

2009 PRODUCT GUIDE

PROFILE DESIGN bellwether TITEC FuelBelt STAY HYDRATED

Athlete-Tested. World Champion Approved.

How can you be sure we have the best? Ask any of our world-class athletes—including the reigning Ironman™ world champion. They use our stuff—and tell us what they need to win. Then, our R&D team rides technology's edge, bringing the latest innovation to every product.

Whether they're jamming on their pedals in Kona, flying down a mountain in Whistler or crushing that epic local ride, all athletes can trust we've given them the best. We know what drives their passion because it's our passion, too. It's the details. Shape, construction, materials, and a lot of sweat—not to mention a little blood—go into our products. We don't take anything lightly. This is our life.

Flip through the pages. You'll be inspired.

Company History

1972 Bellwether established in San Francisco plant with the goal of creating quality, thoughtfully constructed, affordable cycling apparel.

1984 Bellwether Women's collection launches. Bellwether was the first to dedicate an entire line to the female cyclist.

1988 Profile Design enters triathlon market with the Aero I & II.

1986 Bellwether Mountain Specific Collection of Apparel. With the first Repack races held in Marin County, we were influenced by this new genre of cycling.

1992 Profile Design: Airstryke aerobar released.

1992 Titec founded and first product released, the revolutionary 118Ti bar. Which remains in the line to this day.

1994 Titec: Beserkr "downhill" saddle introduced. Titec embraces the philosophy of performance and quality is more important than minimal weight.

1995 Titec: One of the first MTB Riser Bars brought to market.

1996 Titec: Bart Brentjens wins inaugural Olympic gold medal using Titec components.

1997 Profile Design: worlds first integrated aluminum wing aerobar released, Project X.

1999 Profile Design: worlds first integrated carbon fiber wing aerobar released (Carbon X), worlds first carbon fiber clip-on released (Carbon Stryke).

2000 Titec introduces their first carbon handlebar and the famous HellBent line of all-mountain components.

2001 Profile Design: Sonic Stryke released – first aerobar with integrated armrest.

2004 Bellwether unveils completely revamped men's and women's Cadence Collection. Aimed at cyclists who demand quality technical apparel at a fair price

2004 Profile Design: Carbon Stryke – official Aerobar of the Ironman Triathlon World Championships

2006 Profile Design: Worlds first stem mounted aerobar released (Lightning Stryke).

2006 Titec sponsors Mountain States Cup (Official Gravity Component Sponsor) and Ontario Cup race series. Sponsorship is continued through 2008 and beyond.

2007 Profile Design: Carbon X 1.5. Ridden to victory by Ironman™ world champions in 2007 & 2008.

2008 Bellwether Elite CS competition series line is unveiled. Body hugging and moisture wicking, this enthusiast line of road biking apparel is the most technically advanced garments we've ever produced.

2008 Profile Design enters into the Tri Clothing and Wetsuit markets with full lines of men's and women's triathlon specific wetsuits and apparel

2000-2004, 2006, 2007 Profile Design: Ironman™ World Championship Winner.

2008 Titec sponsors the MS – Intense World Cup Mountain Bike Racing Team.

2009 Profile Design: Volna, CX3/ CX3i carbon wing aerobars enter the market.

PROFILE DESIGN
CARBON X3

PROFILE DESIGN

We introduced ourselves in 1988 with our first Aerobar. Today, athletes around the world clutch our Aerobars, wear our brand and depend upon our components to do more with a slice of time than they ever imagined possible.

You'll find our products at every level of competition. With our innovative carbon fiber Aerobars and our full line of components for both triathlon and road bikes—we keep pushing technical advantages. Our new line of triathlon-specific clothing enhances performance on land and water. From wetsuits and triathlon race suits to running apparel, tri shorts and tops—you'll find what you need to slice through the water and fly down the road.

How do we stay on top? Experience, passion and commitment to our athletes set us apart and keep them winning.

VOLNA™

> Full aero carbon wing with ergonomic brake grip areas
> Full carbon aero ergonomic multiple grip extensions allow for internal shift cable routing
> Length and rotational aero extension adjustment
> Integrated armrest bracket for low positioning
> Includes F22c length, width, and rotationally adjustable anatomic armrests

Clamp: 31.8mm
Width: 42 cm center-to-center
Color: Gloss carbon
Weight: 670g

CX3i

CX3™

> Full carbon wing
> Full carbon aero S Bend extensions allow for internal shift cable routing
> Length and rotational aero extension adjustment
> Integrated armrest bracket for low positioning
> Includes F22c length, width, and rotationally adjustable anatomic armrests

Clamp: 31.8mm
Width: 42 cm center-to-center
Color: Gloss carbon
Weight: 660g

CX3I™

> Full carbon wing with integrated carbon fiber stem
> Full carbon aero S Bend extensions allow for internal shift cable routing
> Length and rotational aero extension adjustment
> Integrated armrest bracket for low positioning
> Includes F22c length, width, and rotationally adjustable anatomic armrests

Clamp: N/A – Fits 1" or 1-1/8" threadless steering columns
Stem: 100mm integrated stem length
Width: 42 cm center-to-center
Color: Gloss carbon
Weight: 690g

CARBON X 1.5™

> Full carbon wing with Integrated forged aluminum stem
> Full carbon aero extensions allow for internal shift cable routing
> Total rotational aero extension adjustment
> 6061-T6 forged aluminum brackets
> Injection molded F-19 length, width, and rotationally adjustable anatomic armrests

Clamp: 1" (with shim) & 1 1/8" steering clamp
Stem: 100mm integrated stem length
Width: 40 cm center-to-center
Color: Gloss carbon
Weight: 840g

AIRSTRYKE S™

> Includes F-19 length, width, and rotationally adjustable anatomic armrests
> 6061-T6 aluminum extension and forged brackets
> Length adjustable, one-piece S Bend extension
> Provided with climbing friendly flip-up ZB brackets
> Compatible with rigid ZB arm brackets & our Swiftshift

Finish: Shot peened and anodized finish for extra strength and durability
Color: Anodized matte black
Weight: 655g

TMAG™

> Forged AZ-80 Magnesium brackets with AZ-80 extensions
> Unique bracket system uses no bolts to clamp extension into bracket
> Includes F-25c Carbon armrests

Color: Matte black
Weight: 350g

SONIC CSX™

> Patented, integrated armrest design with multi-layer, multi-directional carbon fiber construction
> Forged 6061-T6 AL bottom brackets with integrated carbon fiber top brackets
> Low aggressive narrow positioning

Color: Gloss carbon
Length: Sm 225mm, Med 245mm, Lrg 265mm (Measured center to extension tip)
Weight: 328g - Sm, 339g - Med, 352g - Lrg

LIGHTNING STRYKE RACE™

> Multi-direction carbon fiber forked extension with a low profile aggressive S-Bend grip area
> Includes Aerobridge to create a one piece extension
> Bar mounts directly to Profile Design Hammer/ Lava series stems
> Low-profile bracket system
> Multi-directional carbon fiber fork-style extension
> Internal shifter cable routing
> Magnesium top and Aluminum bottom bracket
> Injection molded F-22 ergonomic armrests

Color: Gloss carbon
Bridges: Non-rotational
Weight: 372g

LIGHTNING STRYKE™ WITH FLIP-UP ARM PADS

> Forged, 6061-T6 AL flip-up top bracket Armrests that allows for easy access to the top grip area of bar for climbing
> Bar mounts directly to Profile Design Hammer/ Lava series stems
> Low-profile bracket system
> Multi-directional carbon fiber fork-style extension with flip-up armrests
> Internal shifter cable routing
> Aluminum top and Aluminum bottom bracket
> Injection molded F-22 ergonomic armrests

Color: Gloss carbon
Weight: 425 grams

1 MENS CHAMPION

Chris “Macca” McCormack wins triathlons. He holds world records. He’s stayed at the top of his game for nearly a decade yet Ironman Hawaii remained unresolved. “Hawaii was always an Achilles heal” writes Macca on his blog. After omission from the Australian Olympic team in 2000 Macca chose Ironman Hawaii to prove to himself that he owned his own destiny. Defeated six times Macca returned in 2007 to become the Ironman World Champion. “Victory and defeat are so close to each other, and both are present at any moment of time. I think the greatest winners, or the greatest competitors are people who know defeat. I know I do.”

