PEUGEOT

www.bikeboompeugeot.com

The Peugeot bicycle story starts in 1882 at Beaulieu in France, when the first penny-farthing was made. Within three years, up to 300 people were employed, but it was not until 1889 that car production began. So that the two sides of the business could specialise, in 1972, Peugeot acquired its factory in Romilly sur Seine, occupying 54 acres in the Champagne region of France.

This specially-built factory can produce up to 3000 cycles per day, or one bicycle every 12 seconds! In 1991, Cycles Peugeot, together with Cycles Gitane and BH, formed a new European bicycle group called Cycleurope, becoming the single largest cycle manufacturer in the world. In 1993, Cycleurope was the first cycle manufacturer to be awarded the prestigious ISO9001, the international equivalent of BS5750.

PEUGEOT CYCLES

But what does this mean for you? The main aim is to supply the customer with products and services of the highest quality. More than 200 tests are necessary before a cycle actually goes into production; and then 942 random control tests are carried out on the production line, to bring you the perfect product.

Peugeot invented and perfected the technique of lugless brazing, which is now under patent as the "Peugeot Direct Brazing System". At present, Peugeot is developing new and original techniques of frame assembly using glues and TIG/MIG welding processes. All the frames are then phosphate-coated, undercoated and given two enamel top coats, followed by the application of transfers which is done by hand. Finally, a clear lacquer is applied to give both an excellent finish and durable protection. With over 100 years of competition experience behind us, we have the perfect recipe for the next 100 years.

www.bikeboompeugeot.com

Virenque: "I am a Tour Rider!"

Third in the 96 Tour de France, in 1997 he managed second place on the Podium in the Champs Elysees. That's the way Richard Virenque is: he loves climbing as high as possible!

Second in the 97 Tour de France – had you dared hope for such a high place?

The Tour is my main objective of the whole season and I pull out all the stops to be superfit for it. Because it is the most fantastic race, but above all because I am a Tour Rider. It's where I get my greatest kicks.

How do you prepare for the Tour de France?

First I have six whole weeks off during the winter. For my own sake, I have to do something other than cycling during that time. For example, some motor racing with Peugeot! Then, at the start of the season, I slowly increase my training, and when the Tour comes round, I concentrate fully on my objective which is to go hell for leather in the mountains and the time trials. The whole Festina team works with me so that I can tackle these stages under the best physical and mental conditions.

Could you have been wearing the yellow jersey in Paris?

It could have gone one way or the other towards the end. But I have no regrets because the team worked magnificently: Bortolami, Stephens and Rous in the flat stages, and Herve, Dufaux and Brochard in the mountains. The Festina team riders put on the best show of the Tour. In fact, the public greatly appreciated our competitive spirit.

Which disciplines do you think you can improve in?

I am going to continue to work on the time trials. Each year I get a bit better and all the efforts put into such things as ergonomics, aerodynamics and equipment are beginning to show results. It's up to me to ride even faster.

Virenque and Peugeot Cycles, a good story?

It's more than a story which has lasted since 1994, it's a real collaboration. The Peugeot brand has always been associated with cycling. For the Tour I have three Peugeot bikes; three absolute technical and aesthetic gems. And I am really proud of them because when the public sees me climbing a mountain, without realising it they are also looking at the result of an enormous amount of work put in by the Peugeot Cycles engineers. Throughout the year I test new prototypes for them and the progress we make on the frames and components benefit all amateur cyclists, including those who just ride for pleasure.

What advice would you give to a youngster starting out?

Believe in yourself and never stop believing. It's what I do in the mountains to overcome the pain. As far as equipment is concerned, I can of course recommend a Peugeot bike from the Virenque range! However, they won't go far wrong with any of the Peugeot competition models. After that comes the hardest part: to win!

RACING

For more than 100 years Peugeot has been designing racing cycles and have had many winning champions. In recent times such famous names as Tommy Simpson, Eddy Merckx, Stephen Roche, Robert Millar, Sean Yates and Richard Virenque have all tested Peugeot bikes and ridden them to victory. The results of their successes are reflected in our 1998 range of racing bikes.

