CYCLE RANGE

PEUGEOT

www.bikeboard.com/peugeot

The name Peugeot and its association with the world of cycling goes back more than a century. Today, as it did all those years ago, the company still produces some of the finest and innovative bicycles available in the world — based on the sound principles of providing good value for money and a quality product range.

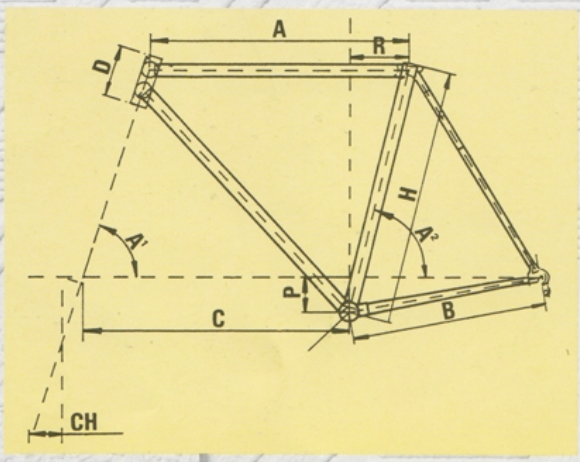

The many successes enjoyed at competition level has provided Peugeot with invaluable knowledge. Knowledge that is reflected in the design and construction techniques of many of the new models featured in this brochure.

Whatever your preferred style of riding, we believe you will find something from our latest range to meet your requirements — and we sincerely hope — a cycle to be proud of.

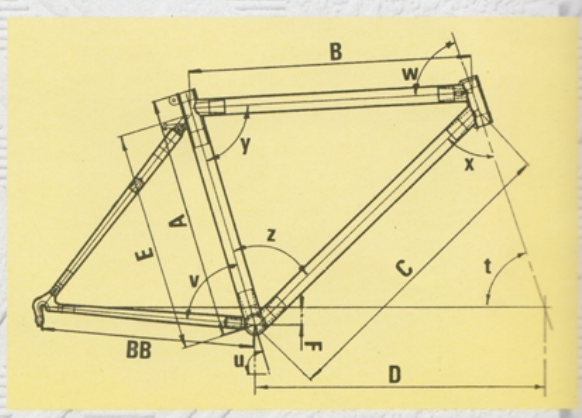

GEOMETRY FOR COMPETITION & PROFESSIONNEL RACING FRAMES

SIZE	A	B	C	D	H	P	R	CH	A1	A2

All measurements in cm.

PEUG

www.bikeboompeugeot.com

All Peugeot cycles are produced at the European Manufacturing Unit in Romilly sur Seine, which is situated some 60 miles to the south east of Paris in France. The factory has ISO 9001 certification (the european equivalent of BS5750). This means that stringent quality checks have to be made at each stage of the production process to maintain the required standards. Although common in the automobile industry, this system of quality regulation is still very rare in cycle production. A measure of Peugeot's commitment to quality assurance that many other brands cannot match — a measure of our commitment to you.

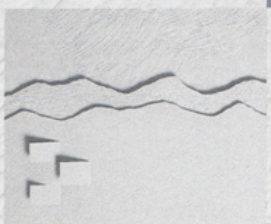

www.bikeboompeugeot.com

This season sees the introduction of the new, very affordable, all Aluminium range, crafted in 5086 series alloy, giving superb strength to weight ratios; a brand new range of Grisley designed lightweight carbon quartz framed bikes plus refined frame geometry especially noticeable in the improved Energy range.

ALL TERRAIN

All models feature the latest componentry with many bikes carrying the Aheadset system which uses threadless steerers and clamp-fit stems.

FLAMINGO

Code: FL20
Colour: PEARL PINK. **Size (cm):** 35.
Frame & Fork: HLE TUBING (DIRECT BRAZING SYSTEM). UNICROWN FORK. **Gears:** SHIMANO 6 SPEED STI. UNDERBAR SHIFTER. **Chainset & Pedals:** SINGLE CHAINWHEEL. MTB PEDALS. **Wheels:** CHROMED RIMS. CHROMED HUBS. **Tyres:** 20 x 1.75 BLACK GUMWALL. **Brakes:** LOW PROFILE BLACK CANTILEVER. **Handlebar & Stem:** BLACK BARS. BLACK ITM T-BONE STEM. **Saddle & Pillar:** ANATOMIC SADDLE. BLACK SEAT PILLAR.

