HERITAGE.

A WORD USED FREELY BY SO MANY THAT IT BEGINS TO LOSE ITS MEANING.

Heritage is not something that is gained overnight or to be used merely as a marketing word to push a product. Heritage is earned. Heritage is storied. Heritage is passed down from generation to generation. It's a vital piece in any lineage; the groundwork of any timeline, and the basis of tradition.

We don't use the word heritage lightly. We use it with the respect and pride that can only come from a company that has spanned generations. Keeping an ideal and a presence requires diligence, perseverance and a passion for what you believe in and what you do.

It's the pride in our heritage that you'll find in our 2011 line of bicycles. New bicycles that embrace the latest technology, but remain true to who we make our bikes for. Steel Bicycles that speak to our history but are not mired in the past. Contemporary commuters made for modern urban environments, that retain the class and sophistication of the originals.

It is our desire to represent, improve, and build upon this storied Heritage for generations to follow.

ROAD
SPEED.

At some point we crave it. At some point we need it. Pure, unadulterated, hand-trembling, leg-quaking, stomach-turning, senses-buzzing, lung-seizing speed. While practical sense is screaming to slow down and recover, something primal is begging to dig a little more and push a bit faster and further than what you've done before.

Re²P
Relaxed Ergonomic
Effective Position

ALL NEW PERFORMANCE ROAD BIKES DESIGNED FOR THE MOST IMPORTANT COMPONENT OF THE BICYCLE… THE RIDER.

RE²P (Relaxed Ergonomic Effective Position) geometry: Designed for the new Revenio, our Raleigh-exclusive RE²P creates a more confident, upright position that reduces body stress and fatigue to achieve an overall increase in performance. The result is an all-day ride that strikes a perfect balance of speed, efficiency and comfort.

Achieving this blend requires manipulating the shape of each lightweight butted Atomic 13 SL aluminum tube to its optimal form for function. Adding our own RE²P geometry reduces the reach to the handlebars, lowers the stand over, and gives a more upright position that produces a ride that is unmatched for miles of enjoyment.

When it's all about endurance, comfort and performance, it's all about REVENIO

Re²P Reduced Ergonomic Effective Position

Re²P
Relaxed Ergonomic
Effective Position

ALL NEW PERFORMANCE ROAD BIKES DESIGNED FOR THE MOST IMPORTANT COMPONENT OF THE BICYCLE… THE FEMALE RIDER.

RE²P (Relaxed Ergonomic Effective Position) geometry: Designed for the new Capri, our Raleigh-exclusive Women's RE²P creates a more confident, upright position that reduces body stress and fatigue to achieve an overall increase in performance. The result is an all-day ride that strikes a perfect balance of speed, efficiency and comfort.

Achieving this blend requires manipulating the shape of each lightweight butted Atomic 13 SL aluminum tube to its optimal form for function. Adding our own Women's Specific RE²P geometry, with increased seat angle and shorter toptube, reduces the reach to the handlebars, lowers the stand over, and gives a more upright position that produces a ride that is unmatched for miles of enjoyment.

When it's all about endurance, comfort and performance, it's all about CAPRI

STEEL ROAD
THIS IS WHERE IT ALL BEGAN.

This is our Past, our Present, and our Future. This is where Raleigh took a simple passion and turned it into 123 years of history. Bikes like our very first fixed gear ignited the passion for movement well before the first horseless carriage. Our steel bikes carried Grand Tour heroes along with World Champions to victory and inspired many bike manufacturers to weld together their first bike. It is the bikes we make today that will live on to see future generations discover a simple two-wheeled machine, and to continue the love affair we've had with them from the beginning.

PERFORMANCE HYBRID

In the Pacific Northwest the Cascade Bicycle Club annually hosts the Seattle To Portland ride. A 200-mile odyssey between two of America's great cycling cities. For many it's the experience of a lifetime and sets them on a new path. One that undertakes a huge commitment to train, ride and push themselves farther than they ever thought possible. The tool they need doesn't need to have won a Grand Tour…it needs to carry them across the finish line of a goal achieved.

STEEL HYBRID
IT ALL STARTS SOMEWHERE.

Some bikes are born on a drawing board. Others are pieced together coldly with the click of a mouse and the tap of a keyboard. Over 80 years ago we were making bikes destined to be collector's items and earn the moniker of Classic. That same passion lives today in our Steel Hybrids. Bikes inspired by the originals to be the next great classic.

ROADSTER

MOUNTAIN

TWENTY TWO MILES UNDER THE TIRES

with another twenty to get back to the parking lot. Deep in the middle of nowhere and yet everywhere at the same time. There was no shuttle to get here. No ski lift to make quick work of the climbs. Just the gear you need on your back, the bike between your legs and the desire to get away in your soul.

