
Those who ride know...

ENVE® Composites

Sometimes you find yourself in the middle of nowhere. And sometimes, in the middle of nowhere, you find yourself. Whether it's making something that has never been made, or improving something that already exists, ENVE® products start as ideas. For us, those ideas almost always start in places like this.

COMMITMENT EQUALS RETURN

Road/Tri

At the core of riding asphalt is an uncompromising commitment to the pedals and the level of your return is directly proportionate to this commitment. At ENVE, we share the same concept in every product we create.

SMART ENVE SYSTEM

Reintroducing the Smart ENVE System in a more complete form...

- Dissimilar wheel geometry to address the front and rear zones of the bike individually.
- Optimized rim shapes achieve top of class aerodynamic performance.
- Unprecedented predictability and handling in variable real-world wind conditions.
- ENVE worthy stiffness, weight, and durability based on proven process.
- Now available as CLINCHERS.

SES 6.7

Pure all-around performance - fast, stable, and smooth... any questions?

	6.7 tubular	6.7 clincher
Weight	440 / 480 g	495 / 530 g
Depth	60 / 70 mm	60 / 70 mm
Width	26 / 24 mm	26 / 24 mm
Hole Count	20 / 24	20 / 24

Available as rims or complete wheelsets.

Timo Bracht and the SES 6.7 crushing the longstanding IM record on the notoriously windy Lanzarote course.

SES 8.9

The evolution beyond a traditional disc combo in a lighter, more effective package.

	8.9 tubular
Weight	500 / 545 g
Depth	85 / 95 mm
Width	26 / 24 mm
Hole Count	16 / 20

Available as rims or complete wheelsets.

SES 3.4

Hill climber with an aero attitude!

	3.4 tubular	3.4 clincher
Weight	340 / 380 g	435 / 450 g
Depth	35 / 45 mm	35 / 45 mm
Width	26 / 24 mm	26 / 24 mm
Hole Count	20 / 24	20 / 24

Available as rims or complete wheelsets.

THE CLASSICS

Everything has a beginning; for ENVE this was ours...

- Molded spoke holes and valve stem holes achieve lighter rims and better durability.
- Engineered braking surfaces provide smooth and consistent braking performance.
- Full bladder extraction means rims have consistent wall thickness, balanced feel, and no dead weight.

Road 45's

Proven performance on any stage.

	45 tubular	45 clincher
Weight	295 g	440 g
Depth	45 mm	45 mm
Width	22 mm	22 mm
Hole Count	20,24	20,24

The classics are alive and well. It is not uncommon to see United Health Care's "Blue Train" towing a stage winner to the line on a pair of ENVE Classics.

Road 65's

Depth without weight... the lightest in its class.

	65 tubular	65 clincher
Weight	360 g	500 g
Depth	65 mm	65 mm
Width	22 mm	22 mm
Hole Count	20,24	20,24

Road 25's

Cross wheel masked as a pure climber.

	25 tubular
Weight	250 g
Depth	25 mm
Width	22 mm
Hole Count	20,24

ROAD COMPONENTS

ENVE's products are laced with clever and subtle improvements that challenge traditional design. Those who ride know...