Columbus Brain Megatube frame

AcroLine fork in aluminium

Shimano Ultegra 9 speed transmission

Competition 8000

Colour: Ivory
Size: 50, 52, 54, 56, 58, 60, 62 cm
Weight: 9.3 kg/54 cm

The Competition 8000 takes us to new levels. New levels in style, but more importantly, new levels in performance. Match a new Columbus Brain Megatube frame with the all-new Shimano Ultegra groupset and you have a match made in heaven. Through new design and manufacturing techniques, this new groupset is around 350 gms lighter, yet the strength of components has been maintained or in some cases even increased. Ambrosio V-section rims, with their aero profile, complete this dream machine.

Competition Alu 9000

Colour: Marine Blue
Size: 51, 54, 56, 58, 60 cm
Weight: 8.8 kg/54 cm

The only way to improve the CP8000 is to give the Competition 9000 a Pechiney 5086 aluminium frame.

www.bikeboompeugeot.com

Competition 7000

Colour: White/Dark Blue
Size 50, 52, 54, 56, 58, 60, 62 cm
Weight: 9.9 kg/54 cm

The heart of any bicycle is the frame, so it can be said that the Competition 7000 is certainly light-hearted; but it is definitely to be taken seriously. Columbus have designed their Brain Megatube set with this in mind. Cyclex tubing is drawn with specially short-butted sections to increase lightness and comfort, while the surface is superfinished to increase hardness and strength. In addition, Veloce Ergopower gives you pulling power for 18 gears. Combine it all with ITM bars and stem and a Selle Italia Nitrox saddle and the result is an Italian thoroughbred.

Competition 6000

Colour: Copper
Size: 49, 51, 54, 57, 60 cm
Weight: 9.8 kg/54 cm

Speed is what this bike is designed for. Whether your sport is triathlon, time-trialling or just going fast, the Competition 6000 is the perfect partner. Re-designed from the ground up, the 650 wheels with their V-section rims slice through the air. The Columbus Brain Megatube frame places the rider in a more aggressive position, while the straight-bladed aluminium forks cut through the wind like a knife. So perfect is this machine that not even the tiniest detail has been overlooked: the A-head system has been used to maximise performance and at the same time remove every possible gramme.

www.bikeboompeugeot.com

RACING

Competition Alu 5000

Colour: Lava Red
Size: 51, 54, 56, 58, 60 cm
Weight 9.8 kg/54 cm

An aluminium frameset takes the Competition 5000 up the evolutionary ladder. But it's not just any aluminium: the Pechiney 5086 tubing is heavily profiled, a result of feedback from our professional riders. Each tube is specially shaped depending on its role within the frame, to provide the optimum performance. With the addition of Campagnolo Mirage Ergopower, this bike is sheer bliss.

Aviatube 5086 Pechiney alu frame

Campagnolo Mirage 8 speed transmission

Hutchinson Succes

Competition 4000

Colour: Marine Blue
Size: 48, 50, 52, 54, 56, 58, 60, 62 cm
Weight: 10.7 kg/54 cm

Mix a Columbus Thron Megatube frame and Campagnolo Mirage Ergopower and you have true Italian flair. From the 16 gears to the dual pivot brakes, everything is designed with the most advanced technology in mind, whilst maintaining an affordable price. Based heavily on components which have won numerous "Tour de France" and World Championships, the only thing left to do is to clip into the pedals and go.

www.bikeboompeugeot.com

Cyclo-Cross

Colour: Team Replica Yellow/Blue
Size: 50, 54, 56, 58, 60 cm
Weight: 10.4 kg/54 cm

Cyclo Cross puts extra demands on any bike, but our Columbus Thron Megatube frame is adapted with this in mind. Extra clearance around all possible mud traps helps you stay on while others are pushing! And if it is finally too much, a flattened top tube makes it easier to carry the bike! Powerful cantilever brakes provide lightweight power, while the RSX STI units allow you to brake and change the 14 widely- spaced gears with complete control. In Team colours, you'll feel like a pro.

Competition 2000

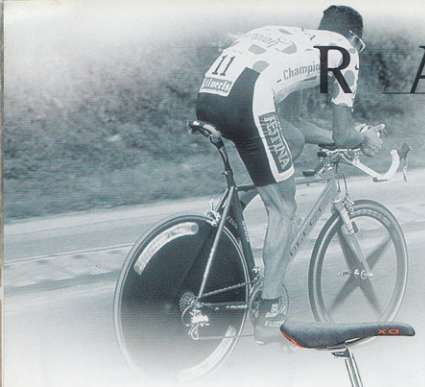

Colour: Black
Size: 48, 50, 52, 54, 56, 58, 60 cm
Weight: 10.8 kg/54 cm

The ideal frame must be a balance between weight and strength. So, for the Competition 2000, we have chosen Columbus Thron Megatube. By reducing flex to a minimum, every ounce of strength is used in forward motion, while the straight forks steer you exactly where you want to go. With 14 gears under your control, it will take a lot to stop this bike – so we have fitted powerful dual pivot brakes.

