2010 Trek Mountain Bikes

Trek MTB 2

Trek World Racing 6

Technology 8

Top Fuel 12

The pinnacle cross country bike — fast doesn't begin to describe it.

Fuel EX 20

Trail performance, patented.

Remedy 30

Ascends to new heights — and then descends, carves, and sprints like the pro it is.

Scratch 38

Freeride specialist. It's what happens when downhill meets backcountry.

Ticket 44

Go big! This pro-style jumper is McCaul and Semenuk approved.

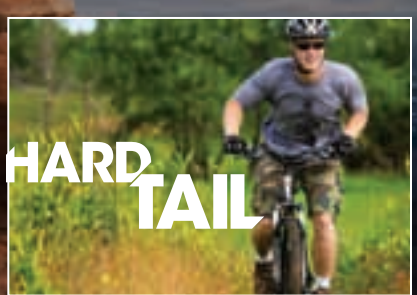

Session 88 48

The pure downhill racer — and a Trek World Racing champion bike.

Elite 54

The XC racer — the lightest weight hardtails available.

Hardtail 64

Trusted rides from the classic mountain bike family.

WSD 74

Bikes designed to fit women right from the start.

Accessories 86

Specs/Geometries 90

Lifetime Warranty 96

OUR MISSION

Technology Driven, Rider Born.

When it comes to mountain bikes, we know you have a choice. That's why we invest so much into Trek mountain bikes—to ensure that Trek mountain bikes are the best choice on the trail.

WHY?

Because mountain biking is a pure sport, pursued by hardy souls. But even the hardiest souls have limits. Which we overcome by turning good ideas into great products, through elegant designs and masterful execution — freeing us to go faster, farther, harder, and longer. Yet getting to that point takes a lot of time and a good bit of money.

For Trek's Mountain Bike Development Team, making the world's best mountain bikes starts with a clear, simple vision: to improve your trail experience by building stuff that just plain works. Day in. Day out. With no BS. And no gimmicks.

HOW?

When the rolling glacial trails of Wisconsin proved not enough for world-class testing, we added Southern California. Our West Coast Suspension Development Facility gives us access to more elevation, year-round riding, different soil types, and open doors at the world's best suspension manufacturers.

When existing suspension platforms didn't offer the right ride experience, we invented a new one that de-coupled braking and suspension forces.

And in 2010, we bring even more good ideas to life: a new shock technology called DRCV;™ a way to protect your all-mountain carbon frame from trail debris; and a handful of new frame platforms that refresh even our most inexpensive bikes from the ground up.

Yep. You've got choices. And choices make a difference. For us at Trek, it's a difference that resonates every time you choose the brand that thoroughly develops its bikes, backs them with an unbeatable warranty, and is committed to taking care of its customers.

North Shore, Vancouver, British Columbia

SANTA CLARITA, CA
Trek West Coast Suspension Development Facility.
Jose Gonzalez tunes DRCV™ rear shock for Fuel EX and Remedy.

WHISTLER, BC
Home of Andrew Shandro, Gravity bike product developer.
Trek Product Developers evaluate Session RC4 rear shock tuning.
Shandro validates the new Scratch prior to production.

Emily Batty takes the U23 Championship aboard her 2009 WSD Top Fuel.

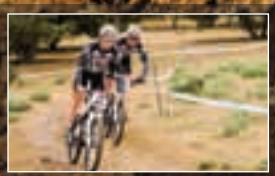

OUR PROCESS

Trek MTB Development: A Worldwide Effort.

Developing world-class competitive mountain bikes takes an extensive team of individuals, working together toward a common goal. Here's a glimpse of the efforts involved in building the 2010 lineup:

MALVERN, ENGLAND
Home of Trek World Racing team riders Tracy Moseley and Liam Killeen.

WYNIGEN AND OCHLENBERG, SWITZERLAND
Home of Lukas and Mathias Flückiger.

NELSON, NEW ZEALAND
Trek World Racing member Justin Leov wins New Zealand's National Championship.

GRANADA, SPAIN
Training grounds for Trek World Racing team members and home of 23 Degrees, owner of Trek World Racing.

PIETERMARITZBURG, SOUTH AFRICA
Trek World Racing debuts on the World Cup circuit with Tracy Moseley, giving the team its first World Cup win.

LOURENSFORD, SOUTH AFRICA
Cape Epic, Stage 7.
The Flü brothers win Stage 7 of the Cape Epic on the Top Fuel 9.9.

OUR TEAM

TREK® WORLD RACING

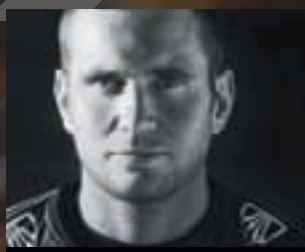

Trek is committed to outfitting the world's best riders with the world's best bikes as they compete in the world's toughest races. New for 2010, Trek World Racing's roster of world-class riders is poised to stand atop the podium at any stop on the World Cup circuit.

Owned and operated by 23 Degrees with Trek as title sponsor, the Trek World Racing team is the only World Cup team to combine both cross-country athletes and downhill athletes into one highly competitive squad.

The team's roster was hand-selected to provide an international mix of competitive personalities who support each other and thrive in a team environment. At its debut race in South Africa, the team showed its true potential by delivering a World Cup win in the women's DH field and positioning the team as the #1 DH team in the world.

Nickname: Math
D.O.B.: 27-Nov-88
Residence: Ochlenberg, Switzerland
Racing Pro Since: 2009

Career Highlights: 2006 Junior World Champion, European Champion, Swiss National Champion, 2008 1st place U23 Schladming, 1st place Cape Epic Stage 7

OUR TECHNOLOGY

MTB Suspension.

Over the past five years, Trek's commitment to mountain biking has resulted in some of the most remarkable advancements in the history of mountain bike development. By focusing on real-world problems that other companies simply accept as inherent, we've evolved our designs and our lineup to be the absolute best.

DUAL RATE CONTROL VALVE (DRCV). Built by Fox and engineered by Trek, DRCV™ is a unique two-stage air spring that takes the pedaling-efficient, small-bump sensitivity of a single-canister air shock, and adds unprecedented big-hit control through DRCV's second air chamber.

The shock's first stage behaves just like a standard Fox Float air shock. Then, halfway through the travel, DRCV's smartly functioning plunger opens up a pathway to the second air canister, allowing a seamless transition to big-hit performance.