ALL GREAT MOUNTAIN BIKES START AT THE SAME PLACE: THE FRAME.

The frame is the heart and soul of any bike. It's where the trail manners, the climbing ability, the descending confidence come from. All of it is based on the solid foundation of the frame.

With the 2011 Aluminum Talus Mountain Bikes, we based the entire line on one solid foundation. We gave them an Atomic 13 SL Butted Aluminum Frame that is lightweight and trail ready. All the tubes are specially formed and shaped to decrease weight where it's not needed and increase stiffness where it is. We CNC machined the head tube for a rigid front end for tight single track conditions.

When looking for a Mountain Bike that is ready for the trail now and is ready to grow with you as your abilities improve, TALUS is ready.

FOR LADIES ENJOYING THE SINGLE-TRACK FRAME OF MIND,

it's common knowledge that the frame is the heart and soul of all great mountain bikes. It's where the trail manners, the climbing ability, the descending confidence come from. All of it is based on the solid foundation of the frame.

With the 2011 Aluminum Eva Mountain Bikes we based the entire line on one solid foundation. We gave them an Atomic 13 SL Butted Aluminum Frame that is lightweight and trail ready. Women's Specific geometry decrease reach and stand over, yet retaining all the ride characteristics of our Talus Mountain Bikes. All the tubes are specially formed and shaped to decrease weight where it's not needed and increase stiffness where it is. We CNC machined the head tube for a rigid front end for tight single track conditions.

When looking for a Mountain Bike that is ready for the trail now and is ready to grow with you as your abilities improve, EVA is ready.

COMFORT

VERY FEW PEOPLE WOULD CALL A PODIUM A DESTINATION.

A coffee shop, a local grocery store or restaurant are what a majority of us would call a destination. Destinations that are close enough that it seems silly to not take a quick spin on your bike to get there.

CRUISER

"IF IT AIN'T BROKE...DON'T FIX IT"

the saying goes. And when a class of bikes has been around as long and remained so true to its roots as the cruiser...we couldn't agree more. Updated look and distinct personalities that pick the rider before they even walk in the door.

YOUTH

In Steamboat Springs CO, home to more winter Olympians than any other town, it's said that the kids can ski before they can walk. Get them started early with a Push Bike and keep graduating your future Tour Champion through the line while boasting that your kid could ride a bike before they could walk.

Understand your bike and its intended use. Choosing the wrong bicycle for your purpose can be hazardous. Using your bike the wrong way is dangerous.

No one type of bicycle is suited for all purposes. Your retailer can help you pick the "right tool for the job" and help you understand its limitations. There are many types of bicycles and many variations within each type. There are many types of mountain, road, racing, hybrid, touring, cyclocross and tandem bicycles. There are also bicycles that mix features. For example, there are road/racing bikes with triple cranks. These bikes have the low gearing of a touring bike, the quick handling of a racing bike, but are not well suited for carrying heavy loads on a tour. For that purpose you want a touring bike. One can optimize a bicycle for their specific purpose within a classification, so do your homework. Visit your bicycle shop and find someone with expertise in the area that interests you. Seemingly small changes such as the choice of tires can improve or diminish the performance of a bicycle for a certain purpose. On this page, we generally outline the intended uses of various types of bikes. Industry usage conditions are generalized and evolving. Consult your dealer about how you intend to use your bike. For more information, please see the Raleigh Owner's Manual.

HIGH-PERFORMANCE ROAD

CONDITION 1: Bikes designed for riding on a paved surface where the tires do not lose ground contact.
RALEIGH MODELS INCLUDED: **Team, Prestige, Competition, Revenio Series, Capri Series, International, Record Ace, Grand Prix, Clubman, Back Alley, Rush Hour, Rush Hour FB, Cadent Series, Alysa Series**
INTENDED: To be ridden on paved roads only.
NOT INTENDED: For off-road, cyclocross, or touring with racks or panniers.
TRADE OFF: Material use is optimized to deliver both light weight and specific performance. You must understand that (1) these types of bikes are intended to give an aggressive racer or competitive cyclist a performance advantage over a relatively short product life, (2) a less aggressive rider will enjoy longer frame life, (3) you are choosing light weight (shorter frame life) over more frame weight and a longer frame life, (4) you are choosing light weight over more dent resistant or rugged frames that weigh more. All frames that are very light need frequent inspection. These frames are likely to be damaged or broken in a crash. They are not designed to take abuse or be a rugged workhorse.

