RALEIGH

High specification Aluminium rims are an added safety feature on Raleigh pavement bikes, they offer a weight reduction and increased breaking performance.

Junior non slip pedals, a safety feature Raleigh has been fitting to Children's bikes for years, they are fitted with rubber pads which prevent feet slipping off. Each pair of non slip pedals is carefully colour matched to fit the bike design.

High specification V-brakes are fitted to Raleigh children's bikes to improve breaking performance.

Raleigh Kid's