“When you train as much as I do, you become almost intimate with your aerobars. So you better have gear that you can trust”

– Chris McCormack, Ford Ironman World Champion

LIGHTNING STRYKE™

> The low profile bracket system is lightweight and easy to install
> Great for the rider that needs to quickly remove their aerobar
> Bar mounts directly to Profile Design Hammer/ Lava series stems
> Low-profile bracket system
> Multi-directional carbon fiber fork-style extension
> Internal shifter cable routing
> Magnesium top and Aluminum bottom bracket
> Injection molded F-22 ergonomic armrests

Color: Gloss carbon
Bridges: Non-rotational
Weight: 375 grams

CGT™

> Designed to work well with road geometry bike frames
> Fully adjustable molded carbon fiber ergonomic aero extensions
> Full carbon aero extensions with ergo hand grip
> Lightweight J2 Brackets mount F-22 armrests
> 6061-T6 forged aluminum brackets

Color: Gloss carbon
Clamp: Fits 26.0mm & 31.8mm bars
Weight: 455 grams

CARBON STRYKE™

> F-19 length, width, and rotationally adjustable anatomic armrests
> Full carbon aero extensions allow for internal shift cable routing
> 6061-T6 forged aluminum brackets
> Provided with rigid ZB arm bracket system
> Compatible with flip-up ZB arm bracket system

Color: Gloss carbon
Clamp: Fits 26.0mm & 31.8mm bars
Weight: 445 grams

T2+ COBRA™

> Aggressive, low hand position
> Suitable for time trial, or triathlon
> Multi-directional carbon fiber extensions
> 6061-T6 aluminum forged brackets
> Injection molded F-22 length, width, and rotationally adjustable anatomic armrests
> Equipped with "J2" Brackets™ for a lower arm position

Color: Gloss carbon
Clamp: Fits 26.0mm & 31.8mm bars
Weight: 450 grams

T2+™

> Affordable, lightweight aluminum construction
> Aggressive positioning for time-trial or triathlon
> "S-Bend" extensions
> 6061-T6 aluminum extensions and forged brackets
> Injection molded F-19 length, width, and rotationally adjustable anatomic armrests
> Shot peened and anodized finish
> Dual cable routing hole

Color: Anodized matte black
Clamp: Fits 26.0mm & 31.8mm bars
Weight: 470 grams

T2+ DL™

> Aerobridge is included to make this bar ITU draft legal (with proper installation)
> 6061-T6 aluminum extensions and forged brackets
> Injection molded F-19 length, width, and rotationally adjustable anatomic armrests
> Shot peened and anodized finish

Color: Anodized matte black
Clamp: Fits 26.0mm & 31.8mm bars
Weight: 418 grams

JAMMER GT™

> An excellent choice for road frame geomety bikes.
> 6061-T6 aluminum extensions and forged brackets

Color: Anodized matte black
Clamp: Fits 26.0mm & 31.8mm bars
Weight: 470 grams

AEROLITE™

> Fully adjustable with telescoping extensions
> Adjustable width armrests

Color: Anodized matte black
Clamp: Fits 26.0mm & 31.8mm bars
Weight: 655 grams

SPLIT SECOND™

> Two-piece fully-adjustable clip on style aerobar
> Includes our patented flip-up arm rests

Color: Anodized matte black
Clamp: Fits 26.0mm & 31.8mm bars
Weight: 686 grams

AIRSTRYKE™

> Includes our patented flip-up arm rests

Color: Anodized matte black / Silver
Clamp: Fits 26.0mm & 31.8mm bars
Weight: 655 grams

CENTURY™

> Low armrest bridges and three mount positions

Color: Anodized matte black
Clamp: Fits 26.0mm & 31.8mm bars
Weight: 600 grams

PHOTO: JOHN SEGESTA

COBRA WING™

> Mulit-direction, multi-layer carbon fiber
> Preslotted internal cable routing

Clamp: 31.8mm
Width: 40, 42, 44 cm wide (center to center)
Color: Gloss carbon
Weight: 195-210 grams

T2 WING™

> Center clamping section wide enough to accept any Profile Design clip-on aerobar
> Double-butted 6061-T6 aluminum, wing shaped base bar

Clamp: 31.8mm
Width: 40, 42, 44 cm wide (center to center)
Color: Anodized matte black
Weight: 250-265 grams

AIRWING™ / AIRWING OS™

> The Airwing is available in standard 26.0mm or oversize 31.8mm
> Double butted 6061-T6 aluminum
> The deep drop makes this perfect time trial base bar

Clamp: 26.0 or 31.8mm
Width: 40, 42cm wide (center to center)
Color: Anodized matte black
Weight: 230-250 grams

STOKER 26™

> Allows for the widest mount for a clip-on aerobar

Clamp: 26.0mm
Size: 40, 42, 44, and 47cm wide (center to center)
Color: Anodized matte Black
Weight: 235-250 grams

COBRA WING

QS2™ QUICK STOP 2

> Forged 6061-T6 series aluminum levers
> Adjustable reach
> Forged ergonomic lever & body
> Return spring to relieve friction from aero cable routing
> Internal cable exit

Color: Shot peen, Anodized matte Black
Weight: 188 grams

QSC™ QUICK STOP CARBON

> Carbon fiber and composite construction produces one of the lightest brake levers available
> Ergonomic lever offers multiple surfaces to facilitate braking
> Internal cable exit
> Return spring to relieve friction from aero cable routing

Color: Matte finish body with gloss carbon lever
Weight: 110 grams

COBRA DROP BAR™

> Multi-direction, multi-layer carbon fiber road bar
> Pre-slotted internal cable routing
> 110mm center clamping section wide enough to accept any Profile Design clip-on aerobar
> Ergonomic upper wing section has multiple hand positions contoured into the handlebar
> Cable exit holes for internal brake cable routing

Clamp: 31.8mm
Width: 40, 42, 44 cm wide (center to center)
Drop/Reach: 142mm/82mm
Color: Gloss carbon
Weight: 265 grams

LAVA™/LAVA OS™

> Our top end aluminum road bar
> Made of super strong triple-butted 7075-T6 aluminum featuring an anatomic bend
> Available in 26.0mm or oversize 31.8mm

Clamp: 26.0mm or 31.8mm
Width: 40, 42, 44 cm wide (center to center)
Drop/Reach: 142mm/82mm
Color: Anodized matte black
Weight: 240-258 grams

HAMMER™/HAMMER OS™

> Double-butted 6061-T6 aluminum with an anatomic bend
> Available in 26.0mm or oversize 31.8mm sizes
> Perfect for clip-on aerobars

Clamp: 26.0mm or 31.8mm
Width: 40, 42, 44 cm wide (center to center)
Drop/Reach: 142mm/82mm
Color: Anodized matte black
Weight: 302-325 grams

PHOTO: JOHN SEGESTA

COBRA S™

> Carbon wrapped 3-D forged 7050-T6 Aluminum
> Strong, lightweight and excellent vibration dampening

Length: 80, 90, 100, 110 120mm
Clamp: 31.8mm
Steerer Diameter: 1 1/8" (1" with shim)
Rise: 84°
Color: Gloss carbon
Weight: 130 grams

LAVA™/LAVA OS™

> 3-D forged 7075-T6 aluminum

Length: 70, 80, 90, 100, 110, 120mm
Clamp: 26.0mm or 31.8mm
Steerer Diameter: 1" or 1 1/8"
Rise: 80°
Color: Shot peen, anodized matte black
Weight: 138-166 grams

HAMMER™/HAMMER OS™

> 3-D forged 6061-T6 aluminum

Length: 60, 70, 80, 90, 100, 110, 120mm
Clamp: 26.0mm or 31.8mm
Steerer Diameter: 1" or 1 1/8"
Rise: 80° or 90° (reversible for a 100° rise)
Color: Shot peen, anodized matte black
Weight: 154-190 grams

ARIS™ / ARIS OS™

> 3D forged 6061-T6 aluminum

Length: 70-130mm
Clamp: 26.0mm or 31.8mm
Rear Clamp: 28.6 rear clamp
Rise: 65°, 83°, 97° & 115°
Color: Shot peen, anodized matte black
Weight: 155-175 grams

FFC™ FAST FORWARD CARBON

> Carbon bladed seatpost effectively changes a 73° seat tube angle frame to 78°
> Moves the riding position forward up to 38mm
> Multi-layer, multi-directional carbon fiber weave

Diameter: 27.2mm
Length: 300mm
Offset: 38mm
Head: Forged 6061-T6 AL head
Color: Gloss Carbon
Weight: 210 grams

COBRA ZERO™

> Multi-direction, multi-layer carbon fiber construction

Diameter: 27.2mm & 31.6mm
Length: 330mm
Offset: 0
Head: 2 bolt micro adjust
Color: Gloss Carbon
Weight: 210 grams

TRI BEAM™

> Carbon fiber seatpost with forged 6061-T6 AL head
> Single bolt micro adjustment
> I-Beam technology

Diameter: 27.2
Length: 310mm
Offset: 0
Head: Forged 6061-T6 AL head
Color: Gloss Carbon
Weight: 191 grams

FAST FORWARD™

> Carbon bladed seatpost effectively changes a 73° seat tube angle frame to 78°
> Moves the riding position forward up to 38mm
> Forged 6061-T6 aluminum construction

Diameter: 27.2mm
Length: 265mm
Offset: 38mm
Head: 2 bolt
Color: Anodized matte Black
Weight: 320-325 grams