GENERAL PURPOSE RIDING

CONDITION 2: Bikes designed for riding Condition 1, plus smooth gravel roads and improved trails with moderate grades where the tires do not lose ground contact.
RALEIGH MODELS INCLUDED: **Sojourn, One Way, Misceo Series, Alley Way, Folding i8, Detour Series, Route Series, Roadster Series, Calispel Series, Talus 2.0/3.0/4.0, Eva 2.0/3.0/4.0, Venture Series, Circa Series, Cruiser Series**
INTENDED: For paved roads, gravel or dirt roads that are in good condition, and bike paths.
NOT INTENDED: For off-road or mountain bike use, or for any kind of jumping. Some of these bikes have suspension features, but these features are designed to add comfort, not off-road capability. Some come with relatively wide tires that are well suited to gravel or dirt paths. Some come with relatively narrow tires that are best suited to faster riding on pavement. If you ride on gravel or dirt paths, carry heavier loads or want more tire durability talk to your dealer about wider tires.

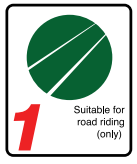

CROSS-COUNTRY, MARATHON, HARDTAILS

CONDITION 3: Bikes designed for riding Conditions 1 and 2, plus rough trails, small obstacles, and smooth technical areas, including areas where momentary loss of tire contact with the ground may occur. NOT jumping. All mountain bikes without rear suspension are Condition 3, and so are some lightweight rear suspension models.
RALEIGH MODELS INCLUDED: **XXIX, XXIX+G, Talus 29, Talus 29 Sport, Talus 5.0/8.0, Eva 8.0**
INTENDED: For cross-country riding and racing which ranges from mild to aggressive over intermediate terrain (e.g., hilly with small obstacles like roots, rocks, loose surfaces and hard pack and depressions). Cross-country and marathon equipment (tires, shocks, frames, drive trains) are light-weight, favoring nimble speed over brute force. Suspension travel is relatively short since the bike is intended to move quickly on the ground.
NOT INTENDED: For Hardcore Freeriding, Extreme Downhill, Dirt Jumping, Slopestyle, or very aggressive or extreme riding. No spending time in the air landing hard and hammering through obstacles.
TRADE OFF: Cross-Country bikes are lighter, faster to ride uphill, and more nimble than All-Mountain bikes. Cross-Country and Marathon bikes trade off some ruggedness for pedaling efficiency and uphill speed.

CYCLO-CROSS

CONDITION 2: Bikes designed for riding Condition 1, plus smooth gravel roads and improved trails with moderate grades where the tires do not lose ground contact.
RALEIGH MODELS INCLUDED: **RX 1.0, Port Townsend**
INTENDED: For cyclo-cross riding, training and racing. Cyclo-cross involves riding on a variety of terrain and surfaces including dirt or mud surfaces. Cyclo-cross bikes also work well for all weather rough road riding and commuting.
NOT INTENDED: For off road or mountain bike use, or jumping. Cyclo-cross riders and racers dismount before reaching an obstacle, carry their bike over the obstacle and then remount. Cyclo-cross bikes are not intended for mountain bike use. The relatively large road bike size wheels are faster than the smaller mountain bike wheels, but not as strong.

ROAD TANDEMS

CONDITION 1: Bikes designed for riding on a paved surface where the tires do not lose ground contact.
RALEIGH MODELS INCLUDED: **Companion**
INTENDED: Are designed to be ridden on paved roads only. They are not designed for mountain biking or off-road use.
NOT INTENDED: Road tandem should not be taken off-road or used as a mountain tandem.

YOUTH SIDEWALK

Bikes designed for riding on a paved surface with adult supervision, and no traffic present.
RALEIGH MODELS INCLUDED: **Retro20, Retro16, all Youth models**

It is the owner's responsibility to thoroughly read and understand the owner's manual and regularly examine the product to determine the need for professional, authorized service or replacement. Please consult an authorized Raleigh America, Inc., bicycle dealership with any questions on use and maintenance. Regardless of the length of the warranty, Raleigh America, Inc., does not infer that the bicycle will last forever or cannot be broken. All Raleigh framesets and bicycles have a finite, limited useful product life cycle. The length of this useful life cycle will vary by environment, riding conditions, frame material and construction, riding style, maintenance, and the amount as well as type of use the bicycle or frame is subjected to. A worn out bicycle does not indicate it is warrantable, rather that the bicycle has outlived (exceeded) its useful product cycle.

