ATALA E WHISTLE,
DUE MARCHI ED UNA MISSION:
"ONE RIDE AT A TIME"

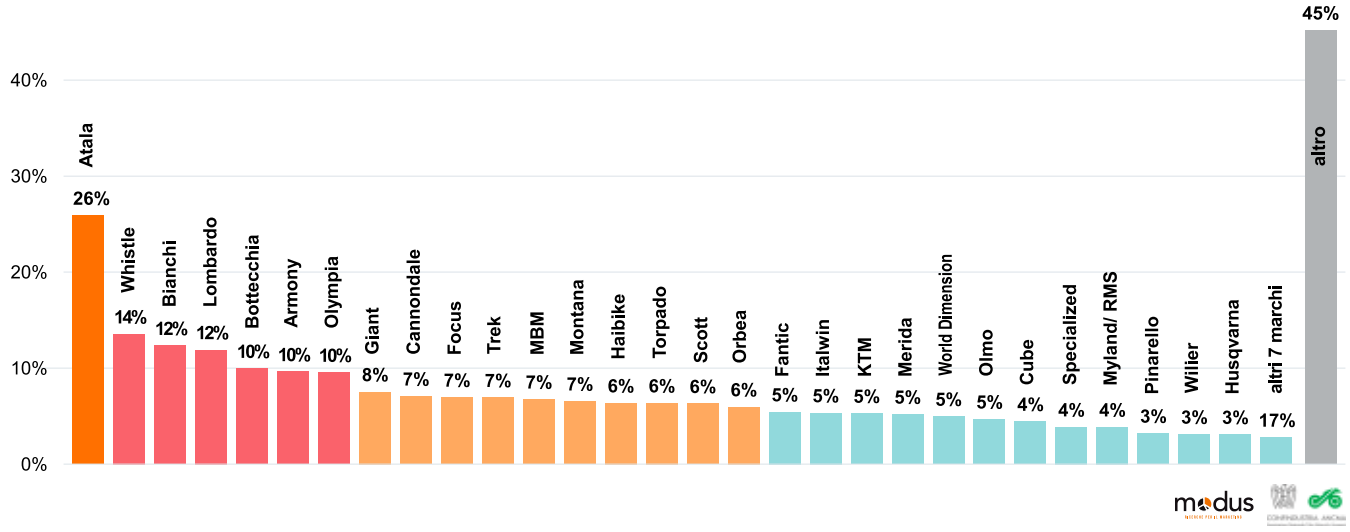

Progettiamo e produciamo in Italia tutte le nostre eBike e le nostre biciclette in fibra di carbonio. Vengono prodotte in stabilimenti dedicati con macchinari specifici e personale specializzato.
Le nostre biciclette sono conformi alle normative europee di sicurezza e vengono testate sia in laboratorio che sul campo, in particolare dal nostro team professionistico eMTB.
Sviluppa tutti i suoi telai ed i suoi sistemi elettrici con i più importanti fornitori mondiali. Il team Whistle si è dedicato a studi approfonditi del mondo Bike e eBike, analizzando nel minimo dettaglio l'integrazione tra i kit elettrici, la componentistica all'avanguardia ed il design con un solo obiettivo: soddisfare le esigenze di tutti gli utenti.

Per la stagione 2025, propone una gamma sempre più completa; dando particolare rilievo ad un materiale molto leggero e al contempo di grande resistenza, in grado di fornire rigidezza e flessibilità nei punti critici.. il carbonio!

Essere competitivi ed osare sono quindi le parole chiave per Whistle: proporre innovazioni, rompere gli schemi pur nel rispetto della forte tradizione che la contraddistingue.

ATALA E WHISTLE SONO LE BICICLETTE ELETTRICHE PIÙ DISTRIBUITE IN ITALIA

Un grande successo nelle vendite, presso i punti di vendita specializzati, negli ultimi anni ed anche nel 2023, testimoniato dalle ricerche di settore (fonte ricerca di mercato MODUS – ANCMA).

ATALA AND WHISTLE,
TWO BRANDS AND ONE MISSION:
"ONE RIDE AT A TIME"

We design and produce all our eBikes and carbon fiber bicycles in Italy. They are produced in dedicated factories with specific machinery and specialized personnel.
Our bicycles comply with European safety regulations and are tested both in the laboratory and in the field, in particular by our professional eMTB team.
It develops all its frames and electrical systems with the most important global suppliers. The Whistle team has dedicated itself to in-depth studies of the Bike and eBike world, analyzing in great detail the integration between electrical kits, cutting-edge components and design with a single goal: to satisfy the needs of all users.

For the 2025 season, it offers an increasingly complete range; giving particular emphasis to a very light and at the same time highly resistant material, capable of providing rigidity and flexibility in critical points... carbon!

Being competitive and daring are therefore the key words for Whistle: proposing innovations, breaking the mold while respecting the strong tradition that distinguishes it.

ATALA AND WHISTLE ARE THE MOST DISTRIBUTED ELECTRIC BICYCLES IN ITALY

A great success in sales, at specialized stores, in recent years and also in 2023, as demonstrated by sector research (source: MODUS market research – ANCMA).

LE NOSTRE BICI SONO SOTTOPOSTE A TEST IN LABORATORIO E SUL CAMPO DAI NOSTRI ATLETI PER GARANTIRE STANDARD QUALITATIVI E PERFORMACE

OUR BIKES ARE SUBJECTED TO LABORATORY TESTS AND ON THE FIELD BY OUR ATHLETES TO ENSURE QUALITY AND PERFORMANCE STANDARDS

L'azienda produttrice si riserva il diritto di cambiare immagini, colori, specifiche e prezzi senza preavviso.
The manufacturing company takes the right to change pictures, colors, specs and prices without prior notice.

E-MTB

Percorsi sterrati, salite da affrontare con agilità, discese impegnative. Le nostre eMTB Hardtail sono perfette per affrontare ogni tipo di trail.
Ottime anche nei percorsi urbani ed extra urbani per spostamenti quotidiani.
Prodotte con motori Bosch, Yamaha, AM80 e con batterie da 400 Wh fino a 625 Wh.
Sono perfette per ogni tipo di terre e per utilizzo urbano.
Disponibili con ruote da 29", 27.5" e 24".

Dirt roads, climbs to be tackled with agility, challenging descents. Our Hardtail eMTBs are perfect for tackling any type of trail.
Also excellent for urban and extra-urban routes for daily commuting.
Produced with Bosch, Yamaha, AM80 engines and with batteries from 400 Wh up to 625 Wh.
They are perfect for all types of terrain and for urban use.
Available with 29", 27.5" and 24" wheels.

E-URBAN

Telai con geometrie sviluppate per il massimo comfort ed abbinati a sistemi elettrici che garantiscono migliori prestazioni ed autonomia.
Il telaio a entrata facilitata è perfetto per l'uso nel traffico cittadino ma ha anche rigidità adatta ad un uso su percorsi extra-urbani.
L'eBike diventa parte integrante della mobilità urbana. Dettagli come parafanghi, luci, portapacchi e gomme sono disegnati per una semplicità d'uso ed una durata nel tempo.

Frames with geometries developed for maximum comfort and combined with electrical systems that guarantee better performance and autonomy.
The easy-entry frame is perfect for use in city traffic but also has the rigidity needed for use on extra-urban routes.
The eBike becomes an integral part of urban mobility. Details such as mudguards, lights, luggage racks and tires are designed for ease of use and durability over time.

THE SMART SYSTEM

Il sistema intelligente ti porta nel futuro digitale dell'eBike e garantisce un divertimento di guida sempre più personalizzato: l'app eBike Flow e tutti i componenti, come la drive unit, la batteria e il display, sono completamente connessi. È sufficiente trasferire gli aggiornamenti over-the-air, in modo che l'eBike rimanga aggiornata anche dopo l'acquisto. L'app eBike Flow ti offre continuamente nuove funzioni: Ad esempio, puoi utilizzare la funzione di navigazione, ampliare la protezione contro il furto, adattare le modalità di assistenza e le indicazioni sul display ai tuoi desideri o sbloccare la tua eBike con Kiox 300 o Kiox 500.

