THE COL DE LA MADONE. WHERE GREATNESS IS TESTED.

There's a mountain just outside Nice, France where greatness is tested. The Col de la Madone is not the longest climb, it's not the steepest climb, it's not the hardest climb. It's Lance's climb. When he wanted to test his fitness, he came here. Twelve kilometers. All out. Greatness came from this mountain. That's why we named this bike after it.

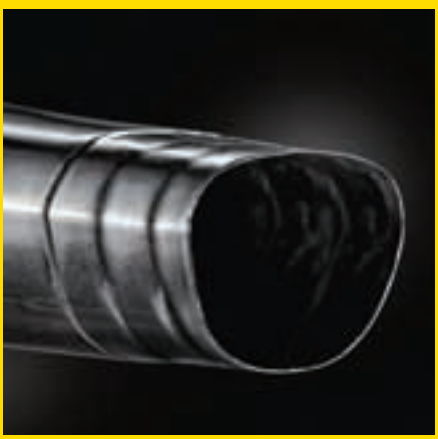

OCLV2.™ THE ONE CARBON ALL OTHERS STRIVE TO BE.

All carbon is not equal. And we like it that way. We're one of the only companies that makes its own carbon frames, and we don't share our production facility or processes with other manufacturers. We've invested the engineering and research to learn how to build carbon frames better—much better—and we're not ready to share. To us, carbon isn't a commodity. It's who we are.

For 2010, we're introducing an even better carbon: OCLV2. Building upon the greatness of OCLV,® our new carbon processes produce a frame like no other. Stepjoint technology, Net Molded bottom brackets, Resin Right molding—these Trek-only processes expand carbon's capabilities, while eliminating redundant material and the restrictions dictated by the "standard" way of making frames. The result? Unprecedented quality control, exquisite ride quality, and the world's best strength and stiffness values per frame weight. The best carbon, for the best ride.

STEPJOINT™

Stepjoint technology is a Trek-exclusive way to bond two carbon structures together perfectly, with no overlap, no excess carbon, and consistent tube wall thickness throughout.

