DBS® Frame Technology

DBS is a unique process in which tubes are assembled together without conventional lugs and unsightly welds. The result is a lighter frame, more aerodynamic, more rigid and much more stylish. All bikes have a frame, but only the DBS frames ensure you of increased performance.

ISS® PROCYCLE SYSTEM

450
500
550

ISS is a bicycle size that lets you chose the size of bicycle the best suited for a person, in other words, to chose the ergonomic bicycle size.
The ergonomic bicycle size is like clothing: you chose the ideal bicycle size and we adjust the saddle and the stem for your best ergonomic position.
An ergonomical position is the one that gives you the more comfort and performance.
ISS is before anything the size that fits you.
