CONTENTS

Here at Peugeot, we regard cycling as not just a mode of transport but as an experience. Our commitment to quality and cutting edge design can be felt with every turn of the wheel. This year you'll find new ideas, new designs, new colours and above all, new bikes – just what you'd expect from a company with a pedigree like ours.

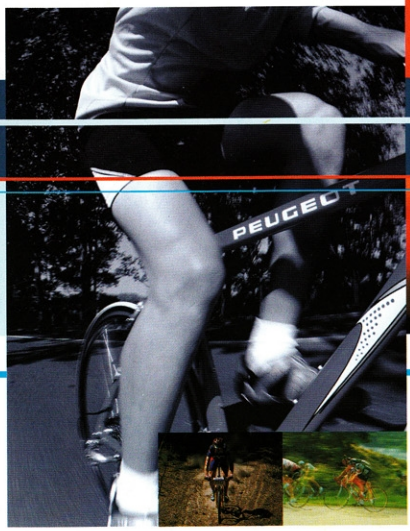

We're launching a brand new range of road bikes with new frame geometry, as well as all the strength and lightness needed to withstand the tough demands of modern racing – just ask Peugeot World Triathlon Champion Olivier Marceaux.

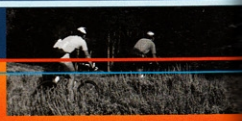

From high-spec competition models to everyday sport and leisure bikes you'll find a bike to suit every pocket in our Mountain range, all giving superb performance, on or off road. Full or front suspension, disc brakes and Shimano gears all help to make mountain biking a real pleasure with Peugeot.

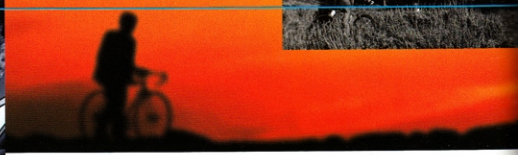

Round town or commuting, the Peugeot range of City and Town & Country bikes feature both modern and traditional styles, from the fashionable and functional Step-in to the sporty Outdoor range with lightweight frames and suspension seat posts.

Whatever you're looking for in a bike, take a look at Peugeot.

RIDE THE NET
www.nationalcyclenetwork.org.uk

WHO: Sustrans stands for Sustainable Transport. It was formed in 1984 and is the civil engineering charity co-ordinating the National Cycle Network.

WHAT: The Network will comprise 10,000 miles of cycle route by 2005. It is supported by £43.5m of National Lottery funds. Sustrans is working with 400 local authorities and other partners in developing the Network.

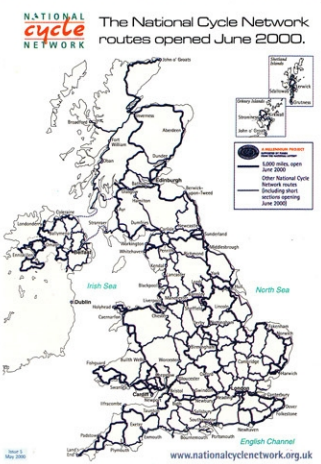

WHERE: Across the UK, the network will mean safe and attractive routes on a mixture of minor roads, traffic-free paths and segregated cycle routes. Parts of the network will also be suitable for walkers and wheelchair users.

WHY: It will allow people to cycle to work, to shops, for leisure and encourage safe routes to schools. An increase in cycling will ease congestion, lower pollution and bring health benefits.

WHEN: Now. The Network is growing across the UK from short sections to long distance routes opening all the time. The first 5000 miles opened in June 2000.