NET MOLDING™

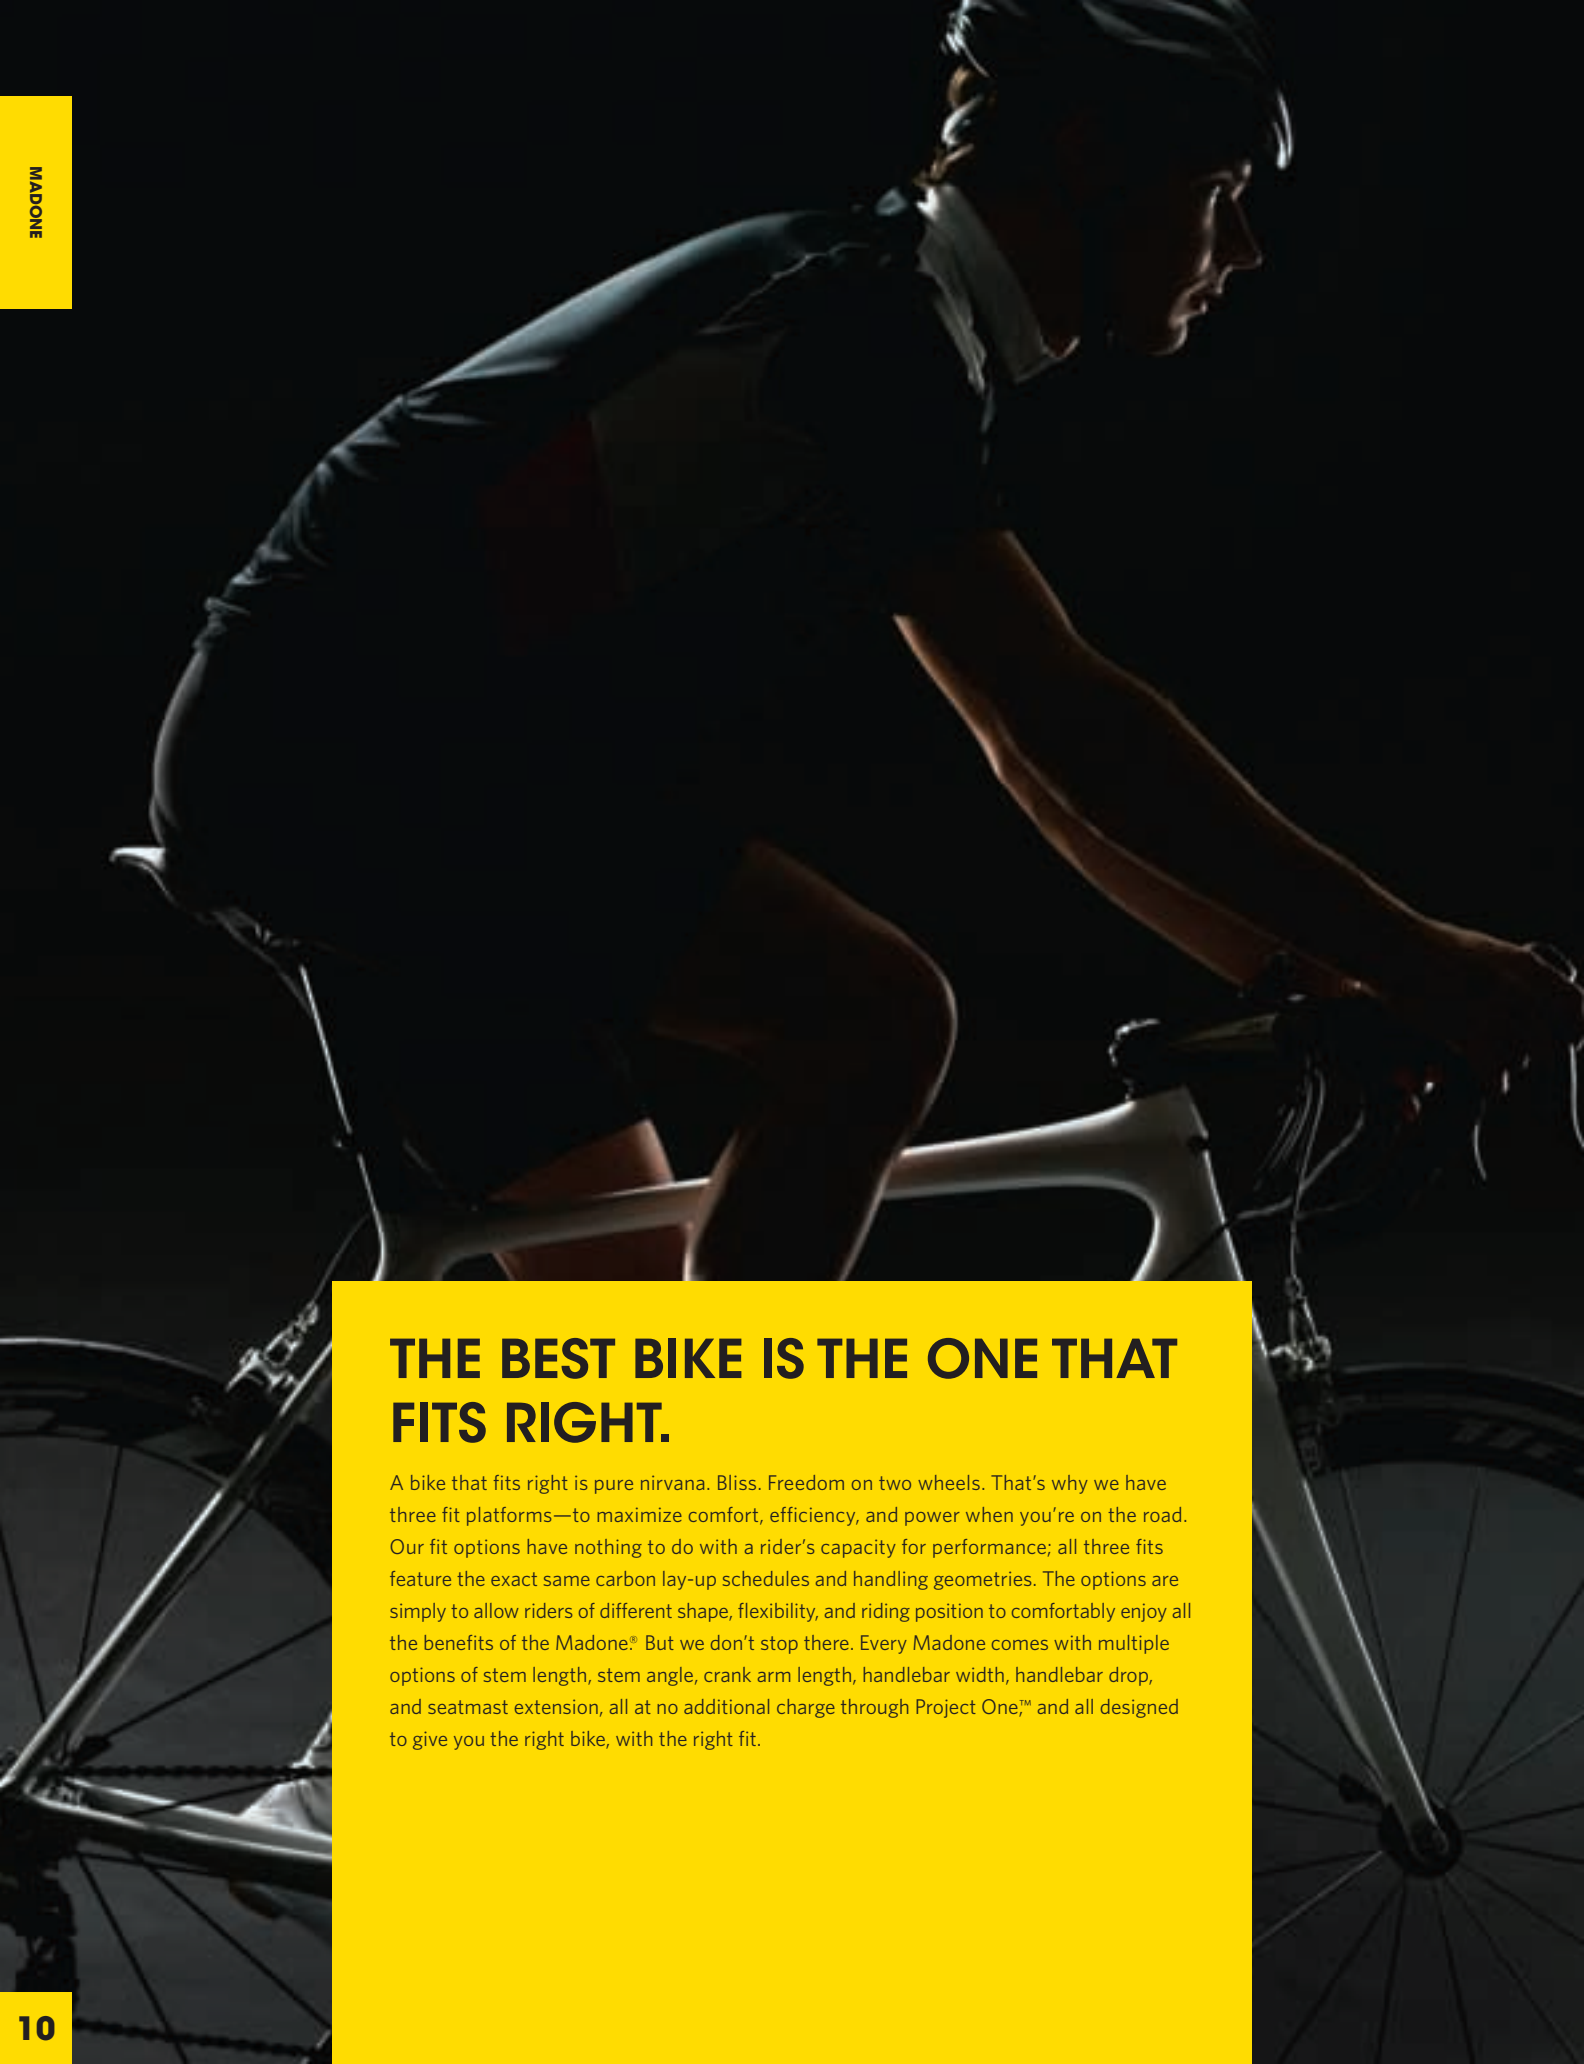

Net Molding is a Trek proprietary process that forms the bottom bracket bearing surface as part of the carbon frame, eliminating heavy bearing cups.

RESIN RIGHT™

Our Resin Right molding process accurately controls the distribution of resin throughout the carbon fiber material to ensure a consistent, flawless carbon structure, inside and out.

THE BEST BIKE IS THE ONE THAT FITS RIGHT.

A bike that fits right is pure nirvana. Bliss. Freedom on two wheels. That's why we have three fit platforms—to maximize comfort, efficiency, and power when you're on the road. Our fit options have nothing to do with a rider's capacity for performance; all three fits feature the exact same carbon lay-up schedules and handling geometries. The options are simply to allow riders of different shape, flexibility, and riding position to comfortably enjoy all the benefits of the Madone.® But we don't stop there. Every Madone comes with multiple options of stem length, stem angle, crank arm length, handlebar width, handlebar drop, and seatmast extension, all at no additional charge through Project One,™ and all designed to give you the right bike, with the right fit.

PRO FIT™

The Madone Pro Fit is a refined, Tour-winning balance of comfort, efficiency, power, and stability. Its aggressive riding position is best suited to athletes with exceptional core strength and hip flexibility.

PERFORMANCE FIT™

The Performance Fit platform maintains the race-proven geometry, handling, and ride characteristics of the Pro Fit, but features a 30mm taller head tube for a slightly higher hand position to suit riders with less hip flexibility.

WSD FIT™

6 Series WSD® bikes use the Performance Fit platform with no modification. 5 and 4 Series WSD frames have a shorter top tube, a slightly shorter wheelbase, and a taller head tube to accommodate riders who require a shorter reach. WSD Fit also comes in smaller frame sizes.

THE LIGHTEST, THE FASTEST, THE BEST. EVER.

INTRODUCING THE NEW 6 SERIES.

We're calling it The One. Ride it, and you will, too. How do we know? Three years of detailed examination. Tens of thousands of hours of R&D. Endless feedback from test riders named Lance, Levi, and Alberto. 70 designs and redesigns. It all adds up to the new Madone® 6 Series. It's faster, lighter, stiffer, yet more comfortable—better, all the way around. No wonder the world's best riders are trading up from their current Tour-winning Madones.

MADE IN

YOUR NEW 6 SERIES MADONE® STARTS HERE.

Bike companies have been defining your dreams for too long. It's high time you took control. Customize, personalize, and sensationalize your new ride by following the rewarding eleven-step process we call Project One.™ Eleven steps that will lead you to the one bike that's perfect for you. Customize yours at trekbikes.com/projectone.

ONE: CHOOSE YOUR FIT

It all starts with a Pro Fit Consultation from your Trek Dealer. A proper fitting session will let you order the right size and model frame, along with the right component dimensions, so you'll love your Madone from mile one.