ELITE TOP / COMP TRI SHORT

PHOTO: JOHN SEGESTA

TRI STRYKE TI SOLID™

> Triathlon specific design
> Extra padding for all day comfort
> Nose and tail designed to fit over transition bike rack

Rails: Titanium
Weight: 295 grams

TRI STRYKE TI™

> Cut-away with vents for comfort and moisture transfer
> Triathlon specific design
> Extra padding for all day comfort
> Nose and tail designed to fit over transition bike rack

Colors: Black/white (pictured) or Black/Black
Rails: Titanium
Weight: 285 grams

TRI STRYKE CROMOLY™

> Cut-away with vents for comfort and moisture transfer
> Triathlon specific design
> Extra padding for all day comfort
> Nose and tail designed to fit over transition bike rack

Colors: Black/white or Black/Black (pictured)
Rails: Cromoly
Weight: 310 grams

TRI STRYKE ELITE™

> Minimalist design with padding strategically placed for triathletes

Rails: Titanium
Weight: 250 grams

TRI BEAM SADDLE™

> SDG I-Beam technology for a light weight high performance saddle
> Compatible with our Tri Beam seatpost
> Injected nylon fiber
> Synthetic leather

Rails: Integrated
Weight: 199 grams

AERODRINK™
> Easy re-fill no splash cap
> Compatible with narrow mounting aerobars or wider systems with our Aerodrink Bracket Parts kit (sold separately)
> 32oz. capacity
> Weight: 171 grams

AQUACELL™
> Dual chamber aerobar mounted drink system
> Main chamber holds 27 oz while secondary chamber holds 17 oz
> Compatible with narrow mounting aerobars or wider systems with our Aerodrink Bracket
> Weight: 310 grams

WATER BOTTLE
> 24oz capacity

T2+ COBRA™ EXTENSIONS
> Pre-drilled for bar-end shifter cable routing
> Multi-layered carbon fiber
> 22.2mm outer diameter
> Ergonomic styling
> Weight: 132 grams / pair

T2+™ EXTENSIONS
> Pre-drilled for bar-end shifter cable routing
> 22.2mm outer diameter
> 6061-T6 aluminum
> Weight: 162 grams / pair

RAZOR BOTTLE SYSTEM
> Gloss carbon Kage with aerodynamically shaped bottle
> Color: White
> Capacity: 20oz
> Combined weight: 134g

F-25C™ ARMREST KIT
> Ergonomic shape
> 15˚ of rotational adjustment
> Recessed, rust resistant bolts
> Pads and mounting hardware included
> Weight: 75g

F-22C™ ARMREST KIT
> Ergonomic shape
> 17˚ of rotational adjustment
> Recessed, rust resistant bolts
> Pads and mounting hardware included
> Carbon fiber construction
> Weight: 79g

F-19™ ARMREST KIT
> Anatomic relief along rear reduces pressure points and aids in comfort
> Injection molded arm rest construction
> 12˚ of rotational adjustment
> Recessed, rust resistant bolts
> Weight: 153 grams

AERODRINK PARTS KIT (not pictured)
> Includes: Both straws, mesh, rubber bands, and Velcro pieces

F-25™ ARMREST KIT
> Ergonomic shape
> 15˚ of rotational adjustment
> Recessed, rust resistant bolts
> Pads and mounting hardware included
> Weight: 85g

F-22™ ARMREST KIT
> Ergonomic shape
> 17˚ of rotational adjustment
> Recessed, rust resistant bolts
> Pads and mounting hardware included
> Weight: 89g

E-PACK™
> Top-tube mounted pack
> Easily accessible from riding position
> Attaches with Velcro straps
> 600D Cordura Nylon and Nylon Mesh
> Padded sides maintain shape
> Water resistant Nylon
> Dimensions:
Large - 150 x 50 x 90mm, 386 cm3
Small - 75 x 40 x 105mm, 220 cm3
> Weight: Large - 30 grams, Small - 15 grams

MULTI-FIT SYSTEM KIT
> Allows early model Profile Design aerobars to work with 26.0mm and 31.8mm handlebars
> Includes F-19™ length, width, and rotationally adjustable anatomic armrests
> Patented flip-up style frees up the "tops" of base bar for ease in climbing
> 6061-T6 forged aluminum construction
> Matte Black
> Weight: 642 grams

T™ BRACKET KIT
> For use with our rotational arm bridge assemblies
> Injected molded nylon/glass fiber
> Creates a lower, tighter arm position
> Standard or riser style kits available
> Matte Black
> Weight: 30-44 grams

UCM™ & UCM XL™
> Simple, twist on construction, NO TOOLS ARE REQUIRED for installation
> Two sizes (25mm & 60mm) are available to fit all applications.
> Weight: 14-22 grams

SWIFT SHIFT™
> Mounts all standard down tube shift levers with a single bolt mounting to Aerobridge, Airstryke or Century
> Shift levers not included
> Weight: 642 grams

CO2 canisters not included

CO2 MOUNTING BRACKETS
> Attaches to any of our rear mounted drink systems or under any bottle cage
> Allows mounting of 2 standard threaded CO2 mounts per bracket
> Weight: 23g

AERODRINK™ BRACKET
> Attaches to bars with Velcro® straps (included)
> Secure Velcro bottle mounting
> Adjusts to 140mm wide
> Weight: 31 grams

ZB™ BRACKET KITS
> Two kits to choose from, one for 26.0mm and one for 31.8mm base bars
> 6061-T6 forged aluminum
> Fixed or flip up styles
> Weight: 65-70 grams

GAP CAP™
> Works with any threadless steerer tube.
> Composite wedges replace star-fangled nut
> Fits 1" or 1-1/8" steer tubes and is available with an aluminum or a Karbon top cap
> Weight: 30-45 grams

F-19 shown

F-19 & F-22 REPLACEMENT PADS
> Medium durometer
> Lycra covering
> Velcro strap style for easy replacement
> Weight: 39-44g

J2™ BRACKET KIT
> Allows for wider armrest mounting on older models of the Jammer GT, CGT, T2+, and T2+ Cobra

VENTURI™ PADS
> Replacement for Century™ Aerobar
> Adhesive backing
> Weight: 39 grams / pair

VENTURI™ VELCRO PADS
> Medium durometer
> Lycra® covering
> Velcro backing
> Weight: 132 grams / pair

CARBON HEAD SPACERS
> 2mm, 3mm, 5mm (packs of 10 each) and 10mm, or 20mm (packs of 5 each)
> Available for 1" or 1-1/8" Steer Tubes
> Weight: 1-10 grams

CARBON X 1.5 KIT
> Allows for the armrests to be installed directly onto the top of the wing of the Carbon X

AEROBRIDGE
> Closes the tips of any Profile Design split aluminum (except Jammer GT or CGT) or old style Carbon X aerobar and allows use of Swiftshift on Split Second
> Weight: 50 grams

THREADLESS CONVERTER
> Converts all quill style forks to use threadless stems
> Weight: 50 grams

KARBON PLUGS
> Simulated black
> Weight: 9 grams

KAGE™
> Nylon/fiberglass non-marking construction
> Colors: Black or White
> Weight: 52 grams

ELITE KARBON KAGE™
> Sculpted design
> Colors: Carbon black w/silver logo
> Weight: 16 grams

STRADA KARBON KAGE™
> Sculpted design
> Colors: Carbon Black w/silver logo
> Weight: 27 grams

KARBONLITE KAGE™
> Sculpted design
> Colors: Carbon Black w/silver logo
> Weight: 29 grams

KARBON KAGE™
> Unique bottle grip prevents bottle launching
> Applicable for all road or trail conditions
> Colors: Carbon Black with Red, Yellow, Blue, Pink or Silver trim
> Weight: 33 grams

STRYKE KAGE™
> Injected molded Nylon/Fiberglass
> Colors: Red, Blue, Yellow, Black
> Weight: 40 grams

RM1™
> 6061-T6 aluminum constructions
> Full angular adjustment allows bottles to be rotated
> Includes 2 lightweight Profile Design Kages
> Compatible with standard 7mm saddle rails
> Includes CO2 mounting brackets
> Colors: Matte black or White
> Weight: 190 grams

BAR WRAP
> Synthetic cork with real cork added
> Non-adhesive backed available in solid, split, & splash colors
> Adhesive backed
> Colors: Black, White, Blue, Red, Yellow solid
> Weight: 55 grams

Hips	31 - 34	35 - 37	37 - 39	39 - 42	42 - 45

We only use technically advanced fabrics in our line of triathlon clothing. Across all three disciplines you can trust our gear to keep you dry, reduce muscle fatigue and keep you ventilated for maximum comfort. We use silicon coated fabric, hydrophobic polyester yarn, lycra prime and polyamide yarn all to give you the most lightweight and comfortable clothing you can buy.

