PEUFECTION SETS THE PACE

PEUGEOT

Cycles built to

Across Europe and beyond, the name Peugeot is synonymous with the very highest levels of cycle building excellence and innovation.

It is this established commitment to state of the art technology that is the essence of our superbly stylish new range of racing, touring, all-terrain and city commuting cycles: the 1987 Peugeot Peufection Collection.

You'll find this innovation and dedication to technology reflected in every cycle in our comprehensive catalogue. From the keen racing cyclist to the fun, run-around enthusiast, our care, craftsmanship and sophisticated construction techniques are allied to the most modern materials and design flair.

This is highlighted by our use of carbon fibre, the sophisticated, new generation material born of "space race" technology. It offers unbeatable qualities of extreme lightness and super-strength: qualities that can be found in our aptly named **Fibre de Carbone** high performance racer.

Further proof of Peugeot innovation is found in the introduction this year of **Comete,** the first and undoubtedly finest cycle of its kind to appear on the world market. An all-aluminium, track-tested racing cycle with a mechanically assembled frame that eliminates brazing and glueing from the frame making process to provide new levels of aerodynamic efficiency and high speed performance. A truly revolutionary machine that inherits the Peugeot pedigree for speed, strength and supreme lightness.

FABRICATION PEUGEOT HLE HAUTE LIMITE ELASTIQUE

In our ceaseless search for material and component Peufection, **HLE** Tubing also plays a prominent part in Cycles Peugeot production for 1987. High Limit of Elasticity (HLE) is a new generation Mangalloy tubing that combines ultra lightness and geometric design versatility with impressive frame rigidity and strength.

Peufection

HLE Tubing is featured on many of the machines in the Peufection Sports range, as well as the Peugeot exclusive 'lugless' welding technique, which provides incomparable lightness and high tensile strength.

In our exciting and strikingly attractive **Paris Express,** we present yet another totally new concept in cycling innovation: a model that brings the comfort, sturdiness and durability of an all-terrain cycle to the streets of the city.

But construction technology is only part of the Peugeot commitment to Peufection. Each cycle in our 1987 range features the exclusive Peugeot corporate graphic design. The distinctive Peugeot stripes are uniquely varnished over to give a lifetime's recognition of the symbol that stands for style.

Many of the models in this 1987 catalogue are completely new in terms of both material and component specifications.

Also, the latest vibrant fashion colours have been introduced to give you the best possible choice.

The Peugeot 1987 Collection is Peufection personified: a range of cycles that sets the pace in the race for style and quality.

MEN'S RACING RANGE

From the acknowledged pacesetters in world cycle building technology comes a superlative range of superbly constructed and technologically advanced racing cycles. A range which has been specifically created to give the serious, super-fast competitor all the sophisticated and race-bred performance features they seek. From our revolutionary new Comete all-aluminium, ultra-light performance cycle to light, strong and superfast models made for the discerning, top-class club rider, each cycle has been produced to the peak of Peugeot Peufection with the same Peugeot frame racing geometry design – the very reason we've named them after the mountains of the world's most famous and demanding cycle race, the legendary Tour de France.

Peufection Guaranteed

Cycles Peugeot guarantee their bicycles against manufacturing or material defects from the original date of sale as follows:-

Frame and Forks for 10 years; Parts for 1 year.

This Warranty covers normal use, but not failure resulting from misuse, alteration from original specification, accident damage, neglect, incorrect assembly/maintenance or fair wear and tear.

Under the terms of this Warranty, Cycles Peugeot will bear the cost of replacement parts, for the period stated, and any labour charges incurred up to one year after purchase, provided that an authorised Peugeot Dealer processes the claim.

This guarantee does not seek to diminish any consumer statutory rights. It is offered to the original purchaser and as such is not transferable.

In the event of any problem, please consult a Peugeot Dealer.

Please Note:

No bicycle can be considered indestructible and therefore this Warranty only applies to normal riding conditions and fair wear and tear.

Except for Mountain Bikes, no bicycle is guaranteed for use 'off the road'. In the case of Mountain Bikes, failure due to lack of regular maintenance, abuse or misuse cannot be guaranteed.

In all cases, we recommend that regular inspection/maintenance is carried out.

The Peugeot policy of continually up-dating and improving their range means that the specifications and appearance of all bicycles in this catalogue may be subject to alteration at any time.
