SES SERO BAR

In 2010 we launched the Smart ENVE System (SES) with its class leading speed, strength, and stability. In the same fashion, the SES Aero Bar underwent extensive in-frame development in the wind-tunnel to achieve maximum aerodynamic efficiencies and performance.

True to ENVE's philosophy, the SES Aero Bar offers unlimited adjustability for the rider seeking comfort and the ideal aero position. With multiple base bar, arm rest, and extension positions, the SES Aero Bar provides optimal rider fitment.

Like all ENVE products, the SES Aero Bar

Weight:	650 - 825g
Base Bar Width (c to c):	40cm
Base Bar Drop:	± 21mm
Clamp:	31.8mm
Extensions:	JBend, SBend (2 in1)
Extensions Angle Adjust:	0-15 deg
Height Adjust Spacers:	5mm, 10mm, & 20mm
Arm Rest/Extension Width:	86mm (narrow), 173mm (wide)
Pad width center to center:	Min. 125mm - Max. 200mm
Stack Height of Arm Rest/Extension:	15mm / 90mm
