

TREK

WATERLOO, WISCONSIN | SINCE 1976

Your adventure begins here

Every great cycling adventure begins with the single turn of the pedals. Or, in this case, the turn of a page.

Welcome to the catalog that'll help you make 2023 your best year ever — one filled with more time outside, less time on screens, and your greatest memories on two wheels.

Treat it like a choose-your-own-adventure book. No, there are no castles or dragons. But there is a hero (it's you). And you do have a sidekick (it's us).

And together, we're on a very important quest to find the perfect bike for the way you ride.

This is going to be fun.

Want the best bikes for city streets?
Start your journey on page 4.

Looking to find your mountain bike for off-road exploration?
Head to page 24.

Road race aspirations?
Find your road bike starting on page 46.

Want to take the road less traveled?
Pedal your way to page 58 for gravel bikes.

Gotta get something super special no one else has?
Take the shortcut to page 66.

On the cover
Kayla VanProoyen's illustration of the Trek Madone is a fresh take on classic cycling art from the early 20th century. Her piece is part of a collection of work created through an ongoing collaboration between Trek and the Milwaukee Institute of Art & Design to foster and build the outdoor industry's next generation of creative talent.

The electric revolution is now

Visit your local Trek shop for an e-bike test ride.

The Trek difference

Awesome warranty, built to last

Trek e-bike motors and batteries are warrantied for two years. That's twice as long as many major online brands!

Made to keep you in control

Trek uses only natural-feeling, predictable pedal-assist systems and reliable all-weather hydraulic disc brakes designed for an e-bike's faster speeds.

Expert assembly and service

Wherever you are, we're there too. Every e-bike is tuned in-house by certified technicians, and you'll never have to ship a Trek to a faraway maintenance center for service.

Durable, high-quality parts

Trek e-bikes have robust hubs, wheels, and tires made for the higher speeds and power of an electric bike.

Third-party tested and certified

Every Trek e-bike is certified to meet or exceed leading e-bike safety standards.

Frames guaranteed for life

Like all Trek frames, every e-bike frame is warrantied for life to the original owner.

We know bikes. It's what we do.

Every one of Trek's 30+ e-bike models is informed by five decades of development experience.

Best for getting out of your car and into your world

THE ELECTRIC

Fetch+ 2

Fetch+ 2 is a longtail electric cargo bike that's sleek and compact enough for easy storage, but big enough to fit everything you need for your daily commute, grocery run, ride to school, and more.

With room to fit two kids plus plenty of cargo, Fetch+ 2 is the fun, fast, and friendly way to get from A to B. Plus, it's available with a full suite of color-customizable accessories so you can set it up exactly for your family's style and needs.

Best for more "Woohoo!" with less weight

THE ELECTRIC

FX+

FX+ is a lightweight city e-bike with a svelte hub drive motor that assists up to 20 mph and a hidden internal battery that gives it the sleek looks of a non-electric ride. Convenient controls and the optional plug-and-play Range Extender put more possibility in your daily commutes, errands, and city explorations. Bonus: the low weight of this e-bike makes it easier to load onto a car hitch rack for transportation!

Included accessories

Front and rear lights, rear rack, fenders

Prefer heading off the beaten path to sweat in solitude? Check out the gravel-ready FX Sport Carbon.

Best for bike paths, rail trails, and gravel adventures

FX Sport Carbon

FX Sport Carbon is a gravel-ready fitness bike that can help you take your riding beyond city streets. These awesome hybrids are lightweight, high-performance, and pack lots of function into a super sleek, super versatile design. With a fast frame, all-terrain tires, and flat bar confidence and control, you'll have a blast achieving your goals and exploring your surroundings.

Want a natural-feeling boost to take your workouts to new heights? Flip back to FX+.

Want an aluminum frame and even more adventure capability? Check out Dual Sport.

Best for mixed terrain

Dual Sport

Dual Sport is a true multi-surface hybrid that rolls from pavement to path and right into the great beyond. It's fast on asphalt, stable in rougher terrain, and built for reliability wherever you roam. Plus, it comes ready to accessorize with tons of mounts for racks, fenders, and more — and Generation 5 models even include mounts for a frame bag.

If you're looking for a single go-anywhere hybrid that'll keep it fun whatever the road conditions, Dual Sport is your match.

Dual Sport 2 Gen 4 ▶

Dual Sport 2 Gen 5 ▶

Generation 4

Comfort rules all on Dual Sport Gen 4. Its suspension fork soaks up potholes and smooths out rough roads while fast-rolling 700c wheels keep things quick.

Generation 5

With a weight-saving rigid fork and 27.5″ wheels with plush 2″ tires, Dual Sport Gen 5 is ultra-light and ready for big adventures.

Want a lightweight carbon frame for faster adventures?
Go back to FX Sport Carbon.

Want a true multi-surface bike with amplified pedaling power?

Want adventure-ready versatility without the assist?
Flip back to Dual Sport.

Want to head off the beaten path to even bigger trails?
Check out Marlin.

Best for oversized performance with an undersized price

Marlin

Marlin is a trail-tough mountain bike that's ready for any all-terrain adventure, whether you're exploring the forest singletrack or navigating a rugged urban landscape. With a race-inspired frame and loads of features you'd typically find on pricier models, Marlin is a mountain bike you won't outpace as your skills advance — which is exactly why it's the best-selling Trek of all time.

