FITS BETTER FROM THE START.

Women's Specific Design (WSD) bikes are designed to fit women better from the start. You'll find WSD bikes throughout the Mountain collection. We believe in the value of difference. And because you're designed differently than a man, your bike should be, too.

/ RUMBLEFISH

BRINGING THE 29ER ADVANTAGE TO TRAIL BIKES.

GARY'S TAKE / Once we figured out how to get bigger wheels and more travel to play nicely together, it was time to change trail bikes forever by introducing the first truly dialed 29er trail machine: Rumblefish.

RIDER PROFILE / 29er believers looking to tackle more technical terrain, or 26" trail riders looking to gain the advantage of bigger wheels.

NEW FOR 2011 / FCC MTB, ABP Convert with a 142x12 rear thru-axle, 10-speed, a new entry-level Rumblefish.

Rumblefish

1 / FCC MTB
29" wheels benefit from oversized hubs, flanges, and end caps to create a flex-free wheel that chews through technical terrain.

2 / ACTIVE BRAKING PIVOT
ABP means your suspension works the same whether you're on the brakes or off. Smooth, controlled suspension that's at its best all the time.

3 / DRCV CONTROL
Trek's two-chamber DRCV shock combines pedalability and small-bump sensitivity with great big hit control. It's two shocks in one to give you all-bump performance.

4 / WHY 120/110MM?
120mm up front with a smooth-rolling 29" wheel gobbles up technical trail, while 110mm in the rear mated to the ultra-plush DRCV shock and a 29" wheel gives the impression of much more travel.
