STAGE 9

Le Grand Bornand - Sestriere. 215km.
Finish time: 5:57:11. Winning margin: 0:31.

"Today was brutal. I was not thinking of winning the stage, but then I looked at the others and, by the look on their faces, I saw they were suffering, too." With 10km to go, Lance Armstrong turned it on – leaving the world's elite climbers in his wake and opening up an insurmountable lead.

A stock 5200 OCLV™ 120 Carbon frame carried Lance Armstrong all the way to Paris for his first Tour win.

2000

STAGE 12

Carpentras - Le Mont Ventoux. 149km.
Finish time: 4:15:11.

A classic duel between Lance and Marco Pantani. After keeping a brutal pace that dropped every other rider in the lead group, Armstrong eased up at the summit to let Pantani take the win. "He was a real fighter today. He came back and attacked and attacked. It's right that a climber like him wins on a legendary climb like Ventoux."

Lance showed what the OCLV™ 110 Carbon 5900 Superlight was capable of in the French Alps.

2001

STAGE 10

Aix-les-Bains - Alpe d'Huez. 209km.
Finish time: 6:23:47. Winning margin: 1:59.

Quite possibly the most dramatic bluff cycling has ever witnessed. All the way up this famed ascent, Lance looked vulnerable. Then he turned to size up Jan Ullrich on his wheel – a moment now known as simply "The Look" – before launching himself up the mountain to take the stage and Tour #3.

Once again, Lance counted on the 5900 Superlight™ to help write another chapter in Tour history.

THE MAKING OF A CHAMPION.

2002

STAGE 19

Regnie-Durette - Macon. 50km.
Finish time: 1:03:50. Winning margin: 0:52.

"Today I was very motivated to come back and win." Not the words Lance's rivals wanted to hear. By winning the final individual time trial and extending his overall lead by more than two minutes, Lance put an exclamation point on the Tour and finished in dominating fashion.

Wind tunnel tests showed that our OCLV™ HC Carbon Team Time Trial™ frame could save Lance up to 15 seconds in a 40km stage.

2003

STAGE 1

Saint-Denis/Montgeron - Meaux. 168km.
Finish time: 3:44:33.

Talk about pressure. Attempting a feat accomplished by only four others, Lance knew he faced his toughest challenge yet. Trek answered with a new bike that shattered everyone's expectations: the Madone 5.9™. Lance went on to win by just over a minute and earned a place in the Tour's exclusive five-time winner's club.

We applied our expertise in aerodynamics to the contoured frame of the Madone 5.9™.