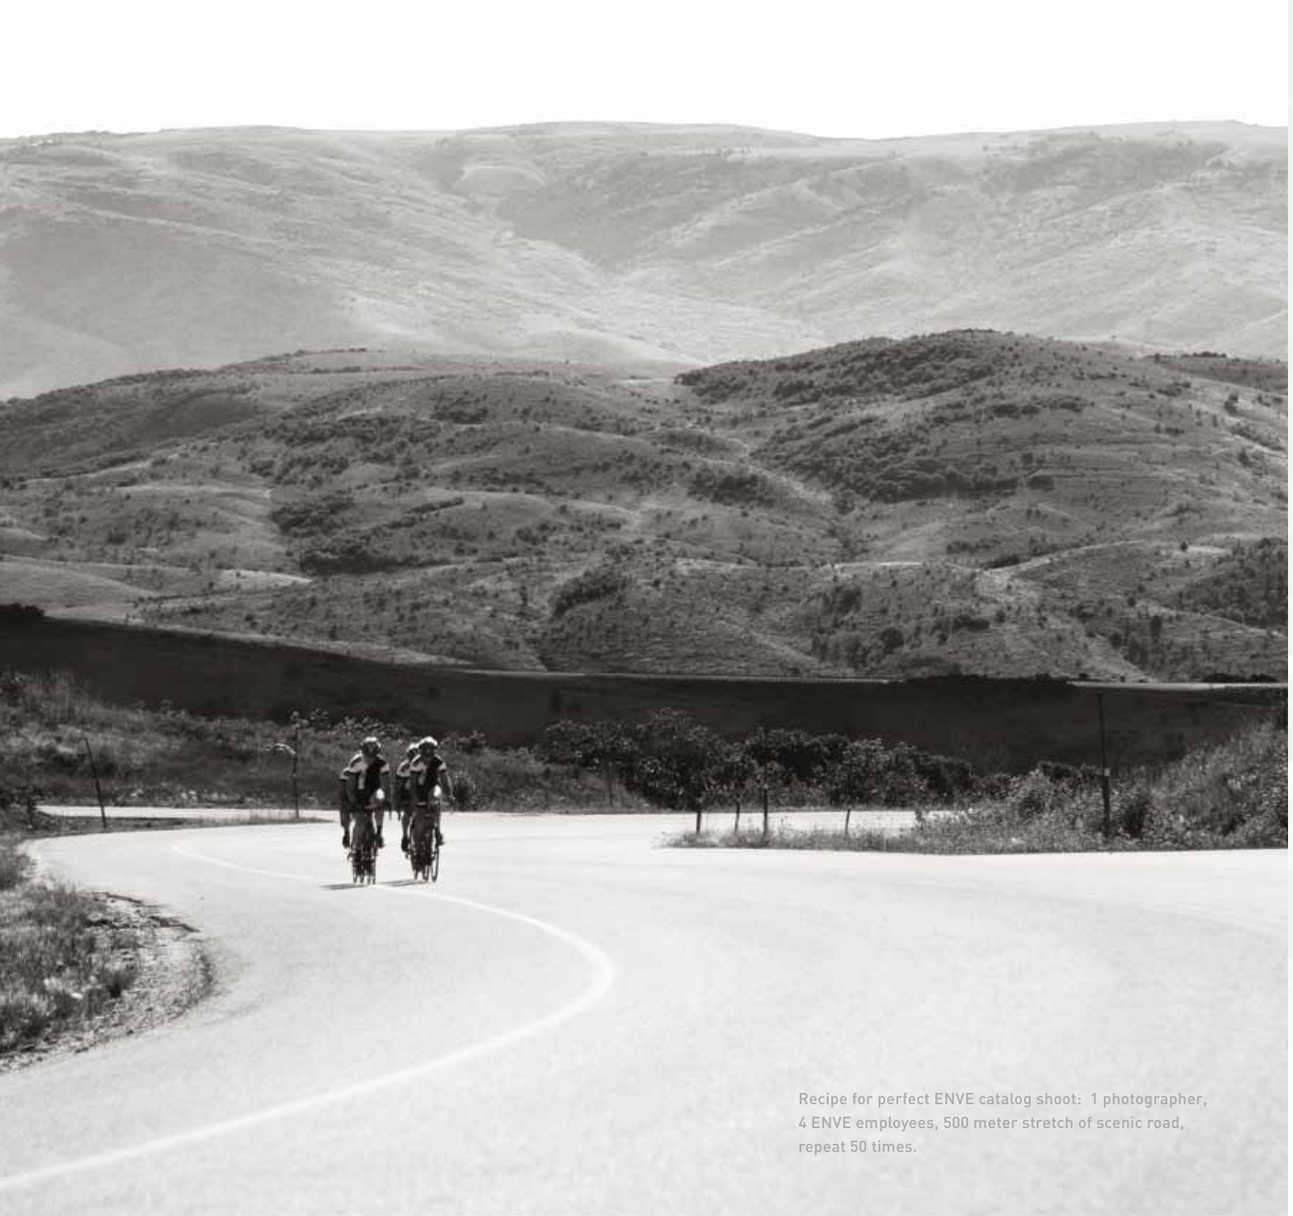

Road Bar

Multiple hand positions, dual cable routing, and ENVE's bar-end solution, all come together in a bar with improved ride feel.

	Compact	Standard
Weight	199 g	199 g
Reach	79 mm	85 mm
Drop	127 mm	144 mm
Clamp	31.8	31.8
Width (c to c)	38,40,42,44	38,40,42,44

Recipe for perfect ENVE catalog shoot: 1 photographer, 4 ENVE employees, 500 meter stretch of scenic road, repeat 50 times.