MEN'S ELITE TRI TANK – CLT8117

> Silicon impregnated, heat calenderized Hydro-Force™ fabric
> Micro-Sphere™ hydrophobic non transparent mesh paneling
> Supportive, chlorine resistant Lycra "Prime" yarn
> Locking front zipper with shield reduces possibility of chafing
> Soft Binding on neck and arm opening further reduce hot spots
> Flat stitch construction for improved comfort
> Colors: Navy, Anthracite
> Size S – XXL

MEN'S ELITE TRI TOP – CLT8113

>Silicon impregnated, heat calenderized Hydro-Force fabric
> Micro-Sphere hydrophobic non transparent mesh paneling
> Supportive, chlorine resistant Lycra "Prime" yarn
> Locking front zipper with shield reduces possibility of chafing
> Soft Binding on neck and arm opening further reduces hot spots
> Flat stitch construction for improved comfort
> 2 rear storage pockets
> Colors: Navy, Anthracite
> Size S –XXL

MEN'S ELITE TRI SUIT – CLT8313

> Silicon impregnated, heat calenderized Hydro-Force fabric
> Micro-Sphere hydrophobic non transparent mesh paneling
> Supportive, chlorine resistant Lycra "Prime" yarn
> 3XDry® quick drying "tri chamois"
> Locking front zipper with shield reduces possibility of chafing
> Soft Binding on neck and arm opening further reduce hot spots
> Flat stitch construction for improved comfort
> Silicon leg grippers keep short from "riding up"
> 2 rear stash pockets
> Colors: Navy, Anthracite
> Size S – XXL

MEN'S ELITE TRI SHORT – CLT8217

> Silicon impregnated, heat calenderized Hydro-Force fabric
> Micro-Sphere hydrophobic non transparent mesh paneling
> Supportive, chlorine resistant Lycra "Prime" yarn
> 3XDry quick drying "tri chamois"
> Flat stitch construction for improved comfort
> Silicon leg grippers keep short from "riding up"
> Colors: Navy, Anthracite
> Size S – XXL

MEN'S ELITE TRI JERSEY – CLT8119

> So versatile it can be worn on race day or as a favorite training piece
> State-of-the-art Vapor Dri™ fabric and Micro-Sphere panels
> Vapor Dri main body fabric
> Longer cut and high collar for increased coverage
> Soft Binding on arm opening to reduce hot spots
> Locking front zipper with internal shield reduces potential chaffing
> Flat stitch construction for improved comfort
> 3 large rear storage pockets
> Colors: Steel Blue, Red
> Size S – XXL

MEN'S COMP TRI TANK – CLT8115

> Optimum support, moisture transfer and range of motion
> Seamless front panel design
> Hypersonic coated main body fabric
> Acti-vent™ mesh paneling increases air-flow
> Supportive, Polyamide and Spandex® yarns
> Flat stitch construction for improved comfort
> 2 rear stash pocket
> Colors: Black, White, Cardinal, Cobalt
> Size S – XXL

MEN'S COMP TRI TOP – CLT8111

> Hypersonic coated main body fabric
> Acti-vent mesh paneling increases air-flow
> Supportive, Polyamide and Spandex yarns
> Longer, wider design improves coverage from the sun
> Locking front zipper with shield reduces possibility of chaffing
> Flat stitch construction for improved comfort
> 2 side stash packets
> Colors: Black, White, Cardinal, Cobalt
> Size S – XXL

MEN'S COMP TRI SUIT – CLT8311

> 1-piece construction for both long and short distance events
> Hypersonic coated main body fabric

WETSUIT IN PHOTO IS 2008 MODEL. 2009 WOMEN'S BIONIK HAS NO RED GRAPHICS.

Wetsuits: We have partnered with Aquaman Wetsuits to bring you the most innovative wetsuits and neoprene accessories

GOLD CELL

The Gold Cell features the latest neoprene from Yamamoto called GIGA #40 with SCS incorporated on the body and the ultra flexible textile on the shoulders and arms. By using GIGA #40 on the inside and outside of the body of the suit it is more flexible, supple, and comfortable to swim with.

> Almost zero water allowed to enter suit
> Reverse zipper design for faster opening and prevents accidental opening in the water
> Shorter cut on arms and legs for fast suit removal
> Flexible zipper design contours to the shape of athletes back during swim
> Ultra flexible textile in the shoulders and armpits with multi-directional stretch
> 7mm high neoprene collar eliminates chafing
> Grooved propeller panel on arms and legs
> 3 mm neoprene behind the knees for increased flexibility to assist with running
> SCS (Super Composite Skin) gives the wetsuit a very slick outer surface
> Size: Men's XS - XXXL, Women's XS - XXL

MAKO SPEED SUIT

New for 2009 is the Mako Speedsuit. Ideal for non-wetsuit swims wherever races allow it. Designed to be used only during the swim, with racing apparel under the Mako. Remove the Mako in T1. Similar to a wetsuit it's snug to put on but extremely fast to remove. The Mako should fit very snug. For specific sizing see the unisex wetsuit chart. If you feel that you are between two sizes, please select a size smaller.

> Specific for swimming
> Made of 100% 0.3 SCS fabric Grey from Yamamoto
> The entire suit is made with the SCS Fabric with no textile is use on the outside of the suit
> Zipper and seems flat-locked stitched
> Color: Grey
> Size: Unisex XS to XXL

SWIM CAP

> Stretchy rubber swim cap

NEOPRENE CAP

> 3 mm stretchy neoprene
> Thin profile chin uses no velcro
> No chafing or breathing obstruction

WETSUIT CARE PRODUCT KIT

Extends the life of your wetsuit. Kit contains:

> Wetsuit Shampoo
> Suit Juice lubricant
> Neoprene repair cement
> Products are available individually too
> Wetsuit shampoo available in case of 6

Men's model shown. Women's has no red color in graphics.

BIONIK II™

Made with Yamamoto # 39 on the body and GIGA # 40 on the shoulders and neck for extra flexibility. The neoprene is also treated with SCS all over the suit on the outside.

> Reverse zipper design for fast opening and prevents accidental opening in the water
> Shorter cut on arms and legs allows for faster removal of wetsuit
> Flexible zipper design contours to the shape of athletes back during swim
> Ultra flexible textile in the shoulders and armpits with multi-directional stretch
> 7mm high neoprene collar eliminates chafing
> Grooved propeller panel on arms and legs
> 3 mm neoprene behind the knees for increased flexibility to assist with running
> SCS (Super Composite Skin) gives the wetsuit a very slick outer surface
> Size: Men's XS - XXXL, Women's XS - XXL

BIONIK™ SLEEVELESS

Made of the Yamamoto # 39 treated with SCS on the body and not on the legs. Same shoulders and thickness as the Gold Cell and Bionik.

> SCS (super composite skin) Coating throughout
> Friction Free Collar
> Flexible Zipper Design
> Great for shorter distances & warm Water temperatures
> Size: Unisex XS-XXXL

BLITZ™

Made of the Yamamoto # 39 treated with SCS on the body and not on the legs. Same shoulders and thickness as the Gold Cell and Bionik.

> SCS (super composite skin) coating neoprene treatment on the arms and torso and upper legs
> Multi-neoprene construction laminated textile in the wetsuit body
> Reverse zipper design for fast opening and prevents accidental opening in the water
> Friction Free Collar-all neoprene inside of the collar to prevent chafing
> Arm Propeller – more power in the pull phase of the swim stroke
> Ergo Shoulder – one piece shoulder
> Size: Unisex sizing XS-XXXL

PHOTO: FUELBELT

"Success at Ironman racing is largely dependant upon nutrition. That is why in my debut at the Ironman world Championships in Kona, I chose Fuel Belt to help me implement my nutrition plan."

– Craig Alexander

Profile Design and FuelBelt have teamed up to bring you the most innovative hydration belts and accessories for the bike and triathlon markets. Proven designs provide athletes with the most comfortable and functional ways to transport necessary gear, nutrition and essentials.

Helium: the fastest selling and most comfortable hydration belt in the world

BREATHABLE
New Helium 3-D Ventilated Foam Pads provide highest levels of breathability keeping runners cool during training and racing. Elastic webbing has been greatly reduced, but still retains overall comfort of original Fuel Belts.

ERGONOMIC
Ergonomically positioned Helium 3-D Ventilated Foam Pads enhance comfort and reduce heat build up. Velcro closure is narrower and conforms to the body's natural shape.

LIGHTWEIGHT
Bottle holster is lightweight, functional and provides easy in and out bottle access. Detachable race pocket is lightweight and keeps items dry and within reach.

COLORFUL
Wide ranging color ways on interior and exterior of Helium 3-D Ventilated Foam Pads. 3M Reflective piping provides highest level of visibility making you visible to oncoming headlights.

FuelBelt Size Guide:

Small:	27 - 29
Medium:	30 - 32
Large:	33 - 35
X-Large:	36 - 38

HELIUM 4
> Four 8-ox bottle
> 32 oz capacity
> Colors: Black, Blue, Red
> Sizes: Small – XL

HELIUM 2
> Two 8-ox bottle
> 16 oz capacity

GATORADE ENDURANCE FORMULA

What you get out of your race depends on what you put into your training.

