AERO ROAD STEM

Our approach to aerodynamics has always been to findthe best solution for the complete system of the bike and rider, because we understand that there is more to aerodynamic performance than a low drag figure in the wind tunnel.This approach can be seen in our wheels, where we target stability alongside drag reduction to make you as fast as possible on the road in real conditions, where it counts. It can also be seen in our pioneering SES Aero Road Handlebar, which delivers a speed boost through rider positioning as well as its shape. The SES Aero Road Stem is the natural partner to that handlebar, using the same parallel design considerations. First, we developed a shape with reduced frontal area, smoother airflow, and lower drag. Next, we designed in beautifully simple methods for adjusting the angle and fine tuning the length.The result is a light weight stem that fits any of our handlebars and makes you faster.

Weight	170-190g
Length	100, 110, 120, 130, 140mm
Clamp	31.8mm
Angle	-12°/-7°/-17
Angle Adjust	+/-5°
Length Adjust	+/-2.5mm

Key Features:

- Integrated aerodynamic profile
- Length-offset shim for +/-2.5mm
- Angle-offset shim for -17° or -7° drop
- Integrated computer mount sold separately

Part #	Description	MSRP
300-1020-001	Stem Aero Road 100 7-17adj BLK	$300.00
300-1020-002	Stem Aero Road 110 7-17adj BLK	$300.00
300-1020-003	Stem Aero Road 120 7-17adj BLK	$300.00
300-1020-004	Stem Aero Road 130 7-17adj BLK	$300.00
300-1020-005	Stem Aero Road 140 7-17adj BLK	$300.00