www.bikeboompeugeot.com

RACING

Performance 5000

Colour: Swiss Silver or Violet
Size: 48, 51, 54, 57, 60, 62 cm
Weight: 11 kg/54 cm

The Performance 5000 is a true race bike at an affordable price. A Columbus chromoly double-butted frame, with a mega down tube increases front end stability and flex, whilst decreasing weight. The Shimano RSX STI system clicks through the 14 gears effortlessly as the Vittoria soft-compound tyres glue you to the road.

www.bikeboompeugeot.com

Virenque 600

Colour: Team Replica Yellow/Blue
Size: 47 cm
Weight: 10.6 kg

For the polka dot star of tomorrow, the Richard Virenque replica is the perfect bike. The 600A alloy wheels and the lightweight HLE frame are perfectly proportioned. With 12- speed index gears and a genuine Selle Italia Turbo junior saddle, you will be keeping up with the big guys, no problem.

Performance 1000

Colour: Star Yellow
Size: 51, 54, 57, 60 cm
Weight: 11.2 kg/54 cm

If speed is your thrill, then our Performance 1000 is a good start. Its Peugeot-evolved frame is designed from light, strong HLE tubing, which together with a stable geometry provides an unforgettable first ride. The 14-speed index gears keep you going up and down hills, while the firmly-padded sports saddle and cork ribbon keep you comfortable for hours.

www.bikeboompeugeot.com

Energy Alu 700 TS

Colour: Marine Blue/Yellow
Size: 47, 51 cm
Weight: 13.4 kg/47 cm

With cross country in mind, we present the Energy 700. By adding five pivots to our Pechiney 5086 aluminium frame, the oil/coil-over shock can deliver 50mm of movement at the rear drop-outs. To save energy, the rear end is designed to lock as the going gets steeper, and perfectly balances the 48mm of movement provided by the Rock Shox Indy S fork. Equipped with a great selection of components, this bike can handle Mother Nature at her worst.

Aviatube 5086
Pechiney alu frame

Shimano Deore
LX 24 transmission

Energy 500

Colour: Lava Red
Size: 41, 46, 51, 54 cm
Weight: 11.3 kg/41 cm

In collaboration with Columbus, Peugeot brings you the Energy 500 with a Pulse Megatube frame. Using finite analysis techniques, stress areas within the frame have been identified; and with its Nivacron tubing, Columbus have designed each tube to withstand or diffuse such stresses. No tube has been overlooked: even the snake stays have been designed to increase braking power by reducing flex, whilst maintaining rider comfort. To this frame, we could only add the best components: Shimano 24-speed Deore XT, Hutchinson Cameleon tyres, Bontrager saddle and Kore bars. Nothing else would do!

www.bikeboompeugeot.com

Energy Alu 400

Colour: Brushed Aluminium
Size: 41, 46, 51, 54 cm
Weight: 11.9 kg/41 cm

If you are serious, then you need some serious stuff. Take one Pechiney 5086 frame, gently add a Rock Shox Indy fork and stir well. Add to the mixture 24 ESP 7.0 gears, Hutchinson Pro-Mud/Cameleon tyres, then top off with a Kevlar Bontrager saddle and you have the Energy 400. But hang on to the Kore Lite bars, because this mixture is dynamite!

Rock Shox Indy suspension

Energy Alu 300

Colour: Matt Orange
Size: 41, 46, 51, 54 cm
Weight: 11.7 kg/41 cm

When the going gets tough, the last thing you think about is looking good. Luckily with the Energy 300 we've done it for you; but beauty is more than skin deep. With a tough Pechiney 5086 aluminium frame, it can take a good beating. Add the 24 Shimano Deore LX gears and you will get the best out of the soft compound Wildgrippers while the V-style brakes will quickly put you back in control.