Raleigh America, Inc., warrants this new Raleigh America, Inc., bicycle frame against defects in material and workmanship, subject to the following limitations, terms, and conditions:

Item	Warranty Term Length
Steel bicycle frames with wheel size less than 20˝	Lifetime, for as long as the original retail purchaser owns the bicycle*
Steel bicycle frames with 20˝, 24˝, 26˝, or 700c wheels	Lifetime, for as long as the original retail purchaser owns the bicycle*
Alloy bicycle frames with 20˝, 24˝, 26˝, or 700c wheels	Lifetime, for as long as the original retail purchaser owns the bicycle*
Full Carbon Fiber or Carbon fiber/alloy bicycle frames with 20˝, 24˝, 26˝, or 700c wheels	Lifetime, for as long as the original retail purchaser owns the bicycle*
Full Suspension bicycle frames	Five years from the date of original retail purchase to the original purchaser*
Forks, Non-branded	One year from the date of original retail purchase
Forks, Branded	Covered under the fork manufacturer's warranty. Consult dealer for details.
Components, Non-branded	One year from the date of original retail purchase
Components, Branded	Covered under the component manufacturer's warranty. Consult dealer for details.
Finish and decals	One year from the date of original retail purchase
Suspension parts including but not limited to bushings, pivot bearings, link plates, bolts, fasteners, chain stays, seat stays, and shock units	One year from the date of original retail purchase under the condition that the bicycle is regularly maintained as well as operated under normal riding conditions
Labor, frame replacement	One year from the date of original retail purchase
Labor, parts replacement (Including Swingarm)	Thirty days from the date of original retail purchase

1. This warranty only applies to the original retail purchaser and is not transferable.
2. Specific model exceptions to this warranty are noted with the bicycle documentation.
3. Raleigh America, Inc.'s sole obligation during the acceptable duration of this warranty is, AT RALEIGH AMERICA, INC.'S OPTION, to repair or replace the product with a current item that is equivalent in construction, design, or value.
4. Raleigh America, Inc.'s liability under this limited warranty shall never exceed the amount of the original purchase.

To obtain service under this warranty, you must:

1. Return your fully assembled Raleigh America, Inc., bicycle to an authorized Raleigh America, Inc., bicycle dealer within the United States of America. A bicycle that has had the components removed cannot be evaluated or warranted.
*2. Provide proof of purchase, including but not limited to the retail bill of sale, your credit or debit card receipt, or other satisfactory proof of the date of purchase.
3. The proof of purchase must indicate the bicycle was sold fully assembled and adjusted by an authorized Raleigh America, Inc. dealer within the United States of America. Sales where the bicycle was delivered in a carton to the end user (e.g., mail order or Internet sales) void the warranty.

This warranty does not apply to damage or failure due to:

1. Accidents, alteration, abuse, neglect.
2. Material fatigue, normal wear and tear.
3. Improper assembly, maintenance, or installation of parts or accessories not originally intended to be compatible with the bicycle as sold, including but not limited to power assist accessories, forks, brakes, or tires different from original specification.
4. Improper assembly by non-authorized dealers inclusive of bicycles sold in a carton to the end user.

This warranty also excludes:

1. Commercial use (such as rental or security fleets), racing or competition, stunting, jumping, trick riding, ramp riding, aggressive riding, riding with excessive loads, lack of technical skill, competence, or experience of the user.
2. Bicycle frames, which have been repaired (e.g. welded or bonded), repainted, or had the original decals removed.
3. Frames, forks, wheels, axles, handlebars, and stems, which are bent from just riding along, can be a sign of misuse or abuse and are not covered under this warranty.
4. Personal transportation costs or product freight costs to or from an authorized Raleigh America, Inc., bicycle dealer.
5. Any additional costs associated with the incompatibility of existing parts and the replacement frame or fork. These costs are the responsibility of the consumer.

Warranty replacement frames must be fully assembled by an authorized dealer to maintain the warranty coverage.
The warranty for the replacement frame shall be the warranty offered for the equivalent bicycle's frame of that model year. If not assembled by the dealer, replacement frames are considered aftermarket frames.
Aftermarket frames are only warranted for one year from the date of purchase for the original purchaser. This one-year warranty excludes any issues that can be traced to assembly or component incompatibility.

This warranty is expressly in lieu of all other warranties, and any implied warranties of merchantability or fitness for a particular purpose created hereby, are limited to the same duration as the express warranty herein. Raleigh America, Inc. shall not be liable for any incidental or consequential damages. Some states do not allow the exclusion or limitations of implied warranties, incidental or consequential, so the above limitations and exclusions may not apply to you. Retailers and wholesale outlets for Raleigh America, Inc., products are not authorized to modify this warranty in any way. This warranty gives the original owner specific legal rights. Other additional rights may vary from state to state.

All Raleigh bicycles meet or exceed CPSC standards. Complete equipment is included with each Raleigh bicycle but not necessarily shown in photographs, e.g. reflectors. All Raleigh bicycles are covered under warranty. See your authorized Raleigh dealer for complete details. Raleigh specifications are subject to change without prior notice. Raleigh is a registered trademark of the Raleigh Cycle Limited. Raleigh bicycles are distributed by Raleigh America, Inc.

WARNING: All riders depicted in this catalog are professionals. Do not attempt to duplicate any actions that are beyond your abilities. **ALWAYS WEAR A HELMET!**