MIAMI 26

Code: VT26EFPC
Colour: TWO-TONE FUCHSIA & WHITE. **Size (cm):** 44, 50.
Frame & Fork: HLE TUBING (DIRECT BRAZING SYSTEM). UNICROWN FORK. **Gears:** SHIMANO TY20 12 SPEED INDEX. **Chainset & Pedals:** THUN COTTERLESS. ANTI-SLIP BLACK PEDALS. **Wheels:** ALLOY RIMS. ALLOY HUBS. **Tyres:** 26 x 2 GUMWALL. **Brakes:** LOW PROFILE BLACK CANTILEVER. **Handlebar & Stem:** BLACK BARS. BLACK ITM T-BONE STEM. **Saddle & Pillar:** ANATOMIC SADDLE. BLACK PILLAR. **MIAMI 24 & 20 ALSO AVAILABLE.**

BULLET

Code: 4597/4597UA
Colour: VIBRANT BLUE OR BLACK. **Size (cm):** 45, 50, 54.
Frame & Fork: HI-TENSILE STEEL TUBING. UNICROWN FORK. **Gears:** SHIMANO 18 SPEED INDEX SIS. **Chainset & Pedals:** COTTERLESS TRIPLE CHAINWHEEL. MTB PEDALS. **Wheels:** ALLOY RIMS. CHROMED HUBS. **Tyres:** 26 x 2 GUMWALL MTB PATTERN. **Brakes:** LOW PROFILE CANTILEVER. **Handlebar & Stem:** BLACK BARS. BLACK T-BONE STEM. **Saddle & Pillar:** ANATOMIC SADDLE. BLACK SEAT PILLAR.

Nothing beats a racing bike for speed, style and excitement on the road. With an even wider choice of designs, performance specifications and alternative frameset materials — still nothing beats a Peugeot. Look out especially for the innovative Mavic Zap System on the Team Line 1100Z and new Team ZX1.

This section provides a short form introduction to the range of quality accessories available through the nationwide network of Peugeot stockists. Featuring many of the leading brand names in cycling development technology, each line represents the very best in design, specification and standards of quality.

ACCESSORIES

www.bikeboompeugeot.com

BELL
The world's number one cycle helmet. Bell has been at the forefront of helmet technology for nearly four decades with its motor cycle and motor racing helmets. In 1975 they invented the modern hardshell helmet for cyclists. Their track record for innovation is impressive, especially with the introduction of the 'Pump' helmet. All Bell cycle helmets exceed U.S. Snell and ANSI safety standards. Attention to detail particularly in design, manufacture and safety standards is why Bell are the market leaders.

LOOK
The Look Pedal System is the most universally-accepted clipless pedal system in the world today. Many top class race honours have been won on their pedals.
Also noted for their carbon fibre technological skills, Look 'Monoblade' and tubular framesets are gaining increasing popularity, particularly amongst many of the top professional teams. A testimonial in itself to the proven design and performance of this well-designed product range.

RITCHEY
The Ritchey philosophy is to achieve the ultimate lightweight bike — without sacrificing strength. Their already renowned WCS range of products are currently some of the lightest of their type in the world — a product range from the market leaders in lightweight component technology. Follow the Ritchey philosophy and 'cut the fat'.