TWO: CHOOSE YOUR PAINT

There are five Select Series™ colors and four WSD® Select Series colors available at no extra charge, plus endless Signature Series™ options from which to choose. You can even personalize Signature schemes with your name or words of wisdom.

THREE: CHOOSE YOUR DRIVETRAIN

Shimano,® SRAM,® Campagnolo,® Compact, doube or triple—nothing but the best.

FOUR: CHOOSE YOUR BRAKESET

Stop as you wish.

FIVE: CHOOSE YOUR CABLE HOUSING

Nine great colors—go wild or mild.

SIX: CHOOSE YOUR WHEELSET

Go aero or go light—either way you'll go fast. Aeolus® models are also offered in multiple colors.

SEVEN: CHOOSE YOUR TIRES

Eight tire models are available, most with color options.

EIGHT: CHOOSE YOUR STEM

The right length, rise, and model are key to your comfort.

NINE: CHOOSE YOUR HANDLEBARS AND BAR TAPE

We have multiple bar shapes, drops, and widths, and a variety of tape color options.

TEN: CHOOSE YOUR SADDLE

Choose not only the model, but color detail as well.

ELEVEN: MEET YOUR DREAM BIKE

RIDE THE BIKE YOU'VE ALWAYS DREAMED OF.

WE'RE RAISING THE BAR. AGAIN.

That's not just marketing mumbo-jumbo. The 2010 6 Series is lighter, stiffer, more comfortable, and better integrated, and we've got the specs to prove it.

150 grams may not sound like a lot, but it's a third of a pound. That's how much lighter the new 6 Series is compared to the old one. We also stiffened the front end by 17%, for more confident handling as you bomb into corners or descend at speed. To add to that, we made the new 6 Series more comfortable, with a newly designed and patent-pending fork steerer and seatmast to absorb the bumps and road even better than before. And finally, new for 2010, we took integration to a whole new level. An exquisite internal cable system translates to beautiful lines and perfect shifting. And the new recessed DuoTrap™ sensor system accepts most popular training computers for seamless integration. The wind won't even notice.

But we're just getting started. Read on.

THE INDUSTRY'S BEST CABLE MANAGEMENT. CLEAN AND SIMPLE.

Our innovative new cable system doesn't just make the 6 Series rocket ship look amazing. It allows the bike to shift flawlessly and brake better, and it's simpler to assemble and maintain.

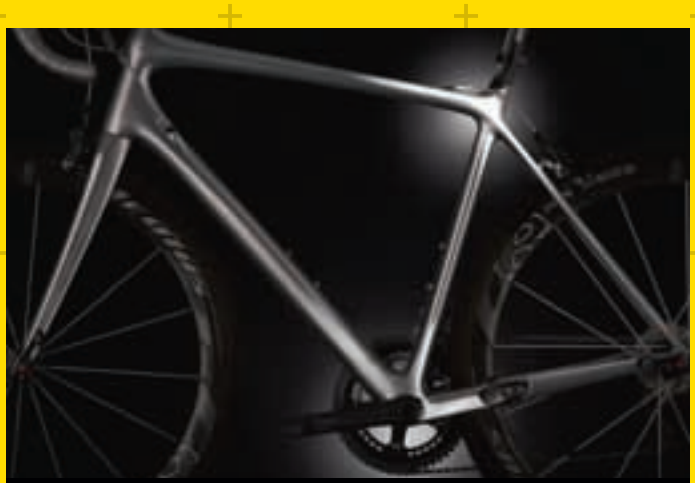

THE DUOTRAP™ SENSOR: SAY GOODBYE TO ZIP TIES

So what else can we do with the Madone 6 Series that's never been done before? Integrate a computer sensor into the frame that measures speed, distance, and cadence. And it works with all the major players who use ANT+ wireless technology: Bontrager,® Garmin, PowerTap, SRM...you get the idea.

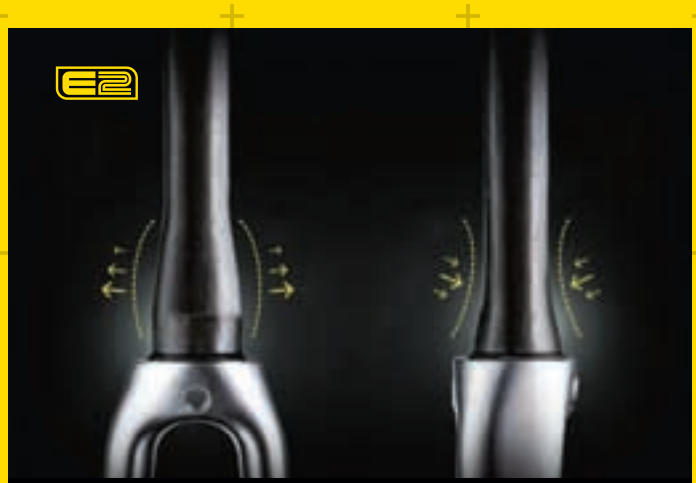

SHIMANO Di2® INTEGRATION

This year, Shimano will make available their new Di2 electronic drivetrain. Already race proven, this innovation is sure to be the hottest thing to hit the bicycle drivetrain biz in a while. Too bad most framesets can't integrate with Di2 seamlessly—except for the Madone 6 Series. A specially designed battery mount and Di2-specific cable routing and stops means perfectly clean and seamless integration with the future of cycling.

LOAD PATH TUBE SHAPING—LIGHTER, STIFFER, AND MORE COMFORTABLE

Tube shapes matter. They affect comfort, ride quality, frame weight, and aerodynamics. Finding the best combination has no quick formula. The variables are many and the possibilities are infinite. That's why we put the best engineering team in the industry on the job to develop the new 6 Series. By examining force loads on every inch of a frame, they reduced enough material to make the frame 100 grams lighter. Along the way, they also laterally stiffened the front end by 17% for even better handling.

INTRODUCING THE FIRST ASYMMETRIC FORK

A bicycle fork does a lot of grunt work. It has to handle extraordinary force loads, give you lateral rigidity when cornering and offer frontal compliance to absorb road imperfections. The new 6 Series Bontrager Race XXX Lite fork does all of this and more. By re-shaping the fork steerer from round to oval, we achieve 15% more frontal compliance to smooth the road, 20% more lateral stiffness when cornering, and 30 grams less weight than the 2009 fork. That means a lighter, stronger, better-handling and more comfortable ride.

A BOTTOM BRACKET SHELL THAT'S TOP DOG

Most bottom bracket shells are 68mm wide, because that's the width of the standard bottom bracket. But for Madone, standard isn't good enough. Our bottom bracket shell is 90mm. This wider, stiffer shell allows quicker takeoff, easier climbing, and faster cornering. To improve on the standard, we eliminated the stock bottom bracket cups by molding the bearing surfaces right into the frameset, out of carbon fiber. This requires the precise control and flawless consistency of our proprietary Net Molding™ process. Out with the old, in with the better.

RIDE TUNED SEATMAST. COMFORT BY DESIGN

Our seatmast system was already light and comfortable. We could've left well enough alone...but we didn't. By reshaping our seatmast, we dropped another 20 grams and added 43% more vertical compliance. Now it's lighter and more comfy than ever.

5

CONVENTIONS. CONSTRAINTS. THE MADONE 5 SERIES LEAVES THEM IN THE DUST.

It may not be a Madone® 6 Series, but this bad boy has three Grand Tour titles under its belt. Hand built in our Waterloo facility, the 5 Series was the first Madone to not just rewrite the carbon frame rules, but redefine them. The moment it hit the road, it became the benchmark. Perfectly proportioned, incredibly balanced, and powerfully exhilarating, the Madone 5 Series looked convention in the eye. And convention blinked.