Stem

Lightweight carbon construction and titanium hardware make this a perfect complement to any ENVE road bar.

	Stem
Weight	120 g
Clamp	31.8
Length	90,100,110,120,130
Rise	+/- 6 deg.

Seatpost

An optimized shape capitalizing on the strengths of carbon fiber, paired with an efficient clamp design allows for maximum adjustment with single bolt simplicity.

	Seatpost
Weight	190 g
Length	400 mm
Diameter	27.2, 30.9, 31.6
Offset	0,25 mm

FORKS

ENVE's proprietary molding process produces forks that are 100% molded carbon fiber from steerer tube to dropout. No co-molding, bonding or drilling. The result is the lightest-weight, most durable and responsive fork available.

Road 1.0

295 grams with full weight performance... enough said.

	1.0 Fork
Weight	295 g
Steerer	300 mm
Rake	40,43,45,50
Axle-Crown	367

Road 2.0

The benchmark... now available in two configurations.

	2.0 Fork	Tapered 1.5"
Weight	345 g	350g
Steerer	350 mm	350 mm
Rake	40,43,45,50	43 mm
Axle-Crown	367	367

Road Disc

Is it the future? Time will tell. I guess you can see what we think...

	Road Disc 1.5"
Weight	435 g
Steerer	350 mm
Rake	43 mm
Axle-Crown	367 mm

Cross

ENVE cross forks are known for their confident feel and superior braking performance in the unpredictable cross environment.

	Cross 1.125"	Cross 1.5"
Weight	450 g	460 g
Steerer	350 mm	350 mm
Rake	47	47
Axle-Crown	395 mm	395 mm