Nel sistema intelligente, puoi scegliere tra diverse unità di trazione. Che si tratti di eMTB o eCity, la giusta drive unit offre una buona sensazione di pedalata e un maggiore divertimento di guida.

The intelligent system takes you into the digital future of eBiking and ensures even more personalized riding fun: the eBike Flow app and all components, such as the drive unit, battery and display, are fully networked. Simply transfer updates over the air, so that your eBike remains up to date even after purchase. The eBike Flow app continuously offers you new functions: For example, you can use the navigation function, extend the theft protection, adapt the assistance modes and display information to your wishes or unlock your eBike with Kiox 300 or Kiox 500.

In the intelligent system, you can choose between different drive units. Whether eMTB or eCity, the right drive unit offers a good pedal sensation and more riding fun.

DRIVE UNIT

The smart system

PERFORMANCE LINE CX (BDU374)

La Performance Line CX (BDU374Y) è un sistema di trazione potente e dinamico, che garantisce facilità di utilizzo e una sensazione di pedalata unica. Va al limite insieme a te, per un divertimento ancora maggiore su terreni tecnicamente impegnativi.

COPPIA MASSIMA 85 Nm
SUPPORTO MASSIMO 340%

The Performance Line CX (BDU374Y) is a powerful and dynamic drive system that guarantees ease of use and a unique riding sensation. It goes to the limit with you, for even more fun on technically challenging terrain.

MAXIMUM TORQUE 85 Nm
MAXIMUM SUPPORT 340%

PERFORMANCE LINE (BDU336)

Versatile e silenziosa, anche la Performance Line fa ora parte del sistema intelligente. Approfitta dei vantaggi, resta in movimento e continua a esplorare i dintorni. Nonostante il potente supporto, la drive unit offre una sensazione di pedalata naturale e più sicurezza.

COPPIA MASSIMA 75 Nm
SUPPORTO MASSIMO 340%

Versatile and quiet, the Performance Line is now also part of the intelligent system. Enjoy the benefits, stay on the move and continue to explore the surroundings. Despite the powerful support, the drive unit offers a natural riding sensation and more safety.

MAXIMUM TORQUE 75 Nm
MAXIMUM SUPPORT 340%

ACTIVE LINE (BDU332)

Al lavoro la mattina e al ristorante la sera: con Active Line, pedalare è divertente. È silenziosissima e fornisce un supporto armonico, pertanto è ideale per i percorsi in città. L'accelerazione finemente dosata e la resistenza alla pedalata appena percepibile oltre i 25 km/h o in modalità Off rendono ogni pedalata rilassante, trasformandola in una breve attività nel tempo libero, persino nel traffico all'ora di punta.

COPPIA MASSIMA 40 Nm
SUPPORTO MASSIMO 340%

At work in the morning and in the restaurant in the evening: with the Active Line, cycling is fun. It is whisper-quiet and provides harmonious support, making it ideal for city riding. The finely dosed acceleration and barely noticeable pedal resistance above 25 km/h or in Off mode make every ride relaxing and a short leisure activity, even in rush hour traffic.

MAXIMUM TORQUE 40 Nm
MAXIMUM SUPPORT 340%

POWERTUBE

Fonte di energia versatili: le PowerPack Frame sono installate all'esterno del telaio nel punto più viccino al baricentro della bicicletta. Hanno un'impugnatura con la quale puoi rimuoverle facilmente e trasportarle comodamente.
Sono disponibili in tre versioni: 545 Wh, 400Wh e 300 Wh. Tutte le PowerPack nel sistema intelligente hanno lo stesso supporto. Quindi puoi inserire facilmente una nuova batteria se la geometria dell'eBike lo consente. Con una batteria più piccola riduci il peso, con una più grande aumenti l'autonomia.

Versatile energy sources: The Frame PowerPacks are installed on the outside of the frame at the point closest to the bike's center of gravity. They have a handle that allows you to easily remove them and carry them comfortably.
They are available in three versions: 545 Wh, 400 Wh and 300 Wh. All PowerPacks in the intelligent system have the same holder. This means you can easily insert a new battery if the geometry of the eBike allows it. With a smaller battery you reduce the weight, with a larger one you increase the range.

POWERPACK

Per maggior esigenze in termini di potenza e stile: garantiscono alto potenziale energetico e, grazie alle dimensioni compatte e alla forma minimalista, si integrano perfette col design dell'eBike. Un fermo ne impedisce la caduta tuttavia, anche se è presente, le batterie possono essere rimosse in modo semplice e pratico.
I PowerTube del sistema intelligente sono disponibili in tre versioni: 750Wh, 625Wh e 500Wh. I nostri telai sono già predisposti per tutte e tre le batterie. Questo significa che sarai pronto per ogni esigenza, sia per le brevi distanze in città, sia per la guida sportiva di una eMTB.

For higher demands in terms of power and style: PowerTubes guarantee high energy potential on every tour and, thanks to their compact dimensions and minimalist shape, integrate perfectly into the design of the eBike.
A lock prevents them from falling out, but even if it is present, the batteries can still be removed easily and conveniently. The PowerTubes in the intelligent Bosch system are available in three versions: 750Wh, 625Wh and 500Wh. Our frames are already prepared for all three batteries. This means that you are prepared for every requirement, whether for short distances in the city or for sporty riding of an eMTB.

CHARGER

Un solo carica batterie leggero (800gr) e compatto per PowerTube e PowerPack da 4 A o 2 A. Il carica batterie del Sistema Intelligente non è compatibile con il Il sistema Bosch eBike 2.

A single lightweight (800 gr) and compact battery charger for PowerTube and PowerPack 4 A or 2 A. The Intelligent System battery charger is not compatible with the Bosch eBike 2 system.

POWERMORE 250

Batteria supplementare portatile, grande come una borraccia, che garantisce ulteriore autonomia. Compatto e con soli 1,5kg, Range Extender può essere fissato facilmente al porta borraccia ed è combinabile con tutte le batterie del sistema intelligente. Informati per sapere se puoi utilizzarlo sulla tua eBike.

Portable, water bottle-sized supplementary battery that provides additional autonomy. Compact and weighing only 1.5kg, the Range Extender can be easily attached to the water bottle holder and can be combined with all intelligent system batteries. Find out in advance whether you can use it on your eBike.

THE E-BIKE 2 SISTEM

PERFORMANCE LINE CX

Compatta, leggera e più potente, combina a materiali di alta qualità, una trazione estremamente potente e sensori di fascia alta. L'eMountain biking sul trail assume una dimensione completamente nuova. Coppia fino a 85 Nm, feature nei comandi motore e una modalità eMTB evoluta, per un'esperienza emozionante: naturale,intuitiva, potente.

COPPIA MASSIMA 85 Nm **SUPPORTO MASSIMO 340%**

Compact, lightweight and more powerful, it combines high-quality materials, an extremely powerful drive and high-end sensors. This takes eMountain biking on the trail to a whole new dimension. With up to 85 Nm of torque, features in the motor control and an advanced eMTB mode, the Performance Line CX offers an emotional riding experience: natural, intuitive, powerful.

MAXIMUM TORQUE 85 Nm ***MAXIMUM SUPPORT 340%***

PERFORMANCE LINE

Sistema di trazione versatile, per fare sport nel verde, andare al lavoro o rilassarsi durante il tempo libero, fornisce il giusto supporto sempre al momento giusto. Disponibili due versioni. La versione Cruise silenziosa e leggera garantisce il supporto fino a 25km/h con una coppia massima di 65Nm, apprezzata per la sensazione di pedalata naturale e sportiva, assicurando divertimento anche su terreni mossi.

COPPIA MASSIMA 65 Nm **SUPPORTO MASSIMO 300%**

Versatile traction system, for doing sports in the countryside, going to work or relaxing during your free time, provides the right support always at the right time. Two versions available. The Cruise version guarantees support up to 25km/h with a maximum torque of 65Nm, appreciated for the natural and sporty pedaling sensation, ensuring fun even on rough terrain.

