Salsa

NEWS

We at Salsa would like to thank all of our customers for making 1991 such a great year. It has been quite a challenge expanding the production of both our frames and stems. Ross has been busy working on a number of new products this year. As a result we have some great new products to introduce, as well as some we hope to have ready in the coming year.

Ross celebrates his 15th anniversary as a framebuilder this year. He considers his recent induction into the Mountain Bike Hall of Fame as the best anniversary present possible. Ross thanks all those whose support and votes made his induction possible.

Some of our longtime dealers will find someone new in the office these days. Julie has left to take it easy for a while and possibly continue her education. Whatever she chooses we wish her the best of luck! Richard Norgrove is our new Minister of Office Affairs. Helping him in the office and learning the new (for Salsa) position of purchaser is Colin Esquibel. We're happy to have these guys on board.

The recall on 241 of our Moto and Pro-moto stems has gone very well thus far. Huge thanks to all those out there who have helped us out by participating. There are still several of these stems out there, if you have any questions regarding this recall please don't hesitate to call us.

In order to work on new projects, Ross will not be taking custom frame orders for 1992.....What new projects? A short list includes: collector series Salsa t-shirts, Salsa Salsa (yep, hot stuff!), new stem models, and yes you guessed it.....some suspension ideas!

The Salsa Alacarte undergoes only a few changes for 1992. The changes are: an external-butted seat tube (uses a 27.0 seatpost), the new BONTRAGER STANDARD fork (Bontrager's COMP model will be a $25.00 option). Also being added to the paint choices is our popular JELLYBEAN finish over a black base. Paint choices for the ALACARTE include White, Black, Met. Red, Pearlescent Purple, andWhite or Black Jellybean.

NEW PRODUCTS

SALSA PRO-MOTO BAR: It's back, this time in Heat-Treated 7075 aluminum, and produced by a company that pioneered ultra-light heat-treated handlebars. The maker is 3TTT of Italy. We at Salsa feel very happy and fortunate about this new association with 3TTT. The bar is 58 cm (23") in length, and weighs 159 gms. Finish is black anodized with laser-engraved graphics. Price to be announced.

SALSA FLIP-OFFS: Our new hub quick releases incorporate the cam-lever from our FLIP-LOCK seat collar, in conjunction with a special cup-washer that allows full cam support. This means they work just like the traditional type of Q. R. and need no extra tightening (when adjusted properly) once the lever is flipped to its closed position. FLIP-OFFS are available with stainless steel or titanium skewer rods. The Stainless version weighs 102 gms. per pair, with the TI model weighing 86 gms.

SALSA MANGOS DE AMOR: These are our new dual-position bar-ends. They use a clamp on design which enables their use on almost all bars. They are made in Taiwan out of cro-moly. A lighter weight aluminum version is in the works. Yes, we know it is a weird name for a bar-end, but how does it make you feel?

SALSA TI BOLT STEMS: For 1992 we are offering a titanium bolt option. Using SRP's fine 6/4 titanium bolts, a rider can subtract 24 gms. from the steel bolt stem models. We will also be stocking these bolts for wholesale to dealers.

SALSA PEPPERMAN COFFEE MUGS: You've seen and worn him on shirts for many years, now you can see him with your favorite hot beverage.