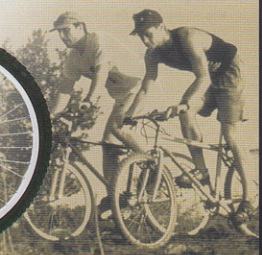

Energy 24

Colour: Team Blue/Yellow
Size: 38 cm

Using all our knowledge from winning World Championships, we have created the Energy 24. Techniques and ideas from our adult Energy series have been combined with a perfectly-proportioned frame. Add to this Shimano's specially-designed 21-speed MJ II series and you have the perfect bike today for the champion of tomorrow.

www.bikeboompeugeot.com

A T B

Origin 30 XC

Colour: Team Blue/Yellow
Size: 41, 46, 51, 54 cm
Weight: 12.3 kg/41 cm

Ever wanted to be a Team Rider? Well, now you can at least look the part with the Origin 30XC. In Team colours, this bike is race-ready, equipped with a list of competition-winning components: 24 gears powered by a Shimano Deore XT mech and a Sugino Impel chainset. Traction is in the hands of the Michelin Man with the most popular tyres today: the Wild-grippers. Not forgetting the Bontrager saddle, a hit with any race bum!

Origin 20 XS

Colour: Iris Blue
Size: 41, 46, 51, 54 cm
Weight: 13.2 kg/46 cm

With its lightweight Origin frame, the 20 is getting serious. The 24-speed Shimano STX-RC/Alivio gears allow you to cope with almost anything in your way. The off-road semi-slick tyres give you bite in corners yet excel in straight-line speed, so you will appreciate the awesome stopping power of the V-style brakes. (Also available with suspension fork).

Origin Alu

Colour: Polished/Red
Size: 41, 46, 51, 54 cm
Weight: 12.7 kg/41 cm

The Origin Alu is for those wanting the latest in design. The hi-tech frame constructed from Pechiney 5086 aluminium is both robust and light with extra-strength being supplied by the twin top tube. Whether cruising or hammering, the Shimano 21-speed Alivio gears will keep you going, while the power of the V-style brakes will always hold you back. Add to this package the latest in graphic design and you have a bike for the next millenium.

www.bikeboompeugeot.com

Origin 10 TS

Colour: Matt Blue/Red
Size: 46, 51, 54 cm
Weight: 15.3 kg/46 cm

The Origin 10TS takes comfort and control to the max in the 10 series. With downhill-style bars and front/rear suspension you can keep cool whether you are in the concrete jungle or in the wilderness.

Origin 10 XLT

Colour: Fizz Yellow or Black
Size: 41, 46, 51, 54 cm
Weight: 13.9 kg/41 cm

With identical specs to the OR10XL, the Origin 10XLT offers all the same benefits, with the added feature of an SR Duotrack 7007 suspension fork, further increasing comfort and control.

Origin 10 XL

Colour: Fizz Yellow or Black
Size: 41, 46, 51, 54 cm
Weight: 13.1 kg/41 cm

For the first-time rider, the Origin 10XL offers all the necessary features and more. The double-butted chro-moly frame with a mega down tube is both light and strong. Along with the comfortable saddle and grips, the design allows a leisurely riding posi-tion. The Shimano Altus 21-speed gears make light work of all types of terrain.

www.bikeboompeugeot.com

ATB

RC 1000

Colour: Matt Green
Size: 43, 48, 53 cm

The First Roc 1000/1005 is the ultimate in this range. Based on the First Roc 800, we have added features normally found on bikes costing hundreds more: V-style brakes with their phenomenal stopping power, bar ends for more leverage when the going gets tough, and a bottle and cage to quench that thirst. All this at a down-to-earth price!

RC 1005

Colour: Cyber Blue
Size: 43, 48 cm

RC 800

Colour: Kumquat Green
Size: 43, 48, 53 cm

Constructed from lightweight HLE tubing, the First Roc 800/805 has inbuilt extra strength using an oversized down tube. The 21- speed Shimano gears are quickly changed using the Gripshift shifters, while alloy rims help the brakes bring you quickly to a stop. This bike is ideal for the leisure cyclist or for those who want to look good around town.

RC 805

Colour: Violet
Size: 43, 48 cm

www.bikeboompeugeot

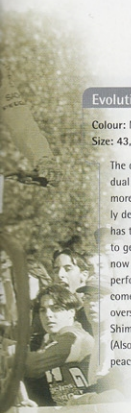

RC 400

Colour: Star Yellow
Size: 43, 48, 53 cm

When fun and fitness is your thing, the First Roc 400/405 is your ideal partner. The 18-speed Shimano gears easily put your legs to the test, while the padded saddle and comfort grips put a little more fun into your rides. Built from strong HLE tubing, the frame makes light work of anything you throw at it.