MAXIMUM TORQUE 65 Nm ***MAXIMUM SUPPORT 300%***

ACTIVE LINE PLUS

Ideale per gli spostamenti quotidiani e per le uscite non programmate. Silenziosa, piccola ma potente, offre maggior divertimento. Niente più fastidioso rumore di sottofondo e una resistenza alla pedalata appena percepibile oltre i 25 km/h: fare nuove esperienze e scoperte diventa più semplice.

COPPIA MASSIMA 50 Nm **SUPPORTO MASSIMO 270%**

Ideal for daily commutes and unplanned outings. Silent, small but powerful, it offers more fun. No more annoying background noise and barely perceptible pedal resistance above 25 km/h: new experiences and discoveries become easier.

MAXIMUM TORQUE 50 Nm ***MAXIMUM SUPPORT 270%***

ACTIVE LINE

Per andare in ufficio al mattino o per il tempo libero, con la Active Line muoversi nel traffico della città è un divertimento. Armonica, leggera e silenziosa, è ideale per tutti i percorsi cittadini. Accelerazione dosata in modo armonico e resistenza alla pedalata appena percepibile oltre i 25km/h o in modalità off.

COPPIA MASSIMA 40 Nm **SUPPORTO MASSIMO 260%**

Whether you're going to the office in the morning or spending your free time, the Active Line makes moving through city traffic a pleasure. Harmonious, light and silent, it's ideal for all city routes. Harmoniously dosed acceleration and barely noticeable pedal resistance above 25km/h or in off mode.

MAXIMUM TORQUE 40 Nm ***MAXIMUM SUPPORT 260%***

INTUVIA

Praticità e controllo della tua ebike garantiti: il display è sempre ben visibile in qualsiasi situazione e mostra tutte le informazioni importanti. Il ciclo-computer viene controllato in modo intuitivo dall'unità di comando separata, così le mani restano sul manubrio.

Easy and intuitive control of your eBike guaranteed: the display is easy to read in any situation and shows you all the important information. The separate control unit allows you to keep your hands safely on the handlebar.

PURION

Concentratevi sulle informazioni essenziali e visualizzatele solo con un clic del pollice: il ciclocomputer Purion è sinonimo di efficienza e precisione massime.

You can focus on the essentials and get all important information at a click of your thumb: the Purion on-board computer operates with maximum efficiency and precision.

PURION 200

Unità di comando con display a colori compatto e completamente connessa al sistema intelligente. Questa soluzione all-in-one, che rende il manubrio più ordinato, viene posizionata direttamente vicino al pollice e offre una visualizzazione nitida dei dati di marcia e un controllo semplice ed ergonomico di tutte le funzioni dell'eBike. Combina Purion 200 con un display aggiuntivo per un ulteriore comfort.

Control unit with compact colour display and fully networked in the smart system. The all-in-one solution ensures an uncluttered handlebar, is in close proximity to the thumb and offers a razor-sharp display of ride data as well as simple, ergonomic control of all eBike functions. Combine the Purion 200 with an additional display – for even greater convenience.

LED REMOTE

Il LED Remote collega l'eBike all'app eBike Flow. Consente di accedere facilmente a tutti i dati di guida importanti ed è intuitivo; le mani restano sul manubrio in modo sicuro. Cambia le modalità di marcia, usa la camminata assistita e aziona il display o il Ride screen del tuo smartphone. Grazie al sistema intelligente, il LED Remote ti consente di effettuare in modo autonomo gli aggiornamenti per l'eBike.

The LED Remote connects your eBike with the eBike Flow app. It makes it easy to access all important ride data and is intuitive to use - your hands remain safely on the handlebars. Change riding modes, use the smart walk assistance and operate your display on your smartphone. Thanks to the smart system allows you to perform updates for your eBike for yourself.

KIOX

Il design si fonde con la funzionalità: il ciclo-computer Kiox è appositamente studiato per le esigenze dei ciclisti sportivi ambiziosi. Robusto, piccolo e compatto, è l'accompagnatore perfetto, sia fuoristrada che come partner per l'allenamento.

The LED Remote connects your eBike with the eBike Flow app. It makes it easy to access all important ride data and Design meets functionality: the Kiox on-board computer was specially developed for the needs of ambitious riders. Robust and small, the compact Kiox is the perfect companion - whether used off-road or as a partner in training.

KIOX 300

Robusto e intelligente, è il display per il sistema intelligente che ti accompagnerà nei tuoi spostamenti. Può essere controllato in modo intuitivo tramite l'unità di comando, compatto e protetto da getti d'acqua e da polvere. Il display a colori è leggibile in modo ottimale. Ideale per le avventure sportive e i tour più impegnativi.

The display for the smart system, and are your robust, intelligent companions. It can be intuitively controlled from the control unit, is compact and protected from splashing water and dust. The color display is optimally readable. Ideal for sporting adventures and challenging rides.

CONNECT MODULE

Il ConnectModule è il componente hardware necessario per poter utilizzare il servizio eBike Alarm e aumentare così la protezione da furto. È dotato di sensori di movimento, di un modulo GPS e di una batteria propria. L'eBike Alarm funziona così anche senza la batteria eBike. Con l'aiuto dei sensori, il ConnectModule montato sotto il coperchio del motore può identificare i movimenti dell'eBike e attivare un allarme locale. Informati in anticipo per sapere se puoi utilizzare il Connect Module sulla tua eBike.

Solo per bici con il sistema intelligente.

The ConnectModule is the hardware component required to use the eBike Alarm service and thus increase theft protection. It is equipped with motion sensors, a GPS module and its own battery. The eBike Alarm thus also works without an eBike battery. With the help of sensors, the ConnectModule mounted under the engine cover can identify movements of the eBike and trigger a local alarm. Find out in advance whether you can use the Connect Module on your eBike.

Only for bikes with the intelligent system.

FLOW APP

L'app eBike Flow è il fulcro sistema intelligente di Bosch e ti offre un'esperienza di guida migliore e connessa: più sicura, più personalizzata e più confortevole.
Nel sistema intelligente, la drive unit è completamente collegata in rete con gli altri componenti della tua eBike. Con l'app eBike Flow, è possibile utilizzare funzioni digitali come l'activity-tracking, l'eBike Lock, aggiornare e personalizzare e la tua eBike.
L'applicazione è disponibile per App Store e Google Play. Una volta scaricata collega tua eBike!
Visita il sito Bosch eBike per tenerti aggiornate su tutte le novità.

Solo per bici con il sistema intelligente.

The eBike Flow app is the heart of Bosch's intelligent system and offers you a better and more connected riding experience: safer, more personalized and more comfortable.
In the intelligent system, the drive unit is fully networked with the other components of your eBike. With the eBike Flow app, you can use digital functions such as activity tracking, eBike Lock, update and personalize your eBike.
The application is available for the App Store and Google Play.
Once downloaded, connect your eBike!
Visit the Bosch eBike website to stay up to date with all the latest news.

ASSISTENZA

Per richiedere modifiche della configurazione della eBike con il sistema Bosch eBike 2 ed il sistema intelligente usa il nuovo programma Bosch Diagnostic Tool 3. Sarà molto più facile e veloce richiedere assistenza grazie al cloud di Bosch per cui avverrà tutto da remoto.

To request changes to the eBike configuration with the Bosch eBike 2 system and the intelligent system use the new Bosch Diagnostic Tool 3 program. It will be much easier and faster to request assistance thanks to the Bosch cloud so everything will happen remotely.

YAMAHA

DRIVE UNIT

Un'assistenza fluida e naturale, con 4 livelli di potenza: Eco+, Eco, Standard, High. Il biker può calibrare la potenza erogata dal motore, in base al percorso e all'autonomia rimanente della batteria.

Sistema di montaggio centrale, in cui unità motrice e batteria sono vicino ai pedali per un baricentro basso ed un bilanciamento del peso e una stabilità eccellenti.

Smooth and natural assistance, 4 power levels: Eco+, Eco, Standard, High. The biker can calibrate the power delivered by the motor, based on the route and the remaining battery life.