TREK
MADONE

YOUR NEW 5 SERIES MADONE® STARTS HERE.

We want every Madone buyer to be happy, from mile one to mile one million. That's why we offer our 5 Series Madones through a custom program we call Project One. Project One™ is our process of building one bike at a time, per your wishes and dimensions—often at no extra cost. It all starts with a consultation with your Trek dealer to define your needs and design your perfect machine. Customize yours at trekbikes.com/projectone.

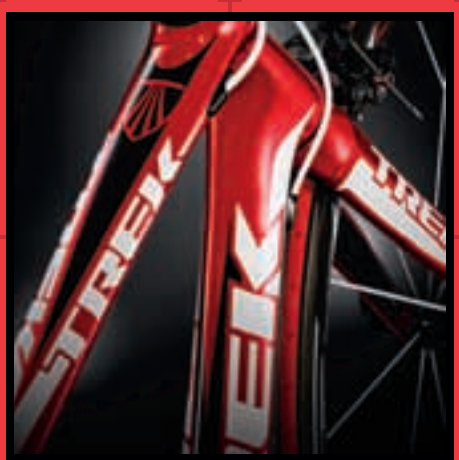

ONE: CHOOSE YOUR FIT

It all starts with a Pro Fit Consultation from your Trek Dealer. A proper fitting session will let you order the right size and model frame, along with the right component dimensions, so you'll love your Madone from mile one.

ELEVEN: MEET YOUR DREAM BIKE

RIDE THE BIKE YOU'VE ALWAYS DREAMED OF.

Gloss Onyx Carbon / White / Red

PROJECTONE™

ALL DAY RIDE QUALITY

The Trek proprietary no-cut seat mast not only saves substantial weight over a standard seatpost system, it also provides a noticeable level of compliance for all day performance and comfort.

POWER TRANSFER

The Madone's BB90™ bottom bracket is 90mm wide, not the standard 68mm. Made possible by our precision carbon molding, this wider, stiffer shell transfers all your power into the road.

MADE IN THE USA

Each and every Madone® 5 and 6 Series bike is made by hand, one at a time in Trek's own factory. It's the only way to ensure true pro level performance and Trek patented technologies get built into every frame.

AMAZINGLY LIGHT

By eliminating material redundancies and the metal inserts used in other carbon frames combined with Trek's OCLV® carbon process, you'll find the best strength to weight ratio on the road. We have a limited lifetime frame warranty to prove it.

Give the artist freedom and stand back. This is just one of many themes available.

4

NEW. IMPROVED. AND READY TO TAKE YOU TO THE NEXT LEVEL.

This carbon masterpiece is designed for the budget-conscious rider who will not—repeat, will not—compromise on performance. The same designers who brought you the 5 and 6 Series Madones worked their magic on the 4 Series. New this year: a 15% stiffer bottom bracket so the power in your legs goes straight to the pedal, plus a lighter Bontrager Race Lite® fork. And, like the 2010 6 Series, the 4 Series is DuoTrap™ capable. That means a slick computer sensor is integrated into the frame. With all this, the 4 Series holds its own in the Madone® family.

PROVEN CARBON PERFORMANCE

Trek has been making full carbon frames since 1992—longer than many other road companies have been in business. Over these years, we've refined and perfected our carbon structures to the point where each is covered by a limited lifetime frame warranty.

SMART INTEGRATION

Now integrated into the frame and fork, the bicycle computer no longer has to be an unsightly lump of zip ties and cables. Introducing the DuoTrap,™ the cleanest, most integrated computer sensor system out there.

MADONE® 4.5
FRAME TCT Carbon, DuoTrap Compatible
FORK Bontrager Race Lite, Carbon w/ E2 Aluminum Steerer

OUTSTANDING HANDLING

By increasing the diameter of the lower headset bearing in the new oversized E2™ fork, we increased front-end rigidity for better tracking, smoother steering and the ability to make an even lighter fork.

CHAMPION BLOODLINE

Race-proven geometry is the soul of the Madone,® delivering the predictable, confidence-inspiring handling that has helped deliver wins at the Giro d'Italia, Vuelta a España and nine Tours de France.