This means a more capable Fuel EX or Remedy, and more possibilities for you on the trail.

ACTIVE BRAKING PIVOT (ABP). There are lots of ways to build a suspension system. But only Trek mountain bikes feature ABP,™ or Active Braking Pivot. ABP places the rear suspension pivot in line with the rear axle. While most other suspensions firm under braking, ABP allows the suspension to remain active and independent of braking. This gives the bike better control and more effective braking.

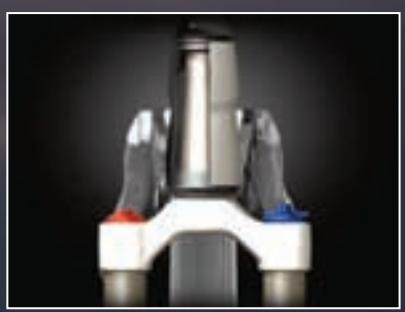

What does this really mean? Trek mountain bikes with ABP let you brake later, go faster, and stay in control.

FULL FLOATER. Traditional suspension systems mount the rear shock at the moving link and at a fixed mount somewhere on the frame.

Full Floater™ connects the shock to two moving points — the EVO Link™ at the top, and at the continuation of the chainstay. This allows Trek's engineers to tune the suspension system more effectively.

In the real world, this efficient yet compliant suspension offers a real performance advantage, from cross country race bikes to full-on downhill machines.

E2. E2™ is the evolution of the straight steerer fork, to a tapered frame and fork system that starts with a 1.5" lower race and tapers to a 1⅛" upper. This places more material where it matters most, giving the stiffness benefits of the larger 1.5" system without the added weight.

This translates to more high-speed stability, more precise steering, and less flex in off-camber situations.

EVO LINK. Since a full-suspension bike consists of a main frame and a rear triangle, the structural integrity of the rocker link connecting those two pieces is incredibly important. Unlike traditional rocker links built with two plates connected by bolts, the EVO Link one-piece rocker link creates unprecedented whole-bike stiffness.

This simple system brings total bike stiffness for greater control and minimal weight.

OUR TECHNOLOGY

OCLV Carbon.

OCLV — this proprietary method of producing carbon frames and components stands for "Optimum Compaction, Low Void."

We invented it. We patented it. And only Trek has it. While many other bike manufacturers have tried to replicate our success in carbon development, none have succeeded. And for good reason.

CARBON PERFORMANCE. Ever-more-sophisticated OCLV® frame construction and increasingly complex manufacturing processes make it nearly impossible to sum up a frame's material usage with a simple number. Instead, the OCLV Carbon hierarchy is defined by Red, Black, and White, so that we can still "rank" frame materials.

OCLV RED

Trek's highest-performance carbon fiber, OCLV Red uses a significant percentage of high-modulus carbon fiber arranged according to our most complex lay-up schedules.

OCLV BLACK

Trek's high-performance carbon fiber, OCLV Black employs intermediate-modulus carbon fiber and our time-tested lay-up schedules.

OCLV WHITE

Trek's value-oriented performance carbon fiber, OCLV White uses predominantly standard-modulus carbon fiber for outstanding value.

CARBON ARMOR – STILL LIGHT, ONLY TOUGHER! Some riders worry about possible damage to their frame from flying rocks and debris typically experienced in high-speed All Mountain-style riding. Carbon Armor alleviates that worry by a combination of mountain bike specific construction techniques and a unique polymer designed to deflect shrapnel. Not just an add-on, Carbon Armor is engineered as part of the OCLV frame with embedded stiffeners to make mountain-specific carbon fiber yet another Trek benefit.

4-LAYER PROTECTION.

1. OCLV Black Carbon
2. Specially formulated OCLV Black with embedded stiffeners
3. OCLV resin
4. Carbon Armor polymer shield

WHAT IS NET MOLDING? Net Molding™ is a process that creates exceptionally precise carbon fiber shapes that mitigate the need for secondary machining operations. All OCLV Carbon mountain bikes feature Net Molded tubes and lugs that "snap" together for perfect alignment.

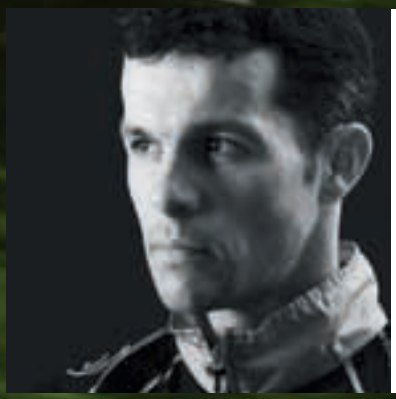

PRECISION FIT SOCKETS. The Net Molding process enabled Trek to create Precision Fit Sockets.™ This means that the bottom bracket and headset faces are assembly-ready right out of the mold. There's no need for headset cups, races, or bottom bracket cups to hold the bearings. OCLV HexMC™ (Molded Carbon), the material that makes this slip-fit bearing system possible, has been tested beyond millions of cycles to ensure long-lasting performance.

OCLV MOUNTAIN BIKES. The Elite 9.9 hardtail, Top Fuel, Fuel EX, and Remedy are all offered with Trek OCLV Carbon frames. OCLV Carbon frames are manufactured exclusively at Trek's Global Headquarters in Waterloo, WI.

TREK

FAST EVERYWHERE.
NO OTHER WAY TO DESCRIBE TOP FUEL.

Most people think of the Top Fuel as a World Cup race bike, but it's so much more than that. 100-mile races. 24 hours solo. 7-day stage races. Settle in and pedal, and Top Fuel will take you there.

– **Chris Eatough,** *Six-time 24-hour World Champion, Trek Test Rider since 1998.*

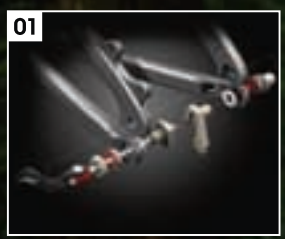

TOP FUEL

TOP FUEL

Transcend Speed.

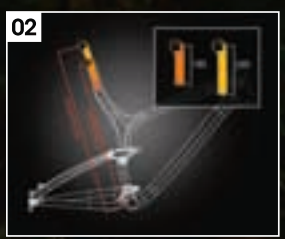

Top Fuel is the pinnacle of cross country race bikes. Its distinctive frame design has presence like no other. Its performance is world-class. With either an OCLV Carbon fiber crossbow frame or an Alpha Red Aluminum frame as its backbone, Top Fuel's suspension is designed around 100mm of front and rear travel. From World Cups to marathons to hundred-milers, Top Fuel is every dedicated athlete's bike.

