SES 5.6 DISC CLINCHER

Disc brake technology offers improved braking performance for amateur and professional road cyclists alike. As a wheel manufacturer, carbon fiber rim-brake surfaces are a major design constraint that limits weight savings and rim shape. By removing the constraints of a braking surface, we can completely rethink the shape of the rim. The SES 5.6 Disc features the patented SES rim curvature but it has been further optimized for disc brakes. Additionally, the SES 5.6 Disc carbon fiber clinchers and tubulars are very light weight because the material used for heat management has been eliminated. This allows for a more structurally efficient and impact resistant rim. Finally, the SES 5.6 Disc carbon clincher is road tubeless compatible, but it can still be run with standard inner-tubes and tires. Like the current generation SES carbon clinchers and tubulars, the 5.6 Disc has been aerodynamically optimized around 25mm tires.

	Front	Rear	Wheelset
Rim Weight:	450g	470g	
DT240 CL:	707g	821g	1528g
King R45:	734g	869g	1603g
Depth:	54mm	63mm	
Width	28.75mm	28mm	
Hole Count:	24	24	
ERD:	550mm	533mm	

Key Features:

- Ground up disc brake specific aero development
- Asymmetric rim geometry front to rear
- Dissimilar rim shapes front and rear
- Lightweight
- Road Tubeless Compatible
- Optimized for 25mm tires