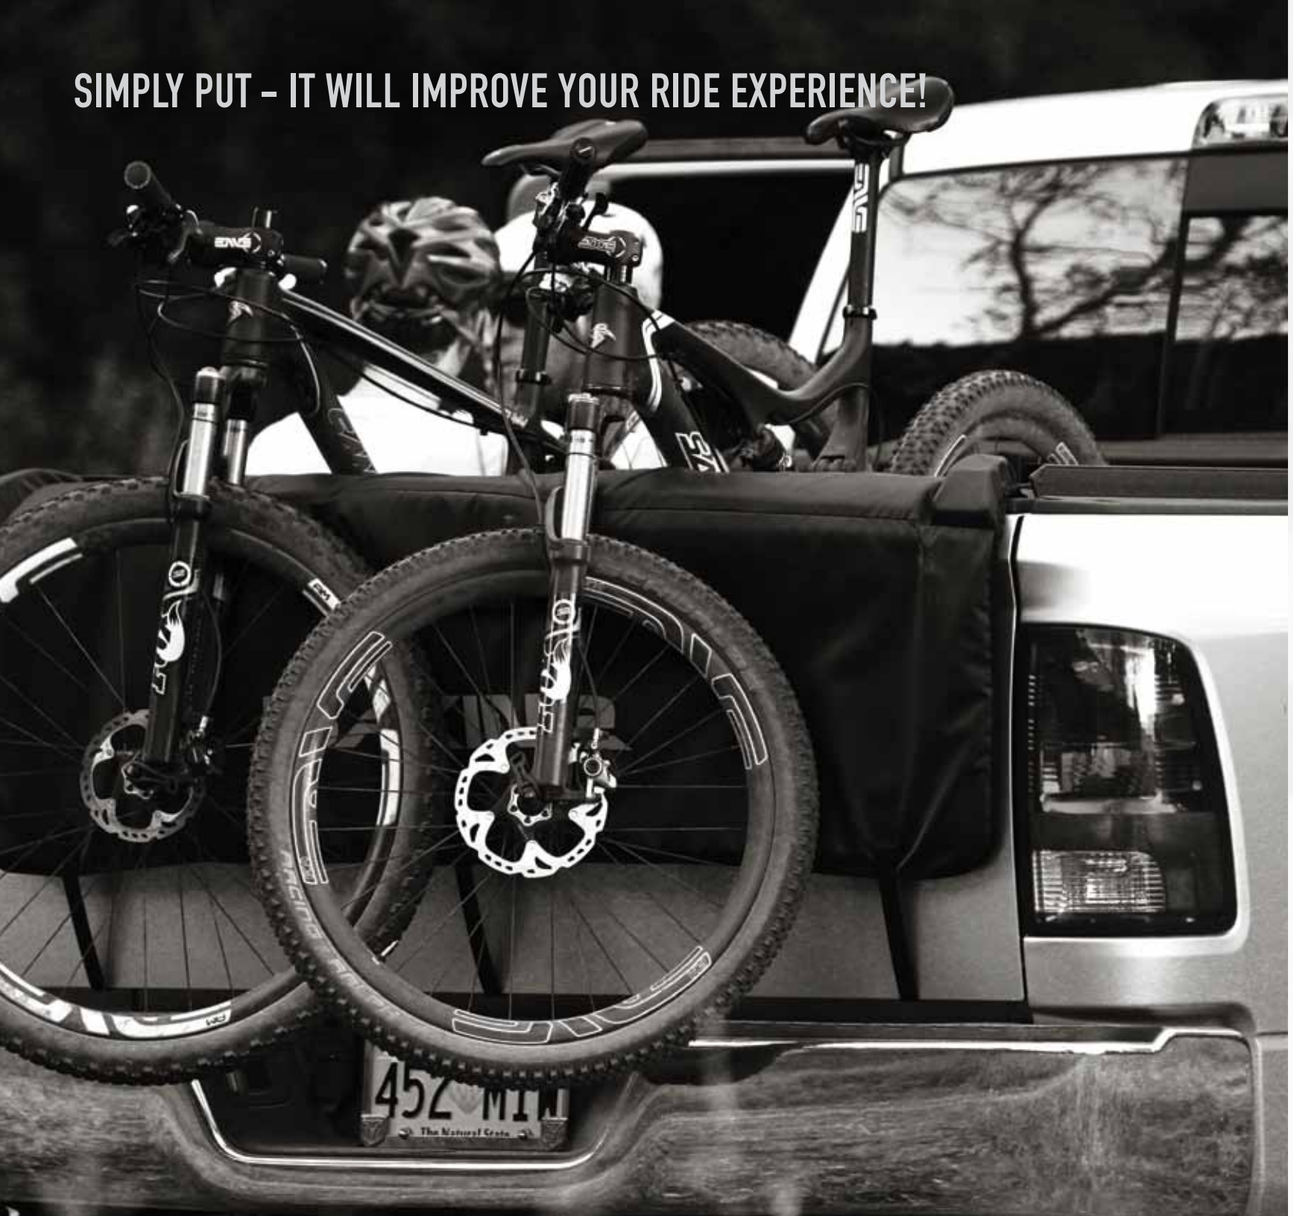

Cross Disc

ENVE's contribution to the evolution of Cyclocross.

	Cross Disc 1.5"
Weight	470 g
Steerer	350 mm
Rake	47
Axle-Crown	395 mm

ENVE Mountain

While we test the aerodynamics of our road products in sophisticated wind tunnels, we torture-test the durability and performance of our mountain product on the 200+ miles of single-track that surrounds our headquarters.

Mountain Rims

After five years of doing what others said couldn't be done, ENVE has pushed the edge again with the addition of the DH rim to the AM and XC lines. ENVE's philosophy is that bikes should be ridden more than they are wrenched on. To back that up, ENVE offers an unprecedented 5-Year Warranty and Lifetime Crash Replacement on all products that wear the ENVE name.