01

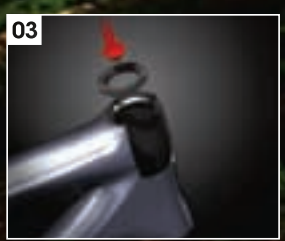

ABP RACE. ABP™ Active Braking Pivot, places the rear suspension pivot in line with the rear axle. This keeps the suspension active and independent of braking, providing more control and more effective braking. ABP Race™ packs the same proven benefits into a narrower system, with easier rear wheel changes courtesy of one-handed quick release.

02

NO-CUT OFF-ROAD SEATMAST. Traditional seatmast systems require cutting the frame to achieve the perfect size. Not with Top Fuel's no-cut off-road seatmast — riders retain the same adjustability of a traditional seatpost design, but with the added performance of a seatmast. Found only on Top Fuel and Elite hardtails.

03

OCLV CARBON. The Top Fuel crossbow frame is a marvel of engineering and production, built in the USA using Trek's proprietary OCLV® Carbon manufacturing process. Trek's exclusive Net Molded™ precision-fit sockets, found at the bottom bracket, headtube, and suspension bearing surfaces, allow the bearings to drop directly into the frame itself, saving weight and increasing durability.

04

BB90.™ Trek engineered the Top Fuel to have the narrowest bottom bracket possible. OCLV Net Molding eliminates the need for heavy aluminum inserts, allowing the bearings to drop directly into the carbon frame itself. This high-tolerance system features the industry's narrowest q-factor for unmatched pedaling efficiency.

03 **PRECISION FIT.** Only OCLV Carbon fiber offers a frame precise enough to eliminate aluminum frame inserts.

FUEL EX

My one do-it-all, go everywhere bike.

You supply the trail, and Fuel EX will bring the mountain-climbing, berm-riding, rock-garden-navigating, switchbacking, whooping-and-hollering fun.

– **Travis Brown,** *Olympian, U.S. Marathon National Champion, Trek Product Developer since 1994. Durango, Colorado.*

TRAVIS BROWN
Olympian, U.S. Marathon National Champion, Trek Product Developer since 1994. Durango, Colorado.

03 **E2 IS MORE CONTROL.**
E2's tapered frame/fork puts more material where it matters most.

04 **STIFFER, LIGHTER.**
New for 2010, the OCLV Carbon seatstay is stiffer than ever and 100 grams lighter.

02 **ALWAYS ACTIVE.**
ABP Race keeps your suspension working as intended: always active, whether sprinting, grinding uphill, or braking.

01 **RIDE EVERYTHING.**
Just when you think you've reached your limit, DRCV comes along. Efficient pedaling, but with a big-hit reserve so you can ride bigger lines with confidence.

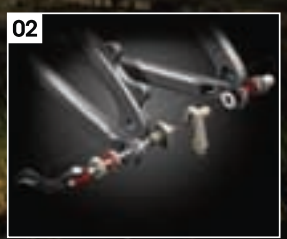

FUEL EX

Trail Performance, Patented.

The 2010 Fuel EX is like nothing else on the trail. More capable and comfortable than a thoroughbred race bike, yet capable of outsprinting many a short-travel bike, this 120mm front- and rear-wheel-travel steed will carry you over the mountains and through the woods with pure confidence and control.

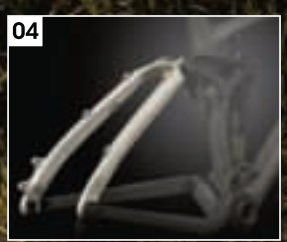

DUAL RATE CONTROL VALVE (DRCV). This exclusive Trek technology combines the pedaling efficiency of a small-canister air shock with the big-hit compliance of a larger-canister shock. Featured on the Fuel EX 8 and above, DRCV™ makes this trail bike the most capable in its class.

ABP RACE. ABP,™ Active Braking Pivot, places the rear suspension pivot in line with the rear axle. This keeps the suspension active and independent of braking, providing more control and more effective braking. ABP Race™ packs the same proven benefits into a narrower system with easier rear wheel changes courtesy of one-handed quick release.

E2. With a 1.5" lower and a 1⅛" upper, the E2™ system features a tapered fork steerer, headset, and frame to keep weight low and stiffness high. In high stakes situations, E2 keeps you in control. Featured on the Fuel EX 7 and above.

NEW OCLV CARBON SEATSTAY. The OCLV® Carbon seatstay is an engineering feat, with Net Molded™ precision-fit bearing sockets and all-carbon disc brake tabs. Manufactured only in Waterloo, Wisconsin, the seatstay lends dramatic curves to the Fuel EX's distinctive frame.

TREK

A lightweight, big mountain machine. It doesn't get any better.

The bike I ride is the bike I race. So when it comes time to pick one bike for the Downieville Classic's XC *and* DH race, I know the Remedy is the best ride out there.

– **Ross Schnell**, *2008 Downieville Classic All-Mountain World Champion.*

REMEDY

REMEDY

Mountain Tamer, Trail Blazer.

The all-new Remedy is tighter, lighter, and more versatile than ever. Refined to 150mm of matched front- and rear-wheel travel and a DRCV rear shock, it will open up new lines, tame outrageous descents, and ascend unthinkable climbs. Now available in OCLV Carbon or Alpha Red Aluminum.*

01

DUAL RATE CONTROL VALVE (DRCV). This exclusive Trek technology combines the pedaling efficiency of a small-canister air shock with the big-hit compliance of a larger-canister shock. Featured on all Remedy models, DRCV™ will show you new ways to conquer any trail.

02

ABP RACE. ABP,™ Active Braking Pivot, places the rear suspension pivot in line with the rear axle. This keeps the suspension active and independent of braking, providing more control and more effective braking. ABP Race™ packs the same proven benefits into a narrower system with easier rear wheel changes courtesy of one-handed quick release.

03

CARBON ARMOR. High-performance OCLV® Carbon frames eat up the trail—and sometimes the trail bites back. That's why Trek engineered Carbon Armor, a 4-layer system that adds embedded stiffeners to the main frame and tops it off with a replaceable polymer shield. OCLV lightweight performance, only tougher.

