passenger trailer.
- Fully enclosed fabric body offers complete protection from wheels and debris.
- Rear cargo net for extra storage.
- Adjustable handlebar fits all sizes of runners.
- Parking brake makes sure the stroller stays in place.

COMPUTERS

Bike computers are powerful - they do everything but your taxes. Track your current and average speeds, or how far you've traveled. It can even keep tabs on the temperature. All in one compact, easy to use unit.

WIRELESS™

- No cords for fast set-up.
- 2 functions, including Dual Trip Distance and Pacer, provide optimal feedback.
- Large screen and large numbers are easy on your eyes.

RADAR 2.0™

- Designed for maximum performance.
- 16 functions at your fingertips.
- Temperature Gauge is standard (as always), along with new Back Light feature.

LIGHTS

Make yourself visible to others and keep the path ahead of you fully illuminated. A must for riders who are in the saddle between dusk and dawn.

DISCO TECH TAIL LIGHT™

- The ultimate safety tail light ready for the commuter.
- Super bright LED visible to 4000 feet.
- Seatpost mount, pocket clip and 2 "AAA" batteries are included.
- Durable waterproof case.

NORTHERN LIGHT SET™

- Northern Light Headlight and Disco Tech Tail Light together in value pack.
- Batteries included for each light.

CELESTIAL HEADLIGHT SET™

- Celestial Headlight and Disco Tail Light in a value pack.
- Batteries included for both lights.

SADDLES

The right saddle makes all the difference to a ride. It's simple - if you're more comfortable, you'll ride longer and more often. And get more enjoyment from your cycling experiences.

BONTRAGER FS 2000™

- Tested and endorsed by world renowned urologist Dr. Marc Goldstein.
- Designed specifically for a woman's anatomy.
- Employs the patented Bontrager "clipped corners" design at the rear of the saddle for easy exit and re-entry during technical descents.
- A drop nose for easy transitions when climbing or sprinting.

BONTRAGER FS 2000 LEATHER™

- The patented FS design supports rails on an elastomer bumper at the front of the saddle to increase comfort when sitting on the "nose" during technical climbs.
- The trademark Bontrager cut at the rear wings makes it much easier to slide off the back of the saddle during technical descents.
- Tested and endorsed by world renowned urologist Dr. Marc Goldstein.
- Shown to reduce pressure on the perineal zone.
- Pressure-relieving center groove will not bunch when compressed.

OASIS MD™

- Designed by world renowned urologist Dr. Marc Goldstein to reduce genital numbness which can cause permanent injury.
- Added width at rear with ischial depressions places riders' weight on the ischial tuberosities and decreases pressure on the perineal area.

OASIS COMFORT SADDLE™

- Super soft, gel padding.
- Men's and Women's sizes.
- Steel rails.
- A great seat for the money.

LOCKS

Wherever you store or park your bike, a quality lock keeps it safe from the people who'd be more than happy to take it off your hands.

DREADLOCKS
CABLE LOCK

- Vinyl cover protects the frame's finish.
- Convenient frame/seatpost mounting bracket.
- 24-hour Key Replacement Program.
- Dust cover protects key mechanism.

ALI BABA™ U-LOCK
HIGH SECURITY

- Center located key cylinder confounds thieves.
- Heat-treated high-quality steel crossbar and shackle for supreme durability.
- Rotating dust cover keeps out dirt and grime from the lock cylinder.
- Optional $1000 anti-theft guarantee.
- 24-hour Key Replacement Program.

TOOLS

The right tools keep your bike performing like the day you bought it. Trek offers a complete selection of Wrench Force® tools, stands and other equipment that are durable and specially crafted to work with your bike.

FOLDING HEX WITH SCREWDRIVERS™

- Compact folding wrench has 2, 3, 4, 5, 6 hex wrenches as well as #2 Phillips and 1/8" flat blade screwdrivers in one tool.
- Works well with Mini Caplifter Wrench 8/10mm to adjust cantilever brakes.

MULTI TOOL™

- More than a dozen tools in one small package.
- Everything you need for emergency repairs.
- Quality, investment cast construction.

Y WRENCH™

- Ergonomic acetate handle is tough and very comfortable.
- Long hex bits work on most dual control levers.
- Heat-treated tool steel hex bits are molded in place and will not strip out.

BAGS

Keep your stuff safely tucked way under your seat and out of the way. There are plenty of rear bag sizes to choose from so you can pick the one that fits your storage needs.

DELUXE REAR TRUNK RACK™

- Secures to rear racks for convenient storage.
- Expands from 750 to 950 cu. in. (12,292 to 15,570cc) capacity.
- Fully insulated main compartment with two side pockets and an adjustable divider in main compartment.
- Reinforced rack straps and zipper flaps for added protection in wet weather.

TREK LIMITED LIFETIME WARRANTY

Ride Trek, and ride the BEST WARRANTY.