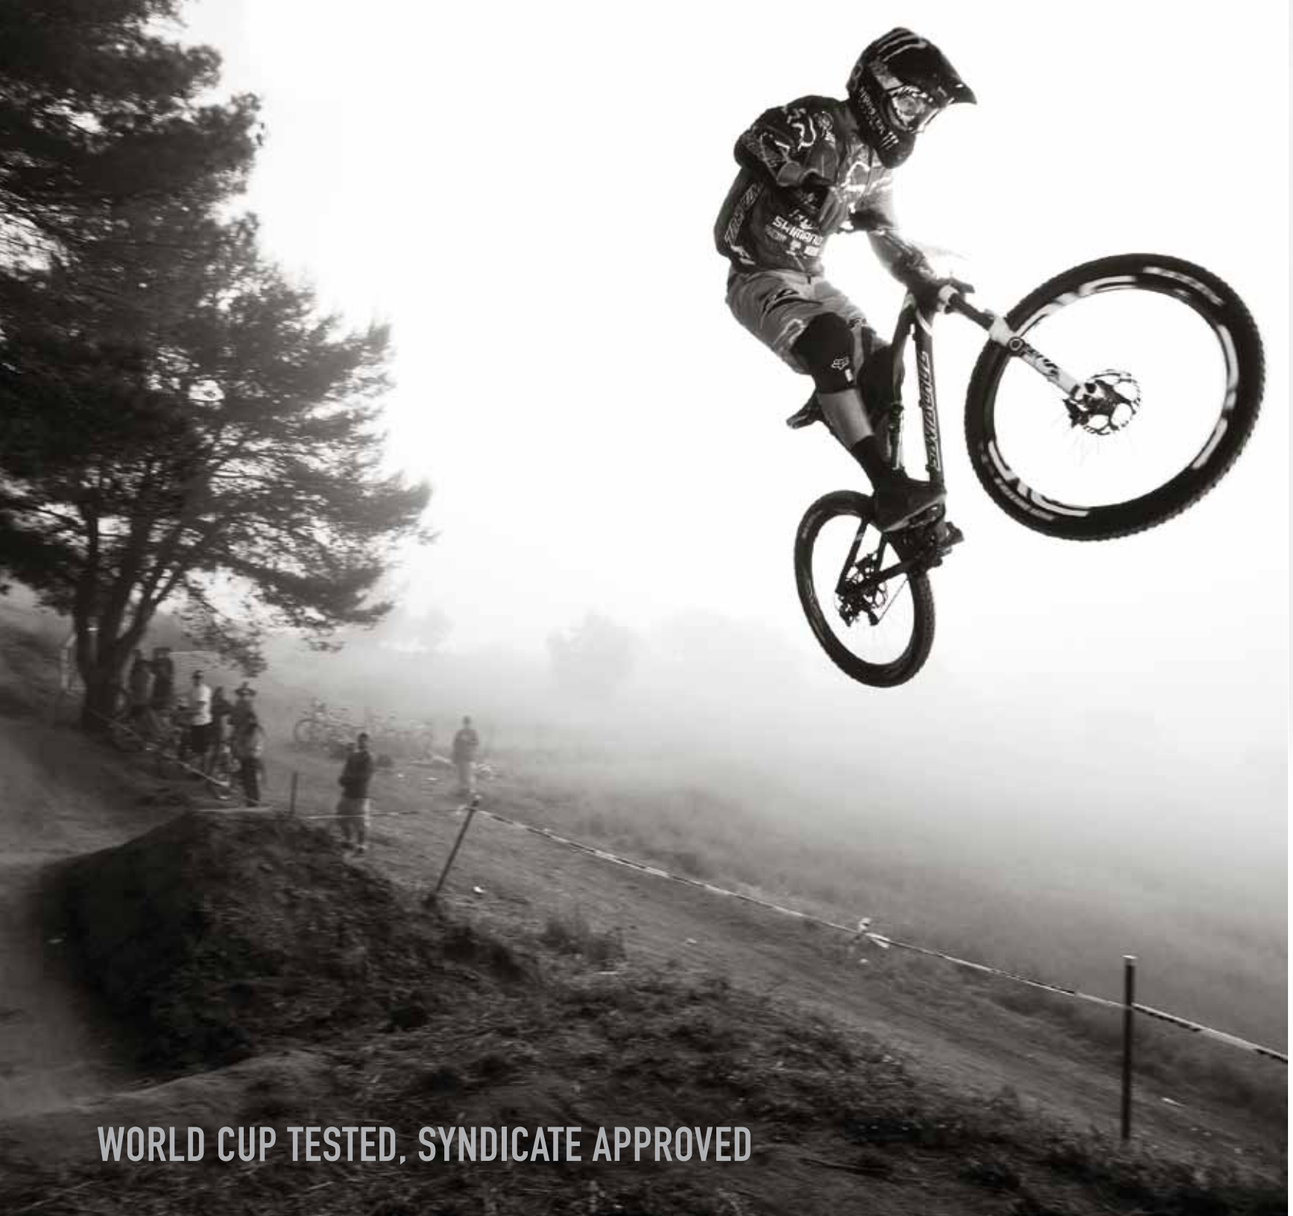

Mountain Tubeless AM

"The single best upgrade to the modern mountain bike."
Joe Graney – Santa Cruz Bicycles

	26" AM	27.5" AM	29" AM
Weight	405 g	410 g	450 g
Depth	31 mm	31 mm	31 mm
Width	30 mm	30 mm	30 mm
Hole Count	28 , 32	28 , 32	28 , 32

Available as rims or complete wheelsets.

Mountain DH

Through a partnership with Zyvex technologies we have produced the world's first successful full-carbon downhill rim.