04

E2. With a 1.5" lower and a 1 1/8" upper, the E2™ system features a tapered fork steerer, headset, and frame to keep weight low and stiffness high. In high stakes situations, E2 keeps you in control.

**Both Remedy OCLV Carbon and Alpha Red Aluminum frames now come in an additional 18.5" frame size.*

Remedy 7 and 9 feature ISCG tabs for easy chainguide installation.

04 E2 IS MORE CONTROL.
E2's tapered frame/fork puts more material where it matters most.

03 TOUGHER CARBON.
When the rocks kick up and the shrapnel's flying, Carbon Armor frame protection has your back.

02 ALWAYS ACTIVE.
ABP Race keeps your suspension working as intended: always active, whether sprinting, grinding uphill, or braking.

01 RIDE EVERYTHING.
Just when you think you've reached your limit, DRCV comes along. Efficient pedaling, but with a big-hit reserve so you can ride bigger lines with confidence.

SCRATCH

Lightweight yet pedalable.
Every bit Freeride.

When we started freeriding, we never dreamed a bike like this could exist. Performance derived from pure downhill, yet still capable of an epic backcountry trip.

– **Andrew Shandro,** *Trek Long Travel R&D Specialist, Freeride Pioneer. Based on the North Shore, British Columbia.*

SCRATCH

Session Skin, Remedy Soul.

Downhillers get shuttles and lift service—and the rest of the working world has to pedal to the pristine backcountry. Enter the all-new Scratch: the perfect blend of Session downhill performance and Remedy 2-chainring pedalability,* with 170mm of rear-wheel travel and Trek's tried-and-true technology: ABP, Full Floater, EVO Link, and E2. Elite freeriders finally have a bike to scratch their niche.

01

ABP. Trek's proprietary Active Braking Pivot (ABP™) places the rear suspension pivot concentric to the rear axle. This keeps the suspension active and independent of braking, providing more control and more effective braking, resulting in a faster, cleaner line that the competition can't touch.

02

142 x 12 STANDARD. The Scratch includes an adapter to allow use of a 135mm x 12mm rear wheel—but trust us, you'll never want to go back. No more rear-wheel installation headaches, since the 142mm system provides a tabbed guide for installation ease.

03

ADJUSTABLE GEOMETRY. Choose from a 66.5° head tube and a 14.4" BB height or a 66° head tube and a 14.1" BB height. Just flip the Mino Links and you've refined your Scratch for either tighter, more technical track, or steeper descents.

04

E2. With a 1.5" lower and a 1⅛" upper, the E2™ system's tapered fork steerer/headset/frame is lighter than a 1.5" system, yet more maneuverable than a dual-crown fork. Light weight plus stiffness in spades adds up to more control.

**Scratch comes equipped with ISCG03 mounts for easy chainguide installation.*

03 CUSTOMIZE YOUR RIDE.
A simple flip of the Mino Link tunes the Scratch's geometry to your local terrain.

01 ALWAYS ACTIVE.
ABP lets your suspension function as intended—always active, whether pedaling, braking, or dropping in.

Whistler, British Columbia

Scratch 9™

FRAME Alpha Red Aluminum w/ABP, Full Floater, alloy EVO Link, E2 tapered head tube, oversized pivot bearings, ISCG03 mounts, 142x12mm or 135x12mm rear axle, replaceable derailleur hanger, adjustable geometry, 170mm travel

TICKET

My Steed of Choice for any Dirt Jump environment.

When we're out building dirt jumps, we don't really know what's possible until we start hitting them. With the Ticket, I can seamlessly thread together a rhythm of lines that's the perfect expression of my riding style.

– **Brandon Semenuk,** *Winner of 2008 RedBull Rampage. Purveyor of Style. Whistler, BC local.*

TICKET

Express Pass to Superhero.

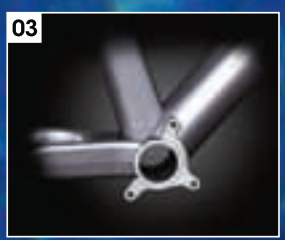

Dirt jumps, dual slalom, pump tracks… the Ticket Signature Edition frame is the versatile, bomber base of a bike to get it all done. The frame was developed through countless Cam- and Brandon-specific revisions to give the low standover, burly build, and variety of setups they require. It's the perfect bike for dump 3s, Supermans, and front flips—or for just finding your flow out on the pump track.

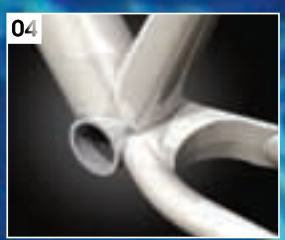

E2. Built around a 1.5" lower and a 1⅛" upper, the E2™ frame is compatible with all tapered and straight steerer forks. This system provides more material wrap around the head tube for greater stiffness and frame durability.

ADJUSTABLE DROPOUTS. The Ticket frame comes with hardware options for either singlespeed or geared setup. Slotted drops and a trick wheel tensioning system take the frame from 15.74"–16.5" chainstay length using a 135x10mm thru-axle wheel. Find that perfect position, and the wheel stays in place, no matter how hard you case it.

ISCG05. The International Standard Chain Guide mounting system's most recent variation is ISCG05. Using this system you no longer need to mount the chainguide to your BB—instead, mount it directly to the frame and setup is as easy as it gets.

FORGED YOKE AND GUSSETS. When the world's most talented dirt jumpers bail or case a jump, their bikes take a beating. We took their hard knock research and applied it directly to the frame in the form of a forged chainstay yoke and gusseted bridgeless seatstays. Without a front derailleur to contend with, we also flared out the seat tube for a massive, super-durable BB juncture.

02 VERSATILE.
Singlespeed or gears, your choice. In either mode, you get 20mm of chainstay adjustability.

04 BOMBER.
Built with real-world feedback, this frame puts more metal right where you need it.

CAM MCCAUL
2008 Claymore Challenge winner.
Trek's first dirt jump specialist. Repo Man.

01 **E2 IS MORE CONTROL.**
E2's tapered frame puts more material where it matters most.

03 **CHAINGUIDE READY.**
ISCG mounts allow easy installation of your favorite chainguide.