2004

STAGE 16

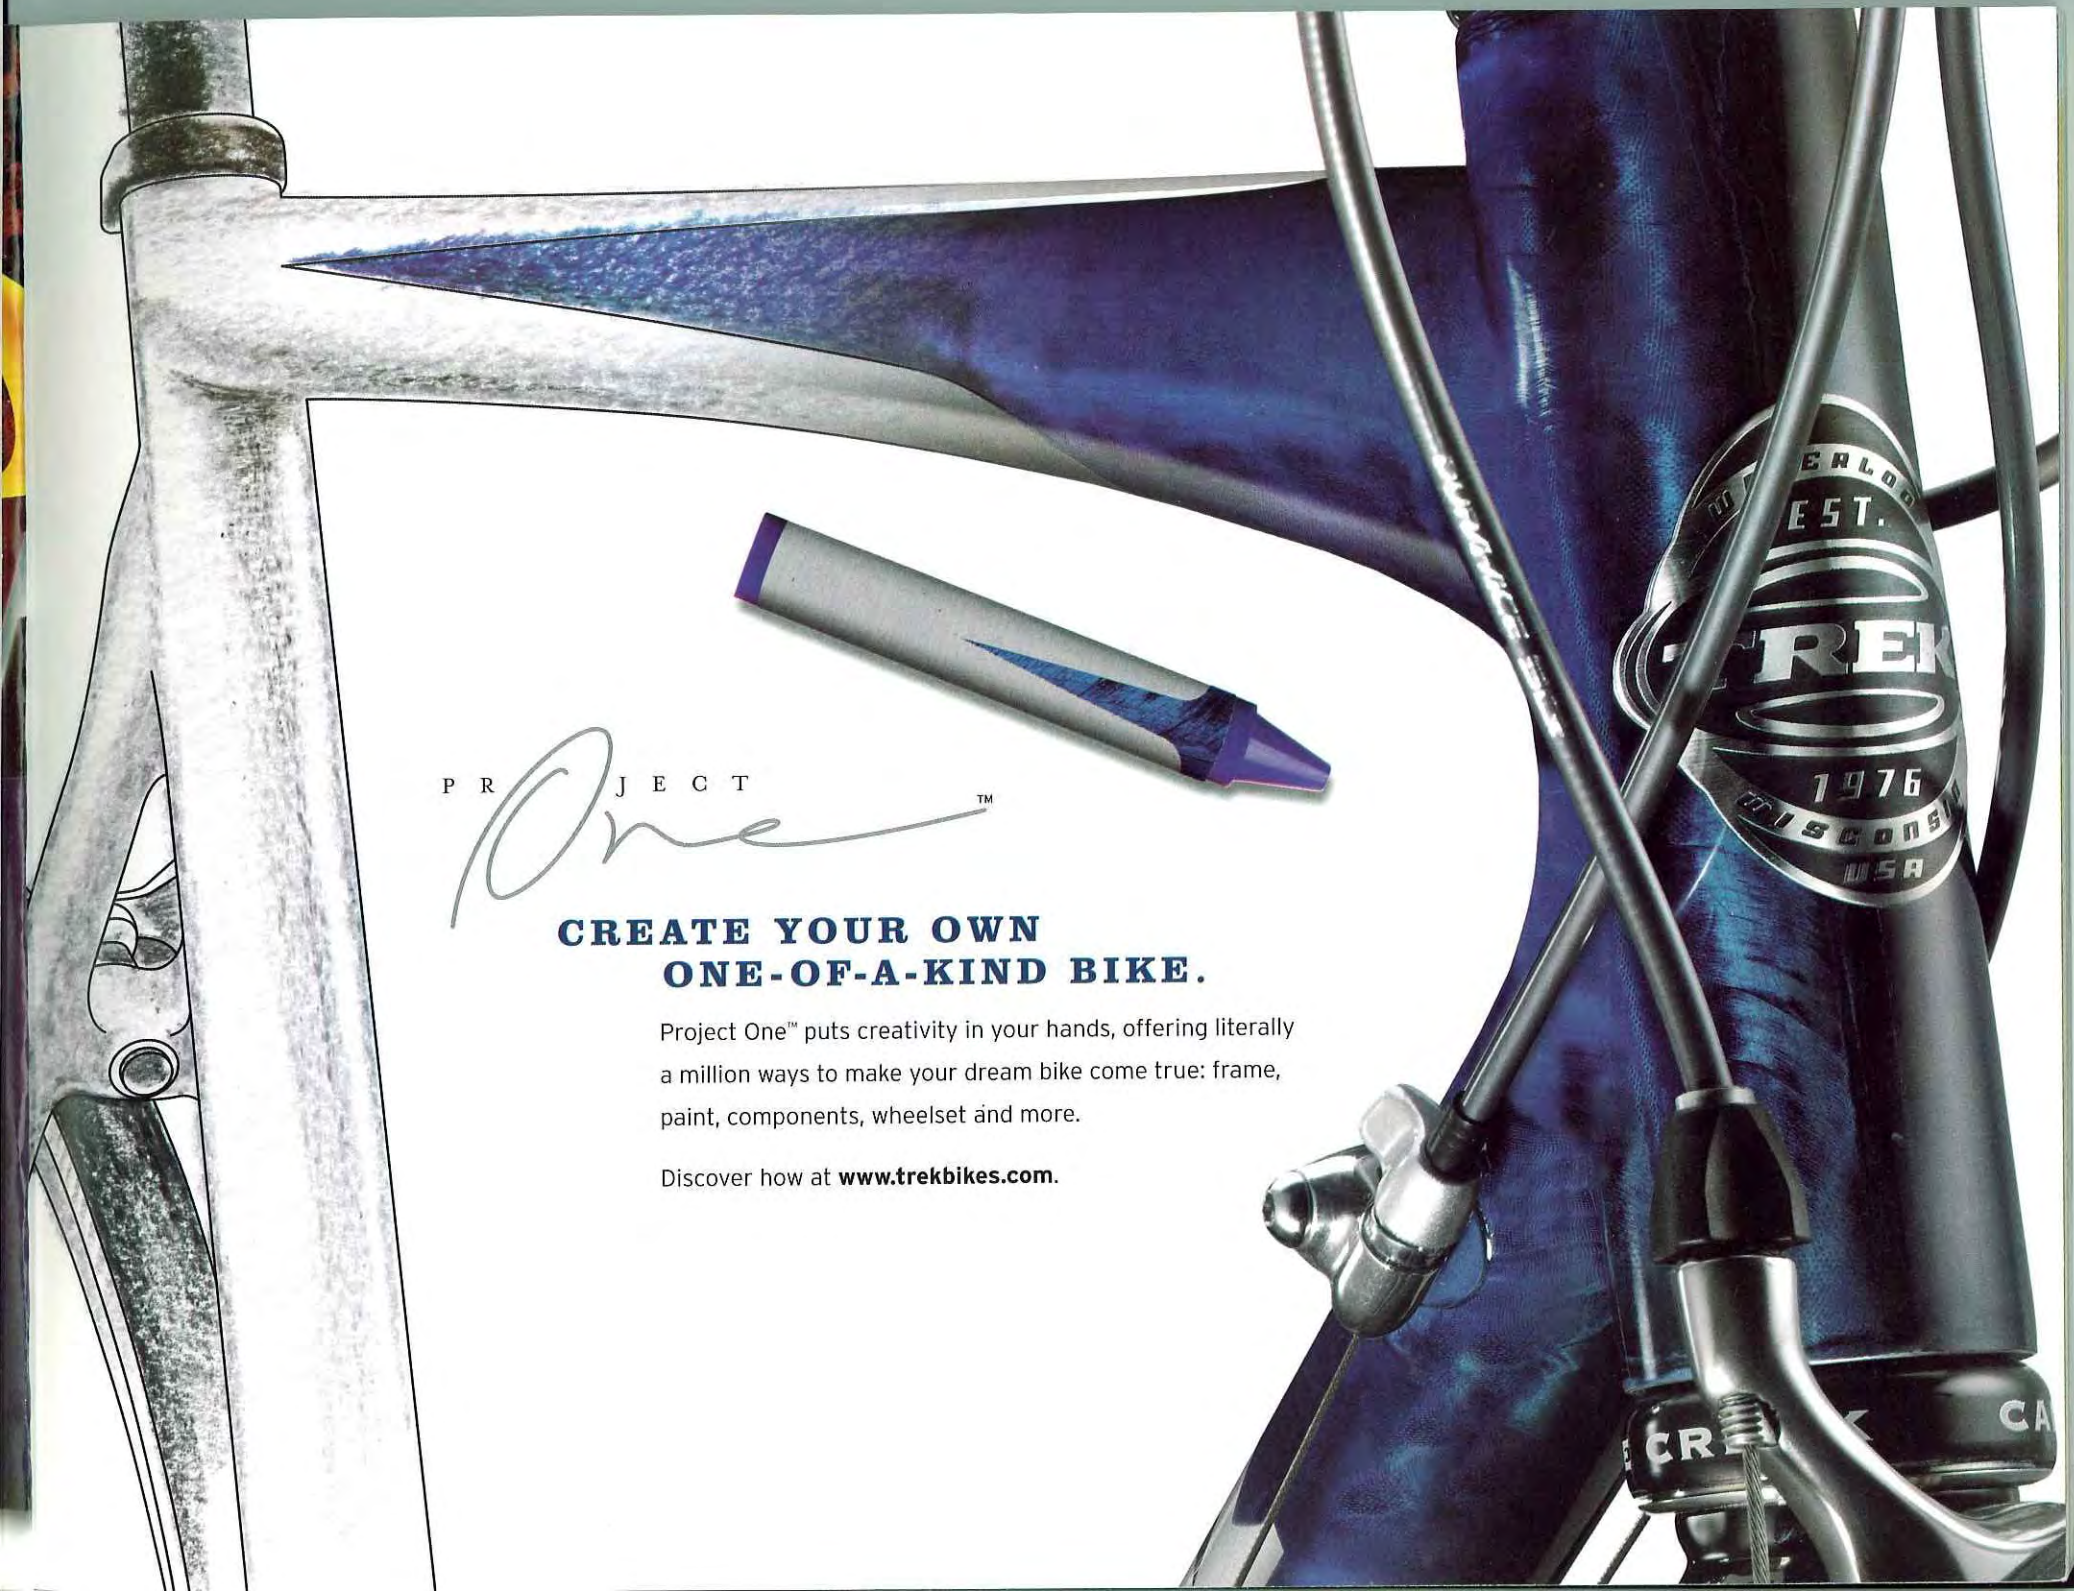

Bourg d'Oisans - Alpe d'Huez. 15.5 km.
Finish time: 39:41. Winning margin: 1:01.

With an estimated one million spectators on hand to witness history in the making, Lance Armstrong certainly lived up to the advance billing. He stormed through the 21 switchbacks of Alpe d'Huez in the second fastest time ever, on his way to a record sixth Tour de France victory.

The new Madone SL 5.9™ adds even more firepower to Lance's arsenal of Trek bikes.

THE ORIGINAL WORKHORSE.

Talk about a winning pedigree. The 5000™ reinvents a true original, expanding our line of performance road bikes that share two defining characteristics: high-performance OCLV™ Carbon, and an insatiable appetite for victories.

Since making its race debut a decade ago, we've made our bikes lighter, stronger and faster than ever before. The enduring appeal of the 5000™ is testament to its staying power, especially on the podium.

Even after thousands of miles, victory in the Tour de France can be decided by mere seconds. Lance Armstrong depends on his training, his team and his bike to come out on top.

The Team Time Trial™ is designed for one purpose: aerodynamics. OCLV™ HC Carbon allows us to engineer a blade-like aero frame that dramatically reduces drag, while providing the stiff, light structure needed for race-winning acceleration.

Every curve, every line, every surface of the Team Time Trial™ is molded for aerodynamic performance.

Kids grow.
So do our bikes.

**At Trek, we make bikes that fit kids.
From cranks to handlebars.**

They're easier to get on and off, control, steer, brake and stop. Best of all, our kids bikes come with adjustable components that grow right with your child. We call it Dialed Fit Specific Design,™ bikes that let you dial in the ideal fit and adjust it as they grow.