	Mountain DH
Weight	495 g
Depth	31 mm
Width	30 mm
Hole Count	32

Available as rims or complete wheelsets.

Mountain Tubeless XC

What goes up, can come down... like a bat out of hell!

	26" XC	27.5" XC	29" XC
Weight	350 C / 260 T *g	360 g	385 C / 280 T *g
Depth	31 mm	31 mm	31 mm
Width	24 mm	24 mm	24 mm
Hole Count	28 ,32 C / 28 T *	28 , 32	28 ,32 C / 28 T *

Available as rims or complete wheelsets.
* Clincher / Tubular

MTN COMPONENTS

All ENVE products are put through extensive internal testing to establish new benchmarks in strength and durability. However, we know that it is only after many hours of riding singletrack, that the perfect balance of stiffness and ride feel is discovered.

Mountain Bars

Optimal feel and control in three configurations.

	Sweep	Riser	DH
Weight	175 g	175 g	225 g
Width	700 mm	700 mm	800 mm
Rise	0 mm	23 mm	23 mm
Sweep	9 deg.	9 deg.	9 deg.

Stem

Lightweight carbon construction and titanium hardware make this a perfect complement to any ENVE mountain bar.

Stem	
Weight	120 g
Clamp	31.8
Length	90,100,110,120,130
Rise	+/- 6 deg.

Seatpost

An optimized shape capitalizing on the strengths of carbon fiber, paired with an efficient clamp design allows for maximum adjustment with single bolt simplicity.

Seatpost	
Weight	190 g
Length	400 mm
Diameter	27.2, 30.9, 31.6
Offset	0,25 mm

ACCESSORIES

Robert Harling once said, “The only thing that separates us from the animals is our ability to accessorize.” We don’t know who Robert Harling is. We just found that quote on the internet. But he sounds like he gets it and might be a good fit here at ENVE.

Titanium Skewers

We’re not going to baffle you with BS. They are skewers. They work. And they’re titanium.

	Ti Skewers
Weight	62 g (set)
Length	170 mm F, 195 mm R

Brake Pads

The problem with making the fastest wheels around is that stopping them becomes a challenge. ENVE has developed a brake pad compound to optimally manage heat, minimize abrasion, modulate and perform in wet conditions. ENVE pads are supplied and required with all ENVE carbon rims and wheelsets.

Valve Extenders

ENVE valve extenders are available in 39mm, 55mm, and 95mm lengths. These allow external access to the valve core and are a must-have for tubular wheel sets.

Compression Plug

See the skewer description... the compression plug meets ENVE standards.

MTN Tubeless Kit

Kit includes one customized roll of tape (enough to cover two 29" rims) and two valve stems with removable valve cores for easy sealant renewal. Tubeless kits are supplied with all mountain rims and wheelsets.

Bar Plugs

In the event that your proprietary bar-end plugs fall out, wear out, or otherwise expire we have replacements to keep your bar fresh. Kit includes rubber cap and retention plug.

Rim Stripe

A necessary finishing touch for every ENVE road clincher rim, our stripe is specifically designed to cover the tire bed of the rim and protect your tubes from unnecessary punctures.

Tubeless Valve Stems

Our tubeless valve stems are for use with ENVE tubeless-compatible 26", 27.5", and 29" XC and AM rims. ENVE valve stems feature a removable valve core for easy sealant injection.

American-Made ENVE Product Guarantee

Lifetime Crash Replacement:

ENVE® Composites designs and manufactures products that will confidently survive the rigors of competition and riding at the highest levels. We also understand that unintentional accidents happen more often than any of us would like. There are pot holes, that rider who "took me out", distracted drivers, debris, animals, weather, and many other ways to crash or damage your bicycle. It may also be that you have put a ridiculous amount of CX miles in the sand and mud and actually wore out an ENVE product. While this hasn't happened...yet, should something happen not covered by warranty, we want to keep you lovin' your ENVE products with as little pain to the pocket book as possible. Toward that goal we offer a LIFETIME Crash Replacement Policy to the original owner.

Five-year No Hassle Warranty:

ENVE® Composites warrants all products to be free from defects in materials or workmanship for a period of FIVE YEARS from the original purchase date, (receipt required). This warranty is non-transferable and valid to the original purchaser of the product only.

Claims under this warranty must be made through the retailer where the original purchase of your ENVE product was made. Proof of purchase is required.