2/1 SERIES

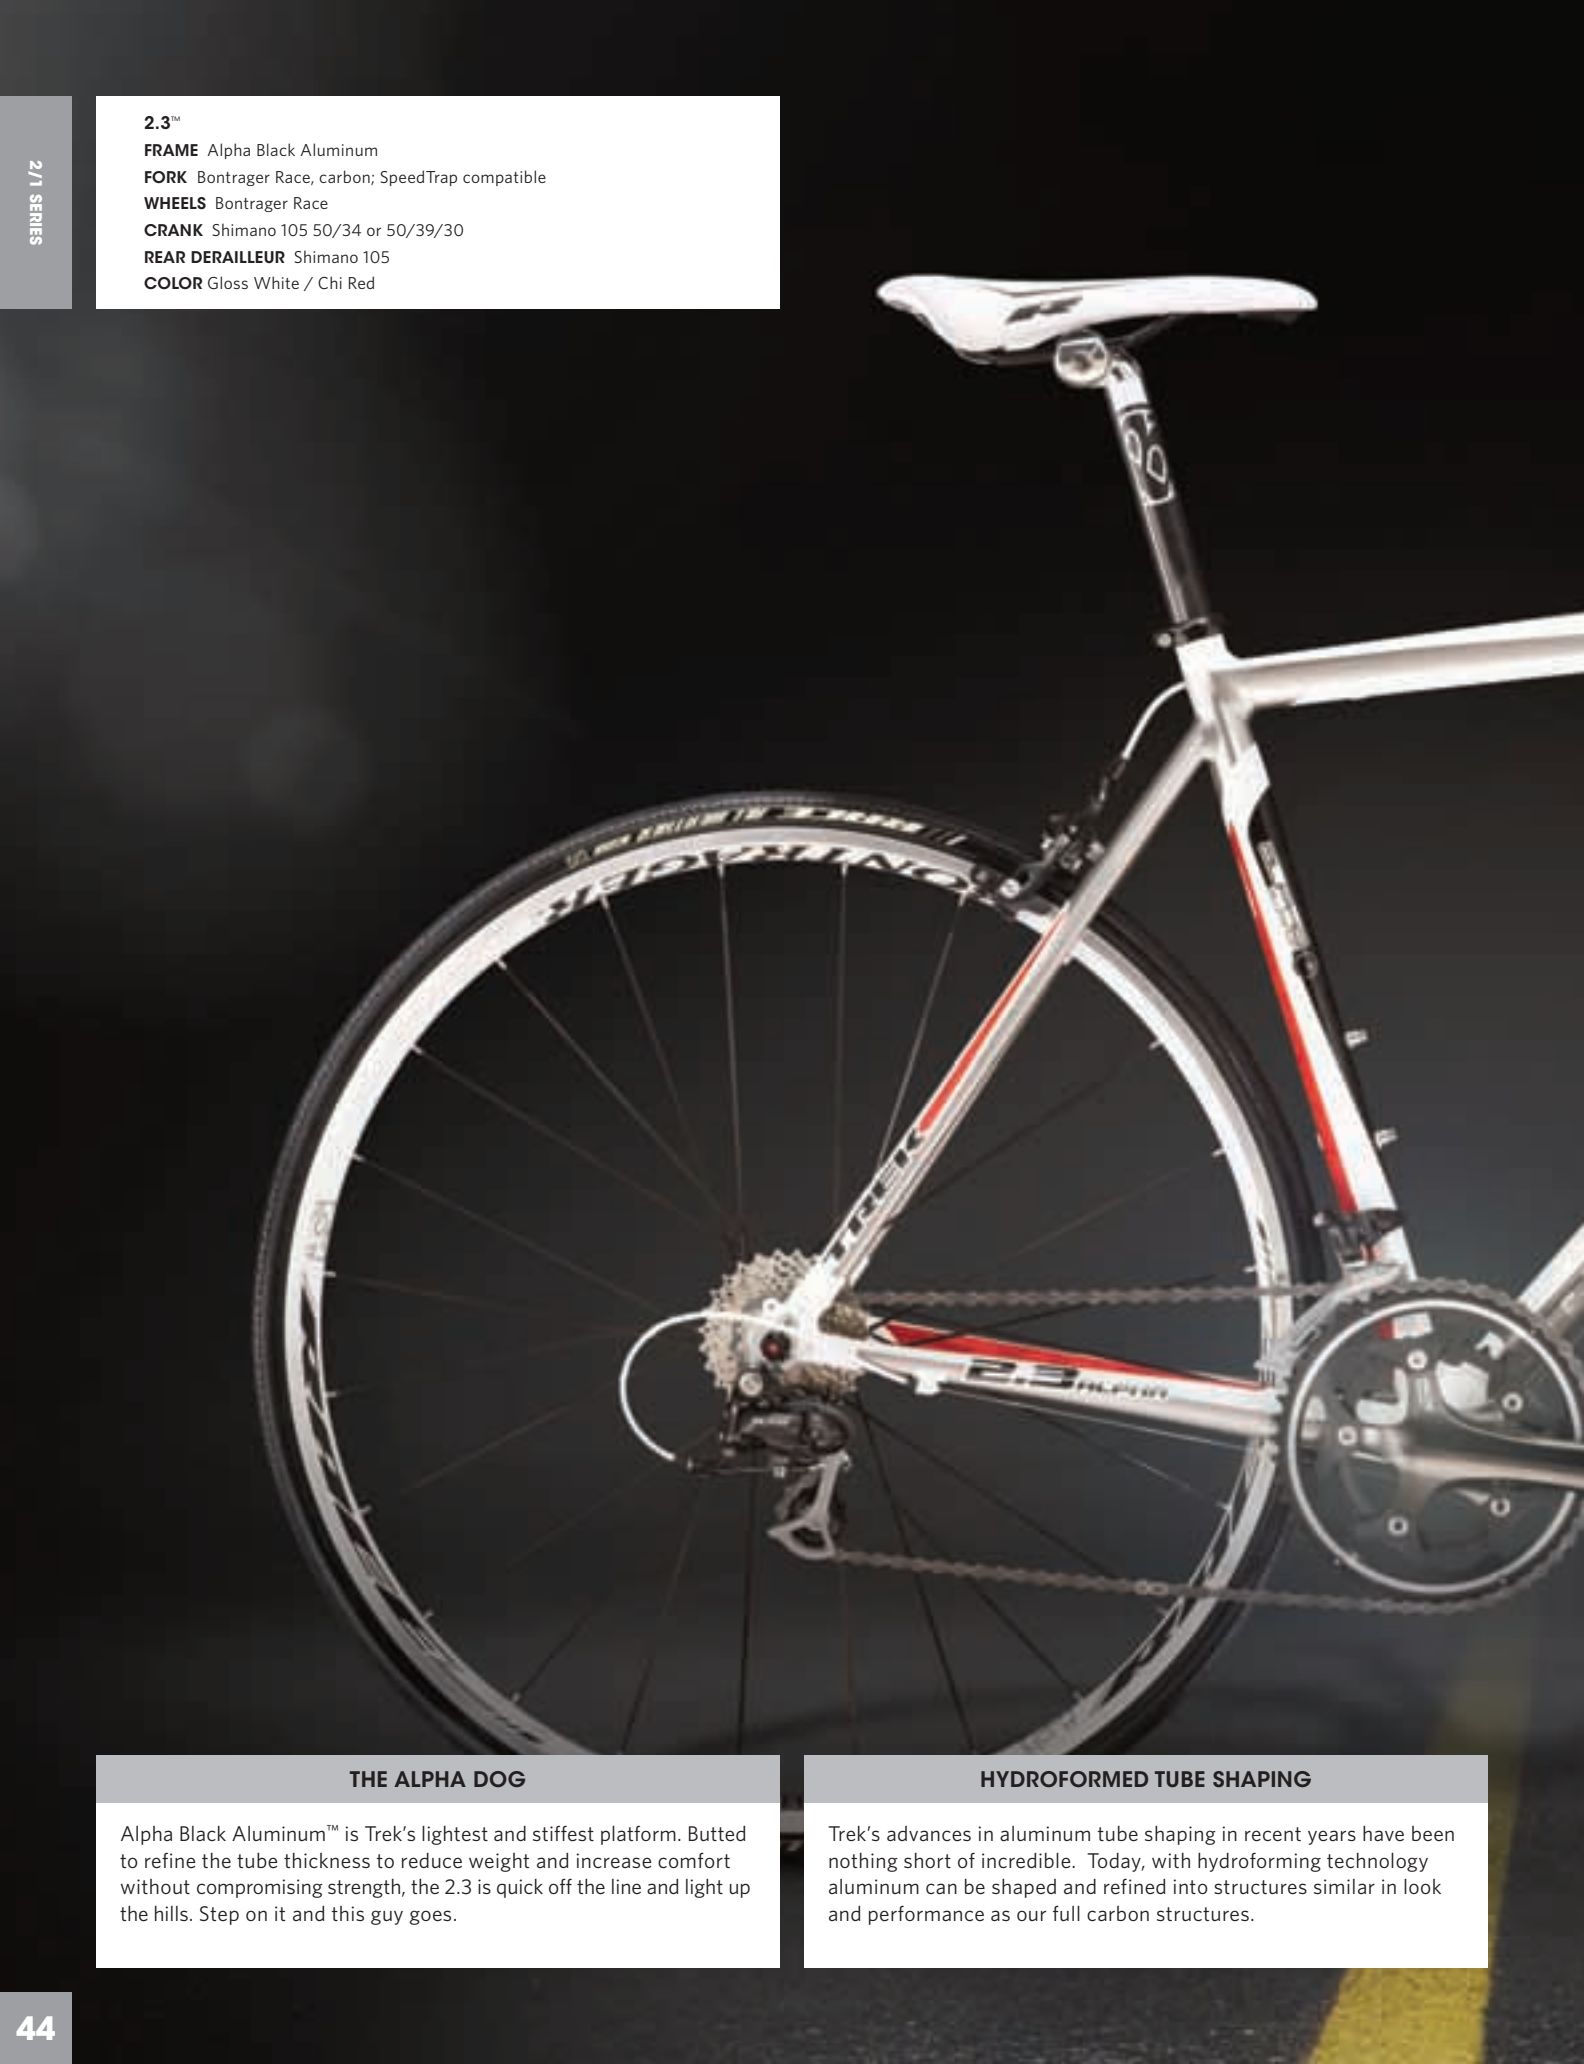

2/1

LANCE'S BIKE IN ALUMINUM.

Built with light and strong Alpha Aluminum™ and designed with the geometry from our Tour-winning Madone,® you'll get a road bike that's race ready and eats anything you put in front of it. Light, fast, without weighing down your budget. The 2010 Trek 1 and 2 Series road machines. Really big bang, the right amount of bucks.

TREK

THE ALPHA DOG

Alpha Black Aluminum™ is Trek's lightest and stiffest platform. Butted to refine the tube thickness to reduce weight and increase comfort without compromising strength, the 2.3 is quick off the line and light up the hills. Step on it and this guy goes.

