

No Crap . . . That's our rap.

From the very beginning, **SALSA CYCLES** has consistently recognized the difference between the real needs of serious cyclists and faddish marketing trends. In **SALSA** design solutions, you won't find answers to questions that no one asked. **SALSA CYCLES** was the first to offer any real selection in off-road stem sizes back when the norm was "one size fits all", these stems have long been considered the industry standard. The geometry pioneered on the first **SALSA** frames 13 years ago has been copied by so many manufacturers, there's no doubt that this is indeed the most popular off-road design. More recently, our FLIP-OFFS have been recognized by many as the best functioning "new style" quick releases. And of course there's our MANGOS DE AMOR. We are constantly getting reports that these are the most comfortable bar-ends on the market.

These claims are not grandiose bits of ad copy thought up by an aggressive marketing department. These statements have history behind them. History that has been created over 13 years by thousands of riders, over zillions of miles, in every condition imaginable.

We at **SALSA CYCLES INC.** feel that riding bicycles is the most fulfilling facet of the cycling experience. With that in mind we continue to proudly produce durable, functional, and simple to use products that assist in the enjoyment of bicycle riding.

SALSA CYCLES delivers intelligently thought out products with enduring designs. HAPPY RIDING !!

SALSA CYCLES GENERAL POLICIES

Business Hours:

7:30 a.m. to 4:30 p.m. (West Coast Time), Monday thru Friday. (Lunch break is taken from 12:00 p.m. to 1:00 p.m.) During non-business hours, our answering machine will record your message.

To Place an Order:
Please note our 800 phone number: 1-800-762-HOTT (1-800-762-4688). Or fax your order to us at 707-762-6847.

Minimum Order:

To help defray shipping and C.O.D. charges, we recommend a $50.00 minimum order.

Shipping Policy:

We process and ship orders the same day or the next day for items in stock. Orders are shipped via UPS and are C.O.D. unless otherwise previously arranged. UPS next day air (Red Label), UPS 2nd day air (Blue Label), and 3 day select are available upon request.

Backorders:

We hold and fill backorders. If a backorder is past 15 days we will call to confirm that items are still needed. For backorders less than $50.00, we will confirm that the items are still needed and/or if additional goods are desired.

Invoicing/Terms:

C.O.D. Orders: The original invoice is included with your order. Shipping charges include freight plus a $4.50 UPS C.O.D. charge.

Net Terms: Previous arrangements must be made for net terms. A copy of the invoice is shipped with the order for your reference. A copy of the invoice is also sent via regular mail to process for payment.

Past Due Accounts: 1-1/2% per month finance charge will be added to past due invoice balances.

Return/Refunds:

If an item is returned or if there is an invoice error, we prefer to issue a refund check rather than to hold credit. However, credit can be used toward merchandise that is being shipped immediately.

STEMS

SALSA CYCLES is America's premier manufacturer of quality handlebar stems. Proper fit and position allow for better control, comfort, endurance and power. **SALSA** STEMS, which are available for every cycling need, provide great flexibility in establishing a riders optimum position. There is no match amongst the competition when it comes to variety. When last counted we had 80 different models of stems. And that doesn't include our monthly run of custom stems.

SALSA STEMS have a long-standing reputation for durability, and quality construction. We like that, and for the present are happy to stick with the formula that earned this for us. The immaculate tig-welds join together fine American made CRO-MOLY steel tubing. Most of which is made to special dimensions, and exacting tolerances exclusively for **SALSA**.

SALSA MOTO STEMS

These stems fit 1 inch (25.4mm) handlebars (P-series are also stocked with a 26.0mm clamp). All models are available for 1 inch steerers, call us for our current stock of stems for 1-1/8 inch steerers. Any of these stems can be supplied with **SALSA'S** original "rollerguide" for a small additional charge.

SALSA MOTO COMPETITION STEMS

We've managed to shed a few more grams off this model for 1994. The **SALSA** COMPETITION stem has lost some of its vertical adjustment, but has gained SRP titanium hardware. These changes leave us with the same proven stem but in a lighter weight than ever. For instance our A13 (11 degree, 13cm) weighs a scant 256gms. These are intended for the rider who understands the relationship between finesse and superlight components. They are recommended for riders weighing under 185lbs.

SALSA ROAD STEMS

Steel is back as a choice for professional quality road stems. **SALSA** has been producing tig-welded Cro-moly road stems since 1987. Their light weight, rigidity and precise fit make them the choice for any serious cyclist. **SALSA** road stems are available in 5 to 15 centimeter reaches (1cm increments only) in both the traditional style and a 5 degree up model. All road stems have a 26.0 mm bar clamp.