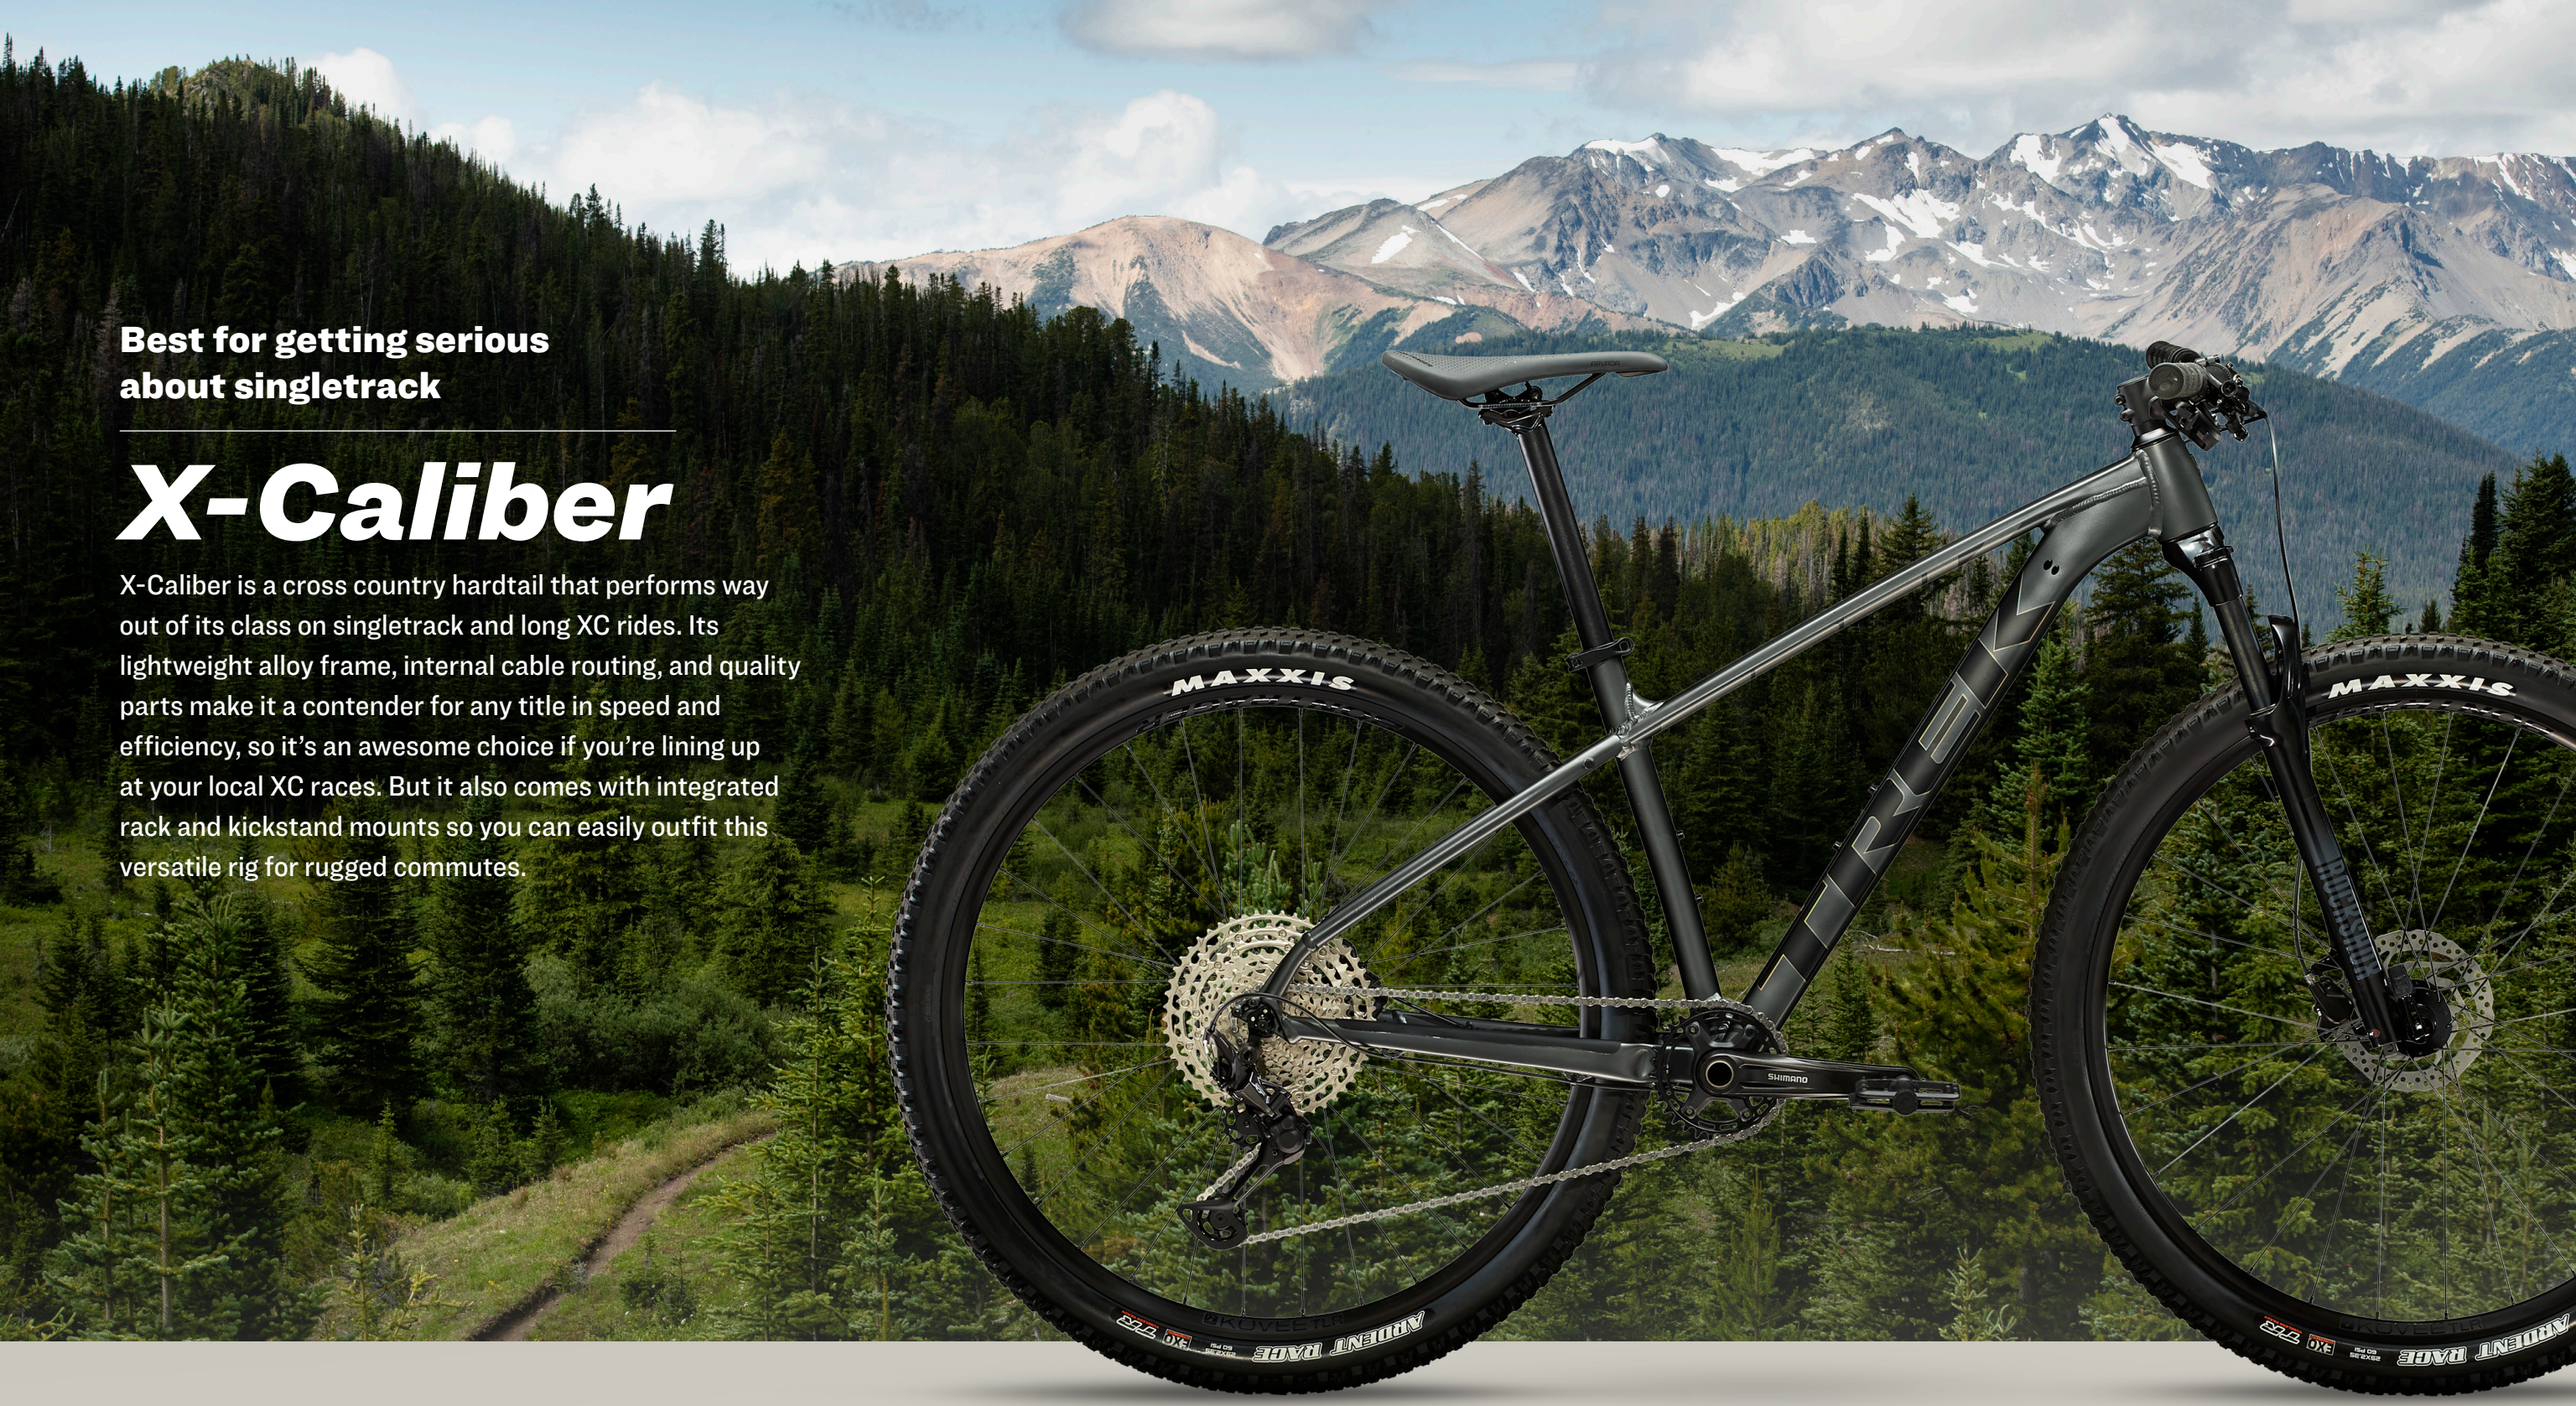

Prefer hardpack and rail trails over dirt singletrack? Head back to Dual Sport and Dual Sport+.

Want even more race capability with an upgraded frame, fork, and drivetrain? Turn the page for X-Caliber.

Best for getting serious about singletrack

X-Caliber

X-Caliber is a cross country hardtail that performs way out of its class on singletrack and long XC rides. Its lightweight alloy frame, internal cable routing, and quality parts make it a contender for any title in speed and efficiency, so it's an awesome choice if you're lining up at your local XC races. But it also comes with integrated rack and kickstand mounts so you can easily outfit this versatile rig for rugged commutes.

Want a race-capable frame with durable parts that'll help you save for entry fees? Head back to Marlin.

Care less about the race results and more about rowdy trail fun? Turn the page for Roscoe.

Best for less fuss and more fun

Roscoe

Roscoe is a good-times trail hardtail that can fearlessly fly down the same rowdy trails you'd ride on a full suspension mountain bike. Big front suspension, progressive geometry, and wide 2.6″ tires on fast-rolling 29er wheels make for a playful and confident ride on even the most bone-rattling singletrack.

Love the capability but want the thrill of flat-out XC speed?
Check out Supercaliber.

Expect to spend most of your time on less technical singletrack?
Return to X-Caliber.