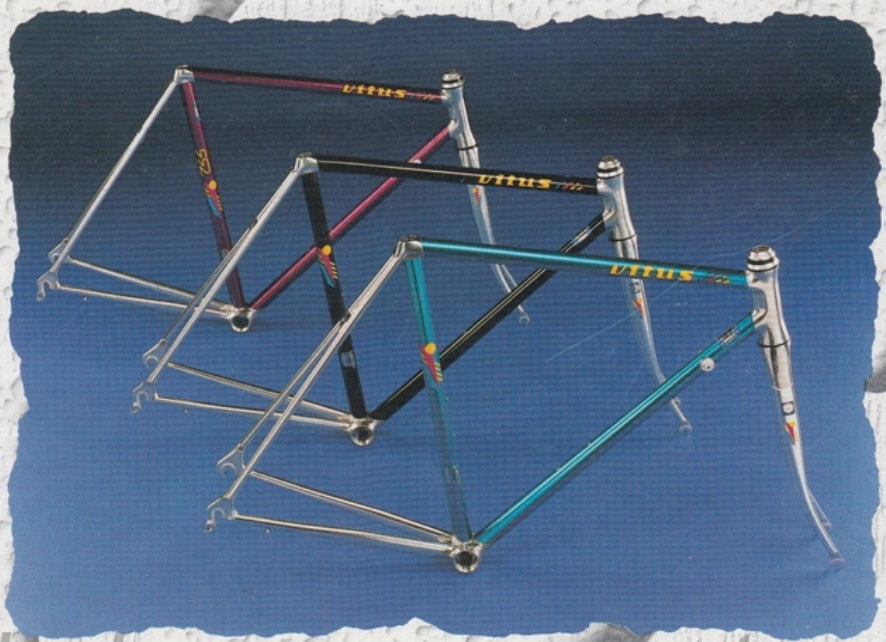

VITUS
Pioneers of the modern aluminium racing frame, Vitus are the market leaders in this field. The '992' with its oval-shaped tapered tubes offers riders a strong, lightweight and responsive frame.
Vitus also produce the spectacular carbon 'Monocoque' ZX1 frameset, currently used by Team Peugeot riders.

GRISLEY
Now with an established following, Grisley's attractive and well-engineered framesets are available at affordable prices. Framesets as used in top competitions by Peugeot team riders.

WOLBER
One of the best-known names in tubular racing tyres, Wolber also offers probably the best value for money available. Their popular SP1 system gives added puncture resistance without loss of grip or performance and provides a greater mileage per tyre.

You can constantly find new products from Peugeot. Look for the titanium and alloy parts arriving from 'Bici' and top quality 'Nalini' brand clothing to be introduced shortly... Keep watching, there will be more...

www.bikeboompeugeot.com

GUARANTEE

Peugeot cycles are guaranteed against defects in materials and workmanship from the original date of purchase as follows : Frame and standard forks : 10 years. Suspension fork : 1 year. Parts : 1 year.

The warranty covers normal use but not failure resulting from misuse, alteration from original specification, accidental damage, neglect, incorrect assembly, incorrect or lack of maintenance, fair wear and tear, exposure.

This warranty is offered to the original purchaser and is not transferable. Cycles not assembled and serviced by an authorized Peugeot dealer or which have been fitted with non-Peugeot approved parts are excluded from the guarantee.

Whilst every effort will be made to supply an identical part in the original colour, if applicable, the Company reserves the right to substitute an alternative.

This guarantee does not seek to diminish any consumer statutory rights.

The Peugeot policy of continually updating and improving its range means that the specifications and appearances of all bicycles in this catalogue are subject to alteration at any time.

All bicycles featured in this catalogue are available through every authorised Peugeot Cycles dealer nationwide.

TECHNICAL INFORMATION

ENERGY RANGE

All frames use cromoly **double-butted** main tubes and cromoly rear triangle. The benefits of butted tubes have long been appreciated by all types of cyclists. For this season Peugeot have had new tubing made specifically for them using several brands, including Reynolds and Columbus. The improved geometry is evident and follows that used by the Team Line Grisley framesets. This range has a longer top tube to give plenty of "room" and a better balance to the bike as a whole. The angles are sensible, not extreme, and will give quick, responsive steering. The all-purpose 73 seat angles fit most riders well, steep enough for competition use, comfortable enough to live with for long periods. Rigid forks will be as at home with this set-up as will suspension units. Those fitted will not change the geometry.

SIZE	TOP TUBE	REAR CENTRE	FRONT CENTRE
41cm	541	425	576
46cm	560	425	588
51cm	582	425	610
55cm	582	425	610

Head angle 70.4; seat angle 73; 31.7mm front-changer fitting; 1.125 head fitting.

ALUMINIUM RANGE

The choice of aluminium currently available is quite bewildering to many people — 7000 series this, 6000 series that — but behind these numbers lies a specialised industry which caters for the needs of each application to which the material may be put. So, why do Peugeot choose 5086 (aluminium + magnesium) for their aluminium range?