Central mounting system, in which the motor unit and battery are close to the pedals for a low center of gravity and excellent weight balance and stability.

DISPLAY

Layout verticale e la retroilluminazione per una migliore leggibilità in tutte le condizioni; il comando remoto sulla manopola sinistra aumenta l'ergonomia e la sicurezza del sistema.

The vertical layout and the backlight of the removable LCD display improve the readability in all riding conditions; the remote control on left grip increase ergonomics and safety of the system.

400/500 WH BATTERIES

Batterie con capacità di 400 e 500 Wh performanti, leggere, ricaricabili anche a bordo della bicicletta e removibili lateralmente.

RANGE 140 km (400 Wh in Eco+)

Batteries with a capacity of 400 and 500 Wh performing, light, rechargeable on the bicycle and removable laterally.

Atala

E-BIKE SYSTEMS

Atala è presente nel settore delle bici elettriche dal 2008, dai suoi inizi nel mercato Italiano contribuito alla sua crescita ed espansione con 50.000 bici elettriche prodotte annualmente oggi.
I modelli trattati sono stati i più svariati, come i più diversi sono stati i sistemi elettrici impiegati. Questo ci ha permesso di avere una conoscenza globale su questi prodotti, e nel tempo a prendere parte alla loro definizione.
Oggi Atala propone bici elettriche con sistemi di marchi importanti e bici elettriche con sistemi proprietari, sviluppati da noi. Così abbiamo la possibilità di proporre prodotti con caratteristiche funzionali ed a prezzi che più si sposano a specifici mercati.

Atala has been present in the electric bike sector since 2008, from its beginnings in the Italian market contributed to its growth and expansion with 50,000 electric bikes produced annually today.
The models treated have been the most varied, as the most diverse have been the electrical systems used. This has allowed us to have a global knowledge of these products, and over time to take part in their definition.
Today Atala offers electric bikes with systems of important brands and electric bikes with proprietary systems, developed by us. So we have the possibility of offering products with functional characteristics and at prices that are more suited to specific markets.

AM80 | ECOLOGIC | ECOTRONIC | ANANDA | PHILION-JOYCUBE

I sistemi sviluppati da Atala sono: AM80, Ecologic e il nuovo EcoTronic. Questi sistemi sono sviluppati in collaborazione con storici e primari attori del settore della mobilità elettrica. Garanzia, per noi, di una lunga, dinamica e proficua collaborazione; per i clienti, di un prodotto qualitativo e con assistenza continuativa nel tempo. Maggiormente impiegati sono Ananda e Phylion/Joycube, che rappresentano l'eccellenza nella mobilità elettrica, per tecnologia e qualità.
I sistemi Atala sono realizzati in co-design con questi partner. Ogni singolo aspetto del funzionamento della bici, da come parte a come stabilizza la velocità, da come reagisce in base alla pedalata, al menù dei display, è definito da Atala e appartiene ad Atala. Prodotti offerti da questi fornitori ad altri marchi di bici, non hanno lo stesso funzionamento e prestazioni, anche se hanno somiglianze estetiche coi nostri.
Per il 2025 ci siamo concentrati su aspetti quali: alte prestazioni di coppia e potenza massima, ergonomia di guida, sicurezza di guida, connessione col cellulare.

The systems developed by Atala are: AM80, Ecologic and the new EcoTronic. These systems are developed in collaboration with historic and leading players in the electric mobility sector. For us, they guarantee a long, dynamic and profitable collaboration; for customers, a quality product with continuous assistance over time. The most widely used are Ananda and Phylion/Joycube, which represent excellence in electric mobility, for technology and quality.
The Atala systems are made in co-design with these partners. Every single aspect of the bike's operation, from how it starts to how it stabilizes the speed, from how it reacts based on pedaling, to the display menu, is defined by Atala and belongs to Atala. Products offered by these suppliers to other bike brands do not have the same operation and performance, even if they have aesthetic similarities with ours.
For 2025 we have focused on aspects such as: high performance of torque and maximum power, riding ergonomics, riding safety, mobile phone connection.

ANANDA

Da 20 anni nel mercato, realizza motori, controller, display e sensori. I moderni impianti produttivi, consentono di offrire prodotti innovativi e di qualità, con una continua proposta di sistemi all'avanguardia. Dal 2024 è una azienda quotata alla borsa di Shanghai.

For 20 years in the market, it produces motors, controllers, displays and sensors. The modern production plants allow us to offer innovative and quality products, with a continuous proposal of cutting-edge systems.
Since 2024 it is a company listed on the Shanghai stock exchange.

PHYLION/JOYCUBE

Fra i più importanti produttori di batterie al Litio per la mobilità elettrica leggera. Presta continua attenzione alla ricerca di nuovi materiali, all'elettronica, alla diagnosi e alle nuove normative. Si contraddistingue per i continui investimenti in ricerca e l'attenzione alla qualità.

Among the most important manufacturers of lithium batteries for light electric mobility. It pays constant attention to research into new materials, electronics, diagnosis and new regulations. It stands out for its continuous investments in research and attention to quality.

AM80

Qualità, affidabilità e convenienza con cuore italiano: questi i valori che si rispecchiano nel sistema elettrico proposto da Atala, AM80. Nato da un'idea del dipartimento Ricerca e Sviluppo di Atala per rispondere all'esigenza di sviluppare biciclette di alta qualità e prestazione con motore centrale.

Quality, reliability and convenience together with an italian heart: all these values can be reflected in the new electric System, Atala AM80. Developed upon an idea of the Atala R&D Department to answer the customer needs of quality and performing eBike with central drive unit.

DRIVE UNIT

5 livelli di assistenza supportano il ciclista dal 50 al 400% della forza da lui espressa (calcolata tramite il sensore di coppia all'interno del movimento centrale).

5 power modes support the rider from 50 to 400% of its power (calculated by the torque sensor inside the bottom bracket).

DISPLAY

Velocità, stato di carica e livello di assistenza sono immediatamente accessibili, in schermata completa sono visualizzate le informazioni di potenza istantanea erogata dal motore, potenza espressa dall'utente e consumo chilometrico per gestire l'autonomia.
Il comando remoto di piccole dimensioni, a sinistra del manubrio è facilmente raggiungibile dal pollice della mano sinistra ed essendo, non influenzando i comandi della bici.
La "camminata assistita" è attivabile in qualsiasi modalità di assistenza con la pressione prolungata del tasto "V" e la velocità non supera i 6 km/h come stabilito da norma di legge.

Speed, charge status and assistance level are immediately accessible, the full screen displays information on the instantaneous power delivered by the engine, power expressed by the user and mileage consumption to manage autonomy. The small remote control, on the left of the handlebars, is easily reachable by the thumb of the left hand and is not influencing the bike controls. The "assisted walk" can be activated in any assistance mode with a long press on the "V" button and the speed does not exceed 6 km/h as established by law.prolungata del tasto "V" sul comando remoto. La massima velocità raggiungibile non supera i 6 km/h come stabilito da norma di legge. The "walk" function can be activated in any power mode simply with a long press of the "V" button on the control. The maximum speed never exceed 6 km/h as established by law.

ENERGY PACK 540 WH

Le EnergyPack sono accumulatori con tecnologia a ioni di litio, non soffrono di effetto memoria e possono essere caricate e scaricate a piacimento senza preoccupazioni.

EnergyPack are batteries with lithium-ion technology inside they don't suffer from memory effect and can be charged and discharged at will without any worries.

AM80 agile

AM80 easy by ANANDA

2 NUOVI SISTEMI PER TREKKING E CITY BIKE

Recentemente abbiamo introdotto gli AM80 Agile e AM80 Easy, per trekking e city. Entrambi sono progettati per avere una partenza dopo pochi gradi di movimento della pedivella (15°) e con una erogazione potente per superare abilmente salite. Ne risulta un funzionamento comodo e diretto per percorsi urbani con più soste e ripartenze. Entrambi hanno 5 livelli di supporto selezionabili, per ognuno il motore fornisce potenza in base a quanto stiamo spingendo sui pedali e un fattore relativo al livello scelto, dal 40% al 250%.