Best for XC racing

Supercaliber

Supercaliber is the gold standard for cross country competition and the bike of choice for the likes of Trek Factory Racing XC's Jolanda Neff and Evie Richards. It delivers hardtail efficiency with full suspension control thanks to the innovative IsoStrut shock, which pairs 60mm of damped, tunable travel with unique pivotless seatstays that move with the trail to keep you smooth and fast.

Prefer chiller good-times trail vibes over racing? Flip back to Roscoe.

Want pro-level speed and endurance on every ride? Turn the page for the electric E-Caliber.

Best for World Cup speed on singletrack

THE ELECTRIC

E-Caliber

E-Caliber's got an appetite for distance, a love of XC speed, and the right amount of suspension and power to turn up your endurance on epic cross country rides.

Based on the profile of the XC race bike used by the pros, E-Caliber is built with the innovative IsoStrut shock — a structural suspension design with pivotless seatstays that let you move with the trail. Pair this suspension design with E-Caliber's ultra-lightweight internal drive system and whatever speed or distance limits you've set for yourself will instantly fade away.

Want a pure XC race bike without assist? Go back to Supercaliber.

The dirty deets

3 – 5 hours

Love the speed of an XC rig but want more travel for rowdier trails? Keep reading for Top Fuel.

Best for XC speed with trail-bike capability

Top Fuel

The wildly fun Top Fuel is perfect for riders who like to stay pinned on both climbs and descents. It's lighter and snappier than a trail bike, but more forgiving than a pure XC bike in rowdy terrain. Rip up and rocket down with a killer suspension setup, uncompromising pedaling efficiency, and features like in-frame storage on both carbon and alloy models.

Want a streamlined XC bike with a boost for longer, faster rides? Go back to E-Caliber.

Top Fuel 9.8 GX AXS ▶

Want to rip with even more travel and all-trail capability? Turn the page to see Fuel EX, Pinkbike's Bike of the Year.

pinkbike AWARDS 2022

Bike of the Year

Fuel EX

The new Fuel EX charged onto the trail last summer and straight to the top spot, earning the coveted Pinkbike Mountain Bike of the Year award.

"This bike blew my mind... (Fuel EX) could be so many different kinds of bikes for so many different riders thanks to the adjustable geo, the fact that it pedals so well... It's just crazy well-rounded."

–Pinkbike

Looking for shorter travel and more XC speed? Head back to Top Fuel.

Want to learn more about the winning bike? Flip the page for more Fuel EX.

Best for any trail, any time

Fuel EX

If you’re going to get just one mountain bike, make it Fuel EX — the jack of all trails and master of fun. This ride’s lively character begs to be let loose on singletrack, and it adapts so well to such a wide variety of terrain that it’ll even rip when the trail turns upward.

Fuel EX 8 Gen 5 ▶

Fuel EX 9.8 GX AXS Gen 6 ▶

Generation 5

With 130mm rear and 140mm front travel, Fuel EX Gen 5 dishes out more nimble handling with less weight, along with better components for the price and internal storage on carbon models.

Generation 6

With 140mm rear and 150mm front travel, Fuel EX Gen 6 gives you extra adjustability features and more stable handling, plus a more robust frame with internal storage on all models, including alloy.

Want the best of Fuel EX with an ultra-quiet, ultra-streamlined power assist?
Keep flippin’ to Fuel EXe.

Best for an authentic mountain bike experience

THE ELECTRIC

Fuel EXe

Fuel EXe is an electric mountain bike that's evolved to break the mold, bridging the gap between power and peace with an ultra-quiet assist that all but disappears in the woods. Its featherweight drive system hides in plain sight and empowers you to do more, without interrupting the way you experience nature. Just as a mountain bike should.

Crushin' on an e-MTB but looking for something that blends in everywhere? Go back to the ultra-quiet Fuel EXe.

Rail 9.8 GX AXS Gen 3 ▶

Generation 3 and Generation 4

Gen 3 and 4 Rail features everything you love about the previous generation with the addition of Bosch's smart system for added connectivity and a streamlined display.

Want to hit burly enduro lines without assist? Head to Slash on the next page.

Best for big-mountain enduro lines

Slash

Slash is a long-travel 29er enduro bike that's fast, smooth, and fun in the wildest terrain. It rips in the rough yet stays planted on punchy climbs with an enduro frame geometry on 160mm of travel that's right at home on park runs in Whistler and the Enduro World Series.

Love the big-mountain vibe but want to conquer even more? Head back to the electric Rail.

Slash 8 ▶

Slash 9.8 XT ▶

Want all the speed and none of the dirt? Seems like Madone's more your style.

If you're thinking "I'll be doing laps around Whistler, not the Champs Élysées," head back to Slash.

Best for all-around road race performance

Madone

From a legacy of greatness comes a new standard of speed. Seven generations in the making, this Madone pushes the boundaries of what's possible with a triple threat of unprecedented aerodynamics, exceptional ride quality, and lightweight design.

Plus, new IsoFlow technology allows the frame to flex over bumps for a smoother, less fatiguing ride — all while improving aerodynamics and shaving weight. Altogether, that turns into precious seconds in the saddle.

Want speed, value, and a frame design with road-smoothing IsoSpeed? Flip for Madone SL 6, the original superbike.

High-performance, high-value

The race-ready Madone SL 6 delivers high performance and a sleek look that screams for speed. Road-smoothing IsoSpeed, aero wheels, powerful hydraulic disc brakes, and an awesome value? Sounds like you're winning more than races with this bike.

Want to see a Madone with the all-new IsoFlow frame design? Flip back for Madone SLR.

Want even more aero for your next Ironman? Turn the page for Speed Concept.

Best for the aero advantage

Speed Concept

Speed Concept is a triathlon bike engineered to be fastest in its class. But it's not all aerodynamics and ultra-light carbon. It's also seamlessly designed hydration and fueling systems that boost your energy post-swim, keep you strong as you cycle, and set you up for your best run ever. You put your all into your training. We put our all into this bike. Sounds like the perfect recipe for getting out and earning what's yours.

Are you more ride-ride-ride than swim-bike-run? Head back to Madone.

