PEUGEOT CYCLES

www.bikeboompeugeot.com

Welcome to the world of Peugeot Cycles.

For more than a century, the name Peugeot has been synonymous with the world of cycling. Today, as in those pioneering years, Peugeot is still noted for producing some of the finest and most innovative bicycles available.

The many successes enjoyed in recent years at competition level have provided us with invaluable knowledge. Knowledge that is reflected in the designs and manufacturing techniques of the models featured in this catalogue.

All Peugeot bicycles are produced at the European Manufacturing Unit in Romilly-sur-Seine, France. The company is the first cycle manufacturer in the world to be accredited ISO 9001 certification for quality standards at international level. ISO 9001 is the most stringent of the 9000 series norms, covering each stage of the production process from concept design right through to after-sales service - recognition of our commitment to quality and to you, the customer.

Whatever your preferred style of riding, we believe you will find a model from our latest collection to meet your requirements and budget. Technology may have advanced out of all recognition in one hundred years, but our principles remain the same: providing value for money and a quality product range - a cycle to be proud of.

CHOOSING AT A GLANCE

To help you identify at a glance the bicycle most suited to your purpose, every model (other than the Team Line collection) features a series of pictograms. The type of terrain to which it is best suited. Whether it is designed for competition use. How many gears it has. What its weight is. Plus the usual detailed specifications to help you make the right choice.

Suitable for use on rough terrain

Suitable for off-road use, bridleways & trails

Suitable for use on smooth surface roads & dedicated cycle paths

Suitable for urban roads, pathways & pavé roads

For fun sports & light competition use

For serious competition use

Total weight in kilograms for this size of frame

Number of gears

All Terrain

When the terrain gets tough, the quality of the bike is as important as the person pushing the pedals. Using the latest materials and componentry and applying them to technically advanced designs, Peugeot has created a range of ATB's for 1997 which represents the summit of achievement in this demanding area of cycle sport activity.

JEROME CHIOTTI
ATB World Cross-Country Champion '96

Team Line
A LA CARTE

Team Line 'A La Carte' is an exciting concept from Peugeot Cycles. Exciting because it represents a unique opportunity to own and ride the most exceptional bicycle in the world; the bike of your dreams.

'A La Carte' is for riders who take their cycling seriously; riders who not only want to be winners but who are going to do it in style. Think of the sheer pleasure of being able to create perfection - a one-off performance machine complete with your own name, if you wish, custom-built by craftsmen to your very own specification.

'A La Carte' offers you a choice of 14 Team Line frames, used to great effect by our pro teams, *Festina*, *Aubervilliers* and *Peugeot-Sachs*, equipped with the highest quality range of components available today. With an almost infinite number of different combinations possible, your opportunity has arrived!

'A La Carte' is the result of sound engineering technology and the invaluable experience gained by Peugeot Cycles during many years of racing at competition level. All Team Line frames have been designed using the latest materials and computer technology to create the ideal geometry and optimum performance.

Team Line frames are built using the most advanced techniques available, combining our own specialised methods of TIG-welding, brazing and bonding. Couple that with Peugeot's renowned stringent quality procedures and you have another masterpiece of craftsmanship and technology.

Be the exception; be different; with Team Line 'A La Carte'.

Please ask your local Peugeot Cycles stockist for the separate A LA CARTE brochure.