Experienced racers know: You've got to train with what's on the course. In most cases, that's Gatorade® Endurance Formula. With 200mg. Sodium per 8oz. serving, twice the amount found in Gatorade Thirst Quencher, Gatorade Endurance Formula was specifically designed to optimize hydration by encouraging drinking and superior fluid retention. If you race with it, train with it. Because it works.

Available Exclusively for Cycling and Multi-Sports Retailers through Profile Design!

Container
50.2 oz instant mix container (makes 88 eight-ounce servings)
Flavor: Lemon-Lime
Six Canisters per case

Packets
32 oz instant mix packets
Flavor: Lemon-Lime
144 packets per case

Nutritional Information:
Gatorade Endurance Formula contains a specialized five-electrolyte blend, including nearly twice the sodium (200 mg) of Gatorade Thirst Quencher, as well as chloride, potassium, calcium and magnesium, to more fully replace what endurance athletes lose in sweat when fluid and electrolyte losses become significant. Like Gatorade Thirst Quencher, Gatorade Endurance Formula contains a scientifically balanced 6% carbohydrate blend (14 grams/8 oz) that helps speed fluid absorption in the body and fuels working muscles.

BRIDGE ADJUSTABILITY:
Rotational - 360° Non Flip-up style

bertschi

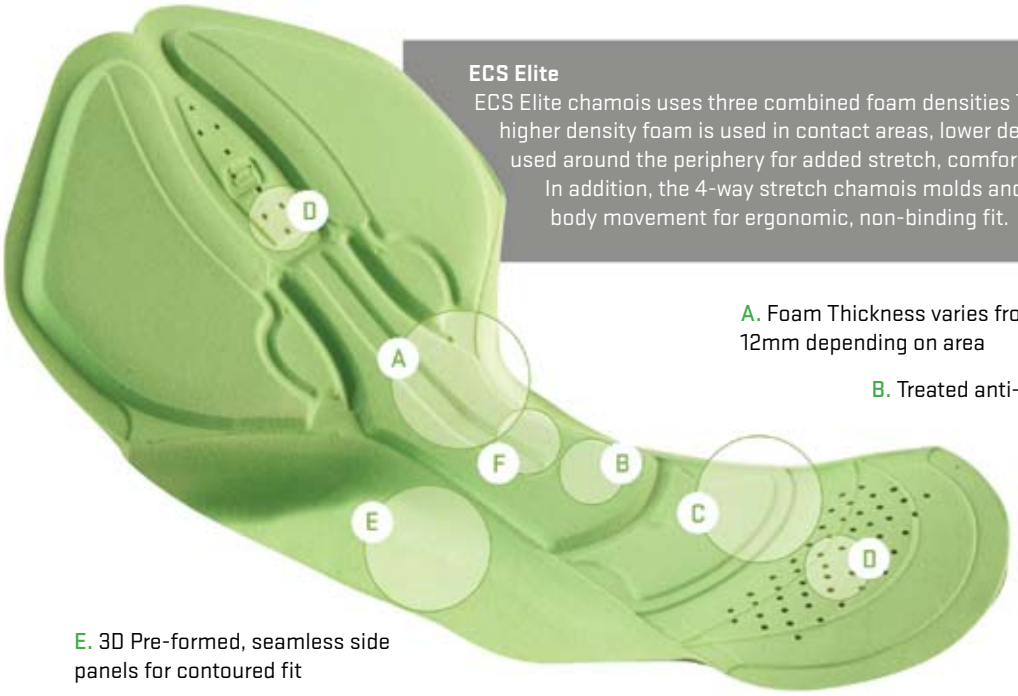

We expect our athletes to ride hard. They pump their own tires. Pack their own energy. Plan their own ride. Essentials make the difference. What they eat. What they wear.

Our clothing wicks moisture from within. They keep the rain out, breath and repel a headwind at the same time. They support muscles and improve endurance. Quality and performance matter to our athletes and our clothing reflects that. Moisture management, warmth, comfort and durability is designed into every item.

For over 30 years our mission remains the same – develop high performance, affordable, technical apparel.

Technical Chamois

One of the easiest things you can do to improve cycling comfort is using a good pair of bicycling shorts. That is why all Bellwether cycling shorts utilize high-tech chamois with impressive features such as an anatomic fit, and moisture-wicking fabrics. Our shorts are a indispensable part of a cyclist's wardrobe.

ECS Elite

ECS Elite chamois uses three combined foam densities Thicker and higher density foam is used in contact areas, lower density foams are used around the periphery for added stretch, comfort and protection. In addition, the 4-way stretch chamois molds and stretches with body movement for ergonomic, non-binding fit.

A. Foam Thickness varies from 1mm to 12mm depending on area

B. Treated anti-microbial face fabric

C. Welded lamination process provides seam free, flat top surface

D. Vented front and tail portions for ventilation and temperature regulation

E. 3D Pre-formed, seamless side panels for contoured fit

F. Lower center relief zone for increased circulation

Features	ECS ELITE	MLP II	MVT ELITE	MVT
4-Way Stretch	X	X	X	X
Anti-Microbial Treatment	X	X	X	X
Multi-Tiered Padding	X	X	X	X
3D Seamless Design	X	X		
One-Piece Seamless Design			X	X
Perforated Foam	X	X	X	
Center Relief Channel	X	X		

MLP II

Our MLP II chamois incorporates a 3D welded design with 4-way stretch. Perforated foam is contoured in a one piece design for improved comfort breathability. The result eliminates friction and pressure points while allowing the chamois to move with the rider.

MVT ELITE

The MVT Elite combines welded channels in a 4-way stretch, one-piece seamless construction, which allow chamois to contour to the body. Perforated foam keeps the rider comfortable and dry.

MVT

Our MVT is loaded with features not normally found at this price range. A welded, seamless one-piece design and 4-way stretch chamois ensure rider comfort and maximum performance.

Bellwether Comfort Control System

Clothing physiology is the interaction between the layers of clothing and the body's own micro climate. Air temperature, humidity, skin temperature, rate of perspiration, and other factors all effect clothing performance. Technical fabrics and products only work well if they allow the body to achieve equilibrium between the input and output of heat and moisture.

With the Bellwether Comfort Control System, the correct balance of breathability and moisture transfer is achieved. The properties of each fabric are chosen to support the thermoregulation of the human body to insure maximum performance and optimal comfort.

At Bellwether we understand the functional design of our products. Using our Comfort Control System as a guide, we can ensure that each item is designed to excel for its intended purpose.

LYCRA POWER®

We are always looking for ways to improve athletic performance. For that reason, we have incorporated Lycra Power as a component of our Aenergia™ fabric. Used in our high-end shorts and bibs, Lycra Power has more stretch and recovery than regular Lycra, which provides muscle compression. This reduces oscillation of muscles, lowers muscles fatigue, heightens body awareness and sharpens muscle response. All of which have been proven through scientific study to extend muscular endurance and efficiency of movement.

Facts about Lycra Power

- Our shorts and bibs with Lycra Power contain a minimum of 20 percent Lycra, providing optimum stretch and recovery with minimum weight
- Properly designed garments completely cover the thigh, from the hip to just above the knee, providing firm yet gentle muscle compression
- Lycra Power garments fit the body like a second skin, assuring comfort and improving the athlete's ability to sense body movements – essential in sports that require great precision of movement.

Test Results of Athletes garments designed with Lycra Power

- Studies at the Centre for Sports Medicine at Pennsylvania State University demonstrated that athletes wearing Lycra Power garments achieved an average of 12 percent improvement in performance levels
- Tests conducted at the ETH Laboratory for Biomechanics in Zurich showed that keeping the muscles at an optimum temperature with Lycra Power improves performance and delays exhaustion. Both performance and endurance benefit from a reduction in the amount of energy required to cool the body core. Further tests prove that the muscle compression provided by Lycra Power garments can improve accuracy of movement up to 73 percent.

Lycra Power is a INVISTA trademark licensed to garment manufacturers for use on athletic apparel that meets INVISTA certification standards for performance.

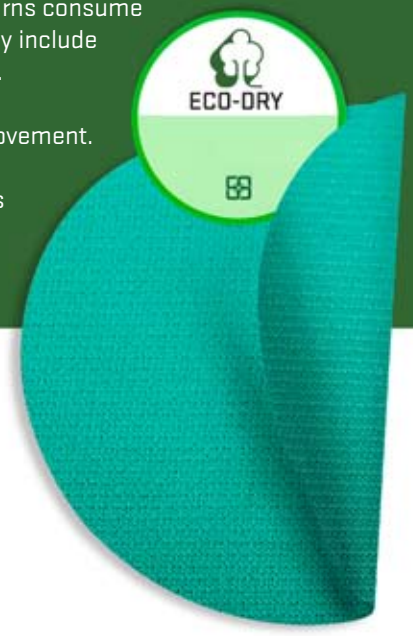

ECO-DRY

Go Green!

