Australian Bicycle Collection 1988–1989

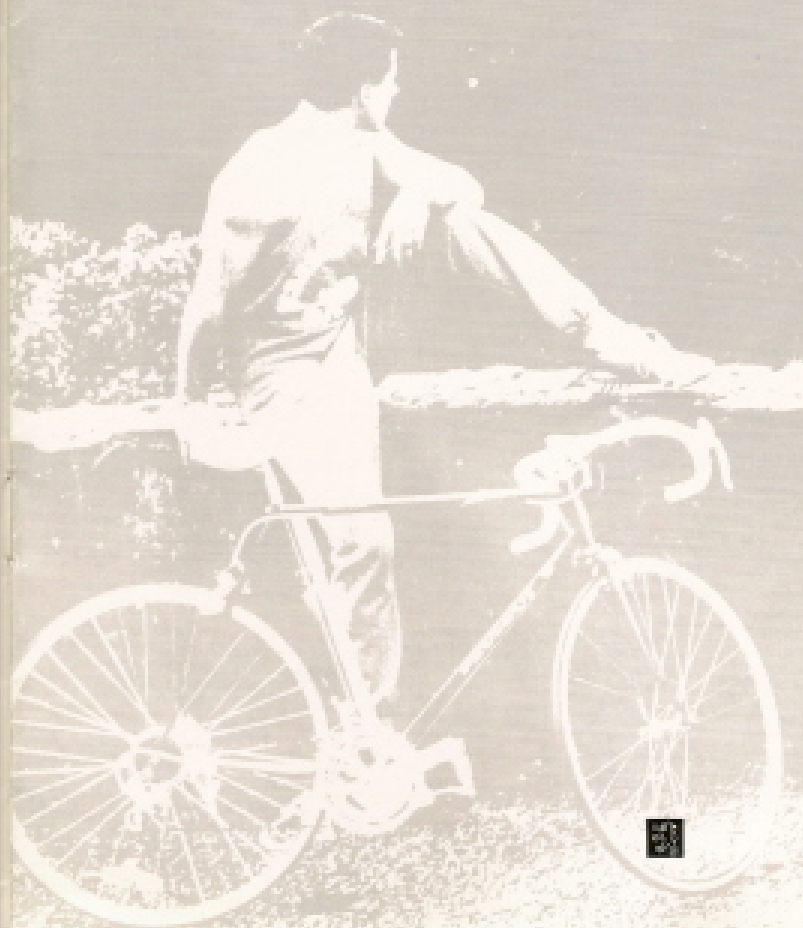

PEUGEOT
CYCLES

SINCE THE BEGINNING, THE PHILOSOPHY AT PEUGEOT CYCLES HAS BEEN BASED ON PRODUCING A BICYCLE THAT DISPLAYS FINE DESIGN, FAULTLESS WORKMANSHIP, AND EXTRAORDINARY RELIABILITY. THIS IS THE REASON THAT PEUGEOT CYCLES IS THE MOST WIDELY SOLD BICYCLE IN THE WORLD TODAY. WHILE OUR MODELS HAVE CHANGED SOMEWHAT SINCE OUR FIRST BICYCLE, OUR QUALITY HAS GONE FROM STRENGTH TO STRENGTH. PEUGEOT CYCLES NOW TAKES PLEASURE IN PRESENTING OUR 1988-1989 RANGE OF BICYCLES MADE ESPECIALLY FOR AUSTRALIA AND HER RIGOROUS TERRAIN. FROM THE EXOTIC CARBON PRO, THE ONLY BIKE OF ITS KIND OFFERED FOR SALE IN THE WORLD, TO A RANGE OF MOUNTAIN BIKES INCLUDING THE FABULOUS EUROPE EXPRESS, TO LADIES TOURING BIKES THAT MANUFACTERERS THE WORLD OVER STILL TRY TO EMULATE. IN CHOOSING A PEUGEOT BICYCLE, YOU ARE CHOOSING A SUPERBLY CRAFTED FRENCH FRAME FITTED WITH COMPONENTS HAND PICKED TO GIVE THE HIGHEST PERFORMANCE. A BICYCLE TO LAST A LIFE TIME, AND A BICYCLE FOR ALL SEASONS.

CARBON PRO

THE ADVANCE OF TECHNOLOGY

Until recently, composite high-performance materials, or structural materials, were entirely reserved for the aircraft and space industries. Now they are widely used in competitive and mechanical sports.

The sportsman knows he needs to examine his equipment in the light of innovations to remain the best. Here optimum use of energy comes into its own. Competitive sports have kept an open mind towards the continuous search for technological innovations, as witness the many "sports" applications of Structural Composite Materials.

A FRAME WITH HIGH REQUIREMENTS

A frame built with high requirements:

- lightness
- rigidity
- guaranteed performance in time
- resistance to outside influences.

The carbon Fiber/Epoxy Resin frame of PEUGEOT CYCLES meets these standards fully.

A WORLD FIRST

Aware of the exceptional qualities of these new materials, PEUGEOT CYCLES and ZODIAC have combined their efforts to develop the best frame on the market.

The most widely sold bicycle brand in the world, PEUGEOT CYCLES has compelled recognition over the past few years by developing a frame made of 3 carbon fiber tubes. PEUGEOT CYCLES has continued to innovate and now offers a frame composed of carbon tubes only, including the rear triangle and whose carbon head unit is a world first.

The front assembly of the frame is the point where all pedalling efforts come together. The diagonal tube tends to be twisted whereas the horizontal tube tends to be flexed. They come together at the front, producing complex requirements which can be evaluated with data processing resources.

This module adjustment makes the CARBON PRO PEUGEOT frame extremely responsive, as witness the very lively pedalling response.

***V*ENTOUX**

Handbuilt by Peugeot France, from Reynolds 501 tubing and featuring Shimano 105 S.I.S., SLR brakes, and Bio-pace components, this bike is for the most aggressive rider. Tight racing design yet at a reasonable price makes the Ventoux an easy choice for triathletes and road racers alike.

890

*M*ONT *B*LANC

Using Peugeot 'HLE' tubing with AR profile design, this bike comes complete with colour co-ordinated chainwheel and sachs – huret derailleurs, and would ideally suit any rider with an eye for excellence.

585

AUBISQUE

An entry level road bike featuring the same fine Peugeot frame tubing and design as above but with Shimano S.I.S. gear system.

500

375

AVORIAZ

100% handmade french frame & fork, fitted with Shimano transmission, this economy model displays the features that Peugeot became famous for. Strength, reliability, and careful design.

***E**UROPE **E**XPRESS*

Our top shelf mountain bike for those who demand the best. Our fully handmade Reynolds 531 oversize tube frame and fork is matched with the legendary Shimano Deore XT MTB components to make this one of the finest mountain bikes ever.

ALPINE ***E***XPRESS

Using Reynolds 501 MTB tubing, this bike is made available with 18 speed Shimano S.I.S., SLR brakes, and Bio-pace transmission to cope with the most rigorous terrain.

CANYON EXPRESS

These mountain bikes are a matched pair. Both feature oversized 'carbolite' tubing in a frame completely handbuilt in France with 15 speed S.I.S. transmission and alloy wheels.

VT1 LADIES MTB

CHAMBORD

Classical lines and quiet sophistication make this top of the line ladies tourer an experience to ride and affords the owner the envy of others.

CASSIS

A lightweight yet robust and reliable bicycle, displaying the fine features of skilled french handcrafting and exemplary road handling.