RC 405

Colour: Turquoise/Blue
Size: 43, 48 cm

Evolution 21

Colour: Matt Sapphire Blue
Size: 43, 48, 53 cm

The definition of Evolution is: "A gradual development especially to a more complex form". This phrase truly describes our Evolution model. It has taken Peugeot well over 100 years to get to where we are today. We now bring you the best value and performance possible. This model comes with a full HLE frame with oversize down tube, sporting 21 Shimano gears.
(Also available in ladies' version in peacock blue).

www.bikeboompeugeot.com

TEENS

Cyber 26S

Colour: Anthracite Grey
Size: 41, 46, 53 cm

Enter a new dimension with the Cyber 26S. The Hi-Tech Unisex frame has been designed with the totally new Bibow technology, and gives the bike a look of its own. Break the sound barrier with the 18-speed Shimano Gripshift and come down to earth with the powerful V-style brakes. The Cyber 26S is tomorrow's bike in today's world.

Cyber 26

Colour: Satin Turquoise
Size: 46, 51, 55 cm

Another futuristic product from Peugeot Cycles. Again using the new Bibow technology, the cruiser frame will take you beyond reality, where you only go in your dreams. But to cope with everyday life, the 18-speed Shimano gears and the quick-release front wheel are the ones you can really trust.

www.bikeboompeugeot.com

Cyber 24

Colour: Cyber Blue
Size: 38 cm

A flashing light in the sky! Do we really know what landed in Area 51?? One of the world's best-kept secrets is at last revealed: an electric blue colour, spaceship equipment with 18-speed Shimano (on Cyber 24), oversized tubing system and bar ends for total control of your machine: this is the Cyber bike.

Cyber 20

Colour: Satin Turquoise
Size: 33 cm

HYBRID

Comp Off Road

Colour: Ivory
Size: 51, 54, 57, 60 cm

Words cannot do justice to this machine. Whether on tarmac or cross-country - just do it.

www.bikeboompeugeot.com

Country 200 Off Road

Colour: Matt Blue
Size: 48, 51, 54, 57, 60 cm

You can't decide between tarmac or dirt? With our Country 200 you can have both. Its lightweight chromoly frame, 700C wheels and low handlebar position make the CN 200 a true streetfighter. Yet the 21 Shimano STX gears, wide tyres and bar ends make it equally at home on the trail. Don't spend time trying to decide – just ride!

Country 500 Off Road

Colour: Matt Red
Size: 48, 51, 54, 57, 60 cm

All the features found on the CN200 are still there, but everything - comfort, weight, performance - has been improved.
Comfort: For 100 years Selle Italia have studied anatomy, resulting in their Bio-Line range.
Weight: Increased use of alloy components not only decreases weight but improves strength.
Performance: Shimano Deore LX 24-speed lifts it to a level previously experienced only by professionals.

www.bikeboompeugeot.com

HYBRID

Outdoor 200

Colour: Brushed Aluminium/Azure Blue
Size: 48, 51, 54 cm
Weight: 12.8 kg/48 cm

If you are looking for a truly versatile bike, efficient for racing or pottering about, this one is made for you. The lightness of its 5086 aluminium frame combined with 21 speeds will give you the best performance possible. With the Bio-Line saddle, you are sure to experience the most enjoyable, comfortable and unforgettable rides.

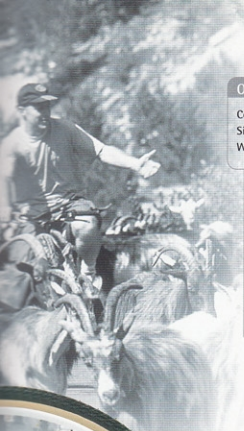

Outdoor 150

Colour: Silver/Green
Size: 48, 51, 54 cm
Weight: 13.8 kg/48 cm

The Outdoor 150 is another example of perfect balance: performance with the HLE tubing, safety with the V-style brakes, comfort with the adjustable stem. All the ingredients for a multi-use bike, for all those for whom riding is more than just a necessity, but a passion.

www.bikeboompeugeot.com

Outdoor 105

Colour: Swiss Silver
Size: 45, 48, 51 cm
Weight: 13.7 kg/45 cm

For the first model in the Outdoor range, Peugeot Cycles want to offer you the best. Created to provide the most efficient ride on or off-road, the Outdoor 105 is a robust bike, fully equipped with 21-speed Shimano, Sachs Wavey twisters and HLE tubing. With the Outdoor 105, you are guaranteed to enjoy every single minute of your ride.
(Also available in gents' version.)

