ROAD DISC FORK THRU-AXLE

Like all ENVE forks, the Road Disc Thru Axle Fork uses a proprietary molding process that is 100% carbon fiber from the tapered 1.25" steerer tube to the new 12x100mm thru-axle dropout. This unique design allows for maximum stiffness to cope with the stresses of disc brakes and eliminate brake rub on hard, out of the saddle efforts. To keep your road disc brake bike looking clean, we included internal routing of the brake housing and flat-mount brake calipers. Tire clearance has also been increased to satisfy the demand for large volume tires.

Wheelsize	700c
Fork Weight	425g
Rake	43, 50mm
Axle to crown	370mm
Tire clearance	23-32mm
Steerer	1.25"tapered
Steerer length	350mm
Rotor size	140 or 160mm
Axle	12x100mm Thru-axle
ENVE Part No.	43mm rake: 200-2005-001 50mm rake: 200-2005-002
MSRP	$575

Key Features:

- Available in two rakes
- Molded in one-piece from steerer to drop-out
- Flat Disc Brake Caliper Mount
- Compatible with 140 and 160mm rotors