AM80 Agile, giunto alla sua seconda generazione, è il motore dalle alte prestazioni, con 100Nm di coppia massima e 520W di potenza massima.

AM80 Easy è il motore dalle prestazioni più contenute ma di tutto rispetto, con 70Nm di coppia massima e 455W di potenza massima.

Su entrambi, la presenza di una contattiera consente una rapida ispezione dei cablaggi senza rimuovere il motore dal telaio.

2 NEW SYSTEMS FOR TREKKING AND CITY BIKE

We recently introduced the AM80 Agile and AM80 Easy, for trekking and city. Both are designed to have a start after a few degrees of crank movement (15°) and with a powerful delivery to skillfully overcome climbs. The result is comfortable and direct operation for urban routes with multiple stops and starts.
Both have 5 selectable support levels, for each the engine provides power based on how much we are pushing on the pedals and a factor related to the chosen level, from 40% to 250%.

AM80 Agile, now in its second generation, is the high-performance engine, with 100Nm of maximum torque and 520W of maximum power.
AM80 Easy is the engine with the most modest but respectable performance, with 70Nm of maximum torque and 455W of maximum power.

On both, the presence of a contact board allows for quick inspection of the wiring without removing the engine from the frame.

Le novità per le bici col motore Agile sono:

- Nuovo display TFT (Thin Film Transistor, a matrice attiva) a colori, con comando remoto, presa USB e sensore crepuscolare
- Bluetooth sui display che permette di associare la bici al cellulare
- Funzione Daytime running light, per l'accensione delle luci di posizione di giorno, anteriori e posteriori
- Funzione luci STOP, che grazie ad un sensore fa accendere la luce posteriore ad una intensità maggiore durante una brusca frenata

Le novità per le bici 2025 col motore Easy sono:

- Batteria con capacità aumentata a 504Wh

The new features for the 2025 bikes with the Agile engine are:

- *New color TFT display, with remote control, USB socket and twilight sensor*
- *Presence of Bluetooth on the displays which allows you to pair the bike with your mobile phone*
- *Daytime running light function, to turn on the daytime running front and rear lights*
- *STOP light function, which thanks to a sensor turns on the rear light at a greater intensity during a sudden deceleration*

The new features for the 2025 bikes with the Easy engine are:

- *Battery with increased capacity to 504Wh*

ecologic

LA TRADIZIONALE FAMIGLIA DI BICI ELETTRICHE CON MOTORE AL MOZZO

Questa è la tradizionale famiglia di bici elettriche con motore al mozzo, con sensore di cadenza su movimento centrale.
I motori sono a 9 fili, con sensori ad effetto hall, per ottenere la velocità della bici e comandare il motore (brushless a 3 fasi) in base alla sua corretta posizione, senza ronzii all'attivazione.
Il riduttore interno ha ingranaggi doppi (uno per l'involucro del mozzo da far ruotare e l'altro per l'asse motore) per aumentarne la durata, con forma elicoidale per aumentare le coppia e ridurre il rumore.
Sono caratterizzati da un'alta coppia massima. Le bici 2025 hanno motori con: coppia massima 55Nm e 410W di potenza massima su ruota 26"/700c, coppia massima 50Nm e 480W di potenza massima su ruota 20"/24".
L'alta coppia permette di superare agevolmente salite: percorrendo una strada a 25km/h, la salita di un cavalcavia abbassa solo di poco la velocità (23km/h). Con motori meno performanti la velocità si abbassa di molto o addirittura non si riesce a superare la salita.
Il sensore di cadenza è di tipo integrato in un unico modulo e con 12 poli. Sostituisce l'ormai superato disco a magneti più sensore esterno, che talvolta poteva causare malfunzionamenti per la loro posizione relativa non corretta. Inoltre i 12 poli invece dei 5 o 7 magneti del passato permettono una partenza del motore con minor sforzo (minor angolo di rotazione iniziale della pedivella).

This is the traditional family of electric bikes with hub motor, with cadence sensor on the bottom bracket. The motors are 9-wire, with hall effect sensors, to obtain the speed of the bike and control the motor (3-phase brushless) based on its correct position, without buzzing when activated.
The internal reduction has double gears (one for the hub casing to rotate and the other for the motor axle) to increase its durability, with an helical shape to increase torque and reduce noise. They are characterized by a high maximum torque. The 2025 bikes have motors with: maximum torque 55Nm and 410W of maximum power if on a 26"/700c wheel, maximum torque 50Nm and 480W of maximum power if on a 20"/24" wheel.
The high torque allows you to easily overcome climbs: traveling on a road at 25km/h, the climb of an overpass lowers the speed only slightly (23km/h). With less performing motors the speed drops a lot or you can't even overcome the climb.
The cadence sensor is of the type integrated in a single module and with 12 poles. It replaces the now outdated magnetic disc plus external sensor, which could sometimes cause malfunctions due to their incorrect relative position. Furthermore, the 12 poles instead of the 5 or 7 magnets of the past allow the engine to start with less effort (lower initial rotation angle of the crankset).

5 livelli di supporto selezionabili, il motore spinge la bici ad una velocità prestabilita associata al livello stesso. Ogni livello è associato ad una coppia massima.

5 levels of selectable support, the motor pushes the bike at a pre-set speed associated with the level itself. Each level is associated with a maximum torque.

DISPLAY	TARGET SPEED	MAX TORQUE
OFF LEVEL	0 km/h	0 Nm
LEVEL 1	11 km/h	26 Nm
LEVEL 2	14 km/h	35 Nm
LEVEL 3	17 km/h	43 Nm
LEVEL 4	21 km/h	50 Nm
LEVEL 5	25 km/h	56 Nm

Il sensore a 12 poli permette di avere un contenuto angolo iniziale di ingaggio. Anche in salita, partendo da fermi, il motore rilascia subito una erogazione potente.

The 12-pole sensor allows for a low initial engagement angle. Even when climbing, starting from a standstill, the engine immediately releases powerful power.

Le novità per le bici 2025 col sistema Ecologic sono:

- Nuovo motore da 55/50Nm
- Funzione luci STOP, che grazie alla centraline e le leve freno, fa accendere la luce posteriore ad una intensità maggiore durante una frenata

The new features for the 2025 bikes with the Ecologic system are:

- *New 55/50Nm engine*
- *STOP light function, which thanks to a control unit turns on the rear light at a greater intensity during a sudden deceleration*

E-SPACE 7.5 26"

ecoTronic

UN NUOVO SISTEMA PER LE CITY BIKE NATURALE, DIRETTO E AUTOMATICO

Le bici elettriche con motore al mozzo spesso utilizzano un sensore di cadenza, e si associa erroneamente il controllo impreciso della velocità al motore stesso. Tuttavia, è il tipo di sensore a influenzare la guida. La posizione del motore (mozzo o centrale) influisce solo sull'utilizzo: i motori centrali sono più efficaci in montagna poiché sfruttano il cambio. Una bici con motore al mozzo e sensore di coppia funziona come un motore centrale, offrendo un controllo immediato della velocità in base alla pressione sui pedali. Anche qui, come per l'AM80 Agile e Easy, la selezione del livello di supporto (5 totali) permette al motore di fornire una potenza dal 40% al 250% di quella dell'utente. Il funzionamento risulta più naturale, diretto e automatico (non si interviene sul display per variare la velocità), dato che affrontando una salita il motore risponderà con più potenza all'incremento della forza che si imprime sui pedali. E' l'ideale nei centri urbani dove per il traffico, semafori e veicoli da superare c'è sempre la necessità di adattare istantaneamente la velocità della bici. Per fare un paragone: con le tradizionali bici con motore al mozzo e sensore di cadenza (Ecologic) è come se usassimo il cruise control dell'auto, mentre se si ha il sensore di coppia (EcoTronic) è come se usassimo l'acceleratore dell'auto. In auto non sarebbe semplice circolare nel centro cittadino col cruise control e si preferirebbe l'uso dell'acceleratore.
Queste sono quindi le bici elettriche con sistema EcoTronic: motore al mozzo (come per le Ecologic) e sensore di coppia (e cadenza) integrato sul movimento centrale. Questa tipologia di bici sono sempre più diffuse nel nord Europa, in Germania e in Svizzera. E anche molte bici da corsa elettriche usano una soluzione del genere. Ne guadagna il comfort e l'ergonomia di guida, la reattività e la sicurezza.