NATIONAL
CYCLE NETWORK

Sustrans (Sustainable Transport) is a charity working in partnership with various bodies to set up the National Cycle Network, a visionary project to provide a 6500-mile network of cycle routes.

Supported by a £43.5 million grant from the Millennium Commission, the Network involves the active participation of more than 400 local authorities, the Department of the Environment, Transport and the Regions and other public and private bodies. The Network will comprise a linked series of traffic-free paths and traffic-calmed and minor roads connecting urban centres and the countryside, and reaching all parts of the UK. These will provide a safe, attractive, high-quality network for cyclists and a major new amenity for walkers and wheelchair users.

The Millenium Routes (2500 miles) will be complete by 2000, with the whole 6500 miles complete by 2005. The Network will connect with thousands of further extensions.

There has never been a better time to take up cycling!

www.pikeboompeugeot.com

CITY

Country 400

Colour: Grenadine
Size: 45, 48, 51, 54, 57, 60 cm

Combining comfort, speed and ruggedness is a tall order, but we have achieved it with the Country 400/405. In doing so, we have created the perfect urban bike. HLE tubing is used for an unbelievable blend of lightness and strength, in an upright design which is comfortable and gives good visibility. All this means nothing without the proper components, so we have fitted an adjustable stem enabling you to tailor-fit your position – upright for comfort, or horizontal for speed. Shimano 21-speed Altus gears, combined with Gripshift allow slick changes under complete control.

Country 405

Colour: Jackpot Green
Size: 45, 48, 51, 54 cm

First Rider 2000

Colour: Rangoon Grey
Size: 46, 51, 55 cm

For a ride around town or country, the First Riders are the single solution. These lightweight HLE-framed bikes come fully equipped for those days out, while the rugged tyres give you that extra sense of security. Comfort, though, has not been forgotten with a Selle Royale Lite foam saddle and twist gear changer placed next to the grip.

First Rider 2005

Colour: Deep Matt Purple
Size: 46, 51 cm

Natural City 305

Colour: Lava Red
Size: 45, 51 cm

The Natural City is the natural choice for ladies around town. The elegant frame design makes cycling more practical, allowing easier access, while the saddle and specially-fitted handlebars make it ultra-comfortable. The Sachs 3-speed hub gears keep everything simple, and the chainguard keeps you clean. Natural really is best!

www.bikeboompeugeot.com

CITY

Bus 25

Colour: Jackpot Green
Size: 48, 51, 54 cm

Whether commuting or cycling for leisure, the Bus series fits the bill. These stylish bikes have been designed to fulfil your every need, whilst keeping maintenance to a minimum. Slick tyres make easy work of any road, and the internal hub system means changing gear is a doddle, even when you are not pedalling. The specially-selected saddle and grips keep the aches and pains at bay. Your only "problem" is to choose the level of equipment you require.

Bus 15

Colour: Iris Blue
Size: 48, 51, 54 cm

www.bikeboompeugeot.com

Bus 10

Colour: Bronze
Size: 51, 54, 57 cm

Swan 25

Colour: Marine Blue
Size: 46 cm

Some people don't want hi-tech, fancy gears, or to race. Some people just want a bike they can ride; in fact, they want a Swan. Designed with such people in mind, with its upright pedalling position, a well-padded saddle, front carrier, comfortable grips and 5 gears, the Swan is easy to use. And when you finally stop, the integrated lock and prop-stand make life easy.

PEUGEOT CYCLES

team LINE

Peugeot Team Line

For World Champions

On 12th October 1997, in San Sebastian, there was no stopping Laurent Brochard, as he jubilantly crossed the finishing line first to become the new WORLD CHAMPION. This was the pinnacle of a hugely successful season for this very talented rider on his exclusive blue and yellow Peugeot. One more celebration for Festina and Big Mat, this was the final climax to a fine season of top-class results. We now give you the chance to join the élite... PEUGEOT TEAM LINE.

The Team-Line "A La Carte" series from Peugeot Cycles allows your imagination to run riot. In fact, using the same frames as World Champions, together with the best equipment, Peugeot offers you no fewer than 8000 combinations from both RACING and ATB ranges. Another difference is that you can even have your frame personalised with your name.

With PEUGEOT, the choice is YOURS.