HYDROFORMED TUBE SHAPING

Trek's advances in aluminum tube shaping in recent years have been nothing short of incredible. Today, with hydroforming technology aluminum can be shaped and refined into structures similar in look and performance as our full carbon structures.

THE GEOMETRY OF CHAMPIONS

Compare the geometry of the 2.3 with the Madone® and you won't see any difference. You see, we believe all our bikes, no matter how much you spend, should perform like winners. Spraying the champagne is up to you.

THE RACE READY COMPONENTS

With a 100% Shimano 105 group and Bontrager Race components powering the 2.3, you can be sure this bike will shift reliably and crisply, and give you the ride you want for many miles to come.

TRIATHLON

TRI ATHLON

DON'T JUST REACH YOUR POTENTIAL. BLOW BY IT.

Whether you want to finish strong or finish first, our triathlon bikes will add speed to your bike leg while at the same time, save some in the tank for the run. Designed to cheat the wind and give you a smooth, stable ride to conserve energy, the TTX™ is your best move to achieve your tri performance goals.

EQUINOX TTX
TREK

AERODYNAMICS. THE MOST IMPORTANT IMPROVEMENT. BAR NONE.

Wind resistance is a drag. It makes you go slower. It makes you work harder. It saps precious energy. Things you can't afford when racing against the clock. That's why we put a lot of money and manpower into ridding wind resistance from the world of cycling. And that's why we offer the most aerodynamic bicycle system.

LEADING EDGE.

So narrow, air won't know it's there. The hour-glass head tube, integrated headset and internal cable routing all combine to make you aero where it matters the most – the front.

INTERNAL CABLES.

Cables are supposed to let you control speed, not slow you down. So we route the cables internally behind the stem, out of sight from the wind.

THE TTX™ FORK.

Like a hot knife through butter. The Bontrager XXX Lite TT fork is specifically designed to go fast. Really fast. It's slim, strong and allows the turbulent air around the wheel to flow past more quickly.

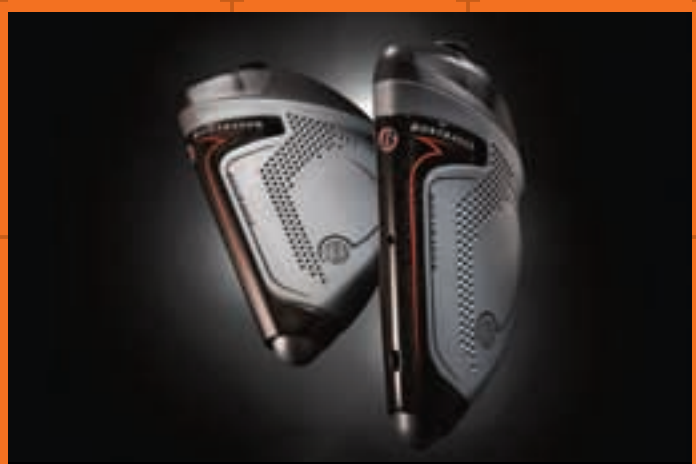

EFFICIENCY. CONSERVE ENERGY, DON'T WASTE IT.
Conserving energy while going as fast as you can is the name of the tri game. After all, you have a run when you get off your steed. Be fresher with the Equinox® TTX. Reaching for a water bottle, bombing into a corner or speeding over rough roads is easier so you don't work as hard. Every little body movement counts.

STABILITY.
Get in and out of your aerobars with confidence. With the TTX, we've established the perfect "front-center" balance to eliminate both over-steering and under-steering when in the aero position. Trek engineers have spent tens of thousands of hours on the road, in the lab and at Ironman competitions perfecting the front-center aero position so the TTX tracks and steers a lot more reliably, thus saving precious energy and speed. Record-setting performances don't lie.