MOMBAT.org

AHEADSET STEMS

This popular headset system has us adding new sizes to the line mighty frequently these days. We stock MOTO stems in various angles and reaches for both 1 inch & 1 -1/8 inch steerers. We also have ninety degree road stems for 1 inch steerers in sizes from 8cm to 15cm. And just in case you're a bit nervous about lopping that steerer down or simply need a tad more rise, we stock an assortment of aluminum spacers to make your life easier.

SALSA SPRINT STEMS

Although the need still exists, not many stems are made anymore which provide the positioning, strength, and rigidity needed by today's top track sprinters. SALSA Sprint Stems are made to fill that need. Stock sizes are 9cm to 15cm (1cm increments) in the traditional deep drop style. Clamp size is 25.4mm for steel track bars. We also stock NITTO's heat treated Cro-moly sprint bars in assorted widths.

SALSA CUSTOM STEMS

Many positioning requirements cannot be met by stock stems that are readily available, which is why we continue to offer stems that are custom-made to your specifications. There is little doubt that SALSA CYCLES makes more custom stems than any other stem maker in the world. No matter what type of cycling you do, if we don't stock the stem you need, we can probably make it.

CUSTOM STEM ORDERING PROCEDURE

To order a custom stem, supply us with reach, minimum or maximum rise (allow approximately 2.5cm of adjustment), rider's weight, handlebar diameter and steerer diameter. If you are using a Cunningham fitfinder, tell us so that we can let you know what information we need from it. We schedule our custom stem batches for the second Monday of each month. Rush orders are available for an extra $25 charge.

FRAMES

SALSA ALA CARTE

There's a lot of history behind these bikes. The kind of history that only uncountable miles (and smiles) can provide. Though certainly not in the weight wars with some of today's modern wonders, these durable (there's that concept again) frames are guaranteed to provide a pretty righteous smiles per dollar ratio. All **SALSA** frames are entirely handmade in Petaluma, California, using carefully selected custom tubesets from Columbus.

For 1994 there are six fork choices. They are the Ritchey Logic, The Bontrager Race, or at an extra cost the Bontrager Comp, Rock Shox Quadra 10, Mag 21 or the new Mag 21 SL Ti.

The *ALA CARTE* frame comes with the Flip-lock quick release seat collar, fittings for cantilever brakes, two water bottles, fenders, and your choice of toptube or standard cable routings. Call for information on the latest color choices.

ALACARTE SPECIFICATIONS

SALSA LA RAZA

We think it's great that the road market is on the rise again. More and more folks who discovered cycling via the mountain bike are checking out the joys of the road. In 1994 we will have available a very limited supply of finely made SALSA *LA RAZA* road frames. They will be available in seven sizes from 39cm to 57cm.

Thanks to the mountain bike, it is now possible to sell a well thought out tig-welded road frame that does not follow traditional design rules. We've down-sized the seat tube by 5cm (2 inches). These days high quality long seatposts and stems in a variety of angles are readily available (thanks again to fat tires). This along with careful design allows for frames that can fit a wider range of body size and type. We've put together tubesets for the *LA RAZA* that draw from no less than five of the finest road sets that COLUMBUS has to offer. The geometry, design, and tube selection ensure a stable, smooth and flawlessly handling bike.

The SALSA *LA RAZA* frame comes with the popular SR PRISM aluminum fork. These are special bikes and will be made in very small quantities, so get 'em while they're HOT!!

LA RAZA SPECIFICATIONS

COOL PARTS

SALSA *MANGOS DE AMOR* : These luscious bar-ends have a compound bend to comfortably offer multiple positions. We offer both tig-welded cro-moly and bonded aluminum. The aluminum version weighs just 175 gms. They come packaged in a simple (but very cool) silkscreened, drawstring bag that begs to be put to use after you've removed your Mangos.

SALSA *FLIP-OFFS:* We are really happy with the success we've had with these. Many shops and riders tell us that these are the BEST ! Well, I know it sounds like bragging, but we think so too. The wheel Q.R.'s are available with heat-treated 17/4 stainless or 6/4 Ti rods. The seat Q.R. is only available in stainless. Our suspension set includes a stainless front and a Ti rear, for riders who want as much weight savings as possible, but they don't want to sacrifice front end rigidity. *FLIP-OFFS* are now available in a plethora of colors. The weights are as follows:

Stainless - 100gms
Titanium - 85gms
Suspension- 93gms
Seat Q.R. - 43gms

**** PLEASE NOTE :*** *FLIP-OFFS* come in such a length that one size fits all. For safety's sake please trim the excess rod off once you've sized them for your bike. (This makes these puppies even lighter!!)

***FLIP-LOCK* SEAT COLLAR:** This Q.R. seat collar works on frames that do not have brazed or welded on seat binders. The *FLIP-LOCK* incorporates the same cam-lever as our *FLIP-OFFS*. Without a doubt this is the most elegant Q.R. seat collar in the world. These are available for 1-1/8", 30mm, 1-1/4", 1-3/8" sizes.