Ticket Signature™

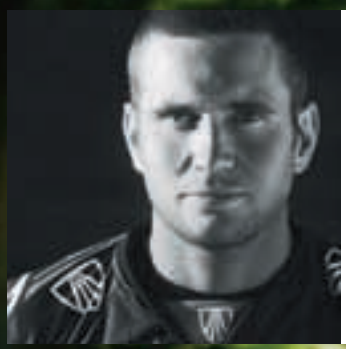

FRAME Alpha White Aluminum w/semi-integrated E2 tapered head tube; shaped, formed and gusseted down tube; flared seat tube; hollow forged chainstay yoke; ISCG05 mounts; seatstay gusset; sliding dropouts w/stainless steel hardware and 135x10mm thru axle

No More Excuses. It's Just Fast!

Some bikes require break-in time, a chance to familiarize yourself with the geometry. Not the Session—it feels like home on the first pedal stroke. And after that, there's no looking back.

– **Justin Leov,** *2009 Trek World Racing, World-Class Downhill Rider.*

SESSION 88

SESSION 88

Be a Podium Threat.

Session has one thing on its mind: pure, downhill racing. With 203mm of rear suspension tuned to near perfection, geometry dialed for World Cup courses, and frame weights that set a new race circuit standard, Session is the downhill ride against which all others will be measured.

01

ABP. Trek's proprietary Active Braking Pivot (ABP™) places the rear suspension pivot concentric to the rear axle. This keeps the suspension active and independent of braking, providing more control and more effective braking, resulting in a faster, cleaner line that the competition can't touch.

02

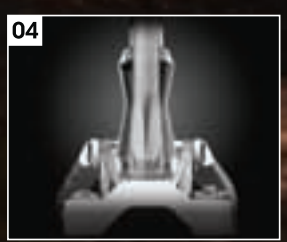

EVO ROCKER LINK. Traditional rocker link systems use two plates connected with bolts. EVO Link™ refines the rocker link system into a one-piece design that's lighter and stiffer, providing a solid connection from the front to the rear triangle for unprecedented stiffness and a whole-bike connection unequalled by other downhill bikes.

03

THE PERFECT GEOMETRY FOR RACING. It's hard to pinpoint exactly what makes the Session platform such a great bike, but we know it starts with the right geometry. A 65° head tube, a 58° seat tube, and a wheelbase that's short enough to flick, yet long enough for high-speed stability — all this and more adds up to a bike that'll take you to the podium.

04

E2. The Session platform features E2™, a head tube that tapers from a 1.5" lower to a 1 1/8" upper. E2 allows for a wider tube juncture at the head tube, increasing overall bike stiffness without adding unnecessary frame material. With E2, you get more material where it matters most.

TREK WORLD RACING DH
2009 Trek World Racing's Roster of World-Class Downhill Riders — (left to right) Andrew Neethling, Justin Leov, and Tracy Moseley.
04 E2 IS MORE CONTROL.
E2's tapered frame/fork puts more material where it matters most.
01 ALWAYS ACTIVE.
ABP keeps your suspension working as intended: always active, whether pedaling, braking, or dropping in.
02 CONNECTED.
When you move, it moves — instant response courtesy of the one-piece EVO Link.
03 POISED TO WIN.
One run on the Session platform, and you'll know what race-winning geometry feels like.
UCI Downhill World Cup Race, Maribor, Slovenia

ELITE

Rocket Fast.

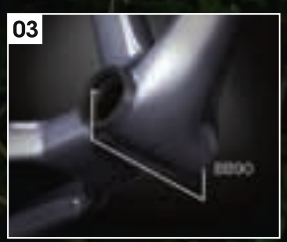

Most riders today want full suspension—but some still espouse the virtues of a classic hardtail mountain bike. For them, Trek builds the Elite 9 Series frames. From the OCLV 9.9 to the Trek Carbon Technology (TCT) 9.8 and 9.7, these highly engineered frames are some of the lightest and stiffest around.

NO-CUT OFF-ROAD SEATMAST. Traditional seatmast systems require cutting the frame to achieve the perfect size. But with Trek's no-cut off-road seatmast, riders retain traditional seatpost adjustability, but with the added performance of a seatmast. Found only on Top Fuel and Elite hardtails.

OCLV CARBON. The Elite 9.9 frame is a marvel of engineering and production, built in the USA using Trek's proprietary OCLV® Carbon manufacturing process. Trek's revolutionary Net Molded™ precision-fit sockets, found at the bottom bracket, head tube, and suspension bearing surfaces, allow the bearings to drop directly into the frame itself, saving weight and increasing durability.

BB90. Trek engineered Elite hardtails to have the narrowest bottom bracket possible. OCLV Net Molding eliminates the need for heavy aluminum inserts, allowing the bearings to drop directly into the carbon frame itself. This high-tolerance system features the industry's narrowest q-factor for unmatched pedaling efficiency—and FSA's K-Force 2.9 crankset, custom for Trek, makes the q-factor even narrower.

TREK WORLD RACING XC
Meet the Flü Brothers of the Trek World Racing Cross Country Team — Older brother Lukas and Junior World Champion Mathias Flückiger.

01 RACE PERFORMANCE.
Elite hardtails feature a no-cut off-road seatmast system for exceptional performance plus easy adjustability.

02 PRECISION FIT.
Only OCLV Carbon fiber offers a frame precise enough to eliminate aluminum frame inserts.

03 NARROW Q-FACTOR.
BB90's narrow pedal stance maximizes human pedaling efficiency.

HARDTAIL

Right Ride for Rugged Trails.

There's a whole world of fun and adventure beyond the paved paths and city streets, and Trek's hardtails are the best way to experience real dirt. The right suspension fork, knobby tires, and an upright riding position are key elements to off-road happiness—and combined with the fit, value, comfort, and color options that only Trek offers, they guarantee that your experiences will be many.

01 **TREK PROMISE.** Treks are sold only through independent bicycle dealers to make sure every customer receives the highest quality service. Every sales associate is well-versed in the product line and can help you determine exactly which model fits your needs.

02 **PERFECT FIT.** Nearly every hardtail is offered in seven different frame sizes to guarantee the best fit possible. Ranging from as small as a 13" frame to as large as 24," aluminum hardtails can fit the smallest to tallest riders.

03 **COMFORT AND VALUE.** Every Trek hardtail's parts are hand picked to achieve the perfect balance of value and durability. Suspension forks are standard on all bikes for superior comfort and control. Further improving the ride experience are newly designed Bontrager tires, grips, and saddle.