Trek Bicycle Corporation provides each original retail purchaser of the bicycle a lifetime warranty against defects in materials and workmanship in the bicycle frame and rigid fork when purchased from an authorized Trek dealer. Trek Bicycle Corporation likewise warrants all original parts on the bicycle, excluding suspension forks and rear shock absorbers, for a period of one year from the date of purchase. Suspension forks and rear shock absorbers shall be covered by the stated warranty of their original manufacturers. Paint and decals are warranted for one year. This warranty is expressly limited to the repair or replacement of a defective frame, fork, or defective part and is the sole remedy of the warranty. This warranty applies only to the original owner and is not transferable. Claims under this warranty must be made through an authorized Trek dealer. Proof of purchase is required. A warranty registration card must be completed and received by the Trek Bicycle Corporation before a warranty claim may be processed.

This warranty covers bicycles and components outside the United States only if purchased through an authorized international Trek distributor or Trek dealer within the country of purchase. The warranty does not cover normal wear and tear, improper assembly or follow-up maintenance, installation of parts or accessories not originally intended or compatible with the bicycle as sold, damage or failure due to accident, misuse or neglect, or modification of the frame, fork or components.

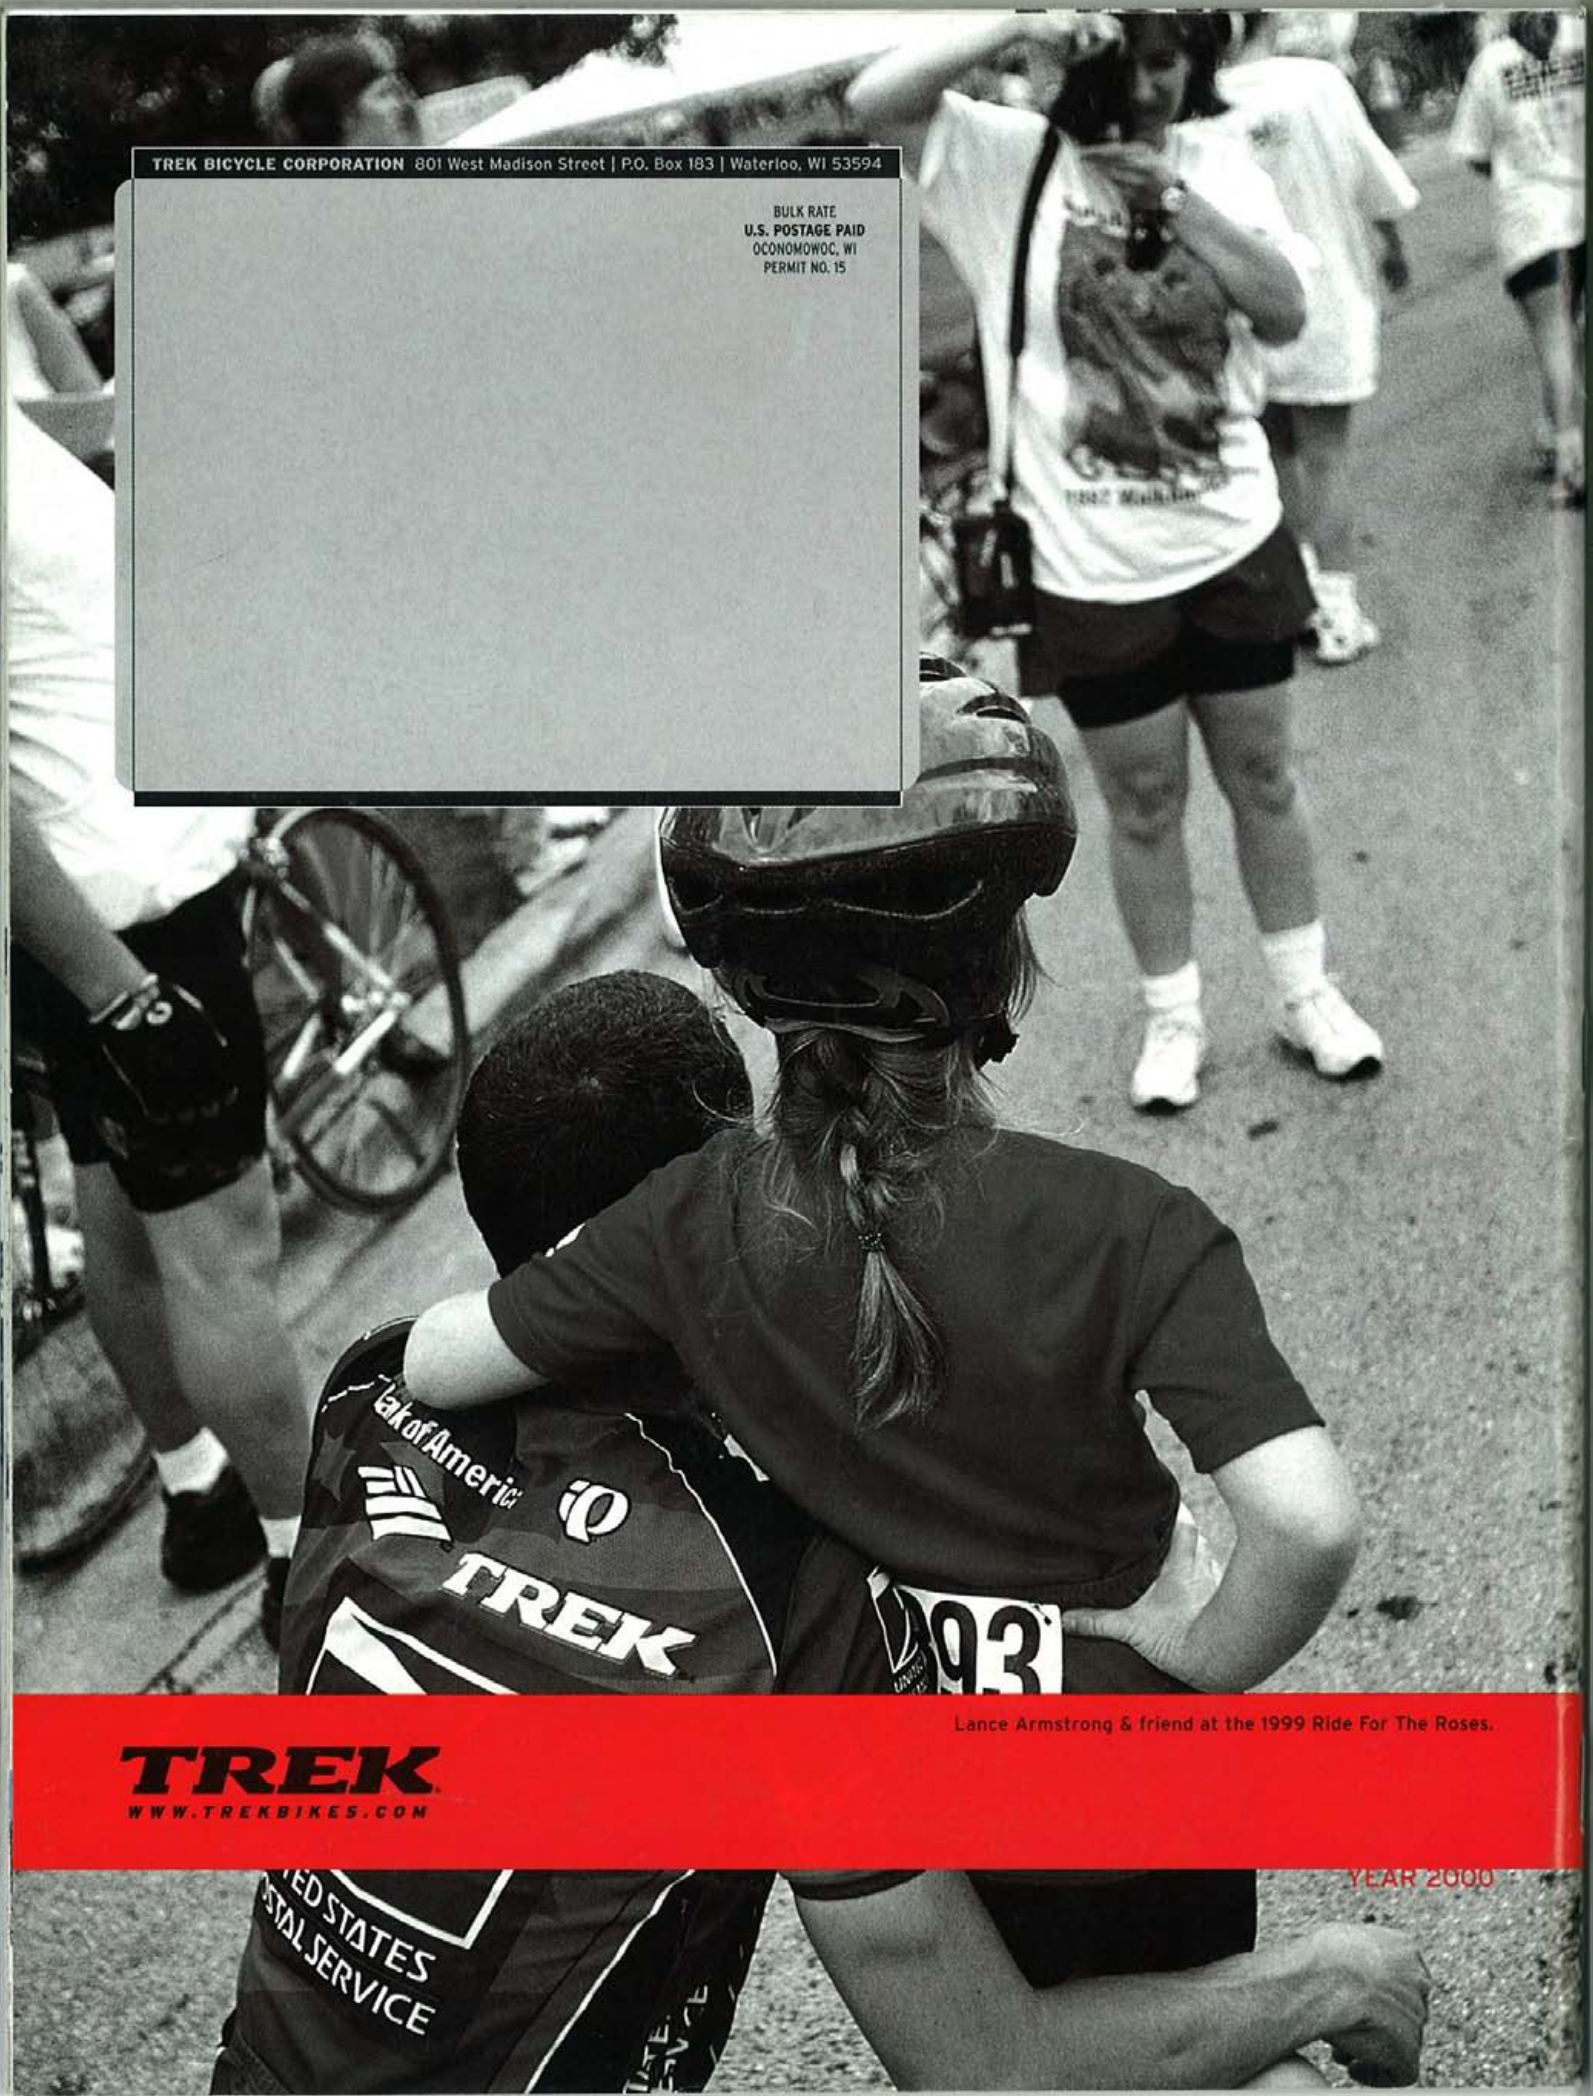

Trek Bicycle Corporation shall not be responsible for incidental or consequential damages. Some states do not allow the exclusion of incidental or consequential damages, so the above exclusion may not apply to you. This warranty gives the consumer specific legal rights, and those rights may vary from place to place. This warranty does not affect the statutory rights of the consumer.

All photos, illustrations and specifications contained in this catalog are based on the latest production information at the time of publication. Trek reserves the right to make changes at any time, without notice, in colors, materials, equipment, specifications and models. Any variations in colors shown are due to the reproductive variations of the printing process. Photos may include non-U.S. equipment. Some models may be shown with optional equipment. Off road bike weights based on medium or 18 inch frame size. Road bike weights based on 56cm frame size.

Special thanks to all who kept the faith alive to create Real Bikes Real People. Props go out to:

