Fuji's history is rich with exquisitely designed, high-performance road bike models. Our high-test racing bikes (winner of the 2004 World Championships), exceptional women's models (awarded Bicycling Magazine's Best Women's Bike), specialty performance line (triathlon, time trial, track, cyclocross, touring and tandem bikes) and Forza bikes (sleek, updated classics) are all the result of careful construction and attention to detail. One ride and you'll see why the Fuji name was built on these magnificent bicycles.

Downhills, uphills, crowded urban streets, twisted single-track, boulders, rocks, roots or pot-holes, Fuji's mountain and jump bikes give adrenaline junkies what they crave—a rock-solid, high-performance ride. Because, after all, when you've got confidence in your machine, the rest is…just plain frolick and fun.

In the days where low carb diets and Atkins™ friendly menus engulf our every turn, staying in shape has become a part of our daily routine. However, racing or being uncomfortable on a road bike isn't quite what you had in mind and neither is conquering the tallest mountain. What you'd like to do is join a local club or ride around with family and friends, keeping in shape without spending too much and being on a bike built for your lifestyle.