Dialed, just for us!

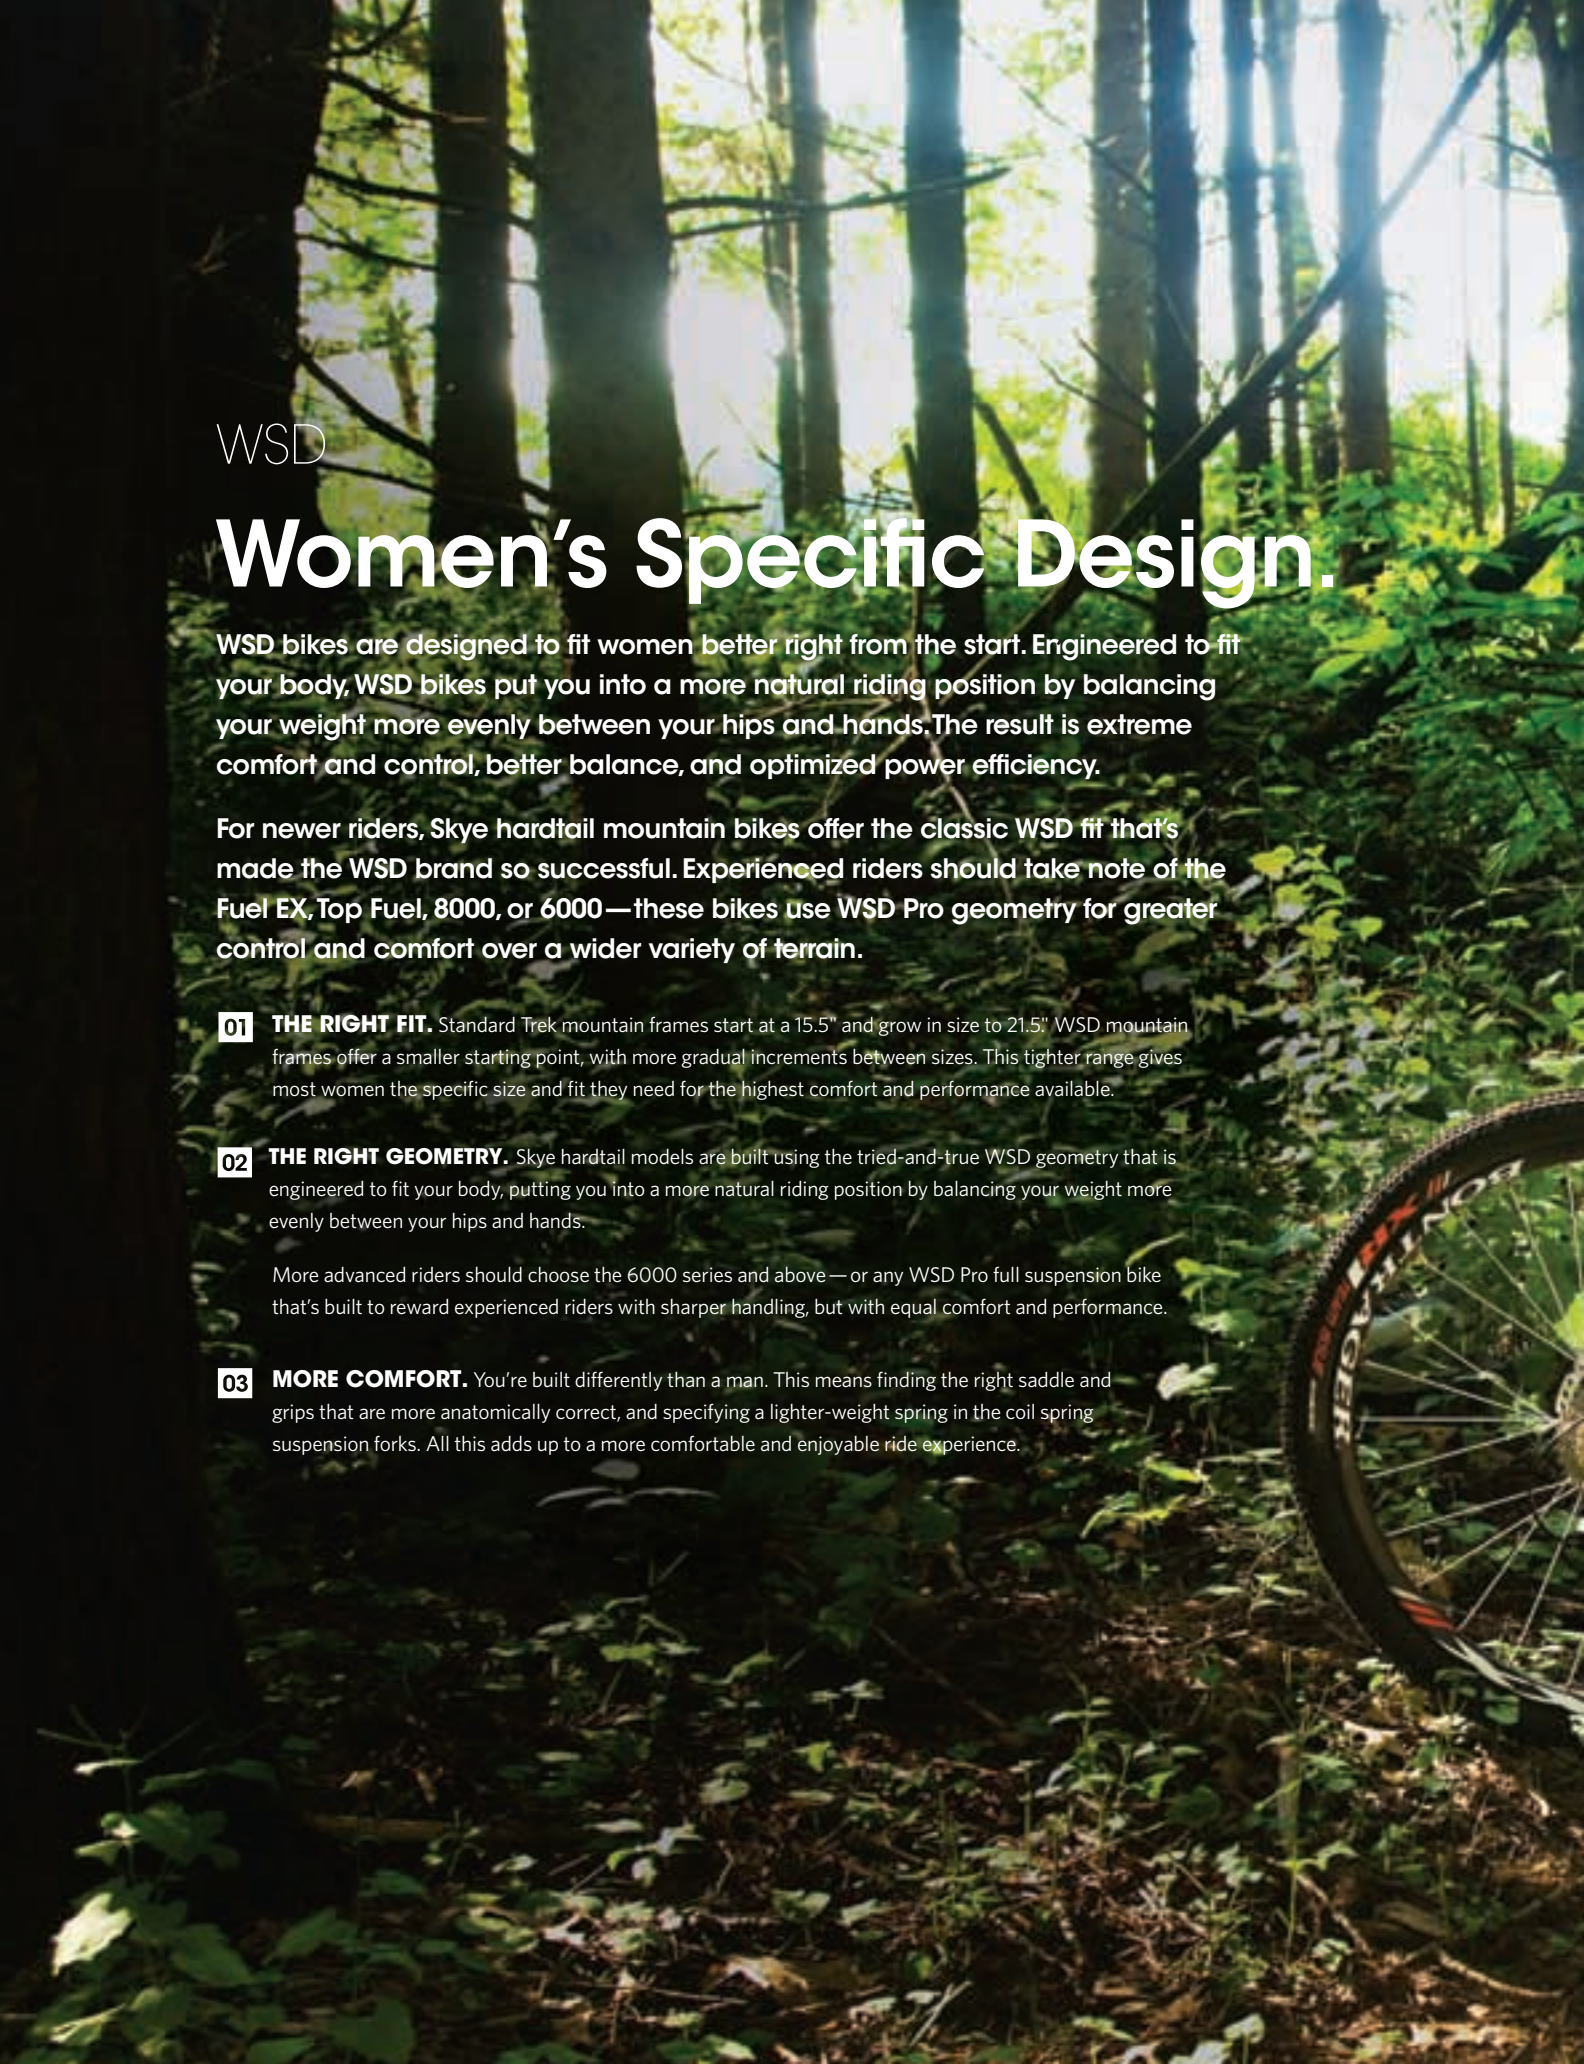

There are lots of mountain bike choices out there, but for me, the Top Fuel 9.8 WSD is the absolute best choice. It's rocket fast, super light, and is made for women like me.

– **Emily Batty,** *U23 Pan-Am Champion, U23 Canadian National Champion*

WSD

TREK

WSD

Women's Specific Design.

WSD bikes are designed to fit women better right from the start. Engineered to fit your body, WSD bikes put you into a more natural riding position by balancing your weight more evenly between your hips and hands. The result is extreme comfort and control, better balance, and optimized power efficiency.

For newer riders, Skye hardtail mountain bikes offer the classic WSD fit that's made the WSD brand so successful. Experienced riders should take note of the Fuel EX, Top Fuel, 8000, or 6000—these bikes use WSD Pro geometry for greater control and comfort over a wider variety of terrain.

01 **THE RIGHT FIT.** Standard Trek mountain frames start at a 15.5" and grow in size to 21.5". WSD mountain frames offer a smaller starting point, with more gradual increments between sizes. This tighter range gives most women the specific size and fit they need for the highest comfort and performance available.

02 **THE RIGHT GEOMETRY.** Skye hardtail models are built using the tried-and-true WSD geometry that is engineered to fit your body, putting you into a more natural riding position by balancing your weight more evenly between your hips and hands.