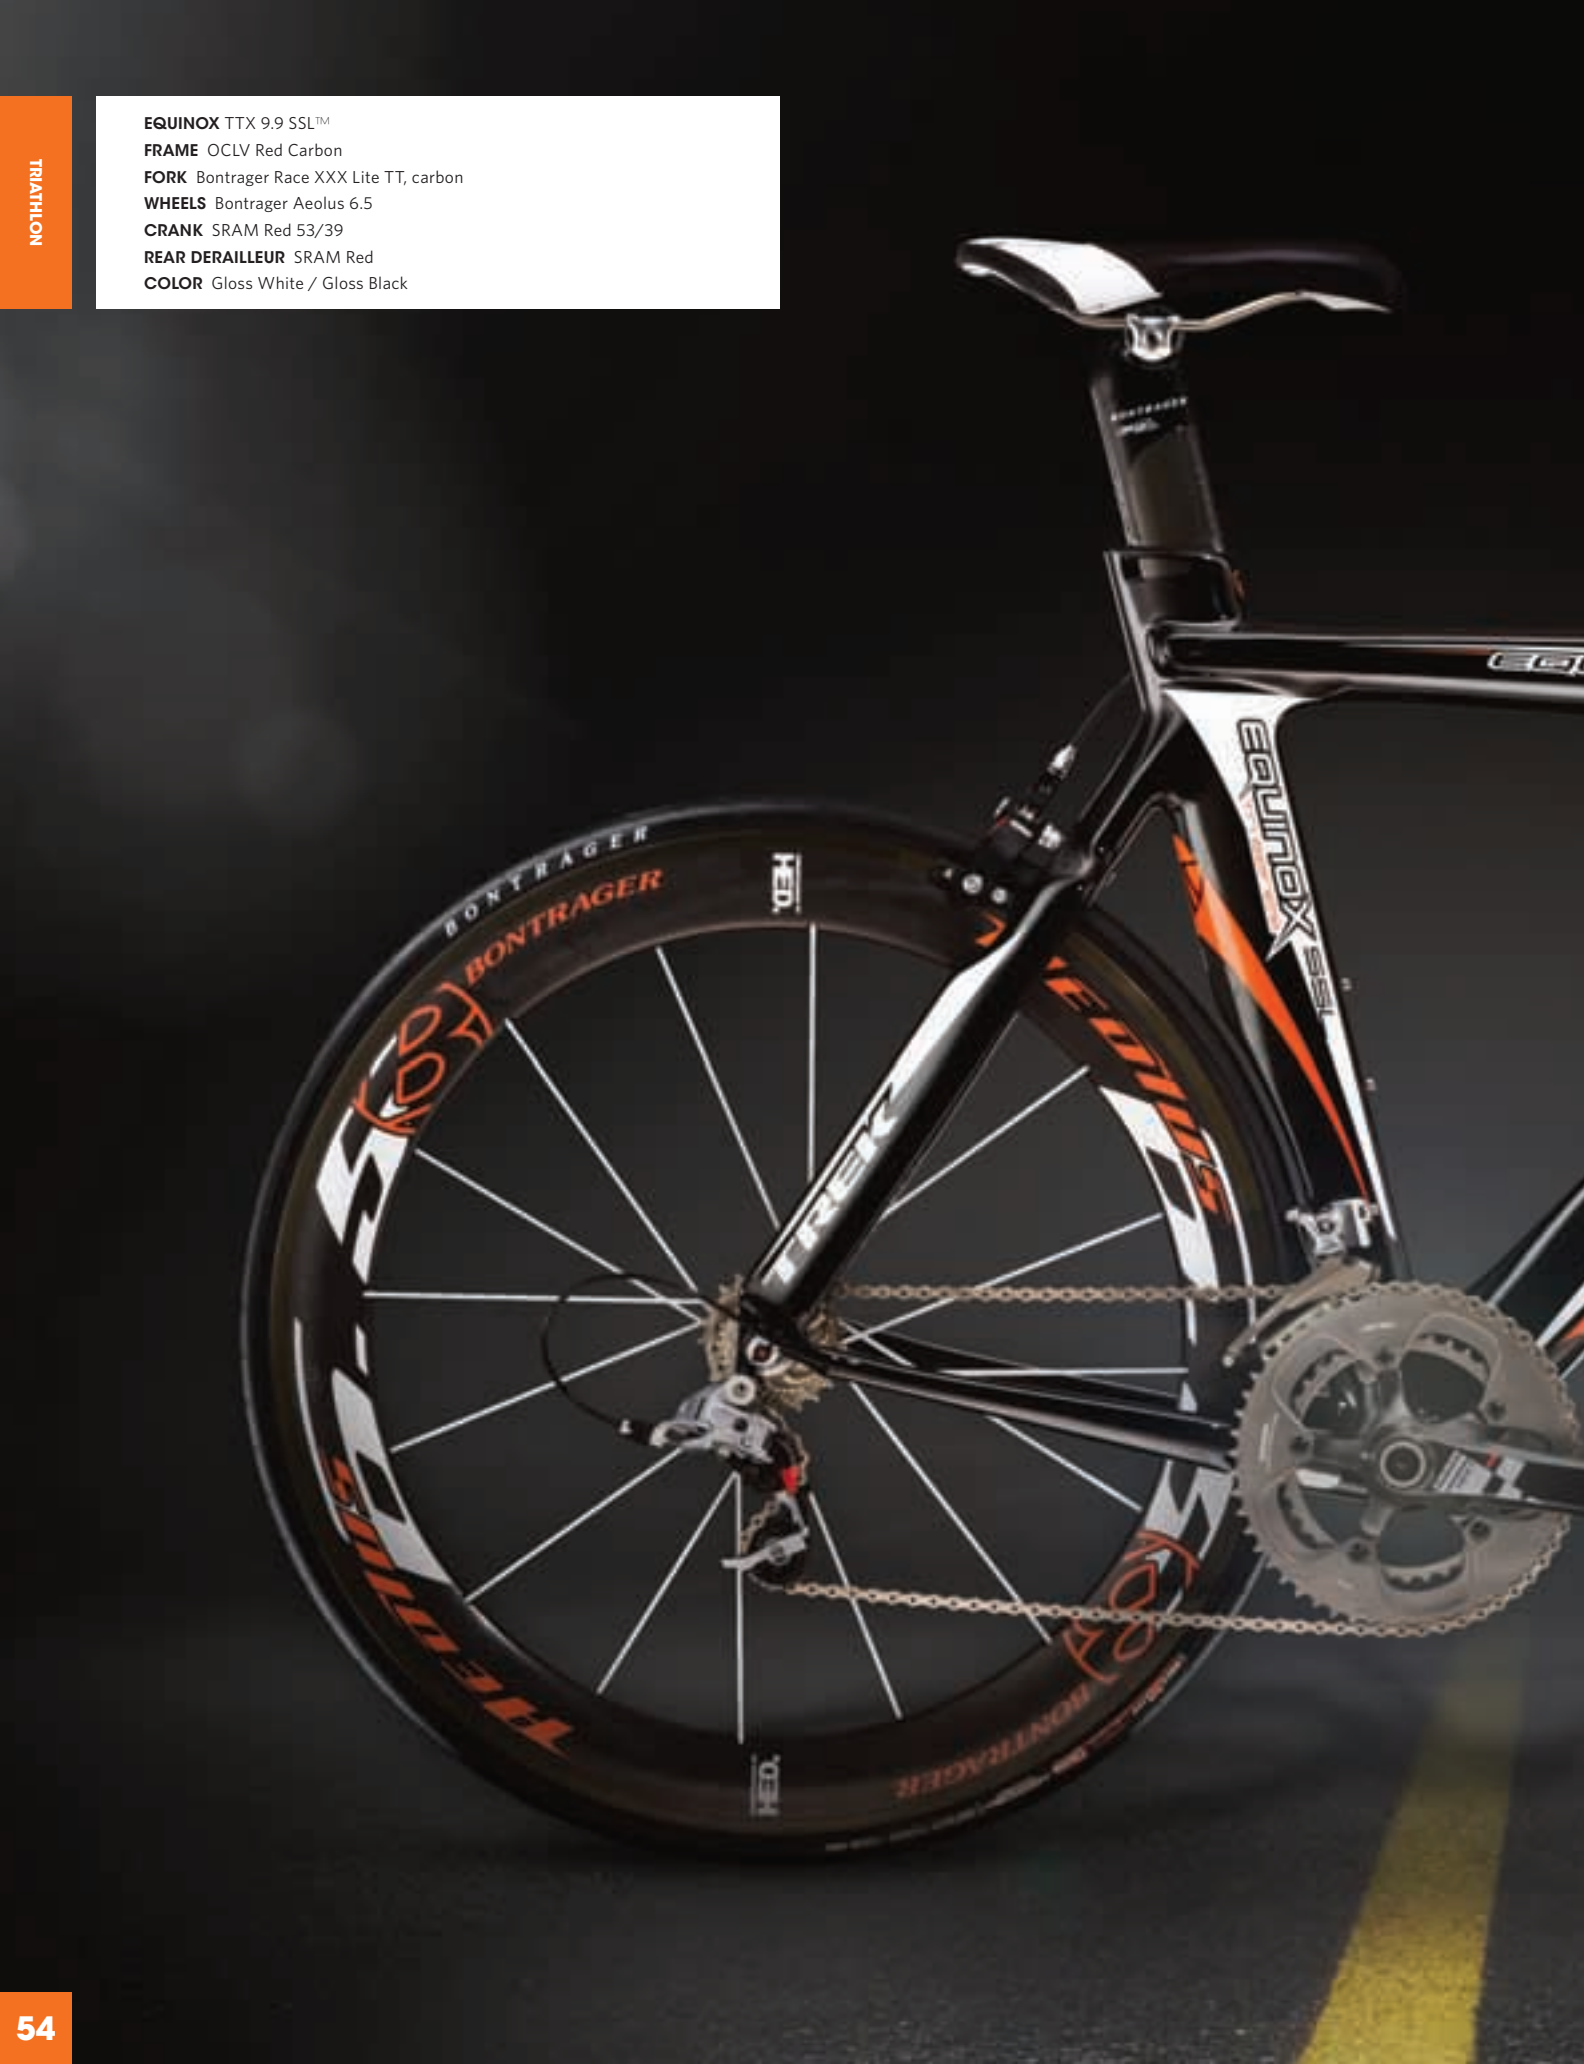

NO SACRIFICE.
The groove on the top tube is not only aerodynamic, but gives the Equinox TTX unmatched steering and handling abilities. Simply, no other bike can claim this combination of aerodynamics, rigidity and stability. Bomb the corners, light the road on fire and be fresher for the foot race at the end.

FUELING PERFORMANCE.
Fuel. It's what makes your engine go longer and faster. Without it, you suffer and even bonk. The TTX is here to help make fueling your body easier. Water bottle mounts are placed higher for easier access to precious liquids. And the ultra-stable design of the frame itself means you can eat and drink without losing control. Even the little things can make a big difference.

WSD®

NOW, WSD ISN'T ONLY WOMEN SPECIFIC, BUT YOU SPECIFIC.

We've uniquely tuned our Women's Specific models to a woman's fit and comfort needs. And new for 2010, even more choices. The new 6 Series WSD Madone® is now available in the Performance Fit™ for a more aggressive riding style. Plus, now you get more choices from our Triathlon line, including the new Equinox® TTX 9.0 and 9.8 WSD to better fit smaller riders. And for women who need an even smaller bike, the Madone 4.7 WSD comes equipped with 650C wheels for that perfect fit.

