OUR WHEELS ARE YOUR WINGS

Cycling means so many different things to so many different people.

For some, it's the adrenalin pumping ecstasy of being first past the post.

For others, it's the smooth cruise through the becalmed traffic jam on the way to the shops.

But whatever factors prompt them to take up two wheel travel, there is a shared motivation.

Cycling is acknowledged to be the transport of the 90s.

Environmentally sound and personally health giving, a bicycle offers the chance to enjoy a unique sense of freedom.

The new ranges of Race and Road bicycles from Raleigh are made in Nottingham, England, with each machine being designed and built to enhance the enjoyment its owner will get out of cycling.

And while styles and equipment are amazingly varied, the same technological excellence goes into each and every one.

Read the brochure, then visit your local Raleigh dealer.

Whatever it is you want out of cycling, you can trust Raleigh to deliver.

RALEIGH
NOTTINGHAM ENGLAND

E

These are the speed machines which look every inch the part. Yet they are sweet tempered enough to glide elegantly through a stalled traffic jam.

Designed and built for out and out performance, they make the ultimate use of your stamina and muscle power.

The gearing and the variable riding positions give you total control over your bike.

And that's whether you're pumping uphill, flying downhill or finding those few extra MPH on the finishing straight.

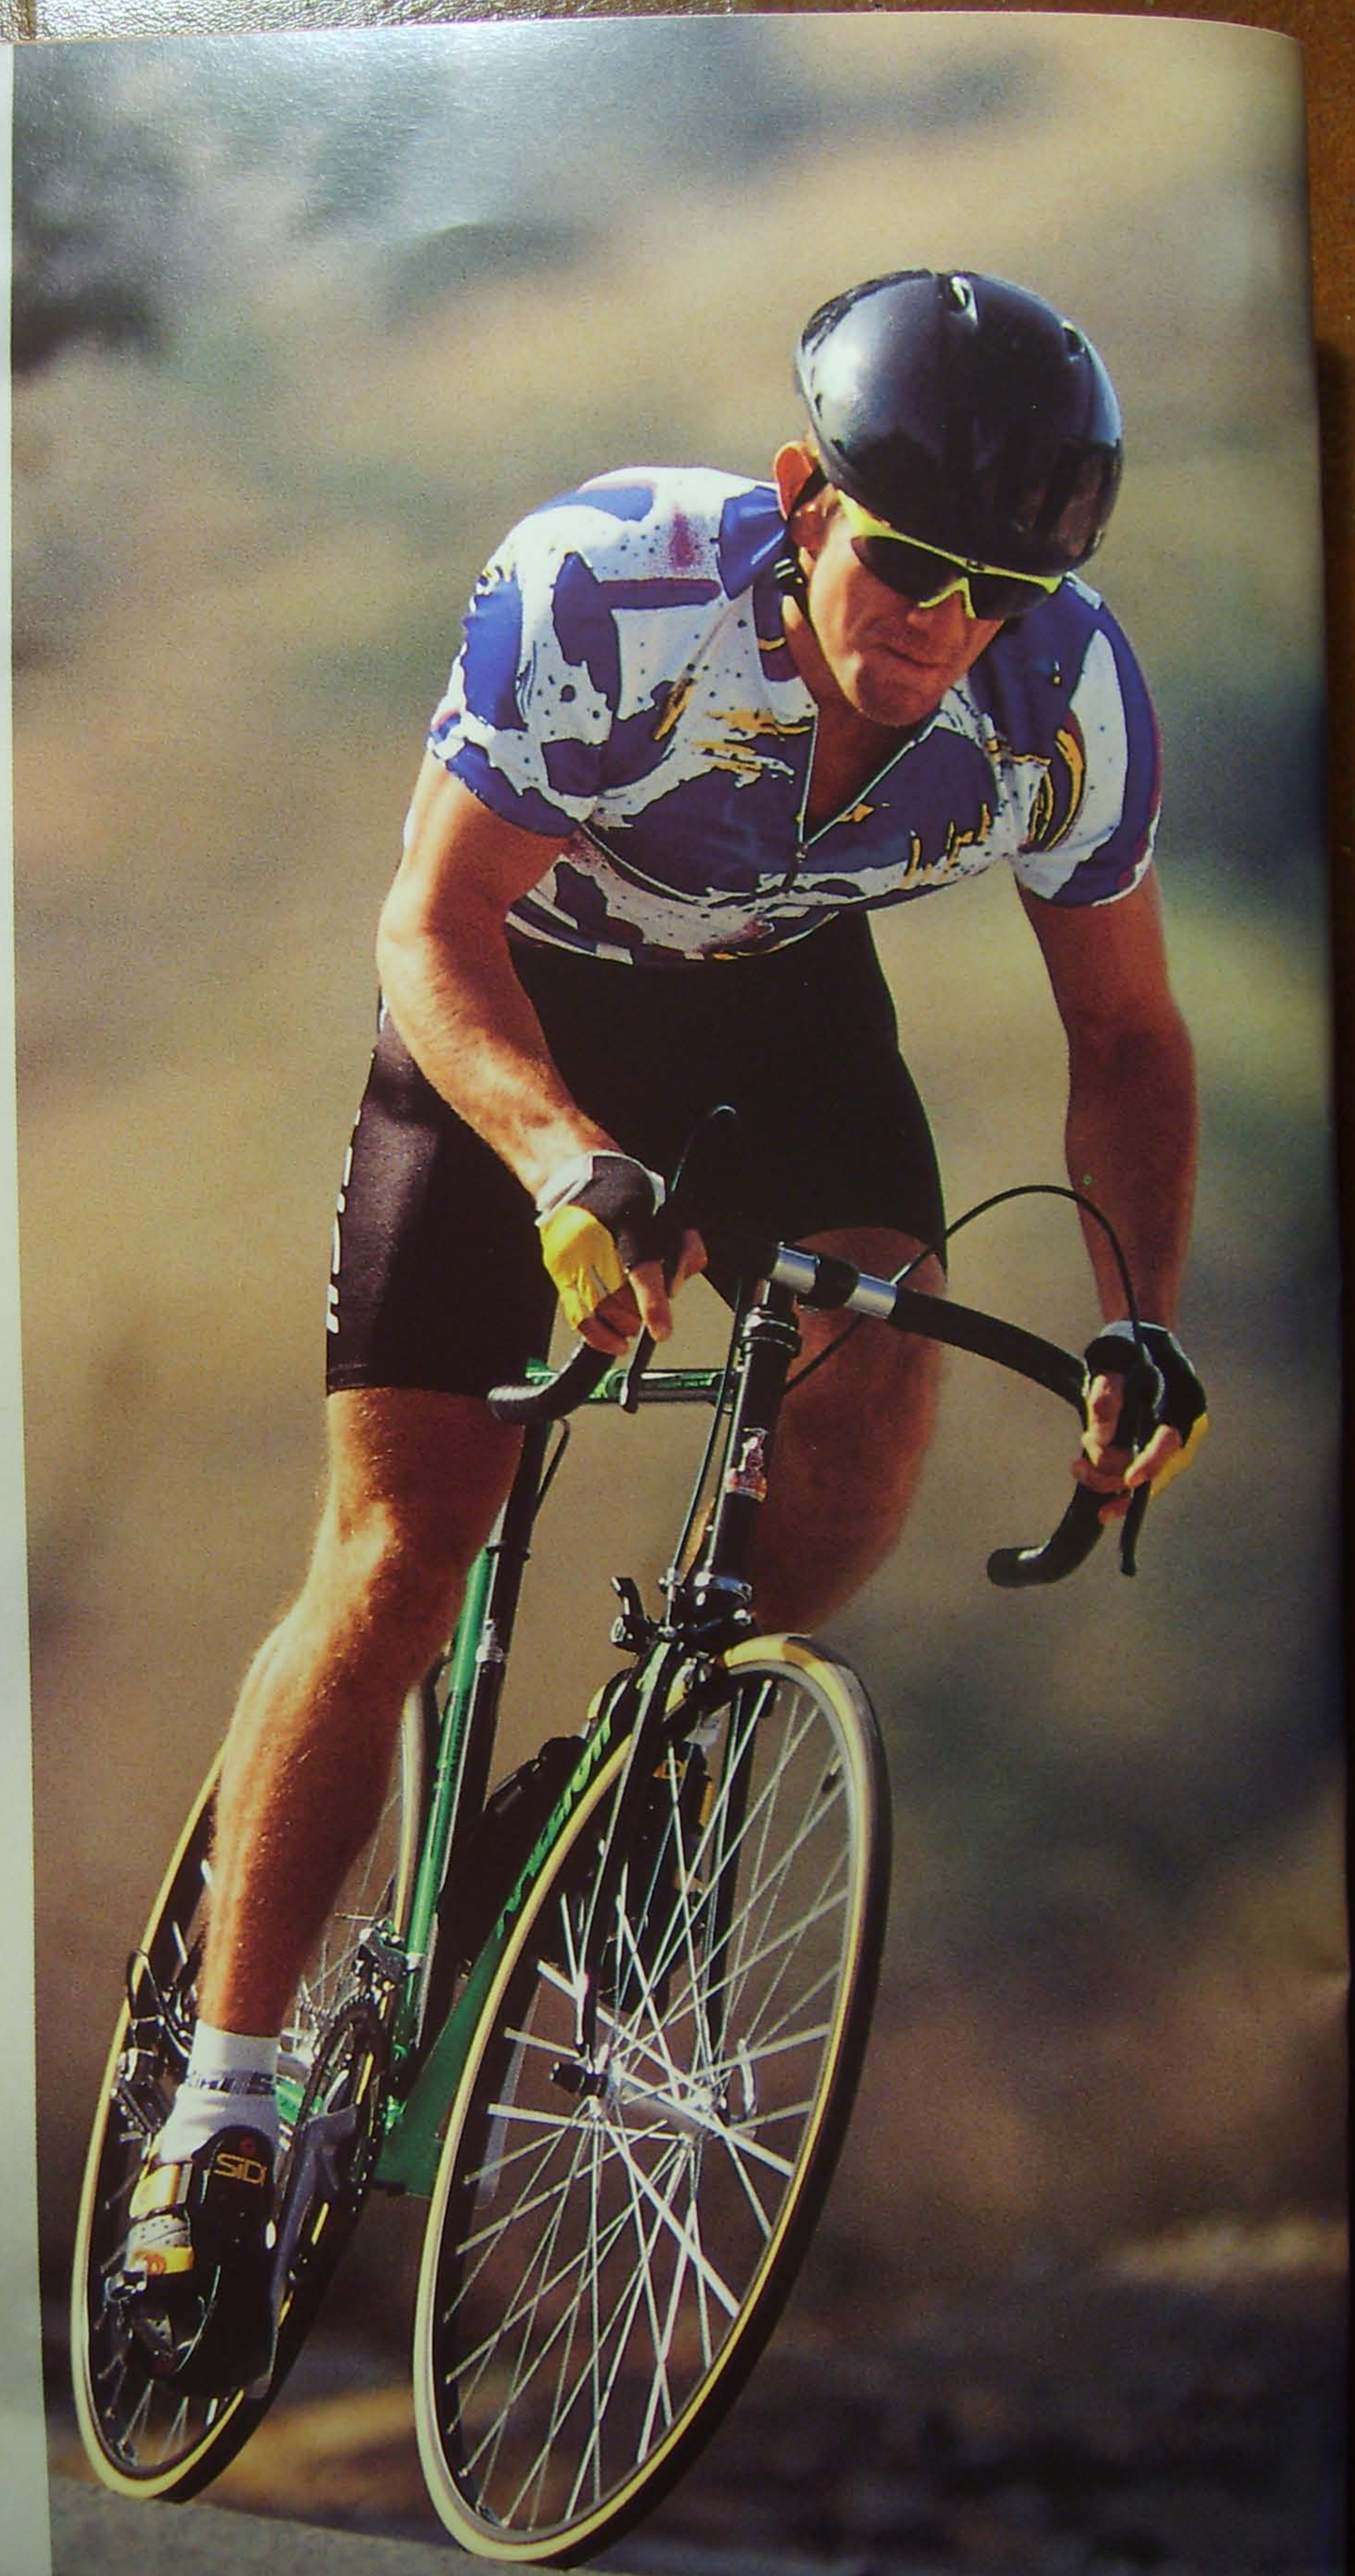

Raleigh Racers prove to you something you always wanted to believe.

That you're a better rider than you thought you were.

- *Raleigh CAD designed, responsive, close clearance racing frame.*
- *Dynamic Fluorescent Orange, Grey and White colour finish.*
- *Frame sizes: 21", 23½", 25"*

The wonderful thing about the Raleigh range is that there is genuinely something for everyone who rides.

With these bikes in particular, you can see how precisely "form follows function".

So bikes which are intended for short shopping trips have bags of storage capacity.

Big, easy-rolling wheels give a bike classic elegance, whereas small, busy wheels make a bike chic and cosmopolitan.

For some, the City Bike means one thing.

Raleigh's traditionally styled, classically elegant and universally admired bicycle-about-town. Much imitated but never matched.

But then all roads lead to Raleigh eventually.

EXCEL

- *12 speed index gear system with stem mounted levers for a fast, precise gear change.*
- *Lightweight alloy brakes, handlebar, stem and cotterless chainset give strength and performance benefits.*
- *Cushioned handlebar tape and padded ladies' sports saddle.*
- *Colour: Warm White with Indigo Blue and Avocado.*
- *Frame sizes: 19", 20", 22"*

CHLOE

- *Drop handlebars and brake lever extensions for a choice of comfortable riding positions.*
- *Convenient stem mounted gear lever and 5 wide ratio gears to cope with a variety of road terrains.*
- *Lightweight mudguards for stylish protection in the rain.*
- *Colour: Warm White with Vaporised Magenta*
- *Frame sizes: 17", 19", 20", 22"*

- *Exclusive integrated vine leaf graphics.*
- *Saddle and handlebar can be quickly adjusted to suit all the family.*
- *Colour: Sparkling Champagne*
- *Inside leg: 25" – 32"*

PARTS AND ACCESSORIES

As you've come to the logical decision of settling on a Raleigh racer, you won't want to spoil the effect with second-rate or inappropriate parts and accessories.