More advanced riders should choose the 6000 series and above—or any WSD Pro full suspension bike that's built to reward experienced riders with sharper handling, but with equal comfort and performance.

03 **MORE COMFORT.** You're built differently than a man. This means finding the right saddle and grips that are more anatomically correct, and specifying a lighter-weight spring in the coil spring suspension forks. All this adds up to a more comfortable and enjoyable ride experience.

EMILY BATTY
U23 Pan-Am Champion,
U23 Canadian National Champion.
01
THE RIGHT FIT.
Four frame sizes, with smaller increments between sizes, give the widest range of women the fit they need.
03
MORE COMFORT.
Female-specific saddles and lighter-weight springs in the suspension fork are among the comfort features WSD offers.
02
THE RIGHT GEOMETRY.
Two different types of frames — WSD and WSD Pro — give more experienced riders the handling they demand.
Jim's Trails,
Waterloo, Wisconsin

Top Fuel 9.8 WSD™

FRAME WSD OCLV Red Carbon w/ABP Race, Full Floater, magnesium EVO Link, oversized pivot bearings, replaceable derailleur hanger, 100mm travel

11 **RHYTHM COMP SHORT, BLACK**
Serious off-road riders demand a serious cycling short; one that's tough enough to stand up to a full day of trail abuse.