Our fearless leaders: Dick Burke, John Burke, Michael Moser, and Bob Mosier. • The Waterloo crew who gave, then gave some more: Mark Andrews, Chad Bailey, Joan Barry, Rebecca Bertsch, Tricia Burke, The Demo Guys, Anne Docter, Antonia Garcia, George Hausladen, Kala Hoekstra, Jane Lagerweij, Jon Mosier, James Peters, John Riley, Krista Schneider, Patsy Tully, Joe Vandenbossche and Joe Wirtz. • Trek sponsored riders, who know it's more than a lifestyle, it's a way of life • Lance: you wowed us last year, but you blew us away this year. Merci Lance! • Hanson, Dodge • Sutter and Team ACME, for inspiring more to bring Real Bikes Real People to life • Our featured Real People! Lance Armstrong, Travis Brown, Katie Compton, Jeanie de Vries, Tom & Victoria Dolan, David Duvall, Chris Eatough, Brandon Geeb, Sue Haywood, Tony Hoeschen, Jackie Hoffman, Matt Kelly, The Leschinson family, Ruthie Matthes and Shonni Tabron. • Thank you for letting us tell your stories. • Our photographers, for bringing the "People" to the people: Dan Campbell, Bob Coakley, Mark Goulette, Tom Able Green, John Laptad, Sean Laughlin, Michael Leschinsky, Brian Maloy, Bob Mackenzie, Neal Palumbo, Doug Pensinger, Mark Salewsky, Graham Watson and Stephen Wilde. • Our experts and others, who waited patiently while we made a dream (and a bike) come true. • The thousands of people we met along the way who love their Trek bikes: you are the heart and soul of Real Bikes Real People.
