FRAMES

Founder Ross Shafer's fourteen years of experience goes into every **SALSA Bicycle Frame**. Precision alignment, careful construction and functional design are the hallmarks of **SALSA Frames**.

SALSA CUSTOM FRAMES

Only 20-25 custom orders are taken each year. Unsurpassed personal attention to fit and detail make these signature frames truly special. These are available for any type of cycling (sorry, no tandems.) Custom titanium off-road frames designed by Ross and built by **Merlin Metalworks** are also available. For more information call **SALSA** and ask for Ross.

SALSA ALACARTE

The **SALSA Alacarte** was first produced in 1984. Although considered by some to be a radical, steep angled departure from its high end contemporaries, the **Alacarte** soon gained a reputation as a well balanced and quick handling bike. The original **Alacarte** geometry has survived intact and has nearly become an industry standard. The **Alacarte** design worked great then and still does. A few notable changes, such as tig welding, ½" shorter chainstays sloping top tubes, and a gusseted downtube/headtube joint, bring the **Alacarte** right up to date!

For 1991 we are please to announce the use of **Columbus** tubing on all **Alacarte** frames. Also for '91, you'll find a Bontrager Competition Composite Fork up front. We feel this is one of the best performing forks available today.

The **Alacarte** frame comes with braze-ons for cantilever brakes, all cable routings, two water bottles and fenders. The frameset also includes a **SALSA Pro-Moto** stem of your choice. Non-stock colors and special paint jobs are available at extra cost.

Alacarte Specifications (in cm.)

Size	Head ∠	Seat ∠	TopTube	Fork Rake	BB Height	Chain Stay	Wheel Base	Standover

SALSA NEWS & SPECIALS

NEWS

Ignore the $2.00 charge for plating on stems that you see on our new price list. We are going back to black powder-coating for the standard finish, and will no longer offer plating as an option. We do, however, have many plated stems in stock and they will be the same price as black.

Look for a less expensive Alacarte frameset in 1991. It will feature the same quality construction but use a less expensive fork and have a durable powder-coated finish.

Due to the lack of supply from other sources, **Salsa** will be attempting to stock a few of our most popular stem models in the 1-inch "Avenger" size. Call for availability.

We've recently installed a powder-coating system in the shop and are happy to offer quality coatings on frames and accessories. We guarantee high quality, fast turn-around and reasonable prices. Call us for more details.

STEMS

SALSA CYCLES is America's premier manufacturer of quality handlebar stems. Proper position and fit allow for more comfort and power. **SALSA Stems**, which are available for every cycling need, provide great flexibility in establishing a rider's optimum position on the bike. All **SALSA Stems** are tig welded and built with **Cro-Moly** steel.

SALSA Off-Road Stems may be used with or without shims to mount all 22.2mm. and 25.4mm. bars. (P series stems are made in both 25.4mm. and 26.0mm. clamp sizes). Standard finish is black powdercoat. Satin nickel finish available at extra charge.

SALSA Off-Road Stem Specifications

Model	Angle	Reach (in cm.)	Rise (in cm.)		H-Bar Diameter (in mm.)
			Min.	Max.	
A 10	11°	10	3.5	6.3	25.4
*A 13	11°	13	4.1	6.8	25.4
*A 15	11°	15	4.5	7	25.4
*F 12	20°	12	5.9	8.4	25.4
K 10	26°	10	6.3	8.8	25.4

NEW COMPETITION STEMS

For the expert level racer who's trying to safely shed every gram possible, we've put our three most popular sizes on a diet and been able to strip away an average of 55 grams. **Competition** stems are available with or without the original rollerguide. **SALSA Competition** stems are intended for the rider who understands the relationship between finesse and superlight components. These stems are recommended for riders weighing under 185 lbs..