A NEW SYSTEM FOR CITY BIKES NATURAL, DIRECT AND AUTOMATIC

Hub motor electric bikes often use a cadence sensor, and imprecise speed control is mistakenly associated with the motor itself. However, it is the type of sensor that influences riding. The position of the motor (hub or central) only affects use: central motors are more effective in the mountains because they use the gearbox. A bike with a hub motor and torque sensor works like a central motor, offering immediate speed control based on the pressure on the pedals. Here too, as with the AM80 Agile and Easy, the selection of the support level (5 total) allows the motor to provide power from 40% to 250% of that of the user.
Operation is more natural, direct and automatic (there is no need to intervene on the display to change the speed), since when tackling a climb the motor will respond with more power to the increase in force applied to the pedals. It is ideal in urban centers where traffic, traffic lights and vehicles to be overtaken always require the bike to instantly adapt its speed.
To make a comparison: with traditional bikes with a hub motor and cadence sensor (Ecologic) it is as if we were using the car's cruise control, while if you have the torque sensor (EcoTronic) it is as if we were using the car's accelerator. In a car it would not be easy to drive around the city center with cruise control and you would prefer to use the accelerator. These are therefore electric bikes with the EcoTronic system: hub motor (like the Ecologic) and torque sensor (and cadence) integrated into the bottom bracket. This type of bike is increasingly widespread in Northern Europe, Germany and Switzerland. And many electric racing bikes also use a solution like this. This improves comfort and riding ergonomics, reactivity and safety.

FUNZIONE SORPASSO

In modalità Cruise, basta pedalare più energicamente fino ad agganciare il pignone posteriore per passare alla velocità massima, per un sorpasso veloce e sicuro.

OVERTAKING FUNCTION

In Cruise mode, simply pedal harder until you engage the rear sprocket for maximum power, for fast and safe overtaking.

Grazie al sensore di coppia non servono più gli switch sulle leve freno, quindi su queste bici si hanno meno cavi in zona manubrio e la possibilità di usare freni idraulici Shimano.

Se non si ha bisogno di usare la bici in montagna, il sistema EcoTronic ha diversi vantaggi rispetto al motore centrale:
- Un sistema con motore al mozzo e centralina ha tecnologia più consolidata e raggiunge oggi livelli molto alti di affidabilità (alta qualità);
- Il sistema è distribuito su di versi componenti separati, quindi l'eventuale rottura di una parte (sensore, elettronica) necessita della sostituzione solamente della parte non funzionante;
- Hanno un costo inferiore ad un motore centrale.

Thanks to the torque sensor, the switches on the brake levers are no longer needed, so these bikes have fewer cables in the handlebar area and the possibility of using Shimano hydraulic brakes.

If you do not need to use the bike in the mountains, the EcoTronic system has several advantages over the central motor:
- *A system with a hub motor and control unit has more consolidated technology and today reaches very high levels of reliability (high quality);*
- *The system is distributed across several separate components, so the eventual breakage of a part (sensor, electronics) requires the replacement of only the non-functioning part;*
- *They cost less than a central motor.*

DUAL MODE

Oltre al funzionamento simile ai motori centrali, dal nome "Drive", c'è la possibilità di selezionare dal display (premendo insieme + e -) una differente funzionalità, come quella delle bici Ecologic, chiamata modalità "Cruise". Nelle aree urbane con poche interruzioni, può essere utile usare la bici in leggerezza senza fare fatica e selezionando la velocità di crociera da display, selezionando la modalità "Cruise".
Con la funzionalità "Dual Mode", una bici EcoTronic può funzionare sia come un motore centrale che come un tradizionale motore al mozzo.

In addition to the operation similar to central motors, called "Drive", there is the possibility of selecting from the display (by pressing + and - together) a different function, like that of Ecologic bikes, called "Cruise" mode. In urban areas with few interruptions, it can be useful to use the bike lightly without tiring and selecting the cruising speed from the display, selecting the "Cruise" mode.
With the "Dual Mode" function, an EcoTronic bike can function both as a central motor and as a traditional hub motor.

Novità aggiuntive per le bici EcoTronic sono:
- Display TFT a colori, con comando remoto, presa USB e sensore crepuscolare
- Bluetooth sui display che permette di associare la bici al cellulare
- Funzione Daytime running light, per l'accensione delle luci di posizione di giorno, anteriori e posteriori
- Nuovo motore al mozzo da 50/55Nm

The new features for the 2025 bikes with the Ecologic system are:
- *Color TFT display, with remote control, USB socket and twilight sensor*
- *Bluetooth on the displays that allows you to pair the bike with your cell phone*
- *Daytime running light function, to turn on the daytime running lights, front and rear*
- *New 50/55Nm hub motor*

SYSTEM DISPLAY

I sistemi AM80 Agile, AM80 Easy, EcoTronic e Ecologic usano diversi display in base alla tipologia e livello di bici: a LED LCD a lato o centrali con comando remoto, TFT con comando remoto. I display (a parità di comunicazione CAN o UART) sono intercambiabili, dando la possibilità di fare un upgrade nel tempo.

The AM80 Agile, AM80 Easy, EcoTronic and Ecologic systems use different displays based on the type and level of bike: LED LCD on the side or central with remote control, TFT with remote control. The displays (with the same CAN or UART communication) are interchangeable, giving the possibility of upgrading over time.

Importante novità per il 2025 è un display TFT (Thin Film Transistor) a colori, che offre una nitidezza e luminosità maggiore rispetto ai display LCD.
Il comando remoto è a 5 tasti (light, +, power/menu, -, walk) disposti in modo ergonomico ed intuitivo.
Presenta una presa USB, utile per caricare il cellulare quando viene associato alla bici e usato come schermo secondario o GPS.
Integra un sensore crepuscolare, per la commutazione automatica delle configurazioni diurna e notturna.

An important new feature for 2025 is a color TFT (Thin Film Transistor) display, and graphics that change color with each different support selected.
The remote control has 5 buttons (light, +, power/menu, -, walk) arranged in an ergonomic and intuitive way.
It has a USB socket, useful for charging the cell phone when it is associated with the bike and used as a secondary screen or GPS.
It integrates a twilight sensor, for automatic switching between day and night configurations.

SMARTPHONE APP

Le bici 2025 con sistemi AM80 Agile e EcoTronic sono dotate di display con comunicazione Bluetooth per interagire con l'App Ananda Ride che offre le funzionalità: controllo dei vari parametri e dati, personalizzazione dei livelli di supporto, impostazione di password per il display, ricerca della bici a distanza Bluetooth, Altre funzioni ora in sviluppo, inclusa la diagnosi del sistema.

The 2025 bikes with AM80 Agile and EcoTronic systems are equipped with displays with Bluetooth communication to interact with the Ananda Ride App which offers the following functions: control of various parameters and data, customization of support levels, setting passwords for the display, Bluetooth remote bike search, Other functions now in development, including system diagnosis.

BATTERIES

Tutti i sistemi AM80 Agile, AM80 Easy e EcoTronic impiegano batterie con smart BMS. E anche tutte le Ecologic del 2025. Questo significa che l'elettronica di gestione della batterie (Battery Management System) è di tipo intelligente e con comunicazione col sistema elettrico.

- L'elettronica evoluta gestisce le singole celle, monitorando funzionamento, errori, bilanciamento e correnti di auto-scarica, per una miglior durata nel tempo.
- La batteria scambia informazioni sul suo stato di carica e di funzionamento e di conseguenza la centralina principale attua specifiche strategie (risparmio energetico se bassa carica, visualizzazione livello carica e autonomia, visualizzazione avvisi).
- Nel caso di inutilizzo o di bassa tensione, la batteria entra in uno stato di consumo quasi azzerato, che permette l'utente di non caricarla per un anno.
- C'è la possibilità, tramite PC, di leggere i dati della batteria e di effettuare l'aggiornamento del firmware.