Looking for an ultra-lightweight ride for group rides and epic climbs? Turn the page for Émonda.

Best for climbing

Émonda

Émonda is the lightest road bike in our lineup and the first up every climb — but we built this bike to do a whole lot more than break away from the peloton in the mountains.

We scrutinized every inch of this legendary race bike to offer ultimate ride quality, balanced handling, and aerodynamic tube shapes without compromising weight. It's fast up climbs, fast on the flats, and an awesome choice for a performance road bike that won't quit on even your most epic days.

Ultra-aero over ultra-light? Head back to Speed Concept and Madone.

Want a road bike with a bigger appetite for adventure? Check out Domane on the next page.

Best for race bike performance with a spirit of adventure

Domane

Looking for a performance road bike that delivers incredible endurance comfort without sacrificing speed? Meet Domane. Wherever you ride it — paved roads, hard-packed gravel, or the cobblestones of the world's greatest one-day races — it's smooth, fast, and fun.

With road-smoothing IsoSpeed and build options for all budgets, Domane is the modern road bike for the modern road rider. Whether you're the kind of rider who always opts for the more adventurous way home, or a racer with Roubaix aspirations, you'll find in Domane a bike that's quick, comfortable, practical, and always willing to meet you where you are.

Certain you'll stick to smooth pavement?
Return to the lightweight Émonda.

Domane SLR 7 Gen 4 ▶

Generation 4

With road-smoothing refined rear IsoSpeed, integrated cable routing, and updated aerodynamic Kammtail tube shapes, Domane Gen 4 is the ultimate endurance ultralight ride.

Domane SL 6 Gen 3 ▶

Generation 3

Engineered with a generous dose of both front and rear IsoSpeed, Domane Gen 3 is a lightweight ride that dishes out even more comfort for taking on long miles and rough roads.

Love Domane but want to ride as far and fast as the pros?
Check out the electric Domane+.

Domane+ AL 5 ▶

Best for keeping up with pros
(and never, ever, ever getting dropped)

THE ELECTRIC

Domane+

Domane+ is a whole new way to experience what you love about road riding. It rides like — and even looks like! — the road bikes you know, with an impressively discreet electric motor that's like a friendly hand on your back during your toughest, longest rides.

Choose Domane+ SLR for a higher-powered assist up to 28 mph, an ultra-quiet TQ drive system, an OCLV Carbon frame, and road-smoothing IsoSpeed for epic all-day adventures; opt for Domane+ AL for assist up to 20 mph, a hub-drive motor, and a lightweight aluminum frame that's friendlier on your wallet.

Wild, fun, and free

Why you should go gravel on your next bike

From epic landscapes you'll share with few-to-zero cars to the party vibe at organized events, there are endless explanations for gravel riding's recent rise in popularity. What you'll get from gravel is whatever you want to get from it — beauty, peace, adventure, challenge, exploration, community — and though there are way more than five reasons to love this sport, here are some of the many reasons you should seriously consider choosing gravel for your next bike purchase.

More quiet, less traffic

Gravel roads get you way out there, and that's a great place to be on a bike. Trade the sounds of rushing traffic for the comforting crunch of gravel under your tires. It's a good deal, trust us.

Do-it-all capability

You can use your gravel bike for just about any kind of riding. Swap the tires for something slimmer and you're ready to hammer on tarmac, or strap on some bags for commutes and extended adventure touring.

Gravel events are genuinely fun

Peel off your Lycra and pull on your finest jorts — this is gonna be a wild ride. Gravel events trade competition for camaraderie and prioritize fun over finishing times, with a welcoming and encouraging community of riders of all backgrounds.

A more engaging experience

Going fast is fun and all, but your average speed will drop when you hop off the tarmac onto gravel. Yes, that's a good thing. Slow down and smell the flowers, will ya? After all, isn't that what adventure's really about?