Competition Stem Weights in Grams

	Moto	Pro-Moto
A 13	292	307
A 15	306	321
F12	287	302

SALSA ROAD STEMS

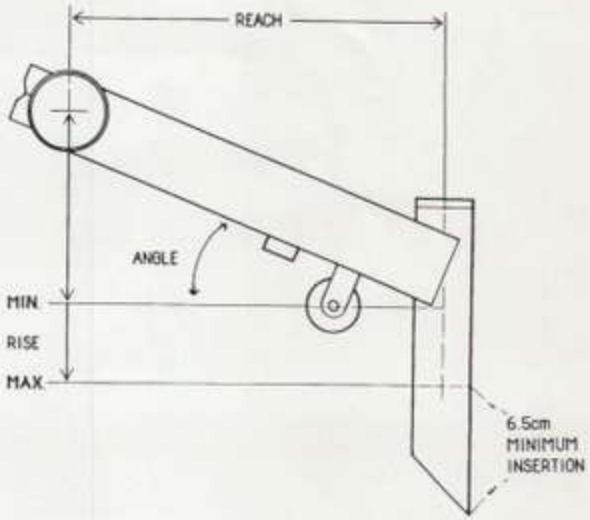

Steel is back as a choice for professional quality road stems. **SALSA** has been producing tig welded **Cro-Moly** road stems since 1987. Their light weight, rigidity and precise fit make them the choice for any serious cyclist. **SALSA** road stems are available in 5 to 15 centimeter reaches (1 cm. increments) in both the traditional style and a 5º up model. All road stems have a 26.0 mm. clamp size. Reach on road stems is measured center to center along the extension in the traditional manner.

SALSA SPRINT STEMS

Although the need still exists, not many stems are made any more which provide the positioning, strength and rigidity needed by today's top track sprinters. **SALSA Sprint Stems** are made to fill that need. Stock sizes are 9 to 12 cm. (1 cm. increments) in the traditional deep drop style. Clamp size is 25.4 mm. for steel track bars.

SALSA CUSTOM STEMS

Many positioning requirements cannot be met by stock stems that are readily available, which is why we continue to offer stems that are custom made to your specifications. There is little doubt that **SALSA CYCLES** makes more custom stems than any other stem maker in the world. Custom sized stems in any quantity are available by special order. These can be made for any cycling application.

CUSTOM STEM ORDERING PROCEDURE

To order a custom stem, supply us with: reach, minimum or maximum rise (allow approximately 2.5 cm. of adjustment), rider's weight, handlebar diameter and steerer diameter. If you are using a Cunningham Fitfinder, tell us so that we can let you know what information we need from it.

Custom stems can be tig welded or fillet brazed, and are available, like our new **Competition Stem**, at a lighter weight (at **SALSA'S** discretion).

We schedule our custom stem batches for the second Monday of each month. Rush orders are available for an extra $25 charge.

SALSA/MERLIN HANDLEBARS

Merlin Metalworks Manufactures one of the lightest and strongest handlebars on the market. The **SALSA/Merlin Bar** is 22° wide and comes in both 5º and 11º. Construction of straight gauge ⅞" X .039" wall 3-2.5 titanium allows for the best balance of strength and shock absorption available. Black anodized aluminum shims are included, weight with shims is 184 grams.

SALSA ALACARTE

The **SALSA Alacarte** was first produced in 1984. Although considered by some to be a radical, steep angled departure from its high end contemporaries, the **Alacarte** soon gained a reputation as a well balanced and quick handling bike. The original **Alacarte** geometry has survived intact and has nearly become an industry standard. The **Alacarte** design worked great then and still does. A few notable changes, such as tig welding, ½" shorter chainstays, sloping top tubes, and a gusseted downtube/headtube joint, bring the **Alacarte** into the nineties!

We are pleased to announce the use of specially selected **COLUMBUS CROMOR tubesets** on all **Alacarte** frames. All framesets are equipped with the **BONTRAGER Comp fork** and **SALSA Pro-moto** stem. Today's **Alacarte** features **FAT CITY'S Double Chin** gusset and a redesigned seat cluster with the new **Flip-lock** quick release seat collar devised by **Ross Shafer.** The **Flip-lock** design was refined in collaboration with and manufactured by **Dave Garoutte** of **DKG.**

The **Alacarte** frame comes with fittings for cantilever brakes, two water-bottles, fenders, and your choice of top tube or standard cable-routings. Call for paint info.