Bellwether believes it is our social responsibility to lessen our impact on the environment as much as possible. That is the reason we've developed Eco-Dry fabric for our new product line.

Eco-Dry™ fabric is made out of polyester yarns, which in turn, are made of recycled plastic bottle flakes (called PET). Research has shown that over 90% of a single PET bottle can be recycled to polyester yarns. In addition, during the process of production, PET recycled yarns consume less energy than normal polyester yarns do. As a result, advantages of Eco-Dry include energy savings, less water waste, less air pollution and reduced landfill space.

Eco-Dry fabric is developed as a meaningful approach to environmental improvement. Even better, it is highly breathable, moisture wicking and quick to dry. All of which make Eco-Dry the perfect choice for our new Alterra collection of men's and women's mountain bike jerseys.

- Soft, micropoly yarns pull moisture away from skin and spread it over a larger surface to speed evaporation
- Open knit construction facilitates airflow
- Enhanced mechanical stretch provides for an unrestrictive fit

PET bottle recycling process

Eco-Dry fabric is approved by the EPA (Environment Protection Administration, Executive Yaun, Taiwan, R.O.C).and meet Okeo-tex certification standards.

Technical Fabrics for Top Performance

Bellwether clothing ensures your body can perform at its peak. Our Comfort Control System optimizes temperature regulation while you ride. Lycra Power supports muscles, delaying fatigue and extending your endurance. Together they create a second skin that keeps your focus on where you're going not what you're wearing.

AENERGIA – Warp-knitted fabric with microstructure horizontal effect. 26% Lycra (Lycra-Power certified™). Honeycomb knitting construction. This fabric gives maximum comfort because when worn, each single cell opens and closes letting air in and moisture out. Highly abrasion-resistant.

XFACTOR – The most technical mesh fabric we use has Mircopoly yarns which spread water droplets over a larger surface area to allow for quick evaporation, while open knit design maintains significant airflow also accelerating the drying process.

XFORMA – The most advanced and technical fabric in our arsenal. X-Forma uses a lower denier (high filament) yarn on the outside to draw moisture through from the higher denier (low filament) yarn on the inside. In addition the inside yarn transports water through its capillary action. This dual combination multiplies the moisture management performance keeping you comfortable and dry.

PS3000 – Powerful, Stretchable PS3000 is a nylon/Lycra blended fabric designed to support muscles during exercise, helping to decrease fatigue while maximizing muscle efficiency.

AEROTEX – Advanced dimpled construction increases fabrics ability to transfer moisture, while also holding aerodynamic properties by minimizing wind drag. Supportive Aerotex fabric provides muscle support through compression.

QUADRA TECH – Unique box like construction increases the outer surface area of the fabric which improves transfer of perspiration away from the skin for speedy evaporation, while small channels promote ventilation for proper temperature modulation.

Collections

ELITE CS

Inspired by competitive cycling, our premium line is road-race ready apparel. Comprised of highly stretchable, moisture wicking and muscle supporting fabrics. A second skin fit and aggressive styling ensure you will look great during high-output performance.

- Full stretch fabrics to minimize wind resistance and maximize freedom of movement
- Details such as flat seam construction and externally sewn zippers
- Technical fabric sets maintain core body temperature

CADENCE

Steady and strong, you can count on the Cadence line for superb technical performance. Moisture managing material and technical features are standard equipment for these garments.

- Proven fabric sets optimize breathability and moisture transfer
- Essential details like seam placement, locking zippers, and reflective accents
- Multi-panel construction for a precise fit

ALTERRA

Built to take serious off-road abuse and keep coming back for more. The Alterra collection appeals to mountain bikers who seek durable materials with subtle styling and high breathability.

- Cuts looser fitting for off-road use with casual styling
- Functional details such as longer cut back panels and mesh inserts
- Technical fabrics and crash resistant durability

Three fit options to choose from allow you to select apparel based on the type of riding you do.

Competition Fit
Second-skin fit reduces wind drag and supports muscles

Club Fit
Club Fit is comfortable and stylish for club and training rides

Relaxed Fit
Cut loose for off-road, commuting and casual style

Bellwether Size Guide:

The Bellwether fit system is designed to ensure the rider with the optimal performance fit.

Fabric

The fabrics in Bellwether's superior moisture management system are designed to work together and keep you cooler, dryer, and more comfortable. We design garments with fabric that accelerates the evaporating process by pulling moisture from the wearer's skin, and onto the fabrics outer surface for quick evaporation. By using only fabrics that we've tested and trust, we are able to guarantee the performance and durability of our garments.

AENERGIA™ — Warp-knitted fabric with a" honeycomb" extensible (stretchable) knitting construction **Lycra-Power certified**. Superb muscle support during exercise.

aerotex — Advanced dimpled construction increases fabrics ability to transfer moisture for super quick evaporation while also holding aerodynamic properties by minimizing wind pressure drag. Supportive Aero-tex fabric provides excellent muscle support reducing fatigue and decreasing recovery time by eliminating muscle vibrations during hard exercise output.

AQUA NO™ STRETCH — Completely wind and waterproof, breathable, with 4-way stretchable outer layer keeps you dry, and allows unlimited range of motion.

COOLMAX® — Coolmax's proprietary four-channel fibers move moisture quickly away from the skin to the fabrics outer layer where it can be evaporated quickly and efficiently. Coolmax is proven to reduce skin temperature and heart rate during exercise.

CORDURA® — A high performance fabric resistant to abrasions, tears and scuffs, while maintaining excellent stretch and recovery properties.

Exo-Grid™ STRETCH — Lightweight and durable 4-way elastic micropoly construction is extremely wind and water resistant while maintaining breathability and moisture transfer.

FIELDSENSOR — Fieldsensor is a unique multilayered fabric which efficiently transports perspiration outward through capillary action, keeping the wearer dry and comfortable under hard exercise output.

GAMEX® — Gamex is a lightweight, naturally elastic micro-fine polyester filament yarn which provides wind and rain protection for active athletes while maintaining outstanding breathability.

LYCRA POWER™ — Designed to fit muscle shapes and to provide maximum support to muscular fibre. Provides muscle stability during exercise.

Hyper DWR — Hydrophobic, durable fabric with its unique DWR (Durable Water Resistant) finish repels water upon contact while maintaining excellent breathability, transferring perspiration to the outer layers for quick evaporation. Rugged while still maintaining a soft feel for all-day comfort.

microdry™ — Brushed Micropoly construction transfers moisture away from your skin keeping you dry and comfortable.

microloft™ — Unique raised rectangular construction circulates pockets of warm trapped air between your skin and fabric while micro denier fibers speed moisture evaporation.

microelite™ — Tightly knitted, and highly stretchable micropoly construction provides insulative and thermal properties to keep your core body temperature at the perfect level during hard exertion on those cooler days.

Quadra-tech™ — Unique box-like construction increases the outer surface area of the fabric which improves transfer of perspiration away from the skin for speedy evaporation, while small channels promote ventilation for proper temperature modulation.

TechTEX™ — Lightweight durable stretch mesh used in outerwear, to provide excellent breathability, and moisture transfer.

Pittards® WORLD CLASS LEATHER — A proprietary tanning process is used to produce extremely soft, water repellent, and breathable leather. Pittards leather provides excellent grip, and abrasion resistance.

SPIN-TECH™ — Powerful, Stretchable PS3000 is a nylon/Lycra blended fabric designed to support muscles during exercise, helping to decrease fatigue while maximizing muscle efficiency.

PS3000 — Unique spun micro fibers create loft which quickly absorbs moisture and transfers it away from the skin to the exterior layers of the fabric for quick evaporation.

Tectra lite — Technical, quick-drying hydrophobic micropoly yarns speed up the evaporating process by drawing moisture away from the skin and onto the fabrics outer layers. Brushed inner-surface is extremely soft.

THERMO DRY™ — Sanded nylon/lycra construction provides luxurious comfort and thermal properties while maintaining great muscle support and moisture management.

THERMAL TECH™ — Brushed heavyweight Thermal-tech fabric maintains incredible warmth as well as breathability for the best in winter-weight apparel performance.

Thermaldress™ — Thermaldress fabrics unique construction traps body heat within the soft brushed inner surface of the fabric while transferring out moisture for quick evaporation.

Thinsulate 3M® — The original "warmth without bulk" offering tremendous warmth in a lightweight design. Thinsulate provides over 12 times the warmth of down and nearly twice that of synthetics when equal thicknesses are compared.

Titan PS — Silky smooth Titan PS is a powerful, stretchable nylon/Lycra blended fabric which is engineered to support muscles through compression which can significantly reduce fatigue and decrease recovery time by eliminating muscle vibrations during hard exercise.

VERTEX™ — Technical soft shell laminate provides a stretchable outer shell which is completely wind, waterproof and breathable, then bonded to an inner fleeced material for additional warmth and comfort.

WindTech™ — Windproof and water resistant breathable membrane which is extremely soft, stretchable and lightweight. Material provides reflective properties to enhance rider visibility.