12 RHYTHM COMP S/S JERSEY, GREY
Stretch-woven, moisture-wicking materials combine long-wearing durability with excellent on-bike mobility.

13 RHYTHM S/S JERSEY, BLACK With its laid-back style and moisture-wicking Temptech fabric, the Rhythm Jersey will help keep you cool, dry, and comfortable.

14 RHYTHM WSD S/S JERSEY, WHITE
Combining hi-tech materials with a more casual design, the Rhythm WSD Jersey keeps you cool, dry, and comfortable.

01 **RL MTB WSD SHOE, BLACK** Designed specifically for women who ride the toughest trails.

02 **RACE MTB WSD SHOE, GREY** A comfortable, walk-able, smartly-styled shoe designed specifically for women.

03 **RXL MTB SHOE, WHITE** A high-end performance off-road shoe with an all-carbon sole and plenty of grip.

04 **RXL MTB WSD SHOE, BLACK** Race-ready performance for female riders looking for best-in-class comfort, light weight, and durability.

05 **RL MTB SHOE, SILVER** A super-stiff all-around off-road performer.

06 **RACE MTB SHOE, GREY** A great all-around walk-able shoe that's perfect for off-road or on.

07 **RHYTHM GLOVE, BROWN** The choice of cross country racers, Bontrager Rhythm gloves provide lightweight, full-finger protection and control.

08 **RHYTHM COMP WSD GLOVE, GREY** This full-finger glove features the Knuckle Dragger Protection System™ for superior abrasion and impact resistance.

09 **RHYTHM WSD GLOVE, WHITE** Bontrager Rhythm WSD gloves provide female riders lightweight, full-finger protection and control.

10 **RHYTHM COMP GLOVE, BLACK** Designed specifically for fearless off-road riders seeking the epitome of comfort, protection, durability, and control.

11 **TREK TIME WATCH** Available in five colors, the Trek Time Watch adds functional style to your handlebars.

12 **RXL LOW RISE CARBON HANDLEBAR** Ultralight, vibration-dampening full-carbon construction pulls out all the stops.

13 **RL BIG SWEEP HANDLEBAR** A stiff, light handlebar with a big sweep for big 29er wheels.

14 **RHYTHM PRO HANDLEBAR, LOW RISE** An ultra-wide, super-stiff bar that can handle any drop that you can.

15 **RHYTHM PRO SEATPOST** Ultra-tough, all-aluminum construction for big air and big hits.

16 **RHYTHM PRO STEM** A super-stiff, ultra-durable stem made for serious trail riders.

17 **RACE XXX LITE STEM** Let's be honest, you don't really need it but its ridiculously light and would really pimp your ride.

18 **BONTRAGER AIR PACK** All the items you need to fix a flat and keep on pedaling. Don't leave home without one.

19 **ROLLBAR 8** Compact, versatile, and rustproof tool provides essential Allen keys, flat head, T25, and bottle opener.

20 **ROLLBAR 12** Everything the Rollbar 8 is, with a wider hex tool selection, chain breaker, and tire lever. Best choice for the trails.

21 **ROLLBAR 18** Building on the Rollbar 12, with a Phillips driver, spoke keys for standard and Mavic, chain link holder, and disc brake spreader.

All dimensions are in centimeters/inches unless otherwise stated.
Some models are not available in all sizes.

Trek Limited Lifetime Warranty

Trek Bicycle Corporation provides each original retail purchaser of the bicycle a lifetime warranty against defects in materials and workmanship in the bicycle frame, except the fork and the Session model, when purchased from an authorized Trek dealer. Rigid forks and all Bontrager components and accessories, except consumables such as tires and inner tubes, are warranted for 5 years. Trek Bicycle Corporation likewise warrants all other original parts on the bicycle, excluding Shimano parts, suspension forks and rear shock absorbers, for a period of one year from the date of purchase. Suspension forks and rear shock absorbers shall be covered by the stated warranty of their original manufacturers. Paint and decals are warranted for one year. This warranty is expressly limited to the repair or replacement of a defective frame, fork, or defective part and is the sole remedy of the warranty. This warranty applies only to the original owner and is not transferable. Claims under this warranty must be made through an authorized Trek dealer. Proof of purchase is required. A warranty registration card must be completed and received by the Trek Bicycle Corporation before a warranty claim may be processed. This warranty covers bicycles and components outside the United States only if purchased through an authorized international Trek distributor or Trek dealer within the country of purchase. The warranty does not cover normal wear and tear, improper assembly or follow-up maintenance, installation of parts or accessories not originally intended or compatible with the bicycle as sold, damage or failure due to accident, misuse or neglect, or modification of the frame, fork or components.

Trek Bicycle Corporation shall not be responsible for incidental or consequential damages. Some states do not allow the exclusion of incidental or consequential damages, so the above exclusion may not apply to you. This warranty gives the consumer specific legal rights, and those rights may vary from place to place. This warranty does not affect the statutory rights of the consumer.

All photos, illustrations, colors, weights, and specifications contained in this catalog are based on the latest production information at the time of publication. Trek reserves the right to make changes at any time, without notice, in colors, materials, equipment, specifications and models. Any variations in colors shown may be due to the reproductive variations of the printing process. Photos may include non-U.S. equipment. Some models may be shown with optional equipment. Off road bike weights based on medium or 18 inch frame size. Road bike weights based on 56cm frame size.

All Trek bikes are sold exclusively through our network of Authorized Dealers who we entrust with professional assembly and service of your bicycle. Trek extends a Lifetime Warranty on every frame, except the fork and the Session model.

WE PRINT OUR CATALOGS ON ONLY FOREST STEWARDSHIP COUNCIL (FSC) CERTIFIED PAPER

FSC certification ensures that the paper in our catalogs contains fiber from well-managed and responsibly-harvested forests. The goal is to shift the market to eliminate habitat destruction, water pollution, and displacement of indigenous peoples. This catalog meets FSC's strict environmental standards.
