PEUGEOT CYCLES

First compare the quality of the components used in the construction of a Peugeot car or a Peugeot bicycle with those used by other manufacturers. Over 100 years ago Peugeot first started making bicycles. Research since that time into choice of components, design and market requirements bring Peugeot into 1976 with an outstanding range of bicycles. The Company now ranks as one of the foremost producers of quality machines.

AE8

Sports Tourer

A cycle with an outstanding choice of components. Full length stainless-steel guards. Rear sports carrier with straps. Centre pull brakes. Derailleur gear. 27″ H.P. tyres. Rear wheel spoke protector. Alloy pump. Reflector pedals.

5 gear Frame sizes: 54, 57, 60 cms.
10 gear Frame sizes: 54, 57, 60, 64 cms.
COLOURS: Violet Flam, Mediterranean Blue Flam.

Principally, Peugeot cycles are of 100% French manufacture. The frame, forks, mudguards and carrier are manufactured and the cycles assembled by Peugeot Cycles at Beaulieu, in the Doubs region, near the Swiss border. The frames have a hand-painted finish, following 3 coats of electrostatically sprayed paint and a coating of varnish. Peugeot Record de Monde transfers and Peugeot head tube emblem together with Bocoma or Nervex lugs and Peugeot or Reynolds tubing are standard on most cycles.
