www.bikeboompeugeot.com

Besides the materials used in building frames, there is also the technology behind the joining and welding of the tubing. It is this high technology that enables the user to fully benefit from the intrinsic mechanical properties of the steel selected for the construction of the frame. After years of research and development, and investments of over $2.5 million, we have come up with the DBS (Direct Brazing System) unique state-of-the-art technology done by internal brazing.

Inner tubing is mechanically made and heat treated to give high-resistance and lightness to the bike.

Truly the best in frame tubing for bikes. The True Temper tubing is made from a high-resistant component mechanically treated to optimize its lightness. Due to a "stress relieved" treatment, the True Temper tubing is worry-free even in rough off-road riding. Combined with the DBS technology, it helps to produce the best bikes available.

Lightness, rigidity and resistance.

Cromo-Lite frames are built of Cromo tubes using the DBS technology. The quality of these tubes (1.0mm) is best summed up in three words: lightness, rigidity and resistance. The combination of different alloys give these special tubes very high physical characteristics, up to 50% superiority over traditional tubes of the same diameter and thickness.

The lightest frames in their category.

Carbo-Lite frames are built of improved steel tubes using the DBS technology. This high quality steel enables us to reduce the thickness to 1.2mm while keeping the same resistance and rigidity as conventional steel tubes. Carbo-Lite frames are the lightest in their category.

WARRANTY

Procycle Group Inc. warrantees its frames to the first owner only. Steel frames made by Procycle have a lifetime warranty. Aluminium frames used by Procycle have a 5 year warranty beginning on the date of purchase and suspension frames have a one year warranty beginning on the date of purchase. The components, other than the frame, are warranted for a period of one year.

WARNING

Peugeot mountain bikes are not designed to be used with double clamp style suspension forks. Peugeot bikes will be void of warranty if the user has installed a double clamp style fork on his bike.

Present models may differ slightly from those available in the store. In its concern for constant improvement, Procycle Group Inc. reserves the right to modify its bicycle components and/or colors.