INTRODUCING INFORM®: THE SCIENCE OF COMFORT.

THE MOST ADVANCED CYCLING GEAR FOR WHERE THE BODY MEETS THE BIKE.

What if you could put on a second, more comfortable skin when riding your bicycle? What if your feet, your hands, and your butt became one with the bike, for a confident, connected ride? What if your saddle, shorts, and shoes were as carefully researched and developed as your frame and components?

Commissioned studies from a major university, hours of trial and error, prototype after prototype—we've carefully and scientifically considered the places where people meet bikes. From the way a chamois supports the rider, to the way your blood flows as you're sitting on a saddle, to analysis of every conceivable pressure point in a shoe, our inForm research is dedicated to making your ride more enjoyable. Let us prove it.

Introducing inForm apparel, saddles, and shoes, exclusively from Bontrager.®

INTRODUCING AN AMAZING NEW FEATURE IN SADDLES: SIZES.

Believe it or not, most saddles are One Size Fits All. Not Bontrager inForm saddles. You get three sizes to choose from, each with its own Size Specific Curvature™ so your pelvic structure is supported properly and you get the best blood flow "down there." inForm saddles from Bontrager are better fitting and better for you—and backed by our Unconditional Comfort Guarantee.

WE'VE THOUGHT A LOT ABOUT YOUR BUTT, SO YOU DON'T HAVE TO.

There are a lot of charts and graphs, zeros and ones, and spreadsheets behind the inForm line of chamois. Why? Because accurately identifying pressure points on real subjects has enabled us to design a chamois with just the right amount of support in precisely the right places. We call that process "pressure mapping science and technology." Your butt will just say "Ahhhhh."

THE PERFECT CYCLING SHOE FOR YOU. AND YOU. AND EVEN YOU.

With cycling shoes, the perfect fit is essential to enjoying the ride. That's why Bontrager shoes are designed using inForm technology—proprietary features that offer almost every cyclist optimal support and fit no matter their riding style or foot structure. Unlike other cycling shoes, inForm models can accept any insole—including custom orthotics—without compromising fit. Their unique construction allows for near-custom adjustability from heel to toe for unmatched comfort mile after mile.

EVERYTHING IS ONE.

To integrate is to combine one thing with another so that they become a whole. A simple idea – one we applied to our frames and cycling computer technology. No longer is a cycling computer and its sensor an add-on to your bike. Now, your computer is a part of it. Clean, seamless, simply smart – sensors and computers as innovative as your Trek bicycle.

THE SPEEDTRAP™ SENSOR

Bye-bye zip ties. Say hello to a computer sensor that fits into the fork, not tied to the outside of it. Compatible with ANT+ digital computers such as Bontrager,® Garmin, PowerTap, SRM and more, the SpeedTrap sensor is your ticket to seeing speed.

THE DUOTRAP™ SENSOR

Slick. This sensor sits within the chainstay and reads both speed and cadence. Like the SpeedTrap sensor, the DuoTrap is compatible with ANT+ digital computers. It's quick to install, aerodynamic and an elegant solution to tracking your performance.

NODE™ COMPUTERS

Introducing the next generation of digitally-coded cycling computers. That's fancy speak for "the coolest little brain on your bike." About the Node 1 computer: using the ANT+ digital signal and compatible with both Bontrager SpeedTrap and DuoTrap sensors, its numerous functions are easy to use, plus you can expand the computer's function to include heart rate and cadence. Need a computer with a few more bells and whistles? The Node 2 offers the same great features and functions as the Node 1 plus heart rate, altitude and percent grade.

ANT+ DIGITAL TECHNOLOGY

A no-brainer for our cycling computers. The ANT+ technology uses digital signals rather than analog ones. That means the elimination of "cross talk" between multiple sensors and computers, longer transmission distances and the ability to design even smaller and lighter sensors such as the SpeedTrap and DuoTrap. Plus, because of ANT+ technology, multiple devices from different manufacturers can communicate with one another. Have a Node computer? Cool. Now you can read power from a SARIS PowerTap hub or SRM crank system.

OCLV Madone frame size is measured from center of bottom bracket to virtual size mark on seat mast. Seat tube dimension applies to non-seatmast frames only and is measured from center of bottom bracket to top of seat collar. Head tube length for 1 Series includes external headset cups. All dimensions are in centimeters unless otherwise stated. Some models are not available in all sizes.

Trek Limited Lifetime Warranty

Trek Bicycle Corporation provides each original retail purchaser of the bicycle a lifetime warranty against defects in materials and workmanship in the bicycle frame, except the fork and the Session model, when purchased from an authorized Trek dealer. Rigid forks and all Bontrager components and accessories, except consumables such as tires and inner tubes, are warranted for 5 years. Trek Bicycle Corporation likewise warrants all other original parts on the bicycle, excluding Shimano parts, suspension forks and rear shock absorbers, for a period of one year from the date of purchase. Suspension forks and rear shock absorbers shall be covered by the stated warranty of their original manufacturers. Paint and decals are warranted for one year. This warranty is expressly limited to the repair or replacement of a defective frame, fork, or defective part and is the sole remedy of the warranty. This warranty applies only to the original owner and is not transferable. Claims under this warranty must be made through an authorized Trek dealer. Proof of purchase is required. A warranty registration card must be completed and received by the Trek Bicycle Corporation before a warranty claim may be processed. This warranty covers bicycles and components outside the United States only if purchased through an authorized international Trek distributor or Trek dealer within the country of purchase. The warranty does not cover normal wear and tear, improper assembly or follow-up maintenance, installation of parts or accessories not originally intended or compatible with the bicycle as sold, damage or failure due to accident, misuse or neglect, or modification of the frame, fork or components.

Trek Bicycle Corporation shall not be responsible for incidental or consequential damages. Some states do not allow the exclusion of incidental or consequential damages, so the above exclusion may not apply to you. This warranty gives the consumer specific legal rights, and those rights may vary from place to place. This warranty does not affect the statutory rights of the consumer.

All photos, illustrations, colors, weights, and specifications contained in this catalog are based on the latest production information at the time of publication. Trek reserves the right to make changes at any time, without notice, in colors, materials, equipment, specifications and models. Any variations in colors shown may be due to the reproductive variations of the printing process. Photos may include non-U.S. equipment. Some models may be shown with optional equipment. Off road bike weights based on medium or 18 inch frame size. Road bike weights based on 56cm frame size.

All Trek bikes are sold exclusively through our network of Authorized Dealers who we entrust with professional assembly and service of your bicycle. Trek extends a Lifetime Warranty on every frame, except the fork and the Session model.

WE PRINT OUR CATALOGS ON ONLY FOREST STEWARDSHIP COUNCIL (FSC) CERTIFIED PAPER

FSC certification ensures that the paper in our catalogs contains fiber from well-managed and responsibly- harvested forests. The goal is to shift the market to eliminate habitat destruction, water pollution, and displacement of indigenous peoples. This catalog meets FSC's strict environmental standards.

TREK
TRAVEL

TREK TRAVEL IS THE ULTIMATE WAY TO EXPERIENCE THE WORLD'S GREAT DESTINATIONS ON THE WORLD'S BEST BIKES.

Explore as much as you like, at your pace. Our highly-experienced guides make sure you don't miss a thing. Whether you prefer long rides or a leisurely pace, luxury or laid-back, there's a Trek Travel® trip to fit your taste.

To learn more about your trip options, or to reserve your spot on the vacation of a lifetime, call 866 464 8735 or visit www.trektravel.com.