Xforma — Lower denier yarn on the outside draws moisture through from the higher denier yarn on the inside. In addition the inside yarn transports water through its capillary action. This combination multiplies the moisture management performance keeping you comfortable and dry.

Xfactor — Mircopoly yarns spread water droplets over a larger surface area to allow for quick evaporation. Open-knit design maintains significant airflow also accelerating the drying process.

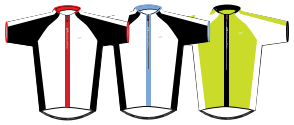

ZenithXT™ — Waterproof, breathable fabric. Zenith XT is a unique 2-layer design that does not need a liner. Inner surface treatment allows the breathable innovative fabric to have a smooth dry touch, while keeping excess bulk to a minimum.

TITEC
EL

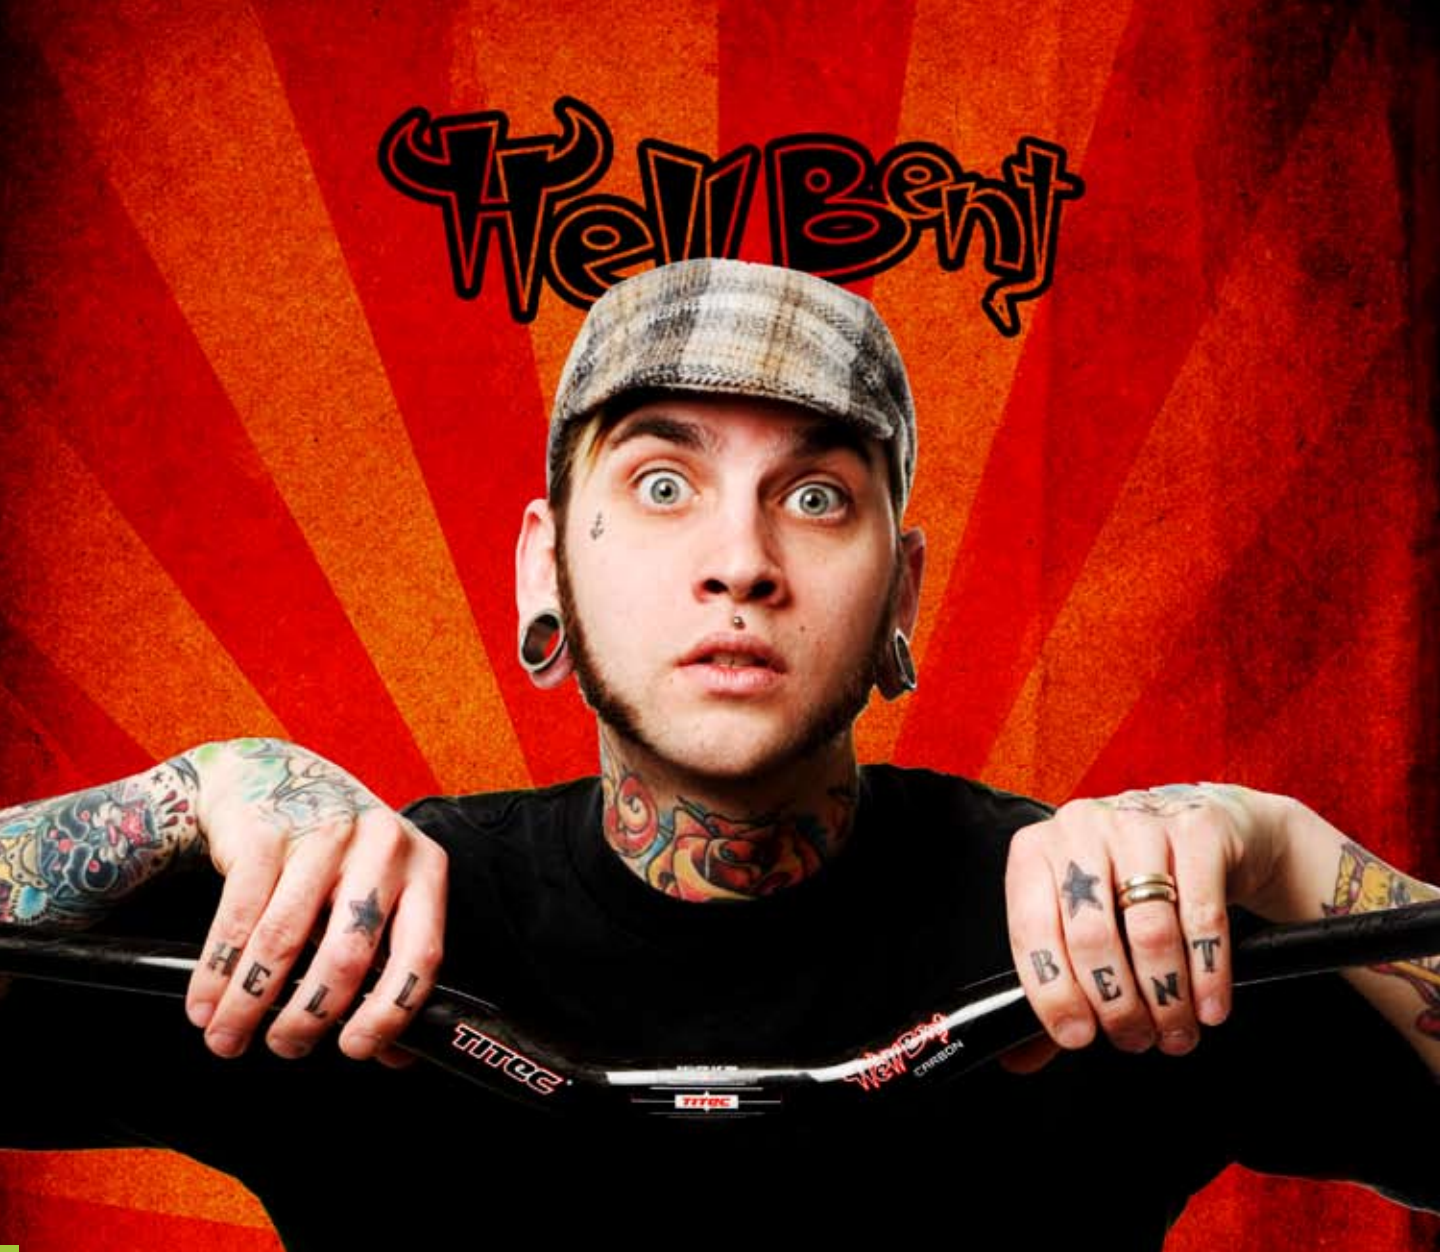

You'll find us where the rider meets the bike. We focus on control components exclusively. We know that small details such as shape, construction and materials make a big difference when you're hurtling down a trail. So we test our components in the real world– guaranteeing performance and durability.

In 1987 we introduced the revolutionary 118 Ti™ bar, and a few years later, brought one of the first riser bars to market. Today, we've pushed the limits of carbon technology with our innovative Pluto line.

To make the best parts we rely on our experience, constant R&D and a commitment to crafting parts that will endure both trail and time.

Titec – The Best Part of any Bike™

"I own 13 bikes, 2 skateboards and half a car. So, yeah my bikes run my life. I sleep on the floor while they stay warm and cozy on the couch! With such a big bike family, I choose components I know will work well and last a long time."

– Tanner Moffit, QBP Quality Control Tech

4 groups for every riding style

All of our products are built to last and technically sophisticated, but what makes us really proud is how well they work in the real world. Titec is pleased to present four groups to satisfy the demands of mountain bikers, from North Shore freeriders to leg-shaving racers: El Norte, HellBent, HellCat and Pluto. Each group offers a full line of parts in a wide range of materials, and new Carbon, ProLite, Expert and Comp levels mean there's a part for every budget. From high-tech carbon fiber to the most durable freeride parts around, our new line has something for everyone. Because at Titec we know you ride for your own reasons, and now your parts can be as individual as your style.

El Norte

Downhill/Freeride

You live for shuttle runs, race day and hard-core stunts like ladders, teeter-totters and big drops. You're the first to the bottom and demand the stiffest and most durable parts available.

HellBent

Epic XC/All Mountain

When your buddy heads to the races, where do you go for the weekend? Whether it is a trip to Moab or a favorite ride closer to home, you need parts light enough for the haul up and sturdy enough for the epic descent.

HellCat

Women's Mountain

Designed to fit a women's anatomy. Everything you would expect from Titec products—no compromise on performance.

pluto

XC Race/Marathon

You demand the best and lightest parts. Carbon Fiber. Titanium. Anything to shed pounds and put you in the lead. So whether you're building up your dream bike, entering your first 24-hour race or competing in the World Cup, Titec Pluto components will get you there faster.

Product rating system

Each Titec group offers a full line of control components in a wide range of sizes and materials. The new Carbon, ProLite, Expert and Comp levels mean there's a part for every budget.