Tutte le batterie sui modelli 2025 già rispettano la nuova normativa Europea che definisce nuovi e stringenti standard di sicurezza delle batterie (EN50604), che sarà obbligatoria per vendere le bici dall'Agosto 2025. A garanzia di una aumentata sicurezza per il consumatore sin da ora. Alcune famiglie di bici hanno allestimenti con lo stesso modello di batteria e capacità di taglie differenti. In questi casi è possibile per l'utente fare successivamente l'upgrade alla taglia più grande.

All AM80 Agile, AM80 Easy and EcoTronic systems use batteries with smart BMS. And all Ecologic models from 2025. This means that the battery management electronics (Battery Management System) are intelligent and communicate with the electrical system.

- *Advanced electronics manage individual cells, monitoring operation, errors, balancing and self-discharge currents, for better durability over time.*
- *The battery exchanges information on its charge and operating status and consequently the main control unit implements specific strategies (energy saving if low charge, display of charge level and autonomy, display of warnings).*
- *In the event of non-use or low voltage, the battery enters a state of almost zero consumption, which allows the user not to charge it for a year.*
- *There is the possibility, via PC, to read the battery data and update the firmware.*

All batteries on the 2025 models already comply with the new European regulation that defines new and stringent battery safety standards (EN50604), which will be mandatory for selling bikes from August 2025. To guarantee increased safety for the consumer starting now. Some families of bikes have setups with the same battery model and capacity of different sizes. In these cases, it is possible for the user to subsequently upgrade to the larger size.

TREKKING

Salire in sella ad una bicicletta Atala è il modo ideale per apprezzare i paesaggi che ti circondano, per assaporare le delizie delle mete che abbiamo raggiunto, per divertirsi facendo attività a contatto con la natura. Il cicloturismo sempre più diffuso abbina le due ruote alla scoperta di nuovi territori e all'enogastronomia territoriale affinchè il viaggio in bici possa restituire un'esperienza sensoriale.
Leggere, semplici da usare, precise nella frenata e nella cambiata. Telai con geometrie moderne e confortevoli.

Riding an Atala bicycle is the ideal way to appreciate the landscapes that surround you, to savor the delights of the destinations we have reached, to have fun doing activities in contact with nature. The increasingly widespread cycle tourism combines two wheels with the discovery of new territories and local food and wine so that the bike trip can provide a sensory experience.
Lightweight, easy to use, precise in braking and gear shifting. Frames with modern and comfortable geometries.

SERVICE

Gentile Rivenditore,
per essere in grado di consentire una rapida e veloce elaborazione delle domande e dei reclami e di offrire il miglior servizio possibile, è essenziale prendere conoscenza di tutte le informazioni necessarie riportate qui in forma sintetica.

Nelle pagine seguenti trova tutte le informazioni importanti riguardo la garanzia, le norme ed il trattamento dei reclami (ad esempio i danni da trasporto).

Ulteriori informazioni più specifiche sui nostri prodotti si trovano nel nostro manuale di base Atala / Whistle allegato a ciascuna delle nostre biciclette.

Dear specialist dealer,
to being able to grant a smooth and quick processing of your enquires and complaints and to offer you the best service possible it is essential that we receive all necessary information promptly and in compressed form.

On the following pages we woud like to provide all important information amongst others about warranty, rules and complaint processing (e.g. damage in transport).

Furthermore specific information about our products and these topics you can find in our Atala/Whistle basic manual, which is enclosed to each of our bicycles.

I PRATICA DI ASSISTENZA

Per garantire una rapida elaborazione, la pratica di assistenza in forma scritta e con tutti i documenti necessari, deve essere inserita nel nostro sistema assistenza.atala.it.

Di seguito informazioni importanti riguardanti i reclami relativi ai danni al trasporto e alla consegna non completa:
Le merci consegnate devono essere controllate per verificare la presenza di tutti i componenti e i danni esterni al momento del ricevimento.
Eventuali danni devono essere confermati dall'autista sul documento di trasporto in maniera estesa. Non è valida una "riserva di controllo", ma va riportata la causa esatta della riserva stessa (ad esempio "Riserva per collo aperto", "Riserva per collo schiacciato").
Eventuali danni e mancanza di componenti quali manuali, documentazioni del veicolo e/o componenti o accessori, devono essere comunicati in forma scritta entro otto giorni lavorativi dal ricevimento della merce.

INFORMAZIONI IMPORTANTI SUI RECLAMI DA PARTE DEI CONSUMATORI FINALI PRESSO RIVENDITORE SPECIALIZZATO

Con riferimento al prodotto oggetto della segnalazione, il consumatore deve rivolgersi al rivenditore con i seguenti documenti:
prova di vendita e data di consegna, quale prova di acquisto come fattura, scontrino o bolla di consegna del veicolo.
Una segnalazione valida da parte del consumatore, può essere effettuata solo tramite il rivenditore presso il quale è stato acquistato il prodotto e con il quale è stato concluso il contratto di vendita.
Se il proprietario della bicicletta si reca da un altro rivenditore rispetto a dove è stato acquistato per eseguire una segnalazione, Atala non dovrà sostenere eventuali costi derivanti, che devono essere pagati dal consumatore.
Atala si riserva il diritto di addebitare i costi di trattamento per reclami non giustificati.

INFORMAZIONI IMPORTANTI SUL RITIRO DI BICICLETTE

Richiedere il ritiro di un pezzo, di un accessorio o di una bicicletta difettosa tramite il portale dedicato all'assistenza.
Atala accetta solamente la consegna di biciclette che sono state ritirate secondo la procedura. Verranno respinte tutte le scatole restituite senza l'ordine di ritiro. Per il ritiro ingiustificato di biciclette, Atala si riserva il diritto di addebitare il trasporto, nonché una tassa di gestione.
I pedali devono essere smontati, il manubrio deve essere girato lateralmente e gli oggetti personali devono essere già stati rimossi dalla bicicletta da parte del rivenditore. Se ciò non dovesse avvenire, queste parti possono essere re-imballate in una scatola per la riconsegna. Atala non sarà responsabile in caso di perdita di alcuno di questi accessori.
Le batterie devono essere inserite nella rispettiva sede e devono essere spediti anche il caricatore, il display e le chiavi.
Deve essere inclusa una copia della fattura del consumatore e un modulo di non conformità completamente compilati.
Le biciclette ritirate devono essere pulite e trasportabili che significa imballate in custodia protettiva, inclusi manubrio e sella per evitare danni al trasporto. Lo spedizioniere non accetterà le biciclette non imballate. Se non è in grado di imballare la stessa come indicato, contatti il nostro team di assistenza.
Al momento del ritiro del veicolo, riceverà una copia firmata del documento di trasporto dal vettore.

Non accettiamo le seguenti ragioni per il ritiro:
- ordine non corretto
- regolazione del cambio o del freno
- centraggio della ruota

I COMPLAINT PROCESSING

To grant a quick processing the complaint, in written form with all necessary documents, has to be registered in our system.

Important information regarding complaints concerning transport damages and non-complete delivery:
The delivered goods have to be checked for completeness and external damage uponreceipt. Possible damages have to be confirmed by the driver on the consignment note in an extended way. Writing "Subject to check" is not valid, but you should write the real cause (for example, "Subject to check because box is open" or "Subject to check because box is crushed").
Hidden damage and non-completeness by missing manuals, vehicle documen and/or missing mounting parts or accessories have to be communicated in written form after eight working days at the latest.

IMPORTANT INFORMATION ON COMPLETE COMPLAINTS BY END CONSUMERS AT THE SPECIALIST DEALER

Besided the product concerned by the complaint, the consumer has to approach the dealer with the following documents:
Proof of sale, date of delivery which is a proof of purchase like invoice or receipt of the vehicle or part.
A valid complaint by the consumer can only be made at the dealer at which he bought the product that is the dealer with whom the sales contract was concluded.
If the vehicle owner instructs an other dealer than the dealer where the vehicle was bought with the complaint, Atala will not bear any possibly arising costs – these have to be paid by the customer himself.
Atala reserves the right to charge an additional processing fee for not justified complaints.