SIMPLY BECAUSE 5086

* is particularly well-suited to the needs of the bicycle (Vitus have used this series in their successful 979 model since the 70s).
* has excellent resistance to corrosion and climatic variations, ie heat, cold, humidity etc.
* retains its integrity during production. It is not affected by heat as, say, the 7000 series which can lose much of its strength during a welding process.
* is suitable for the Tig, Mig and Brv systems.
* retains near-maximum properties when welded.
* has a surface which is very good, and suited to polishing. This enhances an overpaint finish like lacquer on chrome.
* has properties which do not need heat treatment, a relatively expensive process.
* is well-suited to a production environment.
* is lightweight and strong, a 46cm frame weighs only 4lb 6oz.

SIZE	TOP TUBE	REAR CENTRE	FRONT CENTRE
41cm	518	425	554
46cm	560	425	590
51cm	580	425	607
54cm	595	425	617

Head angle 70.4; seat angle 73; 35mm front-changer clamp; 1.125 head fitting.

TEAM LINE GRISLEY

The new carbon-tubed Grisley offers something a little different.

For example, fully Carbon-Kevlar main tubes with a very complex multi-layer weave of different patterns. The top two layers are pigmented, thus giving the green appearance. The open-type weave of the upper layers is designed to give more strength to the tube. This has been borne out by laboratory and off-road testing. Carbon quartz is unique to Peugeot. No further information is available on the tube make-up. Peugeot prefer to keep this "under wraps".

The aluminium versions of the same frame use main tubes of 6061 T6 aluminium in plain gauge, to give a balanced resilience to the frame. The new "nebula" finish looks particularly attractive — a contrast to the Pro-Team finish of black and gold. The rear triangle on both models is in 7075 series aluminium to give extra stiffness to the transmission area, with steel dropouts and fittings, all in 304-type stainless steel. The lugs, bottom bracket and wishbone bridge are investment cast aluminium.

Head angle 70.5; seat angle 73 for all sizes. Top tube lengths are as follows:

SIZES	TOP TUBE
42cm	54.1
48cm	57.2
54cm	59.3

Internal cable routing is retained, giving a very sleek appearance. The aluminium versions have been thoroughly tested in both competition and private sessions to find a weakness. None was evident!!

www.bikeboompeugeot.com

COMPETITION 300

This is a hybrid tubing set using a mix of Columbus, Gara and Cromo tubing for the main tubes, and cromoly for the fork and rear triangle. The frame uses Peugeot's well-liked variable geometry. Seat pin 25.4mm, forged dropouts, unicrown forks, close clearance.

SIZE	HEAD ANGLE	SEAT ANGLE	TOP TUBE	FORK RAKE	F/CENTRE	R/CENTRE

60cm	73.3	73	579	58	559	410
64cm	73	72.3	596	63	569	410

PROFESSIONNEL

The emerald green 400 is of 531 main tubes with cromoly forks and rear triangle. The azure blue 550 is entirely 531, and the 700 is Columbus SLX throughout. All models have long point Italian-style lugs and forged vertical dropouts. Microfusion aero crown are used only on the 550 and 700 models.

62cm	73.3	73	591	58	564	405

TEAM LINE

1100S and 1100Z

Both share the same carbon frameset. The frame is wholly Carbon-Kevlar, oversprayed to give an attractive finish, while the forks are aluminium, built by Vitus for Peugeot. Frame and forks weigh around 1820 grams — that's light!

2002 ZX1

The best looking monocoque currently available, unless you prefer the angular look of the Look Monoblade. Carbon-Kevlar moulded into the shape most will now know.

This geometry is designed to give good aerodynamics at lower speeds than a normal tubular frame. The shape takes into account stresses faced by the frame, and puts strength where it matters. Look at the bottom bracket and head tube area, not just aesthetically pleasing, but strong as well, finished with Vitus alloy forks. Carbon will give a stiff uncompromising ride, but thoroughbreds are made of this kind of character. It is fast, good and well-designed.

LOOK AEROBLADE 860

New to our range is this Look bicycle, a "Monoblock" design in the familiar Look mould, with oversize carbon fibre tubes made as one piece — Monocoque construction — with Look carbon fibre forks. Built with Look's "power" geometry, it includes carbon seat pin and ergostem, as found on the monoblades.