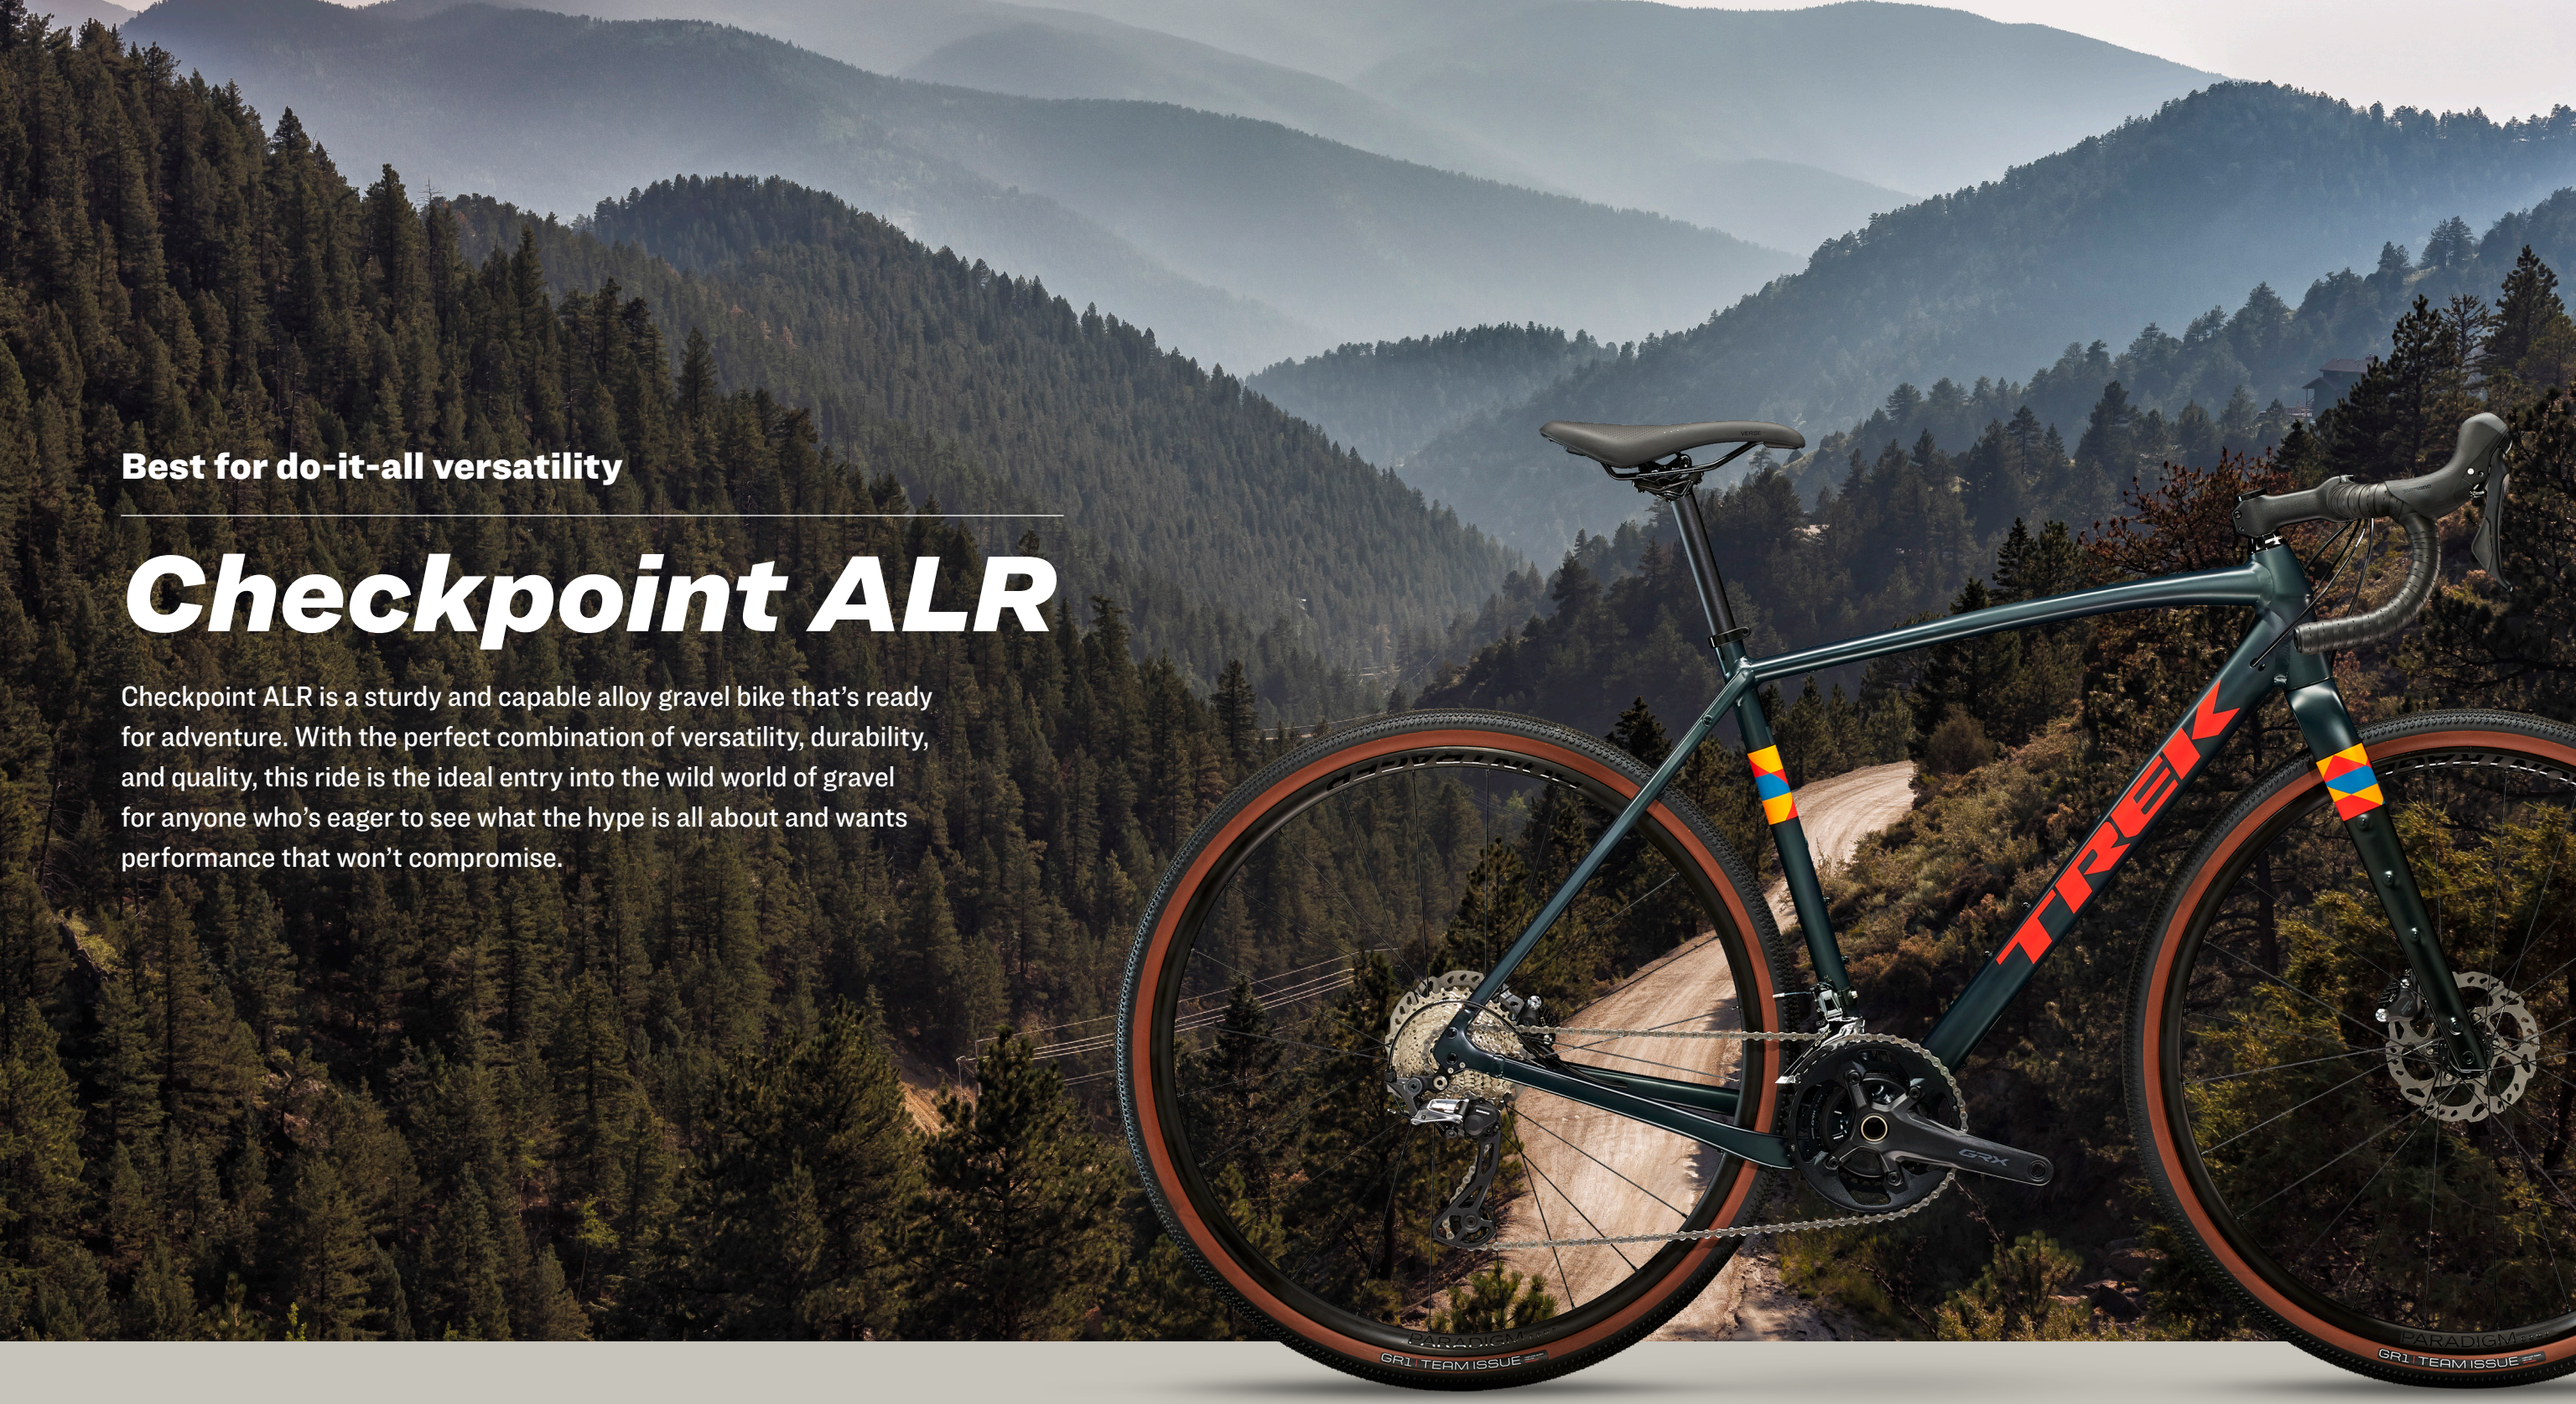

Gravel is for everyone

There are a whole lot of gravel roads in the world. Which means there's space for every rider. The greater gravel-riding community gets this, and that's one of the best things about this kind of riding. When you're on gravel, you belong — and so does everyone else.

Best for do-it-all versatility

Checkpoint ALR

Checkpoint ALR is a sturdy and capable alloy gravel bike that's ready for adventure. With the perfect combination of versatility, durability, and quality, this ride is the ideal entry into the wild world of gravel for anyone who's eager to see what the hype is all about and wants performance that won't compromise.

Prefer to stick to pavement?
Flip back to road bikes.

Looking for lighter weight and more carrying capacity for epic overnighters?
Turn the page for Checkpoint SL.

Best for roaming free

Checkpoint SL

This adventure-hungry carbon gravel bike can help you crush your toughest, longest rides. Performance parts, an OCLV Carbon frame with IsoSpeed — which keeps your ride smooth even when the gravel's rough for more control and less fatigue — a storage compartment in the frame, and loads of mounts for bags and gear make this SL the perfect ride for roaming free and chasing fun on the world's most epic gravel landscapes.

Want great gravel capability plus some extra cash for post-ride beers? Head back to Checkpoint ALR.

Sights set on a podium at your next gravel race? Check out Checkpoint SLR on the next page.