IMPORTANT INFORMATION ON BICYCLE COLLECTION

Arrange pick-up of a defective bicycle mouting part or accessory via our technical support system.
We can only accept delivery of bicycles which have been picked-up on our account.
We have to decline acceptance of any bicycles which are returned to us wihtout pick-up order.
For not justified bicycle collection we reserve the right to charge you the freight costs for transport and possible re-shipment as well as a handling fee.
Pedals must be demounted, the handlebar must be turned sideways and personal items should have already been removed from the bicycle by the dealer. If this should not happens, these parts may only be packed in the box loosely for reshipment. We will not be liable for any loss.
Batteries have to be put in the respective socket including charger, display and key(s) A copy of the consumer invoice and a completely filled compliant form has to be included.
Bikes retrieved by us have to be cleaned and in transportable state which means packed in slipcase, handlebar and saddle protection to prevent transport damage.
The forwarder will not accept unpacked bicycles. If you are not able to pack the bicycle as mentioned, please contact our service team.
Upon pick-up of the vehicle you will receive a signed copy of the cinsignment note from the carrier.

We do not accept the following reasons for a bike retrieval:
- incorrect order
- adjustment work at gear or brake
- wheel re-centering

GARANZIA

I prodotti Atala sono garantiti dal venditore secondo quanto previsto dalle attuali norme di legge vigenti in materia. Non sono coperte da garanzia Atala tutte le parti meccaniche ed i componenti per i quali vale la garanzia del fabbricante.

L'azienda si riserva il diritto di modificare le immagini ed i componenti in ogni momento e senza alcun preavviso.

WARRANTY

Atala's products are guaranteed by the dealer in accordance with the current Italian laws in force. All the other mechanical parts or components are not included in this warranty but are under the manufacturer's warranty.

The company reserves the right to modify pictures and the bicycle parts at any time without prior notice.

Prezzo di listino consigliato al pubblico, iva inclusa. Prezzi soggetti a modifiche da parte di Atala S.p.A.

The price included VAT and may be modified by Atala S.p.A.

Il peso della bici potrebbe variare in base alla taglia di circa il 5%.

The weight of the bike may vary according to the size by approximately 5%.

I DIFETTI DI MATERIALE

DIRITTI DEI COMPRATORI

Secondo le leggi di garanzia europee, aggiornate il 1° gennaio 2002, il rivenditore è responsabile per i difetti dei materiali per un periodo di due anni. Questo periodo inizia con la consegna del prodotto dal rivenditore al cliente. All'interno del periodo obbligatorio della durata di 2 anni, è da considerare anche il periodo di inversione dell'onere della prova fissato in 6 mesi oltre la data di consegna del prodotto. Ciò significa che il legislatore ha stabilito che qualsiasi difetto che si verifichi entro 6 mesi dalla consegna del prodotto era pre-esistente al momento della consegna stessa. Pertanto, in tal caso, qualora si verifichi un difetto, il venditore deve dimostrare che questo era inesistente al momento della consegna o è stato causato da uso improprio o usura correlata all'utilizzo. Passato questo periodo è il compratore a dover fornire questa prova.

LA RESPONSABILITÀ PER I MATERIALI NON COPRE:

Difetti causati da uso improprio o forza maggiore.
Qualsiasi parte del veicolo soggetto a usura e usura a causa dell'utilizzo, purché non vi siano difetti di produzione o difetti nel materiale. Difetti causati da uso improprio, manutenzione insufficiente e riparazioni, conversioni o sostituzioni delle parti del veicolo eseguita da personale non qualificato. Ciò include, ad esempio, la manipolazione del motore di una eBike. Difetti causati dalla mancata osservanza di una sostituzione potenzialmente necessaria dei componenti relativi alla sicurezza, come manubri, freni etc.
Difetti dovuti ad incidenti o ad altre influenze esterne, a condizione che non siano causate da componenti difettose o guasti del prodotto.
Riparazioni effettuate con componenti usati o guasti derivanti da tali riparazioni
Difetti dovuti all'uso durante una competizione, a meno che non vi sia una esplicita autorizzazione. Componenti montati successivamente che non rientrano nell'ambito della consegna al momento della vendita o errori derivanti dall'assemblaggio non professionale di tali parti.
Danni causati dal mancato rispetto del peso massimo consentito del veicolo o dall'utilizzo non conforme alle restrizioni all'uso (sedili per bambini, ecc.)
Veicoli di seconda mano in cui è già avvenuto un cambiamento di proprietà.

I MATERIAL DEFECTS

BUYER'S RIGHTS

According to the European Warranty laws, adjusted on January 1st 2002, the retailer is liable for material defects for a period of 2 years. This period starts with the delivery of the product from the retailer to the customer.
Besided the fundamental 2 year period, there is also the legal so-called reversal of the burden of proof 6 months past the date of the product's delivery. This means that the legislator set a fiction that any defect that occurs within 6 months of delivery of the product was pre-existent at the time of delivery. Therefore in this case if a defect occurs the seller has to prove that the defect was non-existent at the time of delivery or was caused by improper use or function-related wear. Past that period the buyer has to proof the reverse.

THE LIABILITY FOR MATERIAL DEFECTS DOES NOT COVER:

Defects that were caused by improper use or force majeure
Any parts of the vehicle that are subject to function-related wear and tear, as long as there are no manufacturing defects or faults in material
Defects that were caused by improper or insufficient case and unprofessionally performed repairs, conversions or replacement of vehicle parts. This includes, the manipulation of the drive system of an eBike.
Defects that were caused by disregard of a potentially necessary replacement of safety related components, like handlebars, brakes and so on.
Defects due to accidents or other usual external influences as long as they are not caused by faulty information or product failures. Repairs, that use second-hand components or faults resulting from such repairs.
Defects due to competitive use of a product that has no explicit competition clearance.
Retrofitted parts, that are not part of the scope of delivery at the time of the product transfer of faults resulting from the unprofessional assembly of such parts.
Damages caused by not observing the maximum permissible weight of the vehicle or not complying with the restrictions on use (child seat, etc).
Second-hand vehicles where a change of ownership has already taken place.

CONSEGNA DELLE PARTI DI RICAMBIO IN ANTICIPO

Si prega di notare i seguenti punti quando si richiede la consegna anticipata di un pezzo di ricambio prima di presentare un modulo di non conformità adeguato:
- I ritiri necessari saranno organizzati da Atala.
- Tutti i componenti di valore significativo che saranno anticipati, lo saranno in "conto anticipo": se su richiesta di Atala il componente difettoso non sarà restituito nel mese, il conto anticipo genererà una fattura di vendita del componente stesso.
- Le segnalazioni ingiustificate verranno restituite al rivenditore a proprie spese – Atala si riserva una commissione di gestione.
- Per le segnalazioni di difettosità di parti di veicoli o accessori dei marchi nella tabella sottostante, questi devono essere restituiti direttamente al produttore o al distributore con relativa ricevuta.

SPARE PART DELIVERY IN ADVANCE

Please note, before submitting a compliant, the following points when applying for a spare art delivery:
- Necessary pick-ups will be arranged by us.
- All parts with a significant value that are sent in advance, will be sent in "advance replacement" form: if under Atala request, the defective component will not be sent back within one month, an invoice for the component will be automatically generated.
- Not justified complaintes will be returned to the dealer at his own cost we reserve a processing fee.
- For complaints of vehicle parts or accessories by the below mentioned brands, these have to be returned directly to the manufacturer or distributor with receipt.

La richiesta di gestire attraverso Atala la pratica comporterà l'addebito dei costi al rivenditore e un significativo prolungamento dei tempi di soluzione della stessa a causa di un doppio passaggio. In questo caso inoltre, la decisione per la soluzione pratica rimane di completa pertinenza del produttore a cui è indirizzata.