Raleigh's choice of saddles, pedals, toe-clips and straps, wedge bags and waterbottles and cages are styled to the bikes.

And they look right because they are right.

Maintaining your bike should be a pleasure rather than a chore, so nuts, bolts and add-ons are genuinely compatible, which makes them easier to fit.

All of this is accomplished with tools made for the job. (There's even a fold-away Maintenance Stand to hold the bike in position while you work on it).

As Raleigh have gone to such great lengths to give their Team Raleigh riders superbly comfortable and distinctive clothing, it seemed sensible to make it available to all our riders.

So now you can ride around in perfectly tailored, immensely practical and eye-catching race gear, colour coordinated to stand out in any company.

And look every inch the part.

RALEIGH PARTS AND ACCESSORIES

THE BEST THING NEXT TO A RALEIGH

PARTS AND ACCESSORIES

Riding a bike on today's busy roads calls for more than competence, it requires a certain flamboyance.

One needs to be seen.

So Raleigh have introduced a range of reflective items to help you stand out, whatever the conditions. Besides tabards, arm bands, leg bands and Sam Browne belts, there are brightly coloured fluorescent jackets which have the added advantage of being waterproof.

Helmets and helmet covers aren't merely for decoration either. They are ultra lightweight without compromising their prime function. Protection.

Whatever use you put your bike to, your cycle can be accessorised as well.

Carriers, bags and panniers vastly increase your payload and give you somewhere to stow the Puncture Repair Outfit and necessary tools and waterproofs. (If the weather looks threatening).

To make your Raleigh even more comfortable to ride, you may like to try a sprung saddle from our range or choose a set of sponge handlebar grips, which are softer on the hands without forfeiting contact and control.

Now your bike is exactly the way you want it, hold onto it.

By securing it with a heavy-duty lock from the Raleigh range.

THE BEST THING NEXT TO A RALEIGH

A BRILLIANT PAINT JOB

Raleigh have got paintwork down to a fine art. Our own Laboratory staff and Design Department develop the most exciting, innovative and original new colours, finishes and graphics. We have the most sophisticated cycle finishing plant in the world. Here, the technology is on a par with that used by car manufacturers. Up to four coats of finish are applied, after the tubes have undergone a 15 stage priming process to prevent corrosion, including total submersion in electrophoretic primer to coat them inside and out. To ensure the strength of the Raleigh finish is double that of most other bikes, we mainly use dry powder paint finishes which are fused together at very high temperatures.

TOP GEAR

Gears are used to reduce the effort required to pedal. Sturmey Archer hub gears are easy to use and are virtually maintenance free. Where performance is important there are derailleur gears which provide between 5 and 14 gears to cope with the ups and downs of British roads. Most Raleigh Race bikes are fitted with indexed derailleur gears which provide greater speed and accuracy when changing gear.

YOU'VE GOT TO HAND IT TO US

Raleigh offer you a choice of handlebar styles. The sporty 'drop' handlebars on racers enable the rider to adopt a low hand position at speed or a high grip for climbing hills. The semi-raised bar is designed for stability and responsive steering control.

THE RALEIGH CYCLE PROTECTION REGISTER

To help you should you be unfortunate enough to have your bike stolen, Raleigh can register your new bike, FREE, on our unique customer computer. You have a much better chance of recovering it if you have recorded the frame number and its specifications for ease of identification. See your Raleigh Bicycle Guide for details.

THE RALEIGH GUARANTEE

All Raleigh Bikes conform to BS6102 (British Standard for Bicycles). They are so well constructed, we guarantee the frames and forks for a full 15 years and all our bikes carry a one year parts warranty. See your Raleigh Bicycle Guide for details.

Alloy propstand
APPROX WEIGHT 33 1/2 lbs

SIZE

The nominal frame size is the measurement from the top of the seat tube (where the saddle pin fits into the frame) down to the centre of the bottom bracket axle (the axle which carries the pedal cranks).
With the correct frame size, you should be able to sit on the saddle and just touch the ground on either side, but you must be able to reach the handlebars comfortably.
It is sometimes worth considering a smaller frame with the saddle slightly raised in order to obtain a more comfortable reach.
The sizing charts throughout this brochure give a guide to frame sizes against inside leg measurements. We recommend, however, that all bicycles are tried for size before purchase.