Best for racing gravel

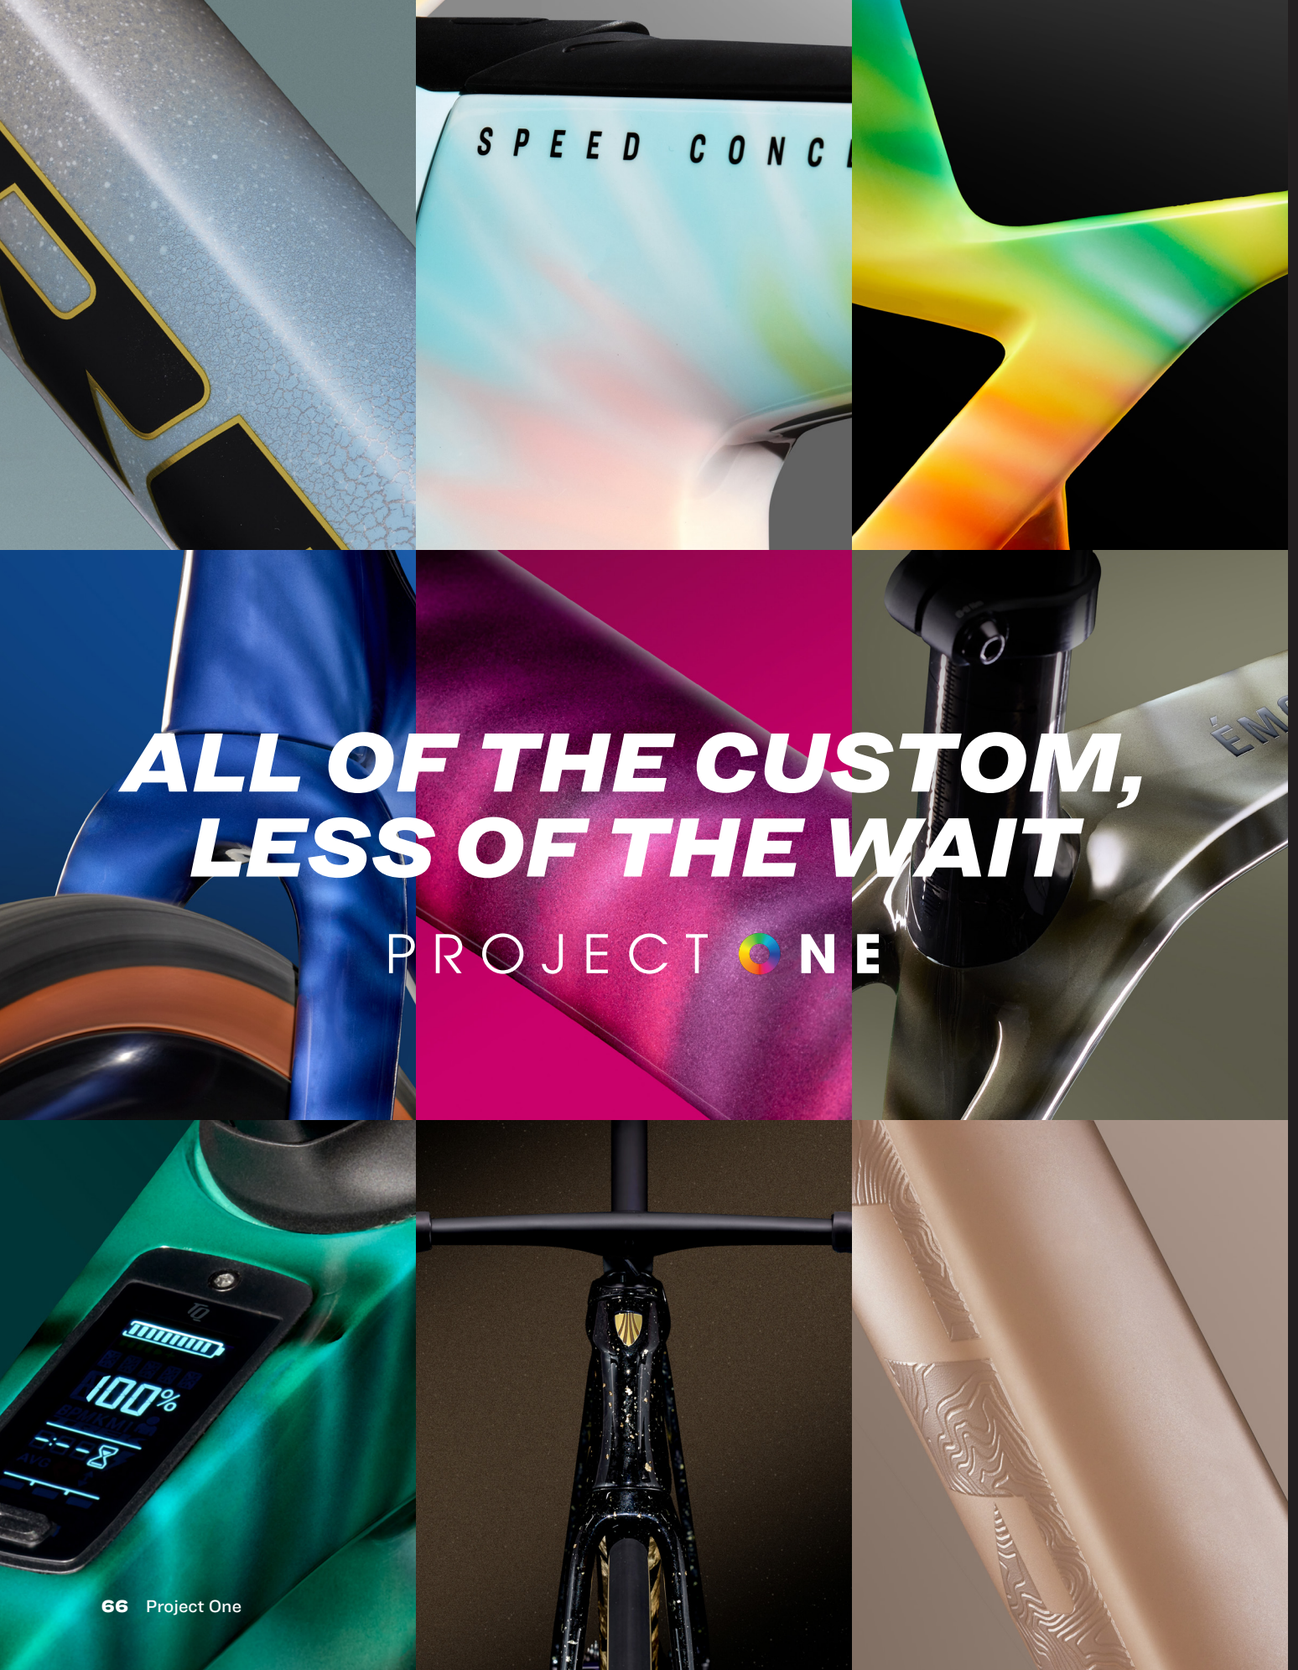

Checkpoint SLR

The top-of-the-line Checkpoint SLR is built for flat-out speed on the longest, gnarliest gravel races. If you're dreaming of podiums at the greatest gravel events, this ride is the way. Our lightest OCLV Carbon gravel frame features a road-smoothing IsoSpeed decoupler — which soaks up fatiguing bumps without bouncing you off your line — and internal frame storage for gravel gear essentials.

Looking for high-performance on gravel without the always-off-the-front mentality? Checkpoint SL is your speed.