Ca

Carbon

Optimal strength to weight ratio. We Build our carbon products to withstand real world mountain bike abuse. Features such as high compression carbon fiber and aluminum reinforcement where its needed.

PL

ProLite

Our best alloy products. Designed to be good enough for professionals. Construction techniques such as tapered walls, double butted and 3D forging make the Prolite group of products worthy of their name. All have the legendary Titec performance and durability.

E

Expert

Top designs and manufacturing process. Slightly less expensive materials offer the same performance at less cost.

Co

Comp

Same great designs means full performance at a great value.

Hellbent Handlebar Materials

Small details such as shape, construction and materials can make a big difference when hurtling down a trail or grinding up a lung buster. That is why we design our products to excel in specific types of riding situations. Take our handlebars for example. Three material options, lots of sizes, and unique designs to choose from. With Titec, you can be sure to find the right part for your bike.

Carbon
High-compression, multi-directional carbon weave.
Reinforced anti-crush zones at clamp and bar ends

Aluminum Alloy
Tapered and butted for optimal strength to weight ratio
Shot peened and anodized finish increases fatigue strength and durability

Titanium
Incredibly lightweight. Butted aerospace grade titanium.

FLAT TRACKER

> 6061-T6 Drawn & butted tapered tubing

Width: 700mm
Clamp: 31.8mm
Rise: 0mm
Sweep: 11° back sweep
Color: Shot peen, anodized matte black
Weight: 375 grams

new

Designed by **Jeff Jones**, these unconventional looking bars can provide better handling and more comfort than traditional bars. The shape of the bar brings your hands closer to your sides for more climbing power and side-to-side control. Unique shape allows for a variety of hand positions.

H-BAR

> 6061-T6 Aluminum Drawn & butted tapered welded tubing

Width: 660mm
Clamp: 2534mm
Rise: 1.5"
Sweep: 45° sweep on outside grip extensions

Our R&D comes from the source. Sponsoring an elite world cup team like MS Intense Racing gives Titec the real world testing that pushes product development to the extreme. These racers test our bike components around the world in every condition. Every race their knobbies meet dirt requires 100% from each team member and their bike. We work hard to give them dependable, lightweight parts for every bike. We know when you're taking on the best in the world your equipment must reign supreme.

TITEC®
The Best PART of Any Bike™

PLUTO CARBON

Knock-Rated™ guarantee

Look for products with Titec's exclusive Knock-Rated guarantee. These parts are covered against riding damage for Two years from the original purchase date. Jumping, crashing, hucking, you name it. You ride it. If you break it, Titec will replace it for free. Simple as that. Want to know if your part is covered? Look for the Knock-Rated icon on your Titec components.

The fine print: Void where prohibited. Any Titec warranty is made void by modification of the part in any way, or by improper installation or application. If you have any questions about proper usage, consult an authorized Titec dealer, call us @ 1-888-800-5999 or email us at warranty@titec.com.

Mike Hopkins

PEEL-N-STICK

PLACE ON PICTURES OF LARGE OBJECTS.

LIKE BUILDINGS.

MIKE HOPKINS COLLECTOR CARD

NO. 27

There's more than one way down the mountain for Mike Hopkins. He's made his name in the extreme community both skiing and biking. He's the Canadian male Extreme skiing Champion.

He packs intensity into every challenge in front of him. Year round you'll find him riding hills or, well, anything at all on a bike. "Walking is overrated," according to Mike.

"I have repeatedly pushed and punished their components, and I have never had a problem. Personally I am more worried about breaking myself, then the product, it's ridiculously tough"

TITEC 99

HELLBENT DUKE PROLITE

> 7075-T6 Aluminum
> Seamless straight gauge alloy

Diameter: 27.2/30.9/31.6mm

WARRANTY

BELLWETHER

Customer service
Bellwether customer service is here to help you. Office hours are Monday through Friday, 8 a.m. to 5 p.m. PST. Our staff of cyclists know every detail of the product line, what garments work best in real world conditions and size related specifics. We are here to answer your questions regarding fit and construction and will gladly assist with your order.

Returns
We want you to be 100% satisfied with your Bellwether experience. If your products do not meet your expectations, you may return them for up to 30 days.

Warranty
We build Bellwether clothing to last. All Bellwether products are fully warranted to the original owner against manufacturers defects in materials and workmanship. If a product fails due to a manufacturing defect, we will repair it without charge, or replace it at our option. Repairs due to accidents, negligence, or improper care—where we are not at fault—will be performed or garment replaced at a reasonable charge. Garments returned for warranty inspection must be clean. For warranty repair issues, please contact customer service at 888-800-5999 ext. 161.

TITEC

Knock-Rated guarantee
Look for products with Titec's exclusive Knock-Rated guarantee. These parts are covered against riding damage for 2 years from the original purchase date. Jumping, crashing, hucking, you name it. You ride it. If you break it, Titec will replace it for free. Simple as that. Want to know if your part is covered? Look for the Knock-Rated icon on your Titec components.

The fine print: Void where prohibited. Any Titec warranty is made void by modification of the part in any way, or by improper installation or application. If you have any questions about proper usage, consult an authorized Titec dealer, call us at 1-888-800-5999 or email us at warranty@titec.com.

Warranty Policy (We stand behind what we sell)
Titec warrants all their component parts against defects in materials and workmanship for the life of the original owner.

PROFILE DESIGN

Customer service
Profile Design customer service is here to help you. Office hours are Monday through Friday, 8:30 a.m. to 5 p.m. PST. Our staff of cyclists know every detail of the product line, what products work best in real world conditions and size related specifics. We are here to answer your questions regarding fit and construction and will gladly assist with your order.

Please contact your Profile Design representative at 888-800-5999 for current pricing, shipping or more information regarding Profile Design products and services. 06/08

Profile Design and the Profile Design Logo are registered trademarks.
All other logos and trademarks are the property of their respective owners.

Profile Design Worldwide Limited Warranty
Profile Design LLC warrants to the original retail purchaser that the Profile Design product for which they received this warranty is free from defects in material and workmanship for two years from the date of original retail purchase. This warranty is not transferable to a subsequent purchaser. Profile Design's sole obligation under this warranty is to repair or replace the product, at Profile Design's option. Profile Design must be notified in writing of any claim under this warranty within 60 days of any claimed lack of conformity of the product.

Warranty Limitations
The duration of any implied warranty or condition, of merchantability, fitness for a particular purpose, or otherwise, on this product shall be limited to the duration of the express warranty set forth above. In no event shall Profile Design be liable for any loss, inconvenience or damage, whether direct, incidental, consequential or otherwise, resulting from breach of any express or implied warranty or condition, of merchantability, fitness for a particular purpose, or otherwise with respect to this product, except as set forth herein. Some states or countries do not allow limitation on how long an implied warranty lasts and some do not allow exclusions or limitations of incidental or consequential damages, so the above limitations or exclusions may not apply to you. This warranty gives you specific legal rights, and you may also have other rights, which may vary, from location to location. This warranty will be interpreted pursuant to the laws of the United States. The original English language version/meaning of this warranty controls over all translations and Profile Design is not responsible for any errors in translation of this warranty or any product instructions. This warranty is not intended to confer any additional legal, jurisdictional or warranty rights to you other that those set forth herein or required by law. If any portion of this warranty is held to be invalid or unenforceable for any reason, such finding will not invalidate any other provision. For products purchased in countries other than the United States please contact Profile Design's authorized distributor in that respective country.

Warranty Service Options

To obtain service under this warranty you must either:

(1) Bring or send your Profile Design product, together with this warranty, the retail seller's original receipt or other satisfactory proof of the date of purchase to the retailer where you purchased the item or another authorized Profile Design retailer, or

(2) Send your Profile Design product (with the return authorization number on the outside of the shipping container and affixed to the product), together with the retail seller's original receipt or other satisfactory proof of the date of purchase to Profile Design 2677 El Presidio St. Long Beach, CA 90810 USA. You must first obtain a return authorization number by calling Profile Design at (310) 884-7756 ext. 161 (or send an email to warranty@profile-design.com) prior to returning the product to Profile Design. Profile Design may require that you complete and sign a warranty replacement request form before processing your warranty claim. Any postage, insurance or other shipping costs incurred in sending your Profile Design product for service under either option above is your responsibility. Profile Design will not be responsible for products lost or damaged in shipping. For products purchased in countries other than the United States please contact Profile Design's authorized distributor in the country where the product was purchased. They can be found on our web site at www.profile-design.com

Warranty Exclusions
Retailers and sellers of Profile Design products are not authorized to modify this warranty in any way. It is your responsibility to regularly examine the product to determine the need for normal service or replacement. This warranty does not cover the following:

· Products that have been modified, neglected or poorly maintained, used for commercial purposes, misused or abused or involved in accidents.

· Damage occurring during shipment of the products (such claims must be presented directly to the shipper).

· Damage to products resulting from improper assembly or repair, the use or installation of parts or accessories not compatible with the original intend
